Dietz Easily Cleaned Short Globe

Large enough to slip the hand through without squeezing. No spot out of cleaning reach. Wide openings remove risk of cutting the hand on the edges.

The experience of 80 years of lamp and lantern making and standardized production enable the Dietz factories to furnish lanterns of known dependability and highest illuminating power possible in a kerosene lighting device.

When you sell a Dietz Lantern you are reaping a good profit on an article of assured quality that will give permanent satisfaction to your customer.

Are You Following Up The Building Boom?

All over Canada thousands of new homes are being built. Every one of these houses requires a sink—some houses require more than one. Thousands of other homes are being remodelled and renovated. A great many of these require sinks.

Are you following up the building boom? Are you getting a good share of the business? Have you realized what splendid possibilities there are in **SMP** White Enamelled Roll Rim Sinks?

Price is $9.90 Ex-Warehouse, Toronto. Compare this price with others. It weighs only 58 lbs., which is less than half the weight of other sinks. Figure out what you would save in freight in a year's time.

SMP White Enameled ROLL RIM SINKS

Each **SMP** Roll Rim Sink is packed complete ready for shipment including nickel-plated brass strainer, special adjustable brackets and couplings for iron and lead pipes. Size 18 inches by 30 inches with a back 16 inches high. Made of 16-gauge Armco Rust Resisting Iron over which are fused three coats of a very special enamel. Place your order at once. **SMP** White Enameled Roll Rim Sinks are in great demand.

"Yes, Madam, this Gold Seal proves it is a genuine Gold-Seal Congoleum Art-Rug"

What the Congoleum Gold Seal Stands For

To-day the women of Canada know the things the Congoleum Gold Seal stands for—they've read Congoleum advertising in the leading magazines, newspapers and farm papers.

They know that the Gold Seal signifies:

1. That the floor-covering is genuine Gold-Seal Congoleum—the nationally known and advertised brand.
2. That this rug will give her full value in wear, lighten her housework and add to the charm of her home.
3. That her money will be refunded if the rug is unsatisfactory.

That's why it's easy to sell them floor-covering that carries the Congoleum Gold Seal—that's why it pays to show them this Gold Seal.

Are you making the most of your opportunities? Are you getting big, easy profits offered by Gold-Seal Congoleum's popularity and reputation? There's no trick to it. Simply let women who pass your store know your store is headquarters for Gold-Seal Congoleum—feature it in your local advertising. You'll be surprised at the number of passers-by who become customers.

We will gladly help you. Let us send you some of our circulars, selling helps, handsome window-cards and hangers printed in colors, and convincing advertisements you can run in your local newspaper.

Gold-Seal Congoleum gives a merchant a name for dealing in guaranteed and nationally known merchandise. And this is an asset for every merchant. Feature the Gold Seal and reap the advantages it is bound to bring.

You are selling the KNACK of Shaving

Says the Wise Old Owl

It's easy to say "Go and get it—
The buyers are waiting right now."
This preachin' is easy, you bet it—
Sounds simple to get 'em, but HOW?
Sell only the goods a man's needin'
The things he's glad always to own.
Just sellin' the goods ain't succeedin'
Sellin's more than just sellin' alone.
When you've got somethin' good keep on tellin'
The public it's good and say WHY.
The "why" is the secret of sellin'
The "why" is what makes people buy.

"The Why"

Please excuse us if this ad. is a little like a correspondence course on selling. It's not meant that way.

And there's money in it for you and for us.

We want to tell you **why** the New Improved Gillette is the best razor that you can sell.

We have taken the knack out of shaving and put it into the razor—reduced it to figures and metals, made it an actual mechanical feature of the New Improved Gillette and patented it at Ottawa.

No man can shave wrongly with the new razor. He has the knack when he has the razor.

It's all in the angle of the cutting edge—the angle that shavers have sought after since the beginning.

They cannot miss it in The New Improved Gillette. It is incorporated in this razor.

A little thing—but everything—the patented feature that makes your customer's first shave and every shave a perfect shave—saves wear on the blades and lengthens their service.

TRADE **RUNWELL** MARK

SEMI-ROTARY WING PUMPS

Are BRITISH MANUFACTURE Throughout.

The "Runwell" Semi-Rotary Wing Pumps are **British Manufacture,** and by reason of their general adaptability for a variety of circumstances, where a reliable and efficient pump is necessary, are becoming increasingly popular. The pumps are liberally designed to withstand rough usage and to give the full capacity specified. They are subjected to a rigid examination and are also tested under working conditions.

The "Runwell" Semi-Rotary is easy to manipulate and is designed to raise more water than any other type of hand-operated pump. All pumps have counter flanges fitted to branches, tapped Briggs standard thread.

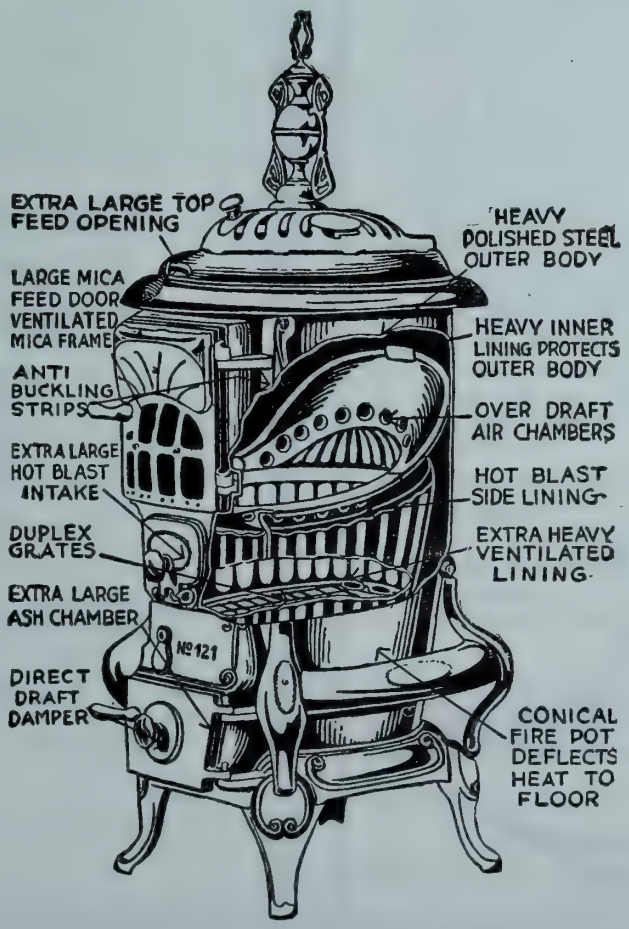
Practical Heaters for Soft Coal

There's positive proof that the coming season will present wonderful selling opportunities for

McClary's So-hot air-blast Heater



Very Hot Blast

This is a Heater that's different. A special air blast cast-iron ring encircles the top of the firepot. Through this ring a current of air passes in from the outside, becomes intensely hot and flows steadily over the coal. All the coal gases are ignited at the correct moment for giving the best service. The result is a clean heat of remarkable intensity radiating directly into the atmosphere. Other parts of this heater are built to give long lasting and satisfactory results.

Tortoise

Take advantage of the present unusual conditions by giving up your best display to the "So-Hot." Besides displaying it well, talk over fuel prospects with your customers and stress the importance of providing some safeguard against possible eventualities.

Other soft coal heaters in our line include McCLARY'S "Very Hot Blast" and "Tortoise," both sturdily built and possessing exceptional heating abilities.

We have advertising literature available to help stimulate your sales and will forward you a quantity on your request.

A Way to Sell More Starrett Ratchet Wrenches

You'll sell more Starrett Patent Ratchet Wrench sets if you play up its advantages to your garage and service station trade. Every auto-mechanic would like to own this tool but he's got to be shown that he's going to get his money's worth out of his investment.

We are showing him through the advertising in the magazines he reads—**you** can complete the sale by demonstrating the set itself to him.

You won't have to show him how useful the Starrett Ratchet Wrench will be to him—he can see its advantages at a glance. Show him the quality—the Starrett quality of every socket, handle and part of the 37 tools that make up this set. Show him the advantage of having a set that he can "treat rough" and yet be certain that it will be on the job for years to come. Show him that when he considers the actual service he will get from this tool—this Starrett Ratchet Wrench is the cheapest set he can get **at any price.**

Put a little extra effort on the auto-mechanic—he is your best customer for this tool.

Write for Catalog No. 22 M. A. and the Supplement describing the new Starrett Tools.

MILLERS FALLS

Bits and Augers

6 different Heads
26 distinctive Types
46 Stock Sizes

How's this for a complete line?

Auger Bits
Electricians' Bits
Ship Auger Bits
Ship Auger Car Bits
Extension Lip Car Bits
Ship Augers
Ring Augers
Boring Machine Augers
Rafting Augers
Machine Bits
Nut Augers

MILLERS FALLS bits and augers are made in all lengths of twist, both single twist and solid center. They provide a complete line which meets all wood boring conditions.

Well proportioned lips and spurs, accurately formed heads, keen cutting edges, and deep, clean cut screws characterize these Millers Falls bits.

Push No. 531 (Ford) Auger Bits—they'll pull for you!

Some of the advantages of these popular bits:

1. Bore with less friction.
2. Wide throat and deep center prevent clogging
3. Bore equally well in all kinds of wood—wet or dry, green or seasoned, hard or soft
4. Cut out with little splintering
5. Easier to resharpen.
6. Bore faster than the regular double-lip bits.

Your stock is not complete without these finely fashioned Millers Falls tools. Put up in twelve different sets. Also single sizes. (Canvas roll or wood box.) Our catalogue describes in detail each set and each individual tool. Stock up now, if you have not already done so.

No. 531 (Ford) Auger Bit. Other numbers, left to right: 542, 812, 935, 931, 532.

What is Your Idea of Financial Independence ?

You save money; each year you draw from your business profits which you put away with some definite end in view. You are aiming at financial independence. It may mean a bigger and better business; it may mean an education for your children, a trip around the world or just assurance of prosperity for your family in the event of your death. But whatever your conception of financial independence you can only attain it by saving and by **conserving what you save.**

A Knowledge of Investing Will Save You Money

Every dollar you have placed by can be made to earn more dollars for you. Dollars that are invested in securities that do not provide the fullest in safety and income return are lazy dollars. It is essential that every man should keep informed on all investment matters if he is to make the most of his savings.

What Kind of Securities Have You in Your Strong Box?

Is every bond you hold paying interest regularly and are all your stocks paying dividends? Are you sure that your life insurance policies are best adapted to your needs? Are your investments the kind that will help you to attain your ambitions?

These are the questions you ask yourself from time to time. If you read The Financial Post each week you will find these questions answered.

SPECIAL OFFER If you have any investment or financial problem at the moment write it on a separate sheet of paper, enclose it with the coupon and the editor will give you the benefit of his advice.

The Financial Post Can Serve You

It will bring you each week news and views relating to stocks and bonds, insurance, estates, mortgages and real estate. It will give you a personalized investment service, for in addition to the 52 valuable numbers that will come to you each year you have the privilege of having your own particular problems answered by the editor at any time and as often as you wish. The Post is helping 9,000 other Canadian business men to invest efficiently. It can help you. Fill in the coupon to-day.

Sundry Cabinets

SUNDRY CABINET NO. 102

Many Little Sales Make Big Profits

With a Cameron Sundry Cabinet you can, with ease and dispatch, handle many lines of goods which though small are very profitable.

For keeping seeds, small auto accessories and other "hard to handle" stock a Sundry Cabinet is unsurpassable.

Write for our catalogue.

They are built in many sizes and shapes, and one can be found that will exactly fit that corner in your store which now is idle and unproductive.

Hobbs Hardware Official States Retailers' Charges Unfair and Untrue

Statement Made to Hardware and Metal by Mr. Whitwam, Vice-President and Managing Director of Hobbs' Hardware Co., at London

UNDER the heading "Hot Protest by Retailers Re Jobber," Hardware and Metal reported in the Sept. 9 issue, a meeting which took place in Toronto where charges were made by London retailers, against the Hobbs Hardware Co., Ltd., of London, who it was stated were doing an extensive retail business in their wholesale warehouse and were selling goods retail at wholesale prices. Interviewed by Hardware and Metal, Mr. Whitwam, vice-president and managing director of the Hobbs Hardware Company, has made a statement, in which he denies the charges and states that many of the statements made by the retailers were unfair and untrue. The statement made to Hardware and Metal by Mr. Whitwam follows:

LONDON, Ont., September 21.—Unqualified denial of the charge made before the executive committee of the Ontario Retail Hardware Association that the Hobbs Hardware Company is subjecting retail hardware merchants of London and district to unfair competition was made to Hardware and Metal to-day by C. A. Whitwam, vice-president and managing director of the Hobbs Hardware Co., Ltd.

"Many of the statements that were made were deliberately unfair and untrue," said Mr. Whitwam. "We absolutely do not cater to it. The retail hardware men and nobody else are to blame for the situation that exists to-day. As a result of failure to keep their word they have lost out and now they are squealing. They are poor losers, to put it mildly. We intend to go right along as we have been doing and they can do whatever they like about it. We do not knowingly sell at wholesale prices to anyone not entitled thereto and will not.

"All our lines of merchandise bear two marks, the wholesale price and a fair retail price. We do not want retail business at all and make no attempt to carry on any over-the-counter trade as we do not want to be bothered with it, but there are cases which in the ordinary course of events cannot be ignored, and which we or no other firm in the country would turn down. For instance if a large contractor with whom we are dealing sends one of his men down with an order, and the man while filling it wants a pair of scissors for his wife or a pocket knife for himself, we cannot say we will not sell him. If it were not for the fact that somebody would say we were bribing the man we would gladly give him the scissors or knife. As it is we let him have them and claim this is perfectly legitimate. Everyone who comes into our place of business asking for merchandise is very closely questioned and if he should be charged the retail prices he is charged them and what is more a sales tax in addition."

Asked regarding the statement that the firm advertises and goes after retail business in that way, Mr. Whitwam stated that nothing of this kind is done. Formerly he said on account of the fact that Col. Hobbs was an intimate friend of A. Talbot, proprietor of the Echo, a local weekly paper, advertisements of a general nature were run in that paper. The Echo people did considerable job work for the Hobbs Company, and it was felt that they should be given some advertising. Two years ago, however, Mr. Whitwam stated he took the matter up with Col. Hobbs, pointing out that the advertisement was bringing people into the warehouse and that as they were not retailers, they did not want this business. He received instructions to discontinue the advertising and this was done immediately. The only advertisements now in which the Hobbs Company's name appears are those in which some manufacturer wishes to advertise and wishes it mentioned that

Hardware and Metal's Comments Re Hobbs Controversy

WITH the article in this issue Hardware and Metal has published both sides of the argument in connection with the Hobbs Hardware controversy. The charges made by the retailers were published in full in the Sept. 13 issue, along with brief statements made by Mr. Whitwam of the London wholesale house and Mr. Bibson of Oneida Community, Ltd. In the accompanying article Mr. Whitwam states the case for the Hobbs Hardware Co. There is one phase of the matter which has not been referred to by either the retailers or the Hobbs Hardware Co., but which Hardware and Metal believes has a bearing on the present trouble in London. Hardware and Metal believes the trade should be given as complete details as possible, and hopes to present some additional information in the next issue.

the Hobbs Company is their distributor. This, said Mr. Whitwam, is perfectly legitimate.

"The whole trouble," said Mr. Whitwam, "is that the retail hardwaremen cannot or will not carry the stock to look after the requirements of the trade. We carry approximately a million dollars' worth of merchandise and we are in a position to look after the needs of a large contractor or any one else. Fifteen years ago the local hardware merchants took up with me the question of not selling to these people. The retailers themselves at that time were hardly buying anything from us and they promised that if we would not sell they would give us their business. I took them at their word and in one year they gave us business that did not amount to anything. I told them they had not done as they had agreed and that we were going to sell. They sent a deputation down and said that they knew they had not done as they had agreed but to give them another chance and they would give us their business. I said all right, and we let things run on for another year. They did no better and when the time was up I told them we were going to sell to contractors and similar accounts. They again wanted to promise us business but I told them frankly I did not believe them and that we were through, and we did as we said and have been supplying the requirements of our legitimate customers. Last spring T. H. Purdom, Jr., met me and said he was tired of dealing with those people over there, meaning another jobbing house, and following a talk with him, the retailers promised us $100,000 worth of business if we would not sell locally. Their best month was June, when they bought something over $3,000 worth from us. Including their purchases our business for the month was in the neighborhood of $38,000. I pointed out to them that we would far rather have the $35,000 worth of business that was independent of them entirely, and the profits from the lines that were handled, than their trade. They simply cannot handle the business that we are taking care of and are poor losers. As far as we are concerned we plan to go right along as we are going, and feel that we are justified. We are not selling promiscously to everybody who comes in as has been charged and we do not want to. That kind of small over-the-counter trade we do not want to be bothered with."

Regarding the statement that six thousand dollars' worth of plated ware had been shipped back to a manufacturer, Mr. Whitwam declared the story was made out of whole cloth. "The jewellers," he said, " by putting on their sacrifice sales had cut prices to the point where they were selling at dealers' costs and the Hobbs Company was blamed." There was no foundation whatever, he said, for blaming the Hobbs Co., and when one of the officials of the company in question, visited London and investigated, he found that a jeweller was planning a sale at prices which were undesirable and rather than have it go on, arranged with the jeweller to return his stock to the factory. The Hobbs Company, said Mr. Whitwam, had nothing whatever to do with this matter.

Secretary MacPherson's Letter to Hobbs Co.

FOLLOWING is the letter sent by Secretary W. F. Macpherson, of the Ontario Retail Hardware Association to the Hobbs Hardware Co., Ltd., London:

Prescott, Ont., Sept. 13, 1922.

Messrs. Hobbs Hardware Co., Ltd.,
London, Ont.
Dear Sirs:—

At a meeting of our Executive held in Toronto recently I was requested to forward the enclosed letter to the wholesale trade, relative to retailing by wholesale firms, complaints having been received by retail firms who have been directly affected.

I would state also that dealers in your city have protested strongly about conditions referring to the large amount of retail business done through your wholesale warehouse, and although they have had a couple of conferences with you, have not been able to secure any definite understanding, nor any suggestions which might tend to create an understanding which would lead to the removal of their grounds for complaint.

The deputation from the London Retail Association who waited on our Executive, were prepared to place a most liberal interpretation of the word "Wholesaler" and its scope. I might further say that while the practice of retailing from a wholesale warehouse is practised to the detriment of those dealers in the immediate vicinity, still, numbers of our Association not in any way affected, have shown themselves opposed to this practice.

We trust that this matter shall receive such consideration at your hands as will remove the cause for complaint and create a new spirit as between yourselves and the regular hardware dealers.

Yours very truly,
THE ONTARIO RETAIL
HARDWARE ASSOCIATION,
Secretary.

Hardwareman Expresses Viewpoint Regarding Application of Sales Tax

Western Hardware Merchant Suggests Collecting Sales Tax at Source of Supply—Manufacturers Would Have to Add This to Cost of Goods—Claims Collection Would be Simplified

FOLLOWING up the numerous articles which have recently appeared in various issues of Hardware and Metal, the following letter expresses the viewpoint of J. L. S. Hutchinson, of the Saskatoon Hardware Co., Saskatoon:

"Surely the manufacturers cannot object to the government collecting this tax direct from them in the first place, when it is simply added into the cost of their goods and they are protected against any goods that are imported into Canada, as all goods imported have to pay the same tax, in fact the tax on imported goods is much higher. What the government should do is to collect all the money that is necessary to meet their obligations, first as quickly as possible and at the lowest possible cost. We believe that any government would be willing to admit these facts and if this is so, why not, as above stated, go to the source of supply and collect this money each month, which can be done without any extra machinery, without all these branch offices all over the country, without all this delay and cumbersome machinery? For instance as an illustration there are approximately about half a dozen nail manufacturers in Canada. If the government collected their tax from these, they would only have the tax to collect from six sources, and the tax would be collected each month, as soon as the goods were shipped out by them, but under the present system of operating this tax, or under the system as outlined in your article, a small percentage of the tax is collected when the manufacturer ships these goods to the jobber and then probably six months or even a year later another portion is collected through the jobbers after they have disposed of these nails to the retailer, and in all probability there are one hundred and fifty or more jobbers who are handling nails, so that the government immediately has to collect from one hundred and fifty different sources the balance of this tax in addition to waiting a year for it and being out of the use of this money."

The Smith-Stewart Co., London Loan Building, London, Ont., have been appointed Ontario representatives for the Riverbank Manufacturing Co., of New Glasgow, N. S.

Farmers Buy Electrical Appliances

Discussions With Electrical Exhibitors at Canadian National Exhibition Show That Farmers Are Taking Keener Interest in Electrical Goods—Are Prospects for Whole Range of Electric Appliances—Coal Shortage Sells Electric Heaters

SOME indication of the manner in which hardwaremen are advertising electrical goods is seen in this layout. G. J. Parker & Co., Alvington, Ont., illustrate electric washers and ranges, along with wash-day requirements. McAvity's, St. John, advertise electrical appliances to save time and labor, stating "Conduct your home with the utmost efficiency, comfort and convenience, and the best means to that end are modern electrical appliances. Saving of time is assured as well as saving of the usual labor that accompanies household work. Every model home should include all the high quality appliances we sell, such as vacuum cleaners, electric irons, toasters, grills, percolators, etc."

Orillia Hardware Co., Orillia, Ont., advertise electric irons for ironing during the continuation of the warm weather. J. B. Kernaghan Hardware, Prince Albert, Sask., advertises an electric washing machine. Main Hardware Store, Burlington, has some facts to relate concerning a vacuum cleaner. Scriven's Hardware, Thedford, Ont., runs an ad. entitled, "Does your washing look like a mountain? Does it loom up every week and scare you? Do you dread the coming of Monday, with its drudgery, work and worry? Solve your problem with an electric washer. Our electric irons make ironing a pleasure." Northern Hardware Co., Edmonton, advertise electric irons for fall use as do also Bernhardt Hardware, Preston, Ont.

Discussing electrical trade possibilities with a number of manufacturers exhibiting at the Canadian National Exhibition this year, a number of interesting points were brought out as a result of experiences with those attending the Fair. It is quite evident that the use of electricity is increasing rapidly. On Farmers' Day this fact was quite evident.

"The farmers are showing an unusually keen interest," said one electrical exhibitor. "I have been astonished at the number of prospects in rural districts which we have obtained this year. Many show interest only in the novelty of the appliances and say 'It would be very nice if we had electricity.' But there are increasing numbers who either have now or expect to have electric service soon installed."

This same condition was reported by exhibitors of vacuum cleaners, washing machine and wringers and the smaller appliances. Particularly those appliances designed to lighten the burden of farm work were being examined. It has been found that the gradual improvement of conditions on the farm has brought the farmer and his wife to the stage where they realize what modern facilities really mean in making their work more efficient. Farmers themselves who have experienced the use of electricity on their farm, also tell of the use of toasters, percolators and curling tongs in their homes, indicating that there is no limit to the electrical appliances which may be sold to this class of buyer.

The threatened coal scarcity brought increased interest on the part of visitors to the Fair in heating appliances. One manufacturer stated that he was behind nearly 18,000 electric heaters, and orders for over 500 such heaters had been taken while the Fair was in progress.

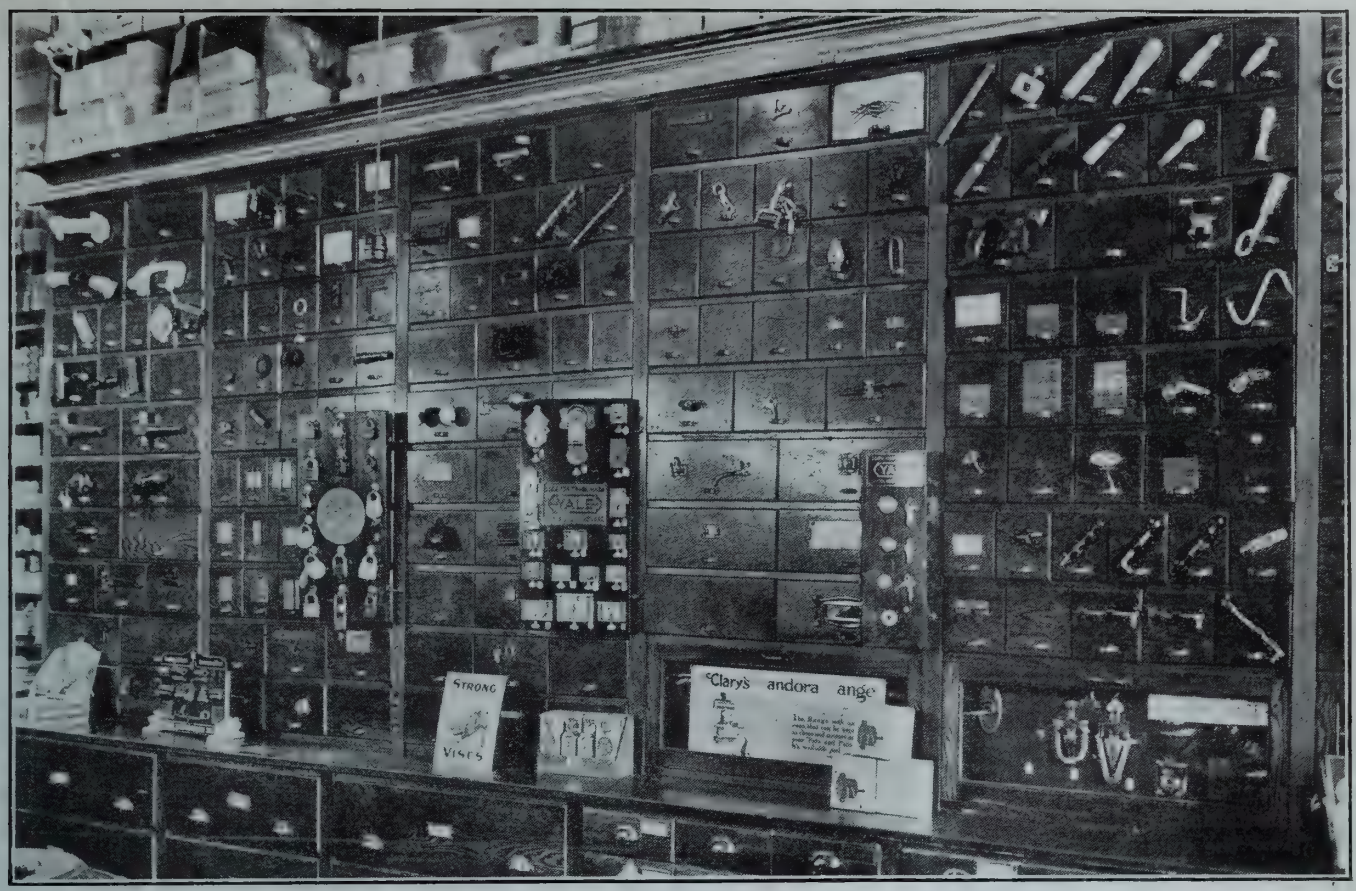
Do Customers Know What You Sell?

Howie's Hardware, Brantford, Ont., Found That Customers, After Buying Household Needs, Would Go Elsewhere to Buy Step Ladders Not Knowing That This Firm Sold Them—Window Display Sold Eight Ladders in Couple of Days—Singling Out Lines for Special Treatment

AN incident recently happened in Howie's Hardware at Brantford, Ont., which suggested to Mr. Howie a line of merchandising which could be developed. He had been in the habit of arranging window displays of seasonable lines, occasionally featuring odd articles which he thought might be suitable. In a display of hardware for fall housecleaning, such as boilers, washing machines, irons, etc., he decided to include a number of ladders. Eight of these step ladders were sold in a couple of days to people engaged in renovating their homes before the coming of the cold weather, and this provided Mr. Howie with an idea. He began to investigate the ladder business in town and found that considerable of such business was going to furniture and other such stores. He realized immediately that many customers probably figured that he did not sell these and though they would purchase many other requirements for cleaning, some of them undoubtedly passed out of his store to go and buy ladders elsewhere when he could have supplied their needs. Since that time ladders have been prominent in all displays of housecleaning equipment and many sales have been made.

The idea which this gave to Mr. Howie was that there were probably other lines in his stock which people did not directly associate with the hardware business though they are distinctly hardware lines. In some communities other retail stores carrying such lines have probably advertised them more aggressively and secured the business. This convinced Mr. Howie of the necessity of singling out such lines and giving them special attention in the displays.

Won't Restrict Stock



There has recently been some discussion as to whether or not the hardwareman would be better advised to restrict his stock to lines of hardware which are not being sold by other stores and not attempt to get in on a share of business in lines which other merchants are handling as well. The argument is along the line that the hardwareman's advertising may help the other merchant's business in that line because it advertises the article itself as much as it does his particular store.

Mr. Howie does not believe this to be good merchandising. He is of the opinion that such lines are in most cases primarily hardware and that other stores selling them have less right to them than have the hardwaremen. He believes in pushing the sale of such lines vigorously and showing customers that the hardware store is the place to buy such lines as might be put in this class.

This firm enjoys a good trade with builders. A policy was followed of watching permits and following these up, but it soon became evident that much time was wasted in this because many buildings for which permits were taken out were not actually started for some time after. Mr. Howie has found that the best way to secure such business has been to send one of his salesmen around

Paint department of Howie's Hardware, Brantford, Ont., prominently located so as to stimulate interest in Fall paint trade. Mr. Howie is a firm believer in constantly driving home arguments for painting at all seasons of the year and has succeeded in very largely making this an all year business. The paint department with shelves kept well filled and where splendid light is available is shown herewith.

Howie's Hardware in Brantford, Ont., uses most modern store fixture equipment to interest prospects. Note the samples of various hardware on the front of the various drawers. This wall fixture is located right inside the store entrance and while customers are waiting to be dealt with they may examine closely these samples.

town on a bicycle, watching for signs of new construction and talking matters over with builders. Permits for alterations or repairs to property are more frequently gone on with immediately and these are sometimes used for prospects.

Uses "Save the Surface"

In connection with the active paint business which this firm does, Mr. Howie makes use of the "Save the Surface" campaign. He believes this to be the one sure foundation for future paint trade. He reports that there has been some complaint due to prices but this is chiefly where the prospect has suffered from unemployment.

Samples of various hardware lines stocked are affixed to drawers and cabinets around the walls of the store. No counters are placed in front to obstruct these but customers are given every opportunity to examine these samples closely while waiting to be dealt with. Demonstrations are arranged frequently, especially in connection with such lines as washing machines and other such household appliances where some instruction in use is required. When such special attention is given it is found these lines move actively. The window displays are used to best advantage at all times, and good sized space is used in the local newspapers three times a week. The advertisements and window displays concentrate on certain definite hardware lines.

PROGRESS IN BUILDING

Montreal.—Figures for the first eight months of the present year, issued at the City Hall, show that construction work in the city is still making good progress. An increase of over $3,000,000 is recorded over the same period last year. The greater part of this increase is attributable to the demand for more dwelling houses, which has followed a time of light building during and immediately after the war. In addition to dwelling houses, permits for five new school houses have been issued representing a cost of from $150,000 to $200,000 each. Several new churches were also built during this period.

According to official records from the building inspector's department, 3,786 permits were issued from January 1 to August 31, representing a value of $13,514,234, as compared with 3,240 permits for buildings valued at $10,430,176 for the corresponding period of 1921.

BRISK SALE FOR HEATERS IN KINGSTON

Kingston, Ont.—"It's an ill wind that blows no person good," says an old adage, and it applies to the current sale here of heaters. The cool weather and the scarcity of coal has resulted in a brisk demand for heaters and dealers report a good business. Oil and electric heaters are being put out in goodly numbers. The first of the coal supply is expected to arrive the latter part of this week, but citizens are not taking any chances and are installing heaters. In addition to the heaters many citizens are having oil burners installed. Citizens in general are endeavoring to get along with heaters for a couple of months until the real cold weather sets in. Wood is coming into the city in large quantities, but is selling as high as $16 per cord and is very expensive burning at this price.

PEAT AS A FUEL

Ottawa.—Peat, as a domestic fuel, is rapidly becoming a commercial fact. At least, that is the conviction of Hon. Charles Stewart, Minister of Mines, on his return from an inspection of the government plant at Alfred, Ontario.

Cost is the crucial point in the manufacture of peat fuel, Mr. Stewart pointed out. This is being solved by the substitution of labor-saving machinery.

Scientific tests have shown that 1.8 tons of peat are equal in heating value to a ton of anthracite. While not recommended for use in the furnace in the coldest weather, it is described as a good furnace fuel for use in the fall and spring months, and also for use in kitchen ranges and fire places.

When Numbers Are Misleading

EACH YEAR the management of the Canadian Exhibition strives to set up new records for attendance. The impression is given that the number of people who can be jammed through the turnstiles is the measure of the fair's success. Hon. Manning Doherty very effectively told the directors as their luncheon guest that the idea of over-filling the grounds and buildings was a poor one if the effect was to have entertainment seekers crowding out those who would benefit by the exhibits from an educational standpoint.

The mistake of being carried away by mere numbers, of over-looking quality in striving for quantity, is a common one. There are many business men who are otherwise sane and sound in the conduct of their business, who are imposed upon by big circulation statements when buying advertising. The manufacturer or wholesaler with a few thousand customers, makes a great mistake when he pays big prices for advertising space on the basis of a hundred thousand circulations.

Of Interest to Investors

OWING TO the extent to which retail hardwaremen invested in war loan bonds and the fact that such bonds are continually being handled in connection with the settlement of accounts, it is of interest to the trade, particularly those holding the five and a half per cent. war bonds maturing December 1 next, to note the offer being made now to renew this loan on favorable terms. The present offer is to exchange the maturing bonds for new bonds bearing the same rate of interest, running for either five or ten years as the bondholder may prefer. A further inducement to the investor is that he receives a bonus of one month's interest. Arrangements for the exchange of the bonds can be made at any branch of the chartered banks.

Credit "Granting"---Debtors' Self-Analysis

THE TERM, credit granting, is a misnomer. Its use shows how very little was known of this medium of exchange in the early days of its development. What the credit department really does is not to grant credit but accept credit. Its chief responsibility is to appraise the credit capacity of a customer and determine to what extent it is safe and wise to exchange commodities or loans for the credit of the applicant. If credit is a medium of exchange, which it is generally conceived to be, then the customer cannot have the commodities and credit both. He must exchange his credit for the commodities or loans.

This picture of the credit task will open wide vistas to the credit manager who must recognize that his task is the sizing up of the capacity of people and the value of the credit offered in exchange for the commodities.

Effects of Fuel Shortage

PRODUCTION of pig iron in Canada suffered a decline of 14.45 per cent. during August, as compared with the record of the previous month. The total output in the month under review was 27,123 gross tons, as compared with a production of 31,705 tons during July, thus involving a decrease of 4,582 tons. The August output, however, represents an increase of 16 per cent. over the record for May, which constituted the minimum monthly production of the present year.

A comparison with the statistics of last year indicates the quiet tone from which this industry has not totally emerged. The pig iron output in August, 1921, was 50,156 tons, comprising an excess of 23,033 or 45.9 per cent. over the record for the corresponding month of this year. Notwithstanding advancing prices and favorable marketing conditions, production slackened perceptibly therefore during August. The fuel shortage was the principal cause of the recession, bearing specially hard upon the industry in question.

Wage Advances In Steel Industry

FOLLOWING the wage advance announced by the United States Steel Corporation, similar action has been taken by many of the independent companies and the movement is expected to become general throughout the steel industry. While in some quarters the claim is presented that the independent companies as a rule pay slightly lower wages than the Steel Corporation, it has been noted that during the strong market that developed since the early part of the year, certain independent mills have been bidding for skilled men, thus tending to disorganize the staffs of larger mills.

Various motives are said to be behind the general wage advance. It probably may mean nothing more than an attempt by the steel producers to hold together existing staffs. Another view declares it to be nothing more than a policy of least resistance against current labor conditions on the one hand, and a desire to make the most of the return wave of prosperity on the other. While in other quarters, the voluntary increase in wage schedules is described as an attempt to circumvent trade unionism and the closed shop.

Get Much,—Give Little

MOST municipalities are displaying a wise degree of caution with regard to industries which present themselves for location and probable operation. It is not long ago that an industrial commissioner declared that he had many prospective industries on paper, but that the majority of these were probably looking for much and offered little in return. It was pointed out that there were certain smooth promoters in the field who, if brought to a showdown, had as their ultimate object, some favor that eventually worked back to the pockets of the ratepayers. It seems unfortunate, but it is generally the case that wherever prosperity flourishes, there will also be found the greatest number of speculative propositions. It is a decided problem sometimes to sift out the worthy, but nowadays it must indeed be a clever scheme that "gets by" such factors as the industrial commissioner, the Chamber of Commerce, the Board of Trade, and the city council, provided such bodies are composed of keen business men, who are actively looking after the best interests of their community.

For the Man Behind the Counter

Salesman is Reflection of His Firm

Impressions for Good or for Ill as He Makes His Rounds—Salesmen Who Really Do Represent—What is Expected of To-day's Salesmen

THE FOLLOWING story appearing in a recent issue of Printers' Ink, by F. G. Jones, really deals with the travelling salesman, but many of the important points brought out are equally applicable to retail salesmen:

About six months ago I was visiting with a rich friend of mine. We were in his private office discussing salesmanship. A secretary brought in the business card of a caller. The capitalist glanced at it, then passed the card to me. I read the name of a famous manufacturer of high-priced motor cars. Beneath it was engraved, "Represented by John P. Smith."

"I'll see him in a few minutes," my friend instructed the secretary. He turned to me. "First I want to tell you about him," he said.

"Smith called on me two or three months ago. He sent in a card like this. I was favorably impressed by the name of the company he represented; so I told my secretary I would see the gentleman. I expected the sort of caller the finely engraved card suggested. Without realizing it, I prepared to meet some one rather distinguished, in keeping with the high-grade motor car.

"The man who clumped into my office was uncouth. He looked like an automobile mechanic instead of a salesman. His clothes were neither pressed nor clean. His shoes had not been polished for a week. He wore a dusty derby on the back of his head; and sported a gaudy necktie that drew attention to his rumpled, soiled shirt. To complete the picture of boorishness, my caller had a mussy-looking cigar stub in the corner of his mouth. The moment he saw me he thrust out his hand.

" 'Good morning Mr. Sherwood!' he boomed out, as if we had been old pals. 'I represent the ——— Motor Company. I want to interest you in our new limousine. It's the classiest car on the market today.'

"I shook my head, but not his hand. My refusal was most blunt.

" 'You can't interest me in anything you represent. If you'll take off your hat and throw away that frazzled, stinking, cheap cigar I'll tell you why I'm not going to buy a ——— car.'

"It jarred the young fellow pretty hard, but he was game. He dropped his la flor de cabbage and apologetically took off his hat. I motioned to a chair and picked up his card. I started after him rough shod.

Handled Without Gloves

" 'You sent this in to me. It is the sort of card I would expect your company to have. It suggests that "classy" car you mentioned. I supposed the representative of the ——— Motor Company would be the sort of classy man your card led me to anticipate meeting. Instead you came into my office with your hat on, and chewing a rank cigar. You stuck out a hand with soiled finger nails. You did not show me the respect that would have been indicated by your wearing a clean shirt, polishing your shoes and getting your clothes brushed and pressed before you came to see me.

"The moment I caught sight of you I was prejudiced against the car you say you represent. Your appearance makes me think of rudeness, poor service and slovenly business methods. There must be something fundamentally wrong with a concern that would let you carry its card as the representative of a $5,000 automobile. You don't represent my idea of a high-grade car. I believe you misrepresent what you are trying to sell, but you have queered any chance there might have been that I would buy a ———automobile. I should feel no confidence in a car built by a manufactory that is so careless in selecting and training its representatives.'

"Smith didn't get sore. He swallowed his medicine. He apologized so sincerely for his bad manners that I talked with him in a more friendly fashion for ten or fifteen minutes. I told him some things he ought to do to live up to his card. He thanked me and said he would follow my advice. I asked him to come back in two or three months and let me know how my suggestions worked out. I am very much interested in knowing what he has done with himself."

My friend pushed a signal button on his desk. The secretary ushered in the caller. The salesman wore a freshly pressed suit of mixed goods. The pattern was modest. His tie was small, neat and inconspicuous. His dark brown shoes were polished. His linen was immaculate. In his left hand the salesman carried a soft gray fedora. He did not hold out his right hand to my friend. It hung easily at his side. I noticed that the fiingernails were trimmed evenly and showed no trace of dirt. The caller's walk was firm, but not noisy.

"I'm really representing the ——— Motor Company now, Mr. Sherwood," said the salesman. He smiled broadly as he paused beside the desk.

The capitalist stood up to shake hands cordially. He introduced me; then with eager interest he asked Smith how he was getting on.

"Just bully!" The answer was accompanied by a chuckle. "I'm third on the quota contest list this month. I owe my success largely to you, Mr. Sherwood. You made me realize what a misrepresentative of the ——— car I was. I called to thank you from the bottom of my heart."

Then at my friend's request the transformed salesman told us many details of the successful effects produced by his true representation of the high-grade automobile he was selling. Everywhere he went he made the impression of "class." Mr. Sherwood was so gratified by the accomplishments of his protege that he gave Smith two personal letters of introduction to two prominent financiers who were good prospects for new cars. I learned later that one bought a limousine and the other a roadster from the re-made representative.

Salesmen Who Really Represent

Since that experience in Mr. Sherwood's office I have studied every salesman with whom I have had any dealings. I have asked myself in each instance, "does he rightly represent his house?" I kept records of a hundred sales made or attempted to be made to me. When I tabulated the impressions I had received, I found that only eleven salesmen deserved to be called true representatives of their employers. All the others contradicted to some degree the house policies of the businesses they misrepresented in their dealings with me.

The man I graded as the best of the eleven presented the card of a firm that specializes in the manufacture of advertising novelties. The salesman had to carry a bulky sample case. But he was so proud of his line that he set down his bag beside my desk as if it were an ambassador's dispatch box. My caller instantly made the impression that he was a gentleman clear through. He was so faultlessly dressed that I have no recollection of his clothes except that they were perfectly suited to a gentleman. The salesman bowed courteously, and

Events in the Trade

NEW FIRMS

P. Irons is now in the hardware business at 336 Weston road, Toronto.

T. Barker, has commenced business in a quality hardware store at 1334 College street, Toronto.

H. Paulin, formerly with Sanderson, Pearcy & Co., is now in business with an attractive stock at 802 College street, Toronto.

W. R. Earle, has commenced business at 731 Weston road, corner Scott street, Toronto. He is carrying a good stock of general hardware.

BUSINESS CHANGES

The Stovel Hardware Co., at Edmonton, has been succeeded by W. H. Greer.

DAMAGE TO STORE

At Listowel, Ont., an auto ran amuck and smashed two large plate-glass windows in front of W. B. Screaton's hardware store, doing damage to the extent of approximately $175.

ROB HARDWARE STORE

Burglars forced an entrance to the hardware store conducted by F. Flintoff and Sons on King Street west, Oshawa, Ont., and stole a rifle, 42 boxes of ammunition, and $40 in cash.

OBITUARY

Charles Alphonzo Mott, general manager of the Shell Co. of Canada, died at the Montreal General Hospital on Sunday evening. Mr. Mott was a native of London, England, and had been in Canada for little more than a year. He was sent out from London in July, 1921, by the Shell interests to organize a Canadian subsidiary company. Head offices have been established at 3808 Notre Dame St., E., Montreal, with a number of branches throughout the Dominion. Despite his short stay in Canada, Mr. Mott had made a large number of friends, particularly in Montreal. He was 47 years of age, and is survived by his widow and one son.

PERSONAL

D. Brewer, vice-president of A. Macfarlane & Co., Montreal, left this week for a trip through the Western Provinces. He will cover the buying centres as far west as Vancouver and expects to be away from his Montreal office for a period of six or seven weeks.

PERSONAL

R. P. Doucet has been appointed general manager, of the Asbestos Corporation of Canada, Ltd., Montreal.

G. W. Eckhardt, newly appointed vice-president and sales manager of the Miller Lock Co., visited their Canadian representative, Chas. Adcock, on Wednesday and Thursday of this week.

Chas. Gillespie, of Gillespie Bros., hardware merchants, Orangeville, Ont., had his Cleveland car badly damaged in an auto smash. A Chevrolet car traveling in the opposite direction collided with Mr. Gillespie and a Ford which was driving close behind ran into the pair. The Cleveland car was practically wrecked and the Chevrolet did not fare much better. The Ford escaped with minor damages. The occupants of all three cars escaped uninjured.

TO MEET AT MONTREAL

The annual meeting and banquet of the Canadian Wholesale Hardware Association will be held at the Windsor Hotel, Montreal, on Wednesday, October 4.

KINGSTON HARDWAREMAN WEDS

Kingston, Ont.—The marriage took place in Toronto of a popular hardwareman of this city in the person of John Arthur Dalton, son of the late W. B. Dalton, of this city, and head of the Dalton wholesale hardware, to Miss Mary Elizabeth Carey, daughter of Mr. and Mrs. J. B. Tyrrell, Toronto. Rev. Canon Plumptre officiated, assisted by Rev. W. E. Kidd, of Kingston, the groom's padre overseas. Mr. Dalton is receiving the congratulations of a wide circle of friends throughout the trade.

NEW BRANCH OF C. M. A.

A new branch of the Canadian Manufacturers' Association was organized at St. Johns, Quebec, to serve St. Johns, Iberville, Chambly Canton and surrounding towns, this week. The following officers were elected: C. T. Trotter, of the Standard Clay Products Co., as Chairman; W. A. Davidson, Singer Manufacturing Co., vice-chairman; and Franklin Tait of the Canadian Potteries Ltd., honorary secretary.

The C. M. A. now have five branches in the Quebec Division, Montreal, Quebec, Sherbrooke, Three Rivers and St Johns.

TO ENLARGE PLANT

The Moffatt Company, Limited, are arranging to build a large addition to their plant at Weston, Ont. The plans call for an expenditure of between $50,000 and $60,000. The company report that they are at present three weeks behind in their orders, and cannot meet demands without increasing accommodation.

WESTERN FAIR BRINGS GOOD TRADE RESULTS

Numerous visitors to the annual Western Fair at London, Ont., stimulated trade to a noticeable degree in practically all lines.

Specially good results were also realized by many local hardware merchants from their exhibits of stoves, hardware, paints, varnishes, etc., at the fair grounds.

SECURE HEATING CONTRACTS

Kingston, Ont.—Boyle & Son, of Napanee, have been awarded the contract for heating and ventilating Deseronto school. They also secured contracts for installing plumbing in the high school at Tamworth, and making changes in heating Bath school, installing combination hot water and warm air.

NATIONAL CASH REGISTER ACQUIRE NEW PLANT

The National Cash Register Co., of Canada, Ltd., have purchased new headquarters at the corner of Bloor and Dufferin streets, Toronto. This is a four-story building of concrete fireproof construction, faced with brick.

"We have purchased sufficient property," said F. B. Patterson, president of the National Cash Register Co., "to permit of increasing the plant so as to provide for three times the present floor space."

When questioned regarding Canadian business conditions, Mr. Patterson said: "I believe Canada is entering a period of sound prosperity, as is evidenced by the very considerable investment involved in the purchase of the new plant.

"Prior to the war period our sales force in Canada for a number of years led all of the divisions in the United States.

"However, with the splendid crops and the return to Canada of prosperity on a sound basis, we expect a big increase in our business and know of no good reason why our Canadian organization should not soon again lead the entire selling force."

News of Western Canada

H. T. Diplock, eastern sales manager of the Steel Company of Canada, Montreal, is in Winnipeg on a business trip.

Victoria.—Incorporations this week include the name of Davidson, Wright and Alcock, plumbers' supplies, of Vancouver. The capitalization is $10,000.

J. F. McMullen, general manager of the Marshall Wells Company, Limited, Edmonton, Alberta, spent a few days in Winnipeg at the firm's head office.

E. M. Adams, general manager of Wood Vallance & Adams Ltd., Calgary, left this week on a business trip to Eastern Canadian points.

Edmonton, Alta.—The retail merchants of the city of Edmonton have decided to revert to the practice of keeping their stores open on Saturday afternoon.

Mr. Alcock, of Alcock, Downing & Wright Ltd., Vancouver, jobbers of plumbing and heating goods, was a Calgary visitor for a few days.

W. S. McLennan, general sales manager of the Brandram-Henderson, Limited, Montreal, is on a trip to Vancouver with the members of the Montreal Board of Trade.

Roy Chown, for some years on the travelling staff of Wood Vallance & Adams Ltd., has resigned and is now the Alberta representative of the Gurney Foundry Co.

James Shaw, has been appointed Winnipeg manager, for the Consolidated Plate Glass Co., of Canada, Ltd. Mr. Shaw has been engaged exclusively in the glass business in Winnipeg for the past seventeen years.

G. M. Johnston, sales manager of the wire products department of the Dominion Iron and Steel Company, Montreal, spent a few days in Winnipeg with their western representatives, Messrs. Bissett & Webb, before leaving for a trip to the coast.

Among the Edmonton visitors to Calgary this week were T. A. Graham, manager of Western Supplies Ltd.; Lorne Muir, manager of the hardware section of Revillon Wholesale Ltd.; and J. F. McMullen, general manager of Marshall Wells Alberta Co. Ltd.

Vancouver—Shaw and McGill have opened a sporting goods store in the new block at the corner of Robson and Granville streets here. McGill has just come from Winnipeg where he won the Western Canada Tennis Championship this summer.

Vancouver.—H. H. McDougall, managing director of the Morrison Steel and Wire Co., was host this week to the B. C. Wholesale Hardware Dealers' Association on the occasion of the monthly meeting of the latter body. Twenty jobbers and distributors accepted the hospitality of Mr. McDougall of the Jericho Golf and Country Club.

Harry Moulden, of Winnipeg, representing Dowswell, Lees & Co., of Hamilton, was on the Coast this week making the rounds of the trade.

T. J. Wilcox, of the Wilcox hardware store, Kamloops, was in Vancouver attending the Provincial Fair at Westminster. While in Vancouver he attended a conference of trade sections of the Retail Merchants' Association on sales tax matters. Mr. Wilcox is secretary of R. M. A. branch in Kamloops.

VICTORIA RETAIL MERCHANTS DISCUSS LICENSE FEE

Victoria, B. C.—The proposal of the City Council to levy a trade license fee based on the rental value of business property was discussed at a meeting of the retail merchants' group of the Chamber of Commerce under the chairmanship of J. D. O'Connell.

MAY PROTECT FARMERS IN FINANCIAL DISTRESS

Winnipeg.—That farmers who are hard pressed financially should be allowed more time to market their produce, was emphasized by Premier John Bracken at a conference attended by representatives of the Retail Merchants' Association, the Canadian Creditmen's Trust Association, the Bankers' Association and the Mortgage and Loan Association.

The conference was called by the premier in an effort to protect farmers in financial distress from being forced by creditors to throw their grain upon the market while prices are deflated. It was stated that the attitude of the government does not mean that undue leniency will be shown.

It was learned that the government will adopt the same policy with regard to the branches of the provincial treasury which assist in financing farmers.

Bicycle Makers In U. S. Slash Prices

THE ANNOUNCEMENT that the Bicycle Manufacturers' Association decided at their convention in Atlantic City to institute a big slash in the retail prices on bicycles, is not generally expected to affect quotations to the Canadian trade, according to B. B. Halladay, sales manager, Canada Cycle & Motor Works, Toronto.

The situation in the United States market, as explained by Mr. Halladay, contains a different aspect from conditions prevailing in domestic fields. Certain manufacturers in the United States have been shading prices during the 1922 season in order to get a larger share of the business offering. Thus the current announcement by southern bicycle makers brings quotations in some cases below costs, but on a basis of competition with other makes, where the situation outlined above has been apparent.

That these conditions will be confined to the United States market alone, is the opinion of Mr. Halladay, who stated that Canadian manufacturers had already announced prices for 1923 spring booking, which showed practically no variation in retail quotations from last season on their standard makes, but however, generally put reductions into effect on special and juvenile lines.

"There is at present, no intention on our part to further reduce prices," stated Mr. Halladay, "as we believe both our wholesale and retail merchants should receive a fair margin of profit. Bicycle makers in the United States generally aim for volume, while Canadian manufacturers prefer to sacrifice quantity and retain quality. The large number of Canadian-made bicycles exported testifies to the success of our efforts in this direction."

Retailers Dispute Tax on Goods Made For Retail Sale

VANCOUVER, B. C.—Another stage in the fight that has been going on for the past two years between the retail merchants of this city and the Federal government over the sales tax developed last week in Vancouver when, following a conference with Col. Arthur E. Myatt, a former excise officer, it was decided by the Retail Merchants' Association to recommend to its members to decline to pay the two years' accumulation of sales tax arrears.

Thirteen classes of small retailers, including florists, confectioners, bakers, saddlers, etc., are affected in the dispute over the sales tax. It is contended that the goods they make in their own places of business, for sale by retail themselves, should not be assessed.

Several test cases have already been fought out in court in three of which judgment has been given in favor of the retailer.

Recently one retailer received a tax notice for $1,400 of accumulated sales tax arrears, and he claims that if he has to pay it he will go bankrupt.

Following the action on behalf of the confectioners, the government several weeks ago announced its intention of cancelling the tax as it applies to candies and chocolates manufactured and sold by themselves.

It is now argued by the Association that cancellation of the tax on the confectioners is an admission of its inapplicability, and that the other retailers are entitled to similar consideration. This is the recommendation which the Association is making its Dominion office at Ottawa. At the same time instruction has been given members affected to decline to pay the tax.

New Hardware Goods

Offered to Canadian Hardwaremen

"UNIVERSAL" BOX STRAPPING

The Cary Manufacturing Co., of Brooklyn, N. Y., are introducing to the Canadian market their line of Universal box strapping. This is made from soft annealed steel, in widths of one-half, five-eighths, three-quarters and one inch. The makers point out that no punching of holes through the strap before driving the nail is required. Universal box strapping is put up in reels of 300 feet each, and is packed twenty reels to a case. It is also supplied in lengths cut to size, 100 pairs in a bundle.

VISE JAW CLAMPS

A set of vise jaw clamps specially designed for use in bench vises or in vise jaws or clamps mounted on milling machines, surface grinders and similar tools, has been placed on the market. Each pair of the set has different sizes of holes, for either square or round stock, so that various sizes of finished stock can be held without marring the surface, when slotting, milling, grinding, threading or other operations are being performed. The two sections of jaw are forced apart when vise is released by action of two springs. Clamps are hardened and ground all over. These sets are designed to take stock from ⅛ to ½ in. in size. They are manufactured by the Milliken Machine Co., West Newton, Mass.

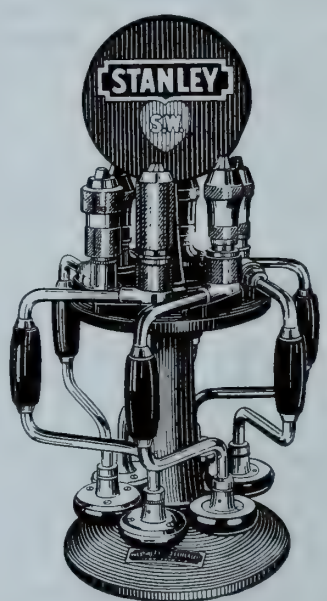
YULETIDE WINDOW TRIM

An attractive and useful Christmas window trim has been prepared by the Aluminum Goods Manufacturing Co., of Manitowoc, Wis. This arrangement is one that embodies the holiday appearance, as well as selling strength. The trim consists of a top banner 43 in. x 11 in. and two side panels 43 in. x 9 in.

The Christmas colors of red and green, in which the trim is printed, reflect the seasonal spirit. In addition, however, to further carry out this Yuletide atmosphere, illustrations of candlesticks have been introduced on both side panels.

The main banner shows an illustration of a fire-place mantel. This is reproduced in solid green and serves as a background. The phrases, "Christmas Gifts that Last," "Glistening, Durable, Guaranteed Aluminum," are worked into the side panels to create interest and put across sales.

IDEAL SOUP TUREEN



The Ideal Aluminum Products, Ltd., Toronto, have placed on the market a new design in soup tureens of the Ideal line of kitchen utensils. This is described by the makers as an attractive table decoration as well as a useful product.

A further addition to the Ideal make of aluminum utensils is a three-quart mug, equipped with strong handle. It is pointed out that this can be used for many purposes, being a useful and handy addition in kitchen accessories.

BIT BRACE STAND

A new bit brace display stand is now being issued by the Stanley Works, New Britain, Conn. This new stand is packed in a wooden case, measuring 17 x 12¼ x 11¼, weighing 45 pounds. The

display stand itself is made of wood, and attractively decorated. Its over-all height is 22 inches. The braces are placed in special cups, and it is pointed out that they may be removed without upsetting the stand. The Stanley Display Stand is made in an assortment of six different prices.

SPRING DEPTH GAUGE

The L. S. Starrett Co., Athol, Mass., announces a new spring depth gauge, No. 48, for quick measurement work.

This gauge is said to be particularly useful for measuring the depth of small holes and similar work. The contact end of the rod is ground square instead of convex, making the gauge easier to manipulate when measuring from a plane surface to a very narrow shoulder.

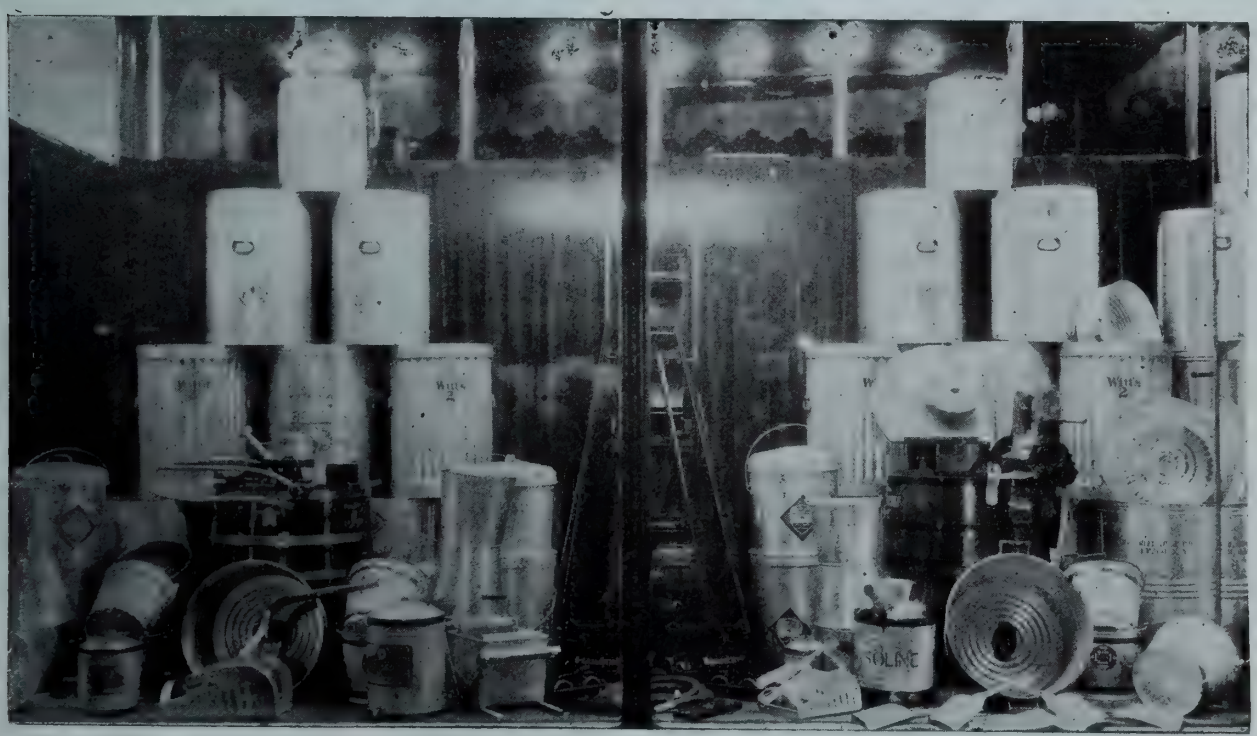
The capacity of the gauge is 3 inches. Its base is 2½ inches long and 4/10 inch thick. The rod is ⅛ inch diameter. Noteworthy features are the extra long base and the fact that the base and contact point are hardened and ground instead of being lapped.

BRESSANT HAIR CLIPPERS

The new No. 000 and No. 00 sizes of the Bressant hair clippers made by the Brown & Sharpe Mfg., Co., Providence, R. I., are described as close cutting clippers with wide plates of the "Bressant" construction.

These clippers have a natural grip of the handles, while other features pointed out by the makers are, the design approved by years of use, indestructible springs and long life. They provide a desirable clipper for homet use.

The No. 000 cuts nearly as close as shaving and the No. 00 cuts hair about 1/65 in. long. Attractive circulars, in color, furnished for distribution upon request to the Brown & Sharpe Mfg. Co., Providence, R. I.



THE ANDREE WRENCH

A new plumbers' tool called the Andree wrench is being made by the Andree Basin Wrench Co., Oak Park, Ill. Although designed specially for plumbers' use, this handy tool is said to be applicable for numerous other uses and is a suitable wrench for mechanics, auto owners, or for any other purpose where a special wrench is required, the construction of which is such as to adapt it for work at close quarters. It is made of drop-forged steel with hardened grip teeth. It is eight inches in length and weighs 14 ounces. The jaw is also reversible for right or left turning. The makers point out that this wrench grips automatically, and no adjustment is necessary. As more pressure is applied, the firmer is the grip. A smaller jaw is also supplied to fit this wrench, thus adapting it for small purposes.

Suggestions for Seasonable Window Displays

The duck shooting season has now commenced and at this time of the year displays similar to the one depicted above attract specific attention. The subject offers a wide realm for many effective and realistic window displays. In the above the use of a mirror on the floor of the window, on which decoys have been placed, lends a natural touch to the setting. Guns, ammunition and hunters apparent are each shown effectively.

Furnace time will soon be here again, and many utensils as are shown in the above display will be in general demand. Ash cans, coal scuttles, pails, ash sifters, and other galvanized ware such as wash tubs, etc., are seasonable products to feature. Placed together with other lines including carpet sweepers, brushes, and so on far Fall house cleaning, the combination gives a pleasing and suitable effect.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

NEW ACCESSORY CATALOG

Omer DeSerres, 204 St. Denis Street, Montreal, have just completed their new automobile accessory catalog and same is ready for distribution to the trade. This catalog is of three hundred pages and contains a very complete line of accessories. Copies will be forwarded to dealers upon request.

USEFUL FENCE CATALOG

The Banwell-Hoxie Wire Fence Co., Ltd., Hamilton, manufacturers of Peerless fence, have gotten out a new catalog. Besides showing several new lines of fencing this catalog gives the farmer much valuable information about erecting fence. One section is devoted to showing how to put up posts, stretch the fence, splice and the most efficient tools to use for each operation.

PILOT PIPELESS FURNACES

A new booklet, giving a full description of the Pilot Success and Superior Pipeless Furnaces, is being distributed by the Hall-Zryd Foundry Co., Ltd., Hespeler. This book has a number of attractive illustrations, depicting the various parts and features of the Pilot Pipeless Furnaces, as well as indicating their practical methods of operation. A copy of this booklet will be forwarded upon request to the manufacturers. They also have a branch office in Winnipeg.

DOMINION LINOLEUM RUGS

Among the catalogs recently distributed to the trade is a neat little booklet describing linoleum and floor oilcloth made by the Dominion Oilcloth & Linoleum Co., Montreal. The many features of these products are duly emphasized by the manufacturers, while a quantity of miniature illustrations showing a variety of linoleum rugs in actual shades and colors attracts special attention. Floor oilcloth rugs are also illustrated, together with full particulars regarding the numerous sizes in which the different patterns are available.

HEES DRAPERY HARDWARE

Catalog No. 30, which has recently been issued by George H. Hees, Son and Company, Bay Street, Toronto, is a handsomely illustrated catalog covering drapery hardware, flat extension rods, wood and brass poles and trimmings, chair seats, and other products such as window shades, and shade cloths. A large number of the lines catalogued are of direct interest to the hardware trade, especially pole brackets and sockets, curtain rods and other accessories. Sundries such as stair plates, upholsterers' supplies, pins, hooks, and numerous brass goods, complete an interesting and cleanly designed book, covering household hardware lines.

UBEL SEMI-ROTARY PUMPS

A new folder describing the Ubel British-made semi-rotary pumps is being distributed by the United Brassfounders & Engineers Ltd., of Cornbrook, Manchester, England. Various types are described including the Ubel semi-rotary wing pumps, double-acting pumps, quadruple acting pumps, and double-acting pumps with ball valves. A list of accessories for the Ubel semi-rotary and other pumps is also included. Several illustrations of these products, as well as parts for same, substantiate the other details given regarding sizes, prices and specifications.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

336. **Corrugated iron sheets.**—A Jamaican firm wish to act as agents for Canadian manufacturers of corrugated iron sheets.

4428. **Aluminum**—If the price is right, a Birmingham firm would be interested in aluminum.

63. **Iron and steel.**—An East London firm just starting in business is prepared to consider agency arrangements for shippers in Canada of iron and steel, all kinds.

64. **Hardware and tools.**—An East London firm request catalogues and prices from Canadian manufacturers of hardware and tools of all kinds.

65. **Lanterns.**—Large Jamaica firm of general importers wish to handle Canadian lanterns similar to the "Dietz" and "E. T. Wright" types.

335. **Cast iron and galvanized piping.**—A Jamaican firm wish to act as agents for cast iron and galvanized piping, from 2 to 6 inches in diameter.

337. **Wooden carriageware.**—A reliable Jamaican manufacturers' representative wishes to get in touch with Canadian manufacturers of wooden carriageware.

321. **Wire nails, screws and builders' hardware.**—A substantial Belgian firm are desirous of receiving catalogues and prices on wire nails, screws and builders' hardware.

4424. **Iron and steel products**—A firm in Birmingham would be glad to hear from Canadian exporters of bolts and nuts, wire and cut nails, wire and barbed wire, tacks, screws and rivets.

326. **Baby carriage fittings.**—An English firm manufacturing baby carriage fittings have asked to be placed in touch with Canadian manufacturers of such vehicles and with makers of wire wheels for the same.

324. **Clothes clips and clothes pegs.**—A manufacturers' agent in London is desirous of securing the representation of a Canadian manufacturer of clothes clips and clothes pegs.

4426. **Iron and steel**—A Birmingham firm, importers of iron and steel rivets, cut nails and chains, state that they are always open to import small steel bars when prices are right.

325. **Hollow-ware, aluminum, etc.**—A London agent and merchant is seeking the representation of Canadian manufacturers in the following lines: Domestic hollow-ware, enamelled, aluminium and galvanized; also for household and kitchen articles of any description.

4427. **Minerals and metals**—A Welsh importer of the following invites samples and prices: Gold, silver, copper, iron, lead, zinc, nickel, cobalt, molybdenum, aluminum, babbitt metal, brass and bronze, coal, asbestos, mica, feldspar, magnesite, graphite and talc. Would prefer to sell these goods for a Canadian firm on a commission basis of 2 per cent.

322. **Hoops.**—A Jamaican firm are desirous of communicating with Canadian firms in a position to export hoops for crating orange and grapefruit boxes. These hoops should be about 52 inches long, and half an inch wide. They are usually made of pliable wood in the rough. Three hoops go to each box—one at each end and one in the middle; the boxes are put together in Jamaica. Quotations and samples of these hoops are required. Quotations should be c.i.f. Kingston, Jamaica, if possible. This firm believe that a very satisfactory hoop can be supplied from St. John and would like to have an early reply from Canadian firms who can ship this article.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

ONE MINUTE WASHER

The Jeffrey Hardware Co., Teeswater, Ont.—Where can we obtain repairs for the One Minute washer?

Answer:—The One Minute Manufacturing Co., Newton, Iowa, U.S.A.

INDIAN MOTOR CYCLE

The Cochrane Hardware Limited, Copper Cliff, Ont.—Can you inform us who are the distributors for the Indian motor cycle?

Answer:—Messrs. H. M. Kipp & Co., 447 Yonge St., Toronto, have the Ontario agency.

CARMOTE FLOOR VARNISH

Hamilton Advertisers' Agency Ltd., Hamilton, Ont.—Can you tell us who is the manufacturer of Carmote floor varnish?

Answer:—This is the product of the Carpenter-Morton Co., of Boston, Mass. Martin-Senour Co., of Montreal, are the Canadian distributors.

TOY TELEPHONES

Messrs. Edwin Chown & Son, wholesalers, Kingston, Ont.—Can you tell us the names of manufacturers of toy telephones?

Answer—Messrs. Munro Bros., 374 Barton St., Hamilton, Ont., and The Gong Bell Mfg. Co., New Hampton, Conn., U.S.A.

"STAR" STOVE

Messrs. Dittmer & Robb, Burns Lake, B.C.—Kindly send us the address of the makers of the "Star" stove.

Answer—The Electric Oil & Gas Stove Works, 393 Pearl St., New York City. This firm was formerly known as Messrs. I. Block & Son.

SCHOOL DESKS

Lacroix Brothers & Company, Limited, Prince Albert, Sask. The name of the Canada Foundries & Forgings Ltd., James Smart Plant, of Brockville, Ont., was inadvertently omitted from the list previously sent you in reply to your recent inquiry as to manufacturers of school desks.

STOVE PIPE

Messrs. W. H. Willett, box No. 450, New Richmond West, Que.—Will you kindly give me the address of some stove pipe manufacturers in Canada?

Answer.—

A. Aubry & Fils, Limited, Montreal, Que.
Edwin Chown & Son, Kingston, Ontario.
The Collins Mfg. Company, Toronto, Ont.
The Thos. Davidson Mfg. Co., Limited, Montreal, Quebec.
J. & P. Davignon, Limited, Montreal, Quebec.
Emerson & Fisher Limited, St. John, N.B.
Hamilton Stove & Heater Company, Ltd., Hamilton, Ontario.
McClary Manufacturing Company, Limited, London, Ontario.
Sheet Metal Products Company of Canada, Limited, Toronto, Ontario.
The Smith Foundry Company, Limited, Fredericton, N.B.
Soren Brothers, Toronto, Ontario.
A. Welch & Son, Toronto, Ont.
E. T. Wright Company, Limited, Hamilton, Ontario.
The O-Rib-O Manufacturing Company, Limited, Winnipeg, Manitoba.

ANOTHER heavy budget of upward price revisions serves to add further emphasis to the general movement increasing current values. Hardware lines appearing with higher quotations this week include the following:—various lines of builders' hardware, galvanized and blue annealed sheets, bar iron, gate, straightway and globe valves, stove and sink bolts, certain styles of mechanics' tools, padlocks, linseed oil, turpentine, window glass, sash weights, stove pipe wire and Kiddie Kars.

LOWER prices are now in effect on the Jonathan Crookes line of pocket knives, Fox English grass hooks, the Eureka line of sprayers, screen door hinges and certain numbers in the A. J. Reach make of sporting goods. It will be noted that the majority of such reductions affect goods for spring delivery. On the other hand, manufacturers of roller skates have withdrawn prices and will not be in a position to quote for spring until December. Grindstone fixtures conclude the list of current price revisions.

A FIRM situation is evident in wrought piping, while rumors of additional higher levels on cast and malleable pipe fittings are observed. Wire and wire products remain in a strong position, while ingot metals are generally on a steady basis with the exception of tin. This metal has weakened somewhat but recovery is looked for. Spelter is in brisk demand, with a scarcity in offerings reported. Sluggish conditions still exist in scrap material markets. In spite of the trend toward increased quotations on galvanized products, the former price levels are still quoted on eavestrough and conductor pipe.

SEASONAL activity is being recorded in ash sifters, and weather strip is also in a popular movement. Current reports indicate a good interest in fall lines, such as shells, cartridges, shot guns, rifles, various lines of cutlery, builders' hardware, buck saws, axes, cross-cut saws, electric bulbs, lamps, lanterns and heaters.

THE danger of a secondary inflation movement contained in the current market developments is generally being discounted. A survey of existing conditions indicates that except for the temporary influence of the recent coal and rail strikes, the advancing level of commodities is merely an incident of improving times.

Montreal, Que.

MONTREAL, September 21.—Many price revisions again attract attention in the current hardware markets. The upward swing is also evident by the number of these changes which are in an upward direction. One of the outstanding increases is announced on builders' hardware generally, various manufcturers withdrawing former quotations and issuing new higher price lists covering an advance of approximately ten per cent. on the many lines. Certain mechanics' tools are also included in these announcements.

Stove and sink bolts have revised discounts, and higher prices are now quoted. Galvanized sheets show a further price increase in most quarters, and both solid and sectional sash weights have new higher prices. Stove pipe wire is advanced twenty-five cents per cwt., while grindstone fixtures also appear with revised quotations. A general increase of about ten per cent. is announced on Miller padlocks. The new season's prices are given on the A. J. Reach line of sporting goods, and while a few lines of baseball goods are a little higher in price, there are many revisions in a downward direction made, particularly on baseball bats. Jonathan Crookes' pocket knives also show a reduction of varying extent.

STOVE BOLTS NOW QUOTED AT LESS 65—5 PER CENT.

Montreal. —

An increase of approximately 10 per cent. is made in prices of stove bolts through revising discounts from 70 per cent. to 65—5 per cent. off list prices.

INCREASED QUOTATIONS ON STOVE PIPE WIRE

Montreal. —

An increase of 25 cents per 100 lbs. is recorded on stove pipe wire and 18 gauge is now quoted at $8.75, 19 gauge at $9.25 per 100 lbs.

NEW SEASON'S PRICES ON "REACH" SPORTING GOODS

Montreal. —

The A. J. Reach Co. of Canada have now issued their new season's prices on sporting goods, showing revised quotations on various lines. Following are present prices on a number of well known lines of baseball goods. Certain numbers of fielders' gloves, catchers' mitts and first basemen's mitts are slightly lower in price, while a few others show a slight price increase. Baseball bats have new lower prices on most lines.

BASEBALLS—
No. 0, 0, per doz. $18.00. No. 0J, $16.20. No. 4A, $8.00. No. 5, $6.00. No. 9X $4.00. No. 11B, $1.35.

NEW PRICES QUOTED ON GRINDSTONE FIXTURES

Montreal.

New prices are now being quoted on grindstone fixtures, and following are quotations on different sizes: 1 x 15″ axle, $7.80; 1 x 17″ axle, $8.10; 1x 19″ axle, $9.70 per dozen.

ADVANCED PRICES ON MILLER LOCKS

Montreal.

A revised price list is being issued by the Miller Lock Co., showing an increase of approximately 10 per cent. on their various lines of padlocks.

ONLY MODERATE DEMAND FOR ASBESTOS PRODUCTS

Montreal.

Manufacturers and distributors of asbestos products describe present trade as slackening to an extent from the movement in evidence during the midsummer months. Contract work in industrial circles was carried out quite extensively during July and August and construction work now under way is primarily of the dwelling house type which does not require the same amount of these products. Quotations are unchanged with the undertone of the market fairly steady. Prevailing prices are the following:

ASBESTOS PRODUCTS—

	Off list prices
2 ply pipe covering	67½%
3 ply pipe covering	65%
4 ply pipe covering	60%
85% magnesia	45%
Boiler covering	$1.50 per bag
Asbestos sheathing	7 50 per 100 lbs.

FIRM TREND CONTINUES IN WROUGHT PIPING

Montreal.

Current quotations on wrought piping remain at the recently revised list No. 56. Notwithstanding this increase in prices, manufacturers still describe the tone of the market as firm, with American markets also continuing to show a good amount of strength. Assisting the firmer attitude generally noted in the steel industry is the steady brisk demand for wrought pipe, sales having continued in good proportions practically all through the past summer season. With this tendency continuing a steady to firm market is anticipated throughout the fall months.

GOOD TRADE NOTED IN SOIL PIPE FITTINGS

Montreal.

Trade in soil pipe and fittings is again described by manufacturers and distributors as quite satisfactory. In production circles prevailing prices are said to be firm notwithstanding the recent price-advances made. Raw material costs are still on an upward trend with indications that higher prices still will be reached. Following are present price levels:

SOIL PIPE—	
2 and 3 inch	35%
4 inch	35%
5 and 6 inch	35%
8 inch	net
Fittings—	
2 and 6 inch	45%
8 inch	net

REVISED DISCOUNT QUOTED ON SINK BOLTS

Montreal.

Through a revision in the discount, advanced prices are quoted on sink bolts. These are now quoted less 65-5 per cent., former discount being 70 per cent.

SLIGHT INCREASE IN SASH WEIGHT PRICES

Montreal.

Sash weight prices are now slightly higher, solids being quoted at $2.60 per 100 lbs., sections at $3.50 per 100 lbs. Cast washers are also advanced to $4.00 per 100 lbs.

FURTHER ADVANCE IN GALVANIZED SHEETS

Montreal.

Further price increases on the various gauges of galvanized sheets are announced by most distributors. Owing to the fairly brisk seasonal demand and limited stocks, the undertone of this product has been gradually strengthened, and as pointed out last week, higher prices have been expected at any time. Quotations considerably less than revised levels are given in a few quarters, but there is very little available stocks reported at these reduced figures. As stated, local stocks are only of moderate proportions and it is evident that some firms are much more fortunate in this regard than others. Shipments continue to arrive, thus allowing dealers to take care of immediate requirements, but up to the present certainly little or no surplus has accumulated. Importers anticipate a speeding-up of deliveries from the English market before the close of navigation, and hope for ample supplies for later fall and winter trade. Following are average quotations:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 25	7 75
26 gauge	7 00	7 50
24 gauge	6 40	6 90
22 gauge	6 05	6 55
18—20 gauge	5 35	5 85
Other Brands—		
10¾ oz.	7 00	7 50
28 U. S. gauge	6 60	7 10
26 U. S. gauge	6 30	6 80
24 gauge	6 15	6 65
22 gauge	6 15	6 65
18—20 gauge	6 00	6 50
16 gauge	5 85	6 35

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

BUILDERS' HARDWARE ON HIGHER PRICE BASIS

Montreal.

As pointed out in a recent issue of Hardware and Metal, the upward swing in the steel industry would in all probability affect the various lines of builders' hardware. The stiffening tendency had already been reflected on many heavier basic iron and steel commodities, and higher prices seemed likely on smaller goods of steel manufacture. This has been substantiated by the announcement of various manufacturers that former prices are withdrawn, and an advance of about 10 per cent. is made in builders' and general hardware. Different lines of mechanics' tools are also included such as: hammers, hatchets, standard wrenches, bench screws, saw rods, plumb bobs, melting ladles, etc.

NO FURTHER CHANGE IN PIPE FITTING PRICES

Montreal.

No further change has been made in quotations on the various pipe fittings since the general revision two weeks ago. Current trade is reported as fairly active, especially in smaller sizes for general sorting of dealer stocks. Discounts at recent revision follow:

PIPE FITTINGS—	
Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, small	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%
Dart Unions, blk., ¼ to 2 in.	331-3%
Do., ⅛ in., 2½ in. and larger	23⅓
Do., galv., add to black	30%
Niples, black and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ; in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., runing thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—
Price list effective June 1st, 1922. Discount 70 per cent.

FORMER PRICES STILL QUOTED ON TROUGH

Montreal.

Prevailing prices on eavestrough, conductor pipe and sundry lines are again described as very firm, with the movement continuing fairly active for this season of the year. Although advanced quotations on these products have been expected at any time, no decision has yet been reached in the matter among manufacturers. In again discussing this tendency with a local manufacturer it was stated that they were desirous of placing nothing in the way of fall trade which was progressing quite satisfactorily, and higher prices might be withheld until present stocks were exhausted. The flat sheet markets however were remaining in a firm position, and a revision would undoubtedly be necessary when they were forced to enter the market.

REDUCTION IN JONATHAN CROOKES POCKET KNIVES

Montreal.

A reduction of varying extent is announced by Jonathan Crookes & Son, on their lines of pocket knives.

STILL FIRMER TONE IN BAR PRODUCTS

Montreal.

Although the undertone of bar products, and the domestic steel industry in general, is if anything on a firmer basis than formerly, no change has yet been announced in local prices. Certain dealers are still very firm in their ideas, stating that price levels are due for an advance at any time, and point to the further recent advance in pig iron quotations as a direct indication that some announcement will shortly be forth-coming. Trade continues of a spasmodic nature and while again slightly improved there is said to be still plenty of room for a further betterment. Unchanged price levels are as follows:

IRON AND STEEL—

Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

SEASONAL TRADE IN COMPRESSION GOODS

Montreal.

Current trade in the various lines of valves and bibbs continues fairly active, in keeping with the amount of building still under construction. There is a firm tendency still noted in the undertone of the market owing to higher prices on basic materials, especially copper which is again advancing on primary metal markets. Any change in prices, because of this strength, would in all probability be in the form of an adjustment, according to a local manufacturer. There were certain items on the list which were entirely out of line in comparison with other lines, some at the present time offering little or no profit while on others the increase would not necessarily be so extensive.

ALL ENAMELED WARE LINES ADVANCED 5%

As Hardware and Metal goes to press, information is received that prices on all enameled ware and tinware lines have been advanced approximately five per cent. Galvanized ware remains unchanged at the higher levels recently effective. The new net prices on tinware and enamel products are being worked out

Toronto, Ont.

TORONTO, September 21.—Another long list of price advances features the week's hardware markets. Higher quotations are now in effect on bar iron, gate and straightway valves, stove pipe wire, builders' hardware lines, stove and sink bolts, and padlocks. Many of these revisions were outlined in previous reports appearing in Hardware and Metal. The advance in bar iron prices was more or less expected in view of the general trend in the steel industry. Likewise the advance in brass compression goods was pointed out, and the change in builders' hardware is no surprise to the trade.

Manufacturers have withdrawn all prices on roller skates and will not quote prices for spring until December. More upward changes are rumored in cast and malleable pipe fittings, but no further discounts have appeared. Wrought piping is still in a strong position, and in some quarters it is thought there may develop higher price levels on bolts and nuts. A firm tone is also evident in wire products. Most ingot metals remain on a steady basis, spelter being very strong, but tin having weakened. The scrap material markets are in a sluggish condition.

PRICES ON BUILDERS' HARDWARE UP 10%

Toronto.

Manufacturers of builders' hardware have withdrawn former prices and an advance in quotations of approximately ten per cent. is now in effect. These new levels affect builders' and general hardware, and mechanics' tools, such products as hammers, shingling hatchets, wrenches, bench screws, saw rods, plumb bobs and melting ladles being revised.

SLIGHT REVISION IN GRINDSTONE FIXTURES

Toronto.

Revised quotations are now in effect on grindstone fixtures. These show a slight variation on the various sizes. Following are the new prices on the Taylor-Forbes make:

GRINDSTONE FIXTURES—

	Per doz.
For 15" Axle	7 80
For 17" Axle	8 10
For 19" Axle	9 70
Ball Bearing	13 50

PADLOCK PRICES NOW ON HIGHER LEVELS

Toronto.

All makes of padlocks have been advanced in price, the extent of this upward development being approximately ten per cent. This increase was outlined in a market report appearing in a recent issue of Hardware and Metal.

STOVE PIPE WIRE PRICES ALSO HIGHER

Toronto.

Prices on stove pipe wire have been advanced 25 cents per 100 lbs. The new quotation on No. 18 is $8.75 and on No. 19 the revised price is $9.25. This compares with the former levels of $8.50 and $9.00 respectively.

QUOTATIONS ON STOVE BOLTS NOW ADVANCED

Toronto.

Through a revision in the discount, quotations on stove bolts have been advanced. The new level is 65 and 5 per cent. off, compared with the former quotation of 70 per cent. off. Sink bolts are revised in a similar manner, these also appearing with the new price of 65 and 5 per cent. off list.

REVISED PRICES ON REACH SPORT GOODS

Toronto.

New price lists for next season are being distributed by the A. J. Reach Co., this make of sporting goods showing various revisions in prices. Certain numbers of baseball mitts are slightly advanced, while other lines appear with lower prices, especially baseball bats.

QUOTATIONS ON VALVES REGISTER ADVANCE

Toronto.

In accordance with the market report on brass compression goods contained in the last issue of Hardware & Metal, quotations on the Jenkins line of valves have been advanced approximately ten per cent. The quotations on J.M.T., gate, and straightway valves have also been revised in a similar manner. It is further expected that other makes and styles of compression work will appear with revised discounts in the near future, but no announcement of these pending changes has yet come to hand. Following are current discounts, including new levels, on the lines which have been advanced:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in.	**60%**
Do., 2½ in. to 3 in.	**43%**
Globe angle and check valves, standard	25%
J. M. T.	10/10
J. M. T. C.	16/10
J. M. T. Gate Valves	16/10
Jenkins gate or straightway	16/10
Jenkins Globe	10/10
Radiator valves, standard	58%
do., removable disc	58%
Emco check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco swing check, ⅜ in. and ½ in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%

BASIN COCKS:—

No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

OFFER CARPET SWEEPER FREE WITH ASSORTMENT

Toronto.

There has been no change in prices on carpet sweepers, but the Bissell Christmas fall offer, giving a free sweeper with a dozen assorted sweepers, is again offered to the trade.

MAY BE ADVANCE ON NUTS AND BOLTS

Toronto.

Advancing prices in bolts and nuts will be reflected in domestic quotations within the near future, according to current advices from primary sources, the advance affecting the general line and amounting to approximately 10 per cent. Jobbers' quotations have not been changed as yet.

WROUGHT PIPE STILL IN STRONG POSITION

Toronto.

In spite of the recent advance in prices on wrought piping, a very strong undertone still prevails in this market. A shortage of certain sizes has also developed in domestic circles, and deliveries are far from prompt. The mills record a heavy current demand for merchant pipe, with reports of some premiums being paid by southern consumers for material. It is stated that mills are from six to eight weeks behind on shipments, and available stocks are therefore considered insufficient in many quarters to meet requirements. List No. 56, now prevailing on domestic markets, is consequently very firm.

MORE CHANGES IN PIPE FITTINGS RUMORED

Toronto.

Following the recent upward development in quotations on cast and malleable iron pipe fittings through revised discounts, rumors of another similar pending advance are recorded. The market is undoubtedly remaining in a strong position, but whether further increases in price will be announced is considered problematic. A firm tone prevails, with the current demand for these products described as good. Seasonal activity is noted in many quarters, but doubt is expressed that the situation warrants additional higher levels. Following are prevailing discounts:

PIPE FITTINGS—	
Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, mail	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	34%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk. and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ⅛ in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., runing thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%
MALLEABLE FITTINGS—	
New piece list, adopted June 1, 1922.	
Discounts: Class A, less 60 per cent.	
Discounts: Class B, less 70 per cent.	
Discounts: Class C, less 70 per cent.	

NEW PRICE LIST ON MAXWELL LAWN MOWERS

Toronto.

Following is the revised price list on the Maxwell line of lawn mowers, with discount quoted at 45 per cent. All shipments prior to April 1, 1923, to date from that time.

VERY FIRM PRICE LEVELS ON SHEETS

Toronto.

Blue annealed sheets are now higher in price, this development being in accordance with recent increases which are in effect on galvanized and blue annealed sheets. Sheets of all kinds are now in better demand, with the price situation remaining very firm and uniform levels prevailing. Delivery is still hard to obtain and shipments are a number of weeks behind. The mills are reported working to capacity to meet the current demand. Following are representative quotations on the local sheet market:

BLUE ANNEALED SHEETS—	
10 gauge, base	4 50
12 gauge	4 55
14 gauge	4 60
16 gauge	4 65
BLACK SHEETS—	
18-20 gauge	5 30
22-24 gauge	5 35
26 gauge	5 40
28 gauge	5 50

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Hd.
28 gauge	7 75
26 gauge	7 50
24 gauge	6 90
22 gauge	6 55

FIRM TONE EVIDENT IN WIRE PRODUCTS

Toronto.

As yet there have been no further advances in prices on wire nails or wire, but certain quarters of the trade are expecting an advance to be put into effect. Makers are not anxious to sell ahead, owing to higher manufacturing costs. The jobbers are having trouble in getting deliveries from the mills, and their stocks are depleted in some cases.

BAR IRON BASE PRICE NOW REACHES $3.40

Toronto.

The advance in base prices on bar iron from $3.25 to $3.40 per cwt. has now developed. The new quotation is general on the local market, whereas formerly the higher price had merely appeared in certain quarters. Large buyers, however, can still purchase at $3.35 base. This increase is attributed to the higher levels announced at the mills where producers were faced with the problem of filling old and lower-priced orders under the greatly increased costs which now prevail. One authority expressed the opinion that mills were thus forced to strike an average by selling steel in future at higher prices.

The undertone of the market remains very strong, with a seasonal demand for bar products which is described by warehouses to be quite up to current expectations.

It has been felt for some weeks past that additional advances in bar iron base prices would result, as the primary basic elements were recording higher levels and wages at southern steel centres were also advanced. Following are new levels:

IRON AND STEEL—		
Mild steel bars, base	3 35	3 40
Mild steel bands, 3-16 in. base		3 90
Bar iron, base	3 35	3 40
Angle iron, base	3 45	3 50
Horse shoe iron		3 90
Tire steel		3 50
Spring Steel	7 00	8 00
Sleigh shoe steel		3 40
Cold drawn steel		4 50
Hoop steel	4 25	4 50
Norway iron		12 50
Toe calk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

SOIL PIPE AND FITTINGS IN SEASONAL TRADE

Toronto.

A good volume of trade in soil pipe and fittings is reported by manufacturers and distributors, the recent market developments adding further strength to these products. In spite of the lateness of the season, building operations are continuing in a surprising manner, and this reflects upon the current demand for soil pipe. Prices are unchanged at the discounts quoted during the past few weeks, with the continued upward trend of raw material costs, resulting in a firm undertone to the market. Current discounts follow:

SOIL PIPE—	
2 inch	Less 33 1-3 per cent.
3 inch	Less 33 1-3 per cent.
4-inch	Less 33 1-3 per cent.
5 and 6 inch	Less 33 1-3 per cent.
8 inch	net
FITTINGS—	
2 to 6 inch fittings	Less 45 per cent.
8 inch fittings	net

WITHDRAW ALL PRICES ON ROLLER SKATES

Toronto.

Manufacturers of roller skates have withdrawn all prices on these goods, and state that they will not be in a position to quote prices for spring delivery until December.

COPPER GOODS STILL ON STEADY BASIS

Toronto.

The market for brass and copper goods has shown no appreciable development as regards volume, but it is noted that the virgin metals retain a strong position and the undertone of sheets, rods and tubing is described as firm. These products maintain a steady basis with quotations unchanged at the recently revised levels. While current trade is stated to be moderate in some quarters, other distributors point out that the aggregate is entirely satisfactory for this time of the year, although individual orders are mainly in small quantities. Following are prevailing prices:

BRASS—	
Sheets base, per lb.	0 23
Tubing, base, per lb.	0 28
Rods, base, per lb.	0 20
COPPER—	
Rods, base, per lb.	0 28
Soft Sheets, plain, 16 oz. and heavier, per lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 32

SLUGGISH CONDITIONS IN SCRAP MATERIALS

Toronto.

Dull conditions, with only a slight ray of hope, continue to prevail in scrap materials. The copper scrap market has shown no improvement during the past week and practically all non-ferrous metals remain in the same position. There is no demand for copper and red brass and brass foundries are waiting the turn in events, which is expected hourly but which persistently refuses to arrive. Lead and zinc are fairly strong but no increase in price has taken place, and the white metal industry is almost as bad as the red metal trade.

It is almost impossible to buy pig iron at any figure. Cast iron is also extremely short and prices are up all the time. The following are averages of dealers' buying prices for large quantities:

SCRAP MATERIALS—		
Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	19 00	21 00
Stove plate	16 00	17 00
Grate bars	12 00	13 00
Standard car wheels	15 00	16 00
Scrap Metals		
Heavy copper and wire	10 75	11 25
Light copper	9 25	9 75
No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 25	7 50
Light brass	3 50	4 50
Heavy yellow brass	5 50	6 50
Heavy Lead	5 00	5 50
Tea lead	2 75	3 50
Scrap zinc	4 25	4 50
Scrap Rubber		
Boots and shoes	2 00	....
Lumbermen's rubber boots	1 25	1 50
Auto tires	0 25	0 50
Solid tires	6 60	1 00

BRISK ACTIVITY IN RADIATORS AND BOILERS

Toronto.

Current trade in radiators and boilers is stated to be on a surprisingly good basis. The brisk activity in building circles has kept up in fair volume during the fall period, thus reflecting in the movement of these products. The approach of milder weather has also stimulated the desire for heating apparatus, while the further developments in the raw material market and higher prices on foundry iron result in additional strength in production circles. No change has been announced in quotations, the following list prices and discounts prevailing on the local markets:

RADIATORS—

Revised radiator list prices are for 1, 2, 3, 4 and 5column radiators per square foot.

38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $136; 18 in, $140; 16 in, $150 14 in., 155; 13 in. $1.60.

Discount on 2, 3, and 5-column standard sizes, 59 per cent. for water and 60 per cent. for steam.

Discount on 1-column standard size, and 2, 3, and 4-column hospital sizese 51 per cent. for water and 52 per cent. for steam.

Discounts on 1-column hospital size, water, 33 per cent.; steam, 34 per cent.

Wall radiators—5 ft., $1.15; 6 ft. $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05 Discount 56 per cent.

BOILERS—

Water:

Round, 64 per cent off list. Square, 15 per cent. off list.

Steam:

Round, 28 per cent. off list; square, 15 per cent. off list.

STEADY TREND IN LEAD PRODUCT PRICES

Toronto.

Prices on lead and zinc goods generally remain at a steady level, there being no variation since the last general revision. Quotations in primary metals have shown signs of minor fluctuation, but these developments have not been of sufficient extent to affect domestic prices on the finished products. On the whole the undertone has remained firm, with the general trend of virgin lead in an upward direction. Tin has been alternately weak, with recoveries. Zinc is experiencing a brisk demand, and such developments are reflected in the maintenance of the following current quotations on lead and zinc goods:

LEAD AND ZINC GOODS—	
Lead pipe, list per lb.	0 13
Lead Waste, pipe, list, per lb.	0 14
Do., over 8 in., list per lb.	0 15
Lead pipe is subjected to a discount of	10%
Lead traps and bends	15%
Lead sheets 4 to 6 lbs. sq. ft. in rolls, lb	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 30
Do., strictly, lb.	0 22½
Do., wiping, lb.	0 21
Do., guaranteed, lb.	0 24
Do., commercial, lb.	0 21
Zinc sheets, per lb. 0 09	0 10

Toronto.

JUST FAIR ACTIVITY IN BOILER TUBES

Toronto.

The demand for boiler tubes at the recently advanced price levels is described as just fair by local warehouses. With the approach of the mild weather, however, an improvement in this respect is usually looked for, orders of a sorting nature for repair work being evident. The market is consequently in a slightly firmer condition, as is reflected by the higher replacement values and certain increases in production costs which resulted in the recent revision in domestic prices. There has been no further change and following are current average quotations existing on a market which is generally acknowledged to be nominal:

BOILER TUBES— Size	Seamless.	Lapweld
¾ inch	$19 00	$.....
1 inch	20 00	.....
1¼ inch	22 00	.....
1½ inch	24 00	.....
1¾ inch	24 00	23 00
2 inch	22 00	19 00
2¼ inch	26 00	.....
2½ inch	26 00	22 00
3 inch	32 00	26 00
3¼ inch	36 00	33 00
3½ inch	38 00	32 00
4 inch	55 00	38 00

MOST INGOT METALS ON FIRM BASIS

Toronto.

The ingot metal markets generally remain on a firm basis, with current trading still being of a restricted nature. Spelter provides the feature in new developments, prices advancing in primary centres and a shortage of this metal being anticipated. The lead market remains strong and offerings are limited. Copper has maintained its position, but tin has shown signs of weakness. While the current demand in domestic circles is not active, yet a firm undertone is generally in evidence, with the exception of tin, and even this metal is expected to recover shortly.

COPPER.—While buying of copper, both on domestic and foreign markets, only continues in moderate quantities, a firm undertone still prevails in this metal. This is probably due to the fact that the statistical position is gaining in strength. The local price remains at 17½ cents.

TIN.—Tin is slightly duller again on foreign and primary centres, with its consequent reaction on prices. Domestic levels, however, are generally unchanged, these fluctuations having been continuing for several weeks and therefore are not immediately represented in local quotations, as would be the case on a steadier market. The current local level continues around 35 to 35½ cents.

LEAD.—This market remains firm at unchanged price levels. The general situation is recognized as strong, and while the general trend has been towards higher levels, the movement is conservatively slow. Domestic interest is more pronounced in lead than the other metals at this time. Local quotations are unchanged at the $7.50 mark.

SPELTER.—The general situation of zinc has also gained in strength, the market continuing firm in view of the fact that output is still restricted on account of the coal shortage. Domestic trading is moderate. Local prices remain at the level of $8.25.

ANTIMONY.—Trading in antimony is reported to be practically at a standstill, this being attributed to the recent holiday period. There is a noticeable lack of aggressive activity, with domestic prices unchanged in the neighborhood of 6 and 7 cents.

Many Products Reflect Trend of Pig Iron

Manufactured Lines Where Pig Iron Enters Into Production Costs Show Firmer Price Tendency Owing to Higher Quotations on Basic Material—Upward Climb Attributed to Effects of Rail and Coal Strikes

THE upward climb of pig iron prices during recent weeks has indirectly resulted in firmer quotations on various manufactured products, pig iron being reflected in production costs. Since the effects of the coal strike have been more pronounced in the steel industry, domestic pig iron prices have gradually risen until the prevailing level is approximately twenty-five per cent. higher than the quotation in effect early this year. In conjunction with this situation, the supply of pig iron has gradually diminished until the current demand is stated to be in excess of the supply. This scarcity is naturally being felt at steel producing centres, a factor which is primarily attributed to the recent rail and coal strikes in southern circles.

Domestic pig iron prices were advanced two dollars per ton a couple of weeks ago, thus bringing the current level to $39.30. Since then, however, further advances are reported as pending in the U. S., and higher quotations are being asked as this material is evidently at a premium. It is interesting to note in this connection that the majority of domestic manufacturers of products where pig iron constitutes the primary basic element have been protected to some extent on rising prices until September. Just what the trend would have been if the transportation and coal miners difficulties had failed to reach any settlement, is of course problematic, but under a continuation of existing conditions, it is stated that no relief from the present high levels could be expected.

In referring to a sudden termination of these strikes, steel producers have pointed out that relief from the prevailing situation could not be apparent immediately, but prices on basic steel elements entering into production costs would cease to climb with the removal of the strike impetus from a consuming viewpoint.

The list of products vitally affected by higher pig iron costs includes furnaces, boilers, soil pipe and fittings, pipe fittings, enameled ware, radiators and piping. The sheet market has also been materially strengthened thereby, with a consequent reflection to a greater or less extent on the by-products such as range boilers and other items. While many manufacturers of goods are thus faced with the possibility of increased costs owing to higher pig iron prices, few advances have been recorded as attributable to this element alone. Soil pipe and fittings are higher, also sheets, but the latter have experienced a strong demand combined with a scarcity owing to transportation difficulties. Other goods which might have registered slightly lower levels now reflect this tendency through maintaining firm prices.

London, Ont.

LONDON, September 21.—Reports show hardware business as good here during the past week. The many visitors in the city for the western fair having stimulated trade.

Several price changes go into effect including new lower quotations on some lines for spring booking, and also an advance in quotations on galvanized ware of approximately ten per cent.

SCREEN DOOR SPRING HINGES NOW REDUCED

London, Ont. —

Screen door spring hinges appear with lower prices for 1923 booking. Following are revised quotations on these products:

SPRING HINGES—

No. 20 or 200 Japd. Spring Hinges, $20.00 per gross pair; No. 50, Japanned Double Acting Spring Hinges, $5.35 per doz. pairs; No. 192, Japanned Offset Spring Hinges, $2.40 per dozen pairs; No. 2255, Japanned Screen Door Sets, $3.25 per dozen sets.

KIDDIE KAR PRICES REGISTER ADVANCE

London, Ont. —

New prices showing an advance of approximately ten per cent. are now in effect on Kiddie Kars. For small lots, the No. 3 is quoted at $2.00 each and the No. 4 at $2.35 each.

STOVE BOLTS HIGHER WITH NEW DISCOUNT

London, Ont. —

Quotations on stove bolts have been increased through a revision in the discount. The advance is approximately ten per cent. The new quotation is 65 and 5 per cent. off list.

WEATHER STRIP IN POPULAR MOVEMENT

London, Ont. —

Weather strip is now moving in fair quantities, according to current reports from both jobbers and retailers. Following are prevailing prices on same:

WEATHER STRIP—

Frost King Felt	Doz. Pkgs.	5 00

WOOD AND FELT—

No. 60, List 5c. ft.; No. 61, List, 5c. per ft.; No. 61½, List 7c. per ft.; No. 64, List 10c. per ft. Less 50 5 per cent.

BRISK TRADE IN NAILS

London, Ont. —

A brisk movement in nails still continues, according to current reports, while the prices remain quite firm on both cut and wire.

NAILS—

Wire, base	3 75
Cut, base	4 60

LOWER PRICES ON REACH SPORTING GOODS

London, Ont. —

New prices for the spring booking of 1923 have been issued by the A. J. Reach Co., covering their line of baseball and other sporting goods. These new lists show lower prices on many numbers, a varying reduction taking place on different articles.

SEASONAL ACTIVITY IN ASH SIFTERS

London, Ont. —

Ash sifters are now beginning to record the usual seasonal movement. Current prices on these products follow:

ASH SIFTERS—

Common Wood Sides	Dozen	2 65
Banner, No. 2	Each	2 65
Banner, No. 3	Each	1 95

NEW NET PRICES ON GALVANIZED WARES

London, Ont. —

Prices on various lines of galvanized ware are now about ten per cent. higher. Following are revised net quotations on some good selling lines:

GALVANIZED WARE—

Wash Tubs—No. 0, $8.45 oz.; No. 1, $11.40 doz.; No. 2, $12.43 doz.; No. 3, $14.18 doz.

Sprinklers, 6 quart, $7.36 doz.; 10 quart, $8.30 doz.; 14 quart, $10.10 doz.; 16 quart, $12.90 doz.; 20 quart, $14.72 doz.

Garbage Pails—No. 1, 83c. each; No. 2, $1.12 each; No. 3, $1.43 each; No. 4, $2.10 each.

Flaring Pails—11 inch, $4.15 doz.; 12 inch, $4.63 doz.; 13 inch, $5.28 doz.; 14 inch, $6.08 doz.

TURPENTINE PRICES ON FIRM UNDERTONE

London, Ont. —

Turpentine prices continue firm and unchanged on the local market, the principal factor being the condition of local stocks. It is pointed out that there is very little turpentine on hand, and the supply situation would undoubtedly be acute if the demand for this product was at all active. Current trading, however, is quiet, and there is no big activity.

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 85
2 to 4 bbl. lots	1 84
5 gal. lots	2 00

PRICES ON EUREKA SPRAYERS NOW LOWER

London, Ont. —

Spring booking prices for 1923 on the Eureka line of sprayers are from 10 to 20 per cent. lower. Seeders, drills and cultivators remain unchanged in price.

EUREKA SPRAYERS—

Seeders, No. 1	Each	9 00
Seeders and cultivator No. 2		11 00
Cultivator No. 4		4 50
Do., No. 8		6 00
Do., No. 10		6 50
Cyclone Seeders		18 00
Dutch Hoes		6 00
		Dozen
Sprayers, No. 108, Dry Powder		8 00
		Each
Do., No. 110 Galvanized Compressed Air		6 00
Do., No. 111, Brass		8 00
No. No. 112, Tin		4 00
Do., No. 113, Glass Jar		7 00
Do., No. 114, Glass Jar.		7 50
Do., No. 115, Tin Continuous		8 50
Bucket Pump, No. 109	Each	4 80

Winnipeg, Man.

WINNIPEG, September 21.—Business is reported as steadily increasing and fall lines are showing improvement in demand. Among the changed prices this week are higher prices on annealed bright and coppered wire also well points and bale ties. Hudson Bay axes have shown a decline of $1.00 per dozen. There is a seasonable demand for paints, glass and putty due to the increased activity in building circles.

HUDSON BAY AXES SHOW DECLINE

Winnipeg.

There has been a decline of $1 per dozen on Hudson Bay patented axes. New quotations are as follows:

AXES—

No. 51 x 1½	12 50
No. 51 x 1¾	12 50
No. 51 x 2	13 00
No. 51 x 2½	13 50
No. 51 x 3	14 00
No. 51 x 3½	14 00
No. 51 x 4	14 50

BALE TIE PRICES TWENTY-FIVE CENTS HIGHER

Winnipeg.

Single loop bale ties have been increased to the extent of twenty-five cents per hundred pounds. New quotations are $6.15.

ANNEALED BRIGHT AND COPPER WIRE ADVANCED

Winnipeg.

An advance of twenty-five cents per hundred pounds is recorded on annealed bright and copper wire. New quotations on the various sizes are:

ANNEALED WIRE—

No. 9, $5.25; No. 10, $5.30; No. 11, $5.37; No. 12, $5.45; No. 13, $5.55; No. 14, $5.65; No. 15, $5.80; No. 16, $5.95.

BRIGHT WIRE—

No. 9, $5.50; No. 10, $5.56; No. 11, $5.62; No. 12, $5.70; No. 13, $5.80; No. 14, $5.90; No. 15, $6.05; No. 16, $6.20.

COPPERED WIRE—

No. 9, $9.50; No. 10, $9.60; No. 11, $9.65; No. 12, $9.75; No. 13, $9.90; No. 14, $10.00.

LEAD MAINTAINS FIRM TONE

Winnipeg.

The tone of the lead market is reported firm. Bar lead is quoted at eight and three quarter cents per pound with pig lead at eight and one-half cents per pound.

SLIGHT ADVANCE IN WELL POINTS

Winnipeg.

There has been an advance of two and one-half per cent. on well points. Sixty gauze and eighty gauze is now quoted at less forty per cent off list price.

FILES SHOW UPWARD TREND

Winnipeg.

Nicholson files show an advance of five per cent., and the discount is now net 35 per cent. of the list price.

TURPENTINE PRICES ON HIGHER PLANE

Winnipeg.

An advance is evident in the turpentine market this week and prices are advanced ten cents per gallon. A firm situation is reported from primary points in the South. There is a good demand and quotations are $1.95 per gallon.

GUNS AND AMMUNITION NOW SELLING WELL

Winnipeg.

With the fall sporting season at hand jobbing houses report an active sale for guns, rifles and ammunition. Although earlier bookings were light the present movement is reported satisfactory and if sales continue a good fall trade is assured. Repeat orders are coming in more frequently.

FIRM TONE CONTINUES ON CORRUGATED SHEETS

Winnipeg.

There is still a strong tendency in corrugated sheets, due to the recent development in southern producing centres. This has been caused by fuel and labor costs having advanced.

BRISK SEASONAL SALES RECORDED IN PUTTY

Winnipeg.

As quite a number of small homes as well as some larger buildings are being erected, the demand for putty is active and a further improvement is looked forward to within a short time. Quotations on 100 lbs in irons are $6 and 1½ lb. tins 16c.

AXE HEADS SHOW UPWARD PRICE TREND

Winnipeg.

There is an advance in axe heads and present prices are as follows:

Axe heads, $2.50; Handle axes, $2.50; Boys' handle axes, $1.50.

SEASONAL GLASS SALES IN EVIDENCE

Winnipeg.

There is an improvement in the demand for window glass due to the increased activity in building circles. Quotations remain unchanged.

LINSEED OIL PRICES SHOW NO CHANGE

Winnipeg.

Linseed oil at primary markets is reported firmer and also scarce. The demand of late has been a little more active with quotations on raw $1.15 and boiled $1.18.

Hamilton, Ont.

Large Majority of Current Price Revisions In Marked Upward Direction

HAMILTON, Sept. 21.—A temporary inflation of values is now generally apparent to those who have followed hardware developments during recent weeks. The majority of price changes have been in an upward direction. While several declines have also been announced during this period, such reductions are chiefly on lines which have not recorded any change for some considerable time, and where manufacturers have been able to effect economies in production and quantity distribution and are not usually attributed to any lowering of raw material costs. The trend of basic elements in manufactured hardware has been steadily on the upward swing of the pendulum, and while it may bring a further reaction in a few months time the current movement itself is described as the natural rebound from the deflation of 1921. One prominent local hardware manufacturer advises Hardware and Metal that owing to the increasing cost of raw materials during the past few weeks they now contemplate advancing practically everything they manufacture, concluding with the statement that "there is no other course open but price increases."

From the viewpoint of hardware manufacturers, the coal situation still contains plenty of room for improvement. Production of soft coal in United States fields is limited by current transportation conditions, and while anthracite mines have resumed operations, this handicap also has to be faced in distribution. Coupled with the rising costs of certain raw materials, higher fuel prices have increased production costs and manufacturers in several instances are confronted with advancing quotations.

Collections are reported to have improved during the past two weeks, this development being attributed in certain quarters to the favorable crop returns. With the advent of fall weather, a seasonal call for oil and electric heating appliances, stove accessories and lamps and lanterns is being experienced. More interest is evident in furnace and repair work.

An evidence of the season is the general movement on the part of retail hardware merchants to make a more prominent display of heating stoves and other heating appliances. The time is a little early for actual sales but interest is evident and keen competition will be displayed in filling the usual crop of requirements that develop with the first frosty weather.

Retail hardware dealers are making preparations for an active fall campaign and to that end are paying a little more attention to attractive window displays of seasonable lines and in a small way have started their advertising campaigns. Good business is coming forward, although heating appliances continue to be in most demand.

Vancouver, B. C.

Lack of Quick Despatch Hampering Coast Trade in Special Steel Lines

VANCOUVER, September 21.—Trade in wholesale and retail hardware circles on the Coast has been steadily maintained during the past week. The holding of the Provincial Fair in New Westminster has brought country merchants into the city and some business has resulted, although it is distinctly evident that for some reason they were not doing any large amount of buying. Some of the houses thought it good business to have representatives on the grounds renewing acquaintances with their customers, showing them some of the mysteries of "Sockeye Row."

The greatest complaint heard at present is the tardy deliveries on goods emanating from Chicago, New York, Montreal and Toronto, the lack of quick despatch hampering trade in special lines, chiefly steel. Notices are being continually received stating that delays may be expected due to the coal and rail strike but with the settlement announced a few days, ago early improvement is anticipated.

Deliveries are good on wire nails for the reason that they are manufactured here. During the war the Morrison Steel and Wire Co. had many opportunities to sell its product to other countries at good advances over prices then current in Vancouver. The company, however, took care of Coast orders with the result that the company is now being repaid by the orders of practically all firms here.

Current Price Developments

Changes this week are all on a stronger basis. Files, for instance, largely used in sharpening crosscut saws in the lumber industry, have been increased ten per cent. On account of the advances in the steel market occasioned through increased wages and the various strikes, axes are up by three dollars a dozen, screws fifteen per cent. and lock sets fifty cents a dozen.

Aluminumware continues to be featured in the windows of many retailers. Wearever saucepans were on sale this week in a Hastings street shop at $1.68, and the double boilers were marked at $2.78. Another Hastings street house, which bought out the stock of the Wallace Hardware Co., on Commercial Drive, as announced in Hardware and Metal two weeks ago, has moved the stock downtown and on Saturday started to dispose of it at reduced prices.

Collections both from retailer and consumer are said to be a little on the slow side this week, while from the country districts they are up to the recent average.

Calgary, Alta.

Construction Provides Opportunities For Better Sale of Builders' Hardware

CALGARY, Sept. 21.—A feature of the retail trade of the city is the more than usual space used by some of the hardware merchants in local papers. Results are described as various and closer enquiry brings out the fact that where values are apparent the response is satisfactory. The interest in summer goods has been transferred to fall lines and healthy competition in keenness and service is very noticeable. Building trade is normal and mostly confined to dwellings of the medium type. This class of trade has been educated out of the cheap class of builders' hardware and now show an inclination to be particular as to the class of finishing hardware that goes on to the job, and as a consequence merchants are showing better ranges of medium and higher priced lines and are selling them. The bungalow type of dwelling provides plenty of opportunity for the up to date builders' hardware man to work in new ideas in window, door, closet and cupboard hardware that are bound to please. The standard of this trade is much higher than a few years ago.

Jobbers of steam and hot water heating plants report several good sized jobs signed up lately, mostly for schools and buildings of a public nature throughout the province. Quotations on this line still show an unsettled local condition, notwithstanding the very evident stiffening up of prices on lines close to the basic industries. The recent advance in iron pipe and roughing-in material for plumbing jobs was expected, and known requirements were pretty well booked up before the advance. Activity in cast enamel plumbing fixtures is not marked, but show a fair movement for current needs. Brass goods are moving in good volume at prices that have been steady over some months.

Grain Shipments Increasing

Collections up to date are not showing much headway in reducing overdues but current paper is met in pretty satisfactory manner and there is not likely to be the usual early fall jumping jobbers' outstandings. Grain shipments are increasing in volume, and in some sections rain has delayed threshing operations. This moisture however is welcome and will help out fall plowing.

New Refinery Ratified

The rate-payers this week voted almost unanimously to ratify the agreement with the Imperial Oil Co., and it is expected that the work on the new refinery will start at once and continue throughout the winter, supplying steady work at good wages to a class of labor that is often unemployed at that season. That the rate-payers regard the securing of this refinery as a highly important development for Calgary is indicated by the large vote polled.

New Hardware Prices

The recent mill advance on base price of wire is now in effect in local markets, plain wires being quoted 25 cents higher throughout. Some little activity was noted in annealed wire last month but further demand will not be much in evidence until threshing is well out of the way. Revised quotations Calgary, Edmonton and Lethbridge follow:—

Axe Quotations Higer

Size	Annealed	Bright	Coppered Spring
0-9	6.25	6.50	10.50
10	6.31	6.56	10.60
11	6.37	6.62	10.65
12	6.45	6.70	10.75
13	6.55	6.80	10.90
14	6.65	6.90	11.00
15	6.80	7.05	

In keeping with the above, single loop bale ties have also advanced 25 cents per 100 lbs. A few odd cars of ties were placed in July, but the tendency is to depend on jobbers' stocks for the monthly requirements. Hay crop is light and everything available for shipment will be baled and this line should be active particularly in those sections where many of last year's stacks are intact. Current quotations are:—5.50 for 14 gauge at head of lakes and 7.15 at Calgary, Edmonton and Lethbridge.

Bench axes show a sharp advance of about 10 per cent., thus keeping in line with the general advance in axes recorded last week. The discount off Weiland Vale list is now 50 off plus 50c per dozen at Calgary, Edmonton and Lethbridge.

Wood screws have also responded to the general stiffening and new discounts show an advance of about 10 per cent. Calgary, Edmonton and Lethbridge quotations on flat head bright are 75 off; round and oval head bright, 72½ off; flat head brass, 70 off; round and oval head brass, 67½ off.

An adjustment in the price of Chicago flexible clippers and parts is also noted, the revision being from 20 and 5 off to 22½ off at Calgary, Edmonton and Lethbridge.

TURPENTINE PRICE RISES

An advance of five cents on turpentine establishes the highest mark of the year. Stocks are fairly low and demand falling off. New price is 2.05 in barrels and 2.15 in less than barrels.

The following reductions in seasonable sporting goods will appeal to the shooters:—Remington shot guns, No. 10-A, from 55.25 to 52.75. Currie's twill waders, from 11.00 to 10.25; sateen waders, from 13.75 to 12.25; stockings, from 7.50 to 6.75. Johnson's folding duck decoys are now 6.75 per dozen. Tin goose decoys, 6.90 per dozen. Solid cedar duck decoys, 15.15, and hollow cedar, 27.75 per dozen. The initial flurry in shooting needs has settled down to a steady trade with October, the month for the seasoned shooter, promising to be a good month.

St. John, N. B.

Maritime Hardware Jobbing Houses Now Develop Increased Activity

ST. JOHN, N. B., September 21.—During the last week Hardware and Metal's representative called on several of St. John's leading merchants in all lines of business and they all stated that business was picking up wonderfully, and that the people are commencing to buy more freely than they did a few months ago. One of the merchants called upon stated that he was doing far more business than last year at this time. Although some merchants are not yet coming into their own, they feel confident that as soon as the weather becomes unsettled, and the winter approaches, there will be a good business crop up immediately.

There is still quite a lot of painting going on in different sections of the city, although the rush is about over with the professional painters. There is also a good amount of building going on as compared with the last two or three years during the fall seasons. Employment conditions are good, very few men being out of work, and the merchants are beginning to feel the benefits of more spending power than when labor conditions are bad. So far as the maritimes are concerned, the vacation season is now over, and everybody back to work, and with all their travellers now covering their territories, the jobbing houses are becoming more active than they have been during the last two or three months.

At this time of the year many big game hunters visit New Brunswick and leave a fair amount of business with the local sporting goods houses. The big game season opened on Sept. 15. Non-residents must pay $75.00 and residents $10.00. The open season for ducks, geese, brant, coots, gallinules, rails, woodcock and jacksnipe also opened. It is the practice of the hardware houses to give away game laws to visiting sportsmen. These laws are sent down from Fredericton by the provincial government.

Considerable improvements have been made to the St. John city market in the way of repairing and consideration is now being given the improving of the lighting system. Angus McLean, general manager of the Bathurst Company, Ltd., has stated that all details in connection with the paper mill project of Bathurst have been attended to, and that actual work of excavating for the new building is expected to start within a few days. The building will be of concrete and steel, about ninety feet wide and four hundred and fifty feet long.

Work has been started on the Hampton station, N. B., with the intention of remodelling the building, and making it more suitable for railroad purposes. A new firm, that of R. H. Reid, of Twin Mountains, New Hampshire, is now making negotiations to carry on a pulp business on both sides of the Bay Chaleur. T. W. Way, manager of the new business, is at present completing arrangements. Campbellton, being a central and convenient point, will likely serve as headquarters.

Joseph J. Outerbridge, a representative of the Bermuda Department of Agriculture, was in St. John last week looking over the trade situation. He has been on a tour of Eastern Canada. His object in calling at St. John was to get in touch with the merchants who are engaged in trade with Bermuda. Bermuda has long bought heavily of New Brunswick potatoes, this trade having existed about half a century. The R. M. S. P. line gives a very good service between St. John and Bermuda.

The potato producers of New Brunswick are practically shut out from the Northern States, on account of the fifty cents per cwt. duty, and are going to ship to the Southern States, where, by water route, they can meet competition at that point. The recent rains have done some damage to the potato crop, but the extent is not yet known.

Pittsburg, U. S. A.

Advancing Trend in Steel Prices Now Subsiding on Steadier Market

PITTSBURG, Sept. 21.—The general talk in the trade is that steel prices are in an advancing state, and the items reviewed support this view, in general, but at the same time the actual concrete advances do not make altogether the showing that would be expected if the market is really a sharply advancing one. The total turnover in the finished steel markets is not large, probably on the whole considerably less than the production, even though production is not much over half of capacity. Jobbers and manufacturing consumers show a strong disposition to buy for early deliveries, say for spot, October or November shipment, while they display very little interest in December or first quarter.

This is the condition. What it means is not so clear. Remarks that forward business is light because mills do not want to sell are not convincing. It may be that buyers' lack of interest in late deliveries is due to their being too busy with present day problems to consider the more distant future, but if they were certain steel prices were going to advance further they would presumably find the time to consider late deliveries. Very likely they feel that prices are too high now, and many mills admit frankly that such is the case. Costs are up by a very considerable margin, but cost increases alone would not warrant 2.25c for plates, shapes and bars when these commodities sold at 1.35c or thereabouts early in the year, or 3.75c for sheets when last year the market dropped for a time to 2.75c.

Increase in Production

One reason why mills are anxious to get as high prices as possible is that they have orders still to fill that will bring little if any profit and in some cases may involve a loss, the material having been sold long ago at much lower prices, while it must now be made when costs are much higher. The mills may feel that they should obtain all they can while steel is scarce even though the prices are too high to justify a long buying movement being based on them.

Steel ingot production at the end of August was down to about 50 per cent. of capacity or about 26,000,000 tons a year, having been at between 70 and 75 per cent. in June. Since the end of August there has been a sharp increase in production, perhaps to a 60 per cent. rate. On account of the particular circumstances existing, it does not follow that further increases, at the same rate, are to occur. The increase thus far has been due chiefly to steel interests getting their union coal mines in operation, the U.M.W. wage scale being signed, and promptly establishing a movement to their by-product coke plants. Further increases would have to come chiefly from there being more coal and coke from the Connellsville region, where transportation has already become the limiting factor, and by purchases of coal in the open market, when the distribution of purchased coal is almost completely controlled by priorities, in which the steel industry has no standing.

Connellsville coke is quoted at $11 to $11.50 for furnace and $12.50 to $13 for foundry. Offerings of furnace coke have not been sufficient to justify a furnace trying to gather together enough for an operation. In the past week car shortage has prevented full shipments being made on contract and offerings are likely to be less in the next few days.

Pig iron remains quotable at $34 for Bessemer, $30 for basic and $35.50 for foundry, valley basis. These figures are not well supported, transactions being very light. It is held that most consumers could not afford to pay these prices, unless they get further advances in their finished products. Recent predictions that pig iron would advance to $40 or $50 have become unpopular.

The Steel Corporation has announced that it will book rail orders, for shipment to July 1, 1923, at the old price of $40 a gross ton, up to October 1, when the price will go to $43. It is a question how much tonnage this move will bring into the market.

Liquid Granite

is the best selling FLOOR VARNISH

Because there is more Liquid Granite sold than any other floor varnish on the market, it is the most satisfactory line for dealers to handle.

Liquid Granite sells best because it gives a beautiful lustre, is easy to keep clean, and withstands the severest tests of wear and water.

Paint Customer Who Argues the Price

Paint Salesman Lets Customer Take the Paint and Use it Alongside the Cheaper Variety and Pay on Basis of Results—Meeting the Price Argument on White Lead—Getting Some Free Advertising

CONTINUING the article commenced in the paint department of last week's issue, the following deals with the way in which still other types of paint customers were handled:—

Now in comes a tough nut. He has been quoted a price by our competitor. He has the cash and he is going to get his money's worth. He insists upon price per gallon and we give it to him. He tells us he can buy a standard grade for 50c per gallon less than ours. We dig up our measured tests of painted samples of different paints and show him he never bought a $3.65 paint for $3.15 and never will. Usually that cuts the bacon and we get the business.

But if he thinks we are flim-flamming him, doubts our knowledge of the fact or doubts our sincerity and refuses to be convinced, we just hand the gentleman a gallon of our paint, white or any color he wants, and invite him to use it, free of charge, side by side with the other paint. After using the two if he decides on the other paint ours doesn't cost him anything. We charge it to advertising, but if he decides to use our paint—and he always does—he pays us $3.65 for colors and $4.05 for white, for this gallon and for every gallon he buys.

There are several ways to handle this "bird," but I am afraid if I attempted to tell you half of them you would get too tired reading.

Now comes the customer, or painter, who is a lead and oil crank.

Lead and oil, gentlemen, is our common enemy. It is lead and oil which is, broad and long, our big competition. Unless we can beat lead and oil, hand-mixed, in our store we are going to have a hard time building up a paint trade. We all love to sell lead because it pays us such a handsome profit on the oil and the colors and the brushes, etc., that go with it, but not on the lead. What are we going to do about it? Sell something better, of course.

I will now show you how a very successful retail paint dealer has met the price argument on white lead, having used this method successfully for many years. He figures:

	Lead at 5 gals oil per 100 lbs.	Average for both coats
100 lbs. lead	$12.88	$12.88
5 gals. oil	1.13	5.65
Colors		1.50
Labor		1.50

Divided by seven gives $3.08 per gal.

House paint sells at $3.65 per gal.

Reduced with one-half gal. raw oil for first coat. To simplify figures we will take two gals. house paint and one gal. raw oil.

2.81 per gal. for first coat.

$3.65 per gal. for second coat.

$6.46 divided by 2 equals $3.23.

House paint $3.23 per gal. average for both coats.

Lead and oil $3.08 per gal. average for both coats.

House paint covers six squares per gal.

Lead and oil covers five squares per gal.

$3.25 divided by 6 equals 54c per square.

$3.08 divided by 5 equals 61c per square.

A first-class house paint outwears a first class hand-mixed lead and oil paint at least 50%. Where's your argument?

As we have time from day to day we are going to invite prominent property owners to our store for ten minute interviews and talk to them about our paint. I know one fine retail paint salesman who is cashing in on this system.

Now we will try to sell a flat wall paint job.

In the course of our telephone conversation with prospective customers, Mrs. Horace Moring informed us that she intended to redecorate the interior of her home and that she was interested in flat wall colors and would probably be interested in enamels and varnishes. We immediately sent her name to the company for promotion advising them the products with which Mrs. Moring might be interested. As a result of this promotion work on the part of the company Mrs. Moring requested decorative suggestions for her home and has now called at our store for further information and prices.

Some Free Advertising

There was very little upon our part to be done except to assure Mrs. Moring that we had the stock and could make prompt deliveries and give her an estimate of quantities resuired and write up the specifications for her requirements. Mrs. Moring happens to be a member of the Methodist church and she is also a member of the Daughters of the Empire and she is interested in Women's Political League and meets a host of friends at the Red Elephant every other day for luncheon. She entertains quite a good deal socially and we rather expect that this job is going to be very beneficial to us with quite a number of Mrs. Moring's friends.

It not infrequently happens that a property owner has one or more rooms which he desires very much to work out in Tiffiny finish. His painter may be perfectly capable of producing the results desired and again he may not. The company's decorative department is thoroughly equipped to furnish either the painter or the property owner with working charts showing in graduated form the colors used and the process of blending so that any workman of ordinary ability should have no trouble in giving his customers and ours entirely satisfactory results on this class of work. It also happens quite frequently that the painter himself is puzzled to know just how to proceed in this matter of Tiffiny finish and does not wish to expose his ignorance or shortcomings to his customer. The

To Holders of Five-Year 5½ per cent. Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent. interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Dated at Ottawa, 8th August, 1922.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

PAINT CUSTOMER WHO ARGUES THE PRICE

(Continued from page 48)

company whom we represent has assured us that its decorative department will be very happy to render services of this character free of charge to any of our painter friends.

Knowing Thinners Important

In selling paints it is important to know what thinners should be used with the different kinds of paint; linseed oil paint, varnish paint and water paint.

You know without my telling you that linseed oil paints should be thinned for under coat work with raw linseed oil and turpentine in sufficient quantities of both to meet the requirements of the surface. You will occasionally find property owners or painters who object to the use of turpentine on outside work. It is almost impossible to do a thoroughly good job of outside painting without the use of turpentine as a thinner in undercoats.

Varnish paints should be thinned for undercoat work with pure spirits of turpentine only when thinning is necessary. Please understand that I am speaking of trade sales products not of industrial products in which other thinners are often used. Varnish paints and clear varnishes should never be thinned with linseed oil, benzine, naptha or gasoline or any similar material.

Water paints include kalsomine, fire proof white, distemper colors, etc., and water either hot or cold is used, for the vehicle and also for thinning purposes when necessary.

The care of brushes is very important if good results are to be expected from the use of paints and varnishes.

The paint brush may be suspended so that the lower ends of the bristles are about one-half inch to one inch above the bottom of the brush holder. A cover may be put over the can to retard evaporation of the volatile thinners. The paint brush may be cleaned with naphtha or gasoline or even may be allowed to stand in gasoline for a period without any serious consequences. A mixture of linseed oil and turpentine 50-50 will keep brushes in fine shape when used in proper brush holder.

Varnish brushes should be cleaned with turpentine only and if put in a brush container should be suspended in turpentine. A varnish brush should not be allowed to stand in naphtha or gasoline which will cause it to get lousy. By lousy in this instance we mean that the naphtha or gasoline separates the gum in the varnish from the liquid and leaves a gritty substance which looks like fine grains of sand in the brush. A brush in this condition put into varnish used on a floor or upright woodwork will leave the surface looking as though it had been sanded.

Knowing Primers

There are quite a few things that a retail paint salesman should be familiar with, such as recommending proper primers for outside and inside work, foundation coats for enamels, thinning undercoats when varnishing new floors, thinning undercoats when painting new floors, the action of alkali in newly plastered walls or in new concrete floors on paint, etc.

Selling the right kind of paint for the right purpose is very important. Investigation of complaints and the fin satisfaction of the customer is no less important. There are many causes of complaints, but I will take time to name only a few of them now. They are improper thinning of undercoats, not having the paint thoroughly stirred up, non-receptive surfaces, insufficient light, poor ventilation, cold floors, insufficient time between coats for drying, too much paint, not enough paint, and many more.

To the retail paint salesman knowledge of the action of paint upon the different kinds of lumber used in his particular locality would be very valuable.

Paint Trade Notes

PAINT SALESMAN WEDS

Harry Lawford, Toronto sales representative of Benjamin Moore & Co. Limited, was quietly married at Howard Park Methodist Church on Monday by the Rev. Dr. C. T. Scott.

Only relatives and friends (which included the staff of Benjamin Moore & Co.) were present at the ceremony. The happy couple will spend their honeymoon in Muskoka.

"BUMPER YEAR 1923"

The Canada Paint Co., Ltd. has adopted as its slogan for next year "Bumper Year 1923" and a button bearing the slogan has been made for its salesmen.

SALES CONVENTION

The officers and sales staff of the Imperial Varnish and Color Co., Ltd., are holding a four-day sales convention this week at the head offices and plant, Toronto. Representatives from coast to coast, including Vancouver, Winnipeg, Montreal and the Maritimes, are in attendance. The convention closed with a dinner at the Scarborough Golf Club, on Friday evening, September 22.

ATTEND TORONTO MEETING

Among the members of the Canadian Paint, Oil and Varnish Association from Montreal, who attended the meeting held in Toronto this week, were: George Henderson of Brandram Henderson, Ltd.; W. S. Fallis and R. C. Mission of Sherwin-Williams Co. of Canada; J. H. Conover of Martin Senour Co.; Royal Cluxton, Canada Paint Co. and John Irwin of McArthur-Irwin, Ltd.

"Save the Surface" Contests

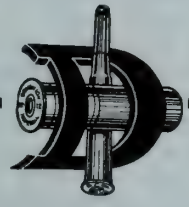
Prize Winners to be announced in next issue

PRIZE winners in the "Save the Surface" campaign contests for window displays and newspaper advertisements will appear in the next issue of Hardware and Metal (Sept. 30). Reproductions of prize winning displays will also appear. Incidentally the Sept. 30 is the Annual Fall "Save the Surface" number of Hardware and Metal and will be brimful of splendid suggestions for increasing sales of paints and varnishes during the coming fall and winter months. The prize winning window displays will offer splendid suggestions, which hardware merchants and window trimmers in Canada can use to advantage in featuring paints and varnishes in a most effective manner. The ideas in these windows can be used throughout the year, in producing practical, effective and sales-producing displays. The issue will be one which window trimmers will wish to keep for future reference. For those who do not wish to cut their file copies of Hardware and Metal, reprints of the prize winning displays will be provided free of charge by Hardware and Metal. Address requests for copies to Editorial Department, Hardware and Metal, 153 University Ave., Toronto, Canada.

Canuck Shot Shells Win Again at Traps

Out of the 22 registered tournaments held in Canada this year, Canuck Shot Shells cleaned up 10 Amateur Championships and 17 Professional Championships.

Year after year, this is the record of Canuck Shot Shells.



Out of the 886 shooters, competing in these 22 tournaments 536—more than half—shot Canuck Shells.

This is evidence of what both professional and amateur trap shooters think of the dependability of Canuck Shells. Let this be your guide in building your ammunition business. These are the shells your customers want–the shells that they can depend upon––the shells that make them satisfied ammunition users.

Check up your stock to-day, and if you are not carrying a complete line, place your order now for:

Weekly Paint Markets

Montreal

MONTREAL, September 21.—The sudden turn in the flax-seed market when a decidedly firm tendency developed after a period of an easier market, attracts attention in the paint markets. Linseed oil, after further receding in price made a total recovery during the past few days and although quotations are unchanged from last week, these prices are said to be very firm. The future of this market is still uncertain, with the new crop ussually offering an easier tone at this season, there are other factors in the market helping to form a stiffer tone. which may have a direct bearing on future prices.

There is still a strong tendency in the turpentine market, limited stocks and a good demand in the south holding the market in a firm position. Local stocks are at a comparatively low level, but owing to a light seasonal demand requirements are being taken care of from stocks on hand. A softer tone continues on import window glass, but this is offset by the inability of manufacturers at this source to make immediate deliveries. Shipments are expected to increase as the season advances, but at the present time local stocks will require considerable replenishment before the real active season commences, and this tendency is thought by certain importers to be sufficient to maintain a fairly firm market for earlier fall business at least.

FLAX SEED MARKET SHOWS TOTAL RECOVERY

Montreal.

A further decline in linseed oil prices to the extent of three cents per gallon earlier in the week, followed by a total recovery in the past few days, bringing prices to former levels, has been the trend of this product during the week. The easier tendency noted in the seed market, and the sympathetic tone in oil, came to an abrupt ending at the beginning of this week when an advance of fifteen points in the seed market was recorded in one day. Oil prices have shown only a three cents advance to date, while the above increase in flax-seed is equivalent to an advance of approximately eight cents. This would indicate that the oil market is now in a firm position, and in discussing this tendency with local crushers it is stated that they are now awaiting further developments before advancing prices to a level representing existing seed quotations. To some, the health of the present rapid rise in flax-seed is thought questionable, and a reaction in the near future would not be surprising, while others, admitting the extent of the gain was a surprise, state that the market during the coming weeks may be full of uncertainties and surprises. Although lower prices might naturally be expected, there is the strength of foreign markets, the unsettled condition now evident overseas, and the chances of a car shortage in the coming weeks to be considered, each of which might have a deciding effect on both flax-seed and oil prices.

LINSEED OIL—

	Raw	Boiled
1 to 2 bbl. lots, per gal.....	0 98	1 00
5 to 8 bbl. lots, per gal.....	0 96	0 98

Less quantities, add ten cents per gallon.

NO CHANGE IN PAINT AND VARNISH PRICES

At a meeting of the Canadian Paint, Oil and Varnish Association held at Toronto on Thursday of this week, it was decided that present prices should remain in effect, and that orders for spring deliveries be accepted on the basis of present prices with April 1st dating. It was claimed by some manufacturers that higher prices were justified owing to increased costs of many raw materials, but no definite action was taken regarding price change at the time. It was also decided to make representations to the Dominion Government regarding the sales tax, the application of which the paint and varnish manufacturers believe could be greatly simplified and improved. A committee was appointed to draft up the recommendations which are to be made to the Government. The details will be given publicity as the committee completes its work.

SLOWER DELIVERIES OF IMPORT WINDOW GLASS

Montreal.

While there is still an easier tendency in the Belgian market for window glass, owing to the low value of the franc, importers are now faced with the obstacle of deliveries from this source. Many factories in commencing operations after a cessation of activities during the summer months, are receiving orders which they cannot immediately fill. This condition is expected to be gradually remedied as the season advances, but in the meantime only part shipments are being made for immediate deliveries. Stocks locally are in fair shape, but the above condition offsets the softer tone on the import markets to quite an extent. Quotations locally on window glass are unchanged, with trade improving from week to week.

FIRM TONE STILL EVIDENT IN TURPENTINE

Montreal.

Current quotations on turpentine are unchanged, ranging from $1.65 to $1.70 per gallon in one barrel lots. The improved tone in this market continues, and at primary centres in the south an advancing market has been in evidence for the most part during the past week. Limited stocks and a particularly active demand, both domestic and foreign, are factors still reported as holding the market in a firm position. Also, there is the rail strike situation involving transportation difficulties which is still a handicap in distribution circles, and not only does this affect Southern markets, but locally available supplies are none too ample. Demand locally is seasonably quiet, and for this reason requirements are being taken care of from stocks on hand. Importers feel that the movement in the South will continue fairly good and a firm market tone will in all probability prevail during the ensuing weeks. Unchanged price levels are as follows:

TURPENTINE—

1 barrel lots	1 65	1 70
2 to 4 barrel lots, per gal. ..	1 63	1 68
Broken lots	1 75	1 80

IMPROVEMENT NOTED IN PUTTY MOVEMENT

Montreal.

There is a continued improvement in putty business, and sales are now commencing to reach satisfactory proportions. No further change has been made in quotations, and following are prices at recent revision:

PUTTY—

Standard, per 100 lbs.	5-ton.	1-ton.	Less.
Bulk barrels, 800 lbs....	$3 25	$3 50	$3 75
Bulk drums, 100 lbs.	3 75	4 00	4 25
Bulk drums or tins, loose 25 lbs.	4 00	4 25	4 50
Do., loose 12½ lbs.	4 25	4 50	4 75
Tins, cased, 25 lbs.	4 75	5 00	5 25
Tins, cased, 12½ lbs.	5 00	5 25	5 50
Bladder barrels, 400 lbs. ...	5 00	5 25	5 50
Bladder cases, 100 lbs.	5 25	5 50	5 75
5 lb. tins	8 00	8 25	8 50
1 lb. tins	10 00	10 25	10 50

Pure linseed oil putty, $1.25 per 100 lbs. advance over above prices.

Toronto

TORONTO, September 21.—A number of price advances attract special attention to the paint markets this week. Window glass, linseed oil and

The Barrett Company LIMITED

MONTREAL TORONTO ST. JOHN, N.B.
WINNIPEG VANCOUVER HALIFAX, N.S.

WEEKLY PAINT MARKETS

(Continued on Page 52)

turpentine each appear with higher quotations, and in addition to these developments, rumors are afloat of contemplated price advances on certain paint products.

The increase in linseed oil is primarily attributed to the sudden recovery in the flax seed market, which added considerable strength to the oil situation. However, in some quarters the health of the rapid rise in seed quotations is being questioned.

Slower deliveries of imported window glass have offset any tendency to weaken the current situation, while a marked improvement from week to week has placed local trade in window glass upon a decidedly better basis. The Belgian factories are reported as unable to immediately fill the orders they are receiving.

A firm tone is still evident in southern turpentine centres, and limited offerings, coupled with an active demand, have kept price levels up in primary quarters. There is only a fair call in domestic circles, but low supplies and delay in receiving further shipments have served to advance local prices.

UPWARD REVISION IN GLASS DISCOUNTS

Toronto.

Owing to the improved demand for window glass, prices have been advanced through a revision in discounts. The quotation on imported glass is now 15 per cent. off in lots up to twenty-five cases. Over that amount the prevailing discount is 20 per cent. A similar revision has taken place in prices on domestic glass, the level of five per cent. off now being in effect on smaller lots, while on lots of 25 cases or over the discount of ten per cent. is given. It is noted that the new quotations on imported glass apply west of Cobourg, Ont. East of that point an extra five per cent. is available. The seasonal movement of window glass is described as reaching good proportions, and distributors point out that this improvement has resulted in the current strength in the market tone. The revised levels are effective from September 19. Deliveries of Belgian glass are stated to be noticeably slower, while trade is improving from week to week.

RECOVERY IN FLAX AND LINSEED PRICES

Toronto.

Linseed oil prices present a see-saw motion this week, the recovery in the flax seed markets being responsible for a three-cent advance in oil prices. This offsets the decline recorded last week, of the same extent, but whereas linseed has exhibited a weaker tone during recent weeks, the opposite tendency is now apparent. The rapid rise in seed prices developed a corresponding strength in linseed oil, which brought a sudden reversal of previous conditions. It is stated that crushers have advanced prices and under the stimulus of a continued movement like the present, oil quotations may rise to even higher levels than those recorded below.

LINSEED OIL—	Per Gallon			
	Raw		Boiled	
1 to 2 barrels ...	1 00	1 05	1 03	1 08
3 to 4 barrels ...	0 99	1 04	1 02	1 07
6 to 9 barrels ...	0 97	1 02	1 00	1 05

Less barrels. 15 cents per gallon.

PRICES ON TURPENTINE AGAIN CLIMB HIGHER

Toronto.

Developments in southern turpentine production centres where a good steady demand is reported consequent upon the rail strike settlement, with the attainment of higher values, are described as responsible for a five-cent advance in domestic turpentine price levels. This change brings the local quotations between $1.80 and $1.90 per gallon in one-barrel lots.

Shipments to local warehouses are described as slow, and the present stocks are far from large. However, fresh supplies are stated to be on the way, and an improvement is expected in deliveries from producing centres from now on, due to the satisfactory settlement of transportation difficulties. There has also been a slight improvement in domestic requirements during the past few days. Following are revised quotations:

TURPENTINE—		
1 barrel lots	1 80	1 90
2 to 4 barrel lots.....	1 79	1 89
5 gallon lots	1 95	2 05

Less than one barrel lots, 15 cents per gallon extra.

SALESMAN IS REFLECTION OF HIS FIRM

(Continued from page 31)

spoke in a modulated voice that was especially pleasing to the ear. His manner was assured and yet deferential. What he said about his novelties was convincing.

Another good representative of his house called to sell me some printing. He was not a fashion plate. His clothes were a little rumpled, though clean. The impression that won me in his case was of painstaking desire to render the best service. The salesman made me feel that he and his house were sincere in their purpose to do more than ordinary printing. He gained my confidence, and I gave him an order for half a million circulars.

Most of the sales misrepresentatives I encountered were employees of retail stores, though twenty-seven of the eighty-nine were travelling salesmen.

One day I went to a department store to buy a rug. The motto of the great establishment was, "The customer is always right." I had made up my mind about the kind of rug I wanted. The salesman assigned to wait on me, however, did his level best to frustrate me in making a selection. He had his idea of what I should have, and he paid no attention to my preference. I went elsewhere and bought exactly what I wanted.

Attracted by an advertisement of business suits, I recently entered a clothing store. I was greeted most courteously by the chief usher, who escorted me to a floor-walker who also was cordial and polite. Then I was turned over to a smirking salesman. His courtesy was a sham. At the end of ten minutes of snippy condescension to my repeated insistence on a blue suit of rough goods, the salesman became disgusted with my obstinacy. He said to me, "I can fit your body, but not your mind." His attitude was a misrepresentation of the house policy of "Courtesy first, last and always." It spoiled all the good impressions made by the chief usher and the floor-walker. I bought my new suit in a competing store.

Few businesses seem to realize that their salesmen literally represent them in the views of prospective buyers. When a salesman presents himself before a possible purchaser, he stands in the place of his house. He typifies the business as the prospect sees it. Of course, it is unfair that a great firm should be judged by the impressions a single salesman makes, but the prospective purchaser reasons that the house selected the representative and that he mirrors his employer's policies. Justly or unjustly I have formed unfavorable opinions of eighty-nine businesses because their salesmen made poor or bad impressions on me. The misrepresentatives of the rug store and the clothing store cost their employers the profits on the two orders I placed elsewhere. They are expensive penalties for careless or indifferent selection and training of representatives.

Misrepresentation is usually due to ignorance or thoughtlessness somewhere. The house is to blame for not taking precautions to assure itself true representation in its salesmen. The salesman is to blame for not fitting his conduct and ideas to the policies of the house. Poor teamwork cannot get successful results.

Last week I had occasion to cash a check at a bank that advertises "Thank You" as its slogan. I was eighth in the line at the paying teller's window. The man behind the wicket was supercilious. His face expressed sneering aloofness. His treatment of the people who presented checks for payment was a direct contradiction of the "Thank You" sing-song he perpetrated when he pushed the money across the counter. The blunt-speaking woman just ahead of me turned and commented, "wouldn't you like to slap his face?" I nodded hopefully. I thought she might express herself to the teller, but she contented herself with a glare at him when he paid her check.

Norval Hawkins, the sales manager who built up the distributing organization of the Ford Motor Company, trained his salesmen for twelve years to observe a rule of representation that he expressed in a sentence:

"When you are talking to a prospect, speak and act as if Henry Ford stood at your elbow."

No salesman whose thoughts and conduct are in accord with that principle will be a misrepresentative of his house. No good sales executive will let a salesman say, "I represent" until he does.

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

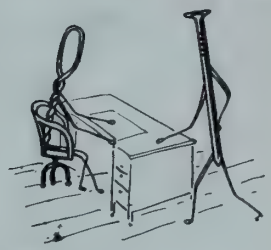
Feature the MONO-VAC

An Electric Vacuum Washer of Proven Efficiency at a Sales-making Price

Maxwell **Product**

Made-in-Canada

Features that make the Mono-Vac exceptional:
—Single large vacuum cup, of aluminum;
—Adjustable to size of washing;
—Heavy cypress tub **holds** heat, instead of radiating it as with metal;
—Driving gears under tub promote stability; all fully protected;
—Adjustable fourth leg, for uneven floors and draining off;
—Swinging, reversible quick-release wringer.



Attractive Folders (in color), for distribution to your customers, gladly supplied on request.

PNEUMATIC
WATER SUPPLY
SYSTEM

Gives country residents all the advantages of a city water system without the excessive cost

The wide-awake dealer will make big profits out of this system among customers who now have difficulty with their water supply. It is so simple to operate and costs practically nothing for upkeep.

The outfit consists of an air-tight steel tank which can be placed in the basement, and a "Myers" famous guaranteed pump (hand or power), suitable for pumping air or water, together with pipes and fittings. Any plumber or gas fitter can easily install it. Every outfit guaranteed to do the work for which it is designed. For small or large dwellings.

Write us for Water System Catalogue and prices. Now is the time to interest your customers.

The

STEEL TROUGH & MACHINE CO., Ltd.

Tweed, Ont., Canada

THE PROGRESSIVE MANUFACTURING CO.

Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Now is the Time to Buy—don't wait.

TINKER TOM'S TALKS.

NO. 377

What's Doing?

The Well-Posted Buyer looks for advance information at all times. He must be alert, yet cautious.

The Sheet Market is, of course, subject to the rise and fall of Ore, Pig Iron, Coke and Labor.

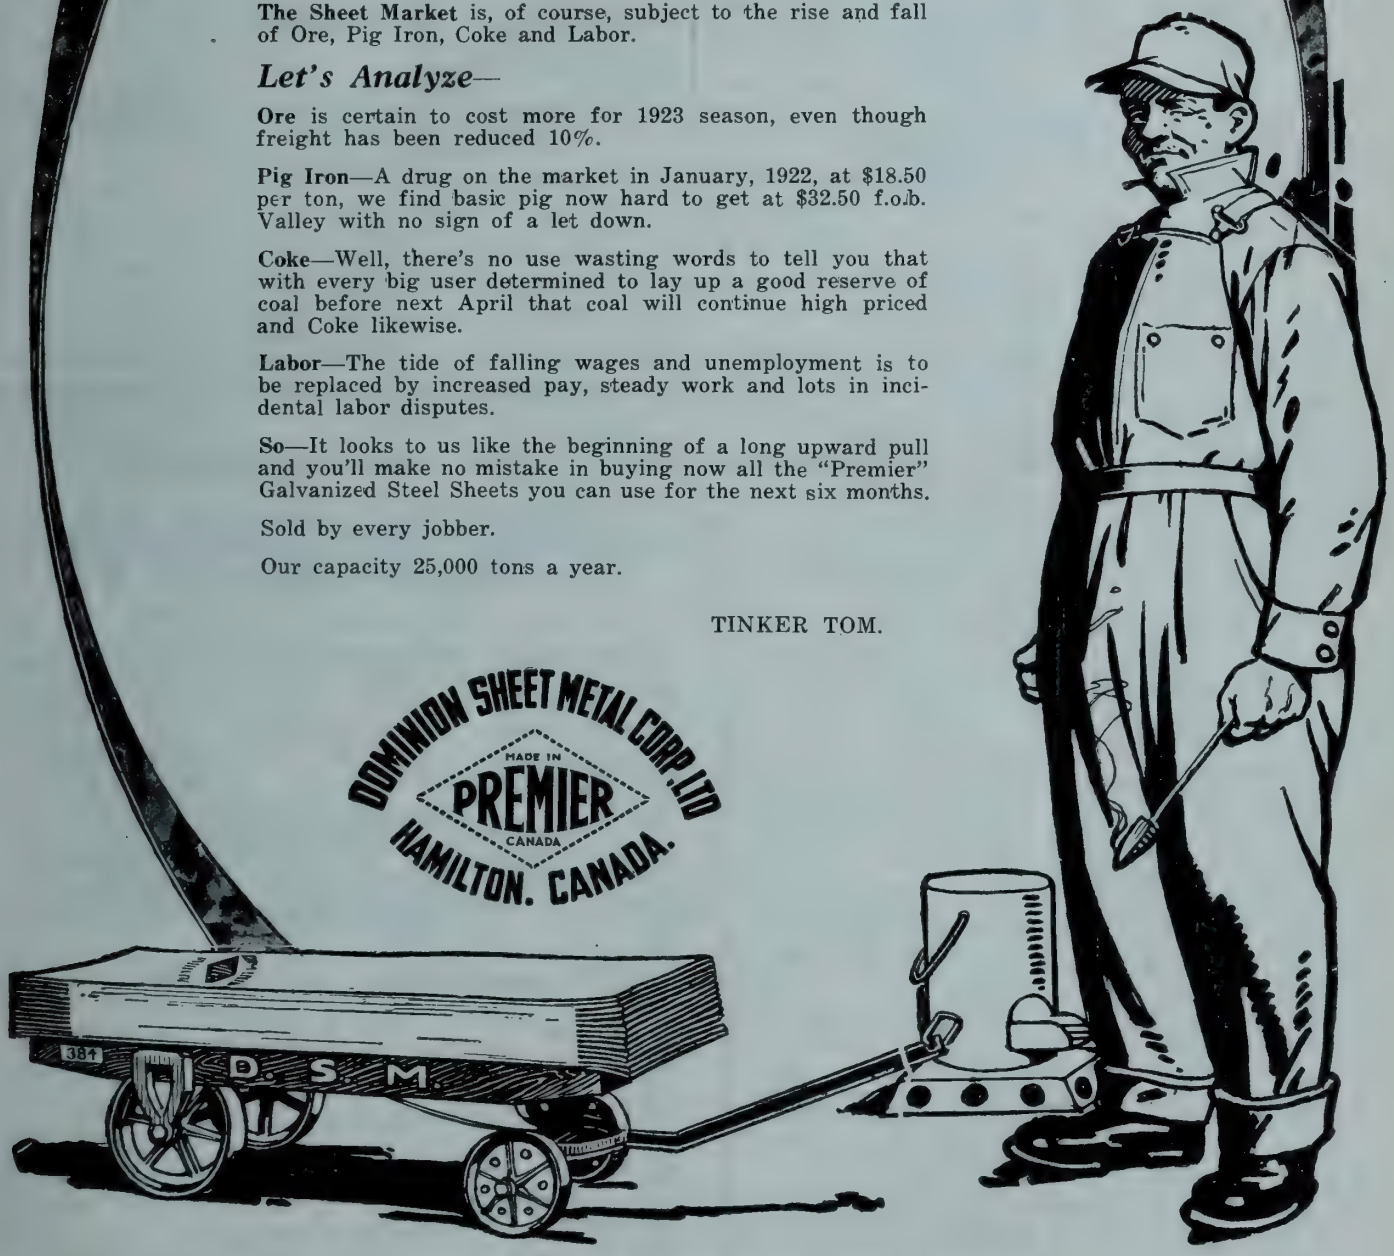
Let's Analyze—

Ore is certain to cost more for 1923 season, even though freight has been reduced 10%.

Pig Iron—A drug on the market in January, 1922, at $18.50 per ton, we find basic pig now hard to get at $32.50 f.o.b. Valley with no sign of a let down.

Coke—Well, there's no use wasting words to tell you that with every big user determined to lay up a good reserve of coal before next April that coal will continue high priced and Coke likewise.

Labor—The tide of falling wages and unemployment is to be replaced by increased pay, steady work and lots in incidental labor disputes.



So—It looks to us like the beginning of a long upward pull and you'll make no mistake in buying now all the "Premier" Galvanized Steel Sheets you can use for the next six months.

Sold by every jobber.

Our capacity 25,000 tons a year.

TINKER TOM.

Discards Reduced to a minimum

When you stock
STILL'S HANDLES

Every hardware man knows that his profits on handle sales can be greatly reduced if a portion of his stock is not saleable. You can eliminate these losses by selling "Still's Handles." We are handle specialists, and for your protection we stamp our name on all handles.

Losses on discards are reduced to a minimum when you stock "Still's" line of pick, axe, sledge, hammer, cant hook and peavie handles.

Ask for Discount.

Satisfaction and Profits

It is a pleasure to use the No. 1 Improved Double Needle Fire Pot. It quickly heats a pair of 12 lb. coppers and a pot of metal. Top section is removable. Burner and Pump troubles are overcome. Gas orifice is cleaned by upper needle, lower regulates, both are blunt, overcoming enlarged orifice and trouble caused in other makes having sharp needles. They save time, fuel and money. Jobbers supply at factory prices. Catalogue free.

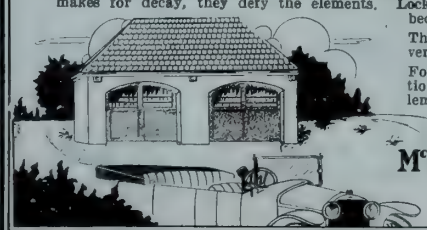
Why the Head Engineer Stands by "Maple Leaf" Belting

Sells Easily

Engineers everywhere have the utmost confidence in "Maple Leaf" Belting. It stands by them. It is reliable and dependable and can be trusted to fulfil its mission. That is why engineers use "Maple Leaf," and dealers find good profits and repeat orders.

The Dominion Belting Co *Limited*
Hamilton Canada



"Crown" Metal Shingles

You Can Safely Recommend them

For any and all kinds of building, for they have been scientifically constructed to adapt themselves to the most exacting roofing work. They are absolutely storm, water, fire and wind proof making the strongest metal roof in existence. Free from solder, exposed nails or anything that makes for decay, they defy the elements. Locked on all four sides they become a continuous piece.

They are easy to apply and are very attractive in design.

For details and any information on any sheet metal problem, write

McFarlane-Douglas Co.

"COLE" PATENT

AND

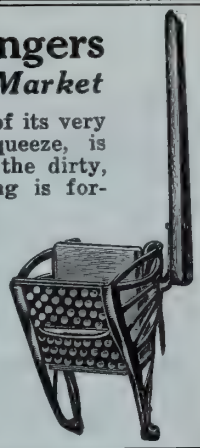
ACME

WOOD SNOW SHOVELS

Our "Cole" Patent shovel has a broad, curved basswood blade with sides reinforced with iron plate, steel tips and wood or iron D grips. They are especially desirable for shoveling off sidewalks and light snow.

In the Acme shovel lightness and strength are so combined as to give a most serviceable shovel for all uses. Steel tips and wood D handles, blades of basswood and finished in varnish.

Wood shovels for the kiddies also.



Send for catalogue and price list.

Rugg Ball Mfg. Co. Ltd., Ayer's Cliff, Que.

White Mop Wringers

Quick Turnover-Wide Market

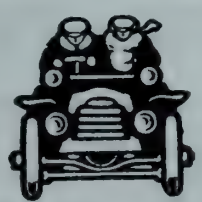
This wringer sells on sight because of its very evident merits. Has powerful squeeze, is built to last for many years. All the dirty, tiresome drudgery of hand wringing is forever done away with. Several family and janitor sizes. Send for catalog. Your jobber's salesman will take your order for White Mop Wringers. Write us for illustrated circular of complete line. **Made in Canada**

WHITE MOP WRINGER CO. OF CANADA

Factory: PARIS, ONT. Office: FULTONVILLE, N.Y.

GLAZIERS' DIAMONDS

A. RAMSAY, SON & CO. Head Office: Inspector St., Montreal. Branches: Toronto and Vancouver.



Every worth-while buyer reads your advertisement in

Hardware & Metal

The logical medium to use if you have a message for the Canadian hardware trade—you will create desire among the hardware buyers.

HARDWARE AND METAL is the only paper in Canada giving a weekly market service on hardware, metals, paints, varnishes and other lines allied with the hardware trade.

Also the only hardware publication in Canada with circulation audited by the Audit Bureau of Circulations.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

LUFKIN

COMBINATION SQUARES

LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS

JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.

On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

Exactly What He Wants!

The Correct Grade of Gargoyle Mobiloil

When the red Gargoyle sign and your attractive window display has induced the motorist to stop for oil, are you able to give him exactly what he wants and needs every time?

If you do, he will become a regular customer and stop frequently--not only for Gargoyle Mobiloil but for other hardware supplies.—And car owners are the best customers of many hardware merchants. A large automobile trade is nearly always an indication of good business and good profits.

Every car owner can be given exactly the oil he needs to lubricate his car in the most efficient and economical way, if you sell the five grades of Gargoyle Mobiloil. One of these five grades will correctly lubricate every type of automobile, truck and motor cycle.

You will receive frequent calls for each of the five grades and you can stock the complete Gargoyle Mobiloil line with the assurance that every item will bring you a quick turn over and that you will have no dead stock on your hands.

Be careful to give each of your customers the grade shown by our Chart of Recommendations. It is easy to do this if you hang up the chart in plain sight, where it is handy to get at.

The Chart of Recommendations prominently displayed will be a constant reminder that your store is lubricating headquarters. The Chart is recognized as an authoritative guide to correct lubrication.

The successful Hardware Dealer is the man who has wakened up to the fact that his profits come in the last ounce of the pound. He knows if he loses that, he is working for nothing.

The old-fashioned scale with its murderous "down weights" is like the unseen leak in the ship which if not stopped will sink it sure as fate. Hardware dealers cannot afford to give away fractions of ounces of nails, paint, putty, colours, rope, dyes, glue, etc., and you won't need to if you use the

INTERNATIONAL DAYTON Hardware Scale

This scale was built specially for the hardware trade. It provides both a rack for bulky goods or a scoop for small goods and shows you at a glance not only the correct weight to the fraction of an ounce, but the correct price, to the fraction of a cent—all ready figured out for you.

It's special "count-by-weight" device is invaluable at stock-taking time.

Let us send you a complete descriptive folder on the Dayton Hardware Scale. We sell this scale on easy payments without interest. Discount for cash.

Pullino Paint and Varnish off Your Shelves

A united industry is behind this big idea of developing Fall Painting and more Barn Painting.

It is to everyone's advantage.

Here are four of the action-breeding "Save the Surface" advertisements that will appear all over Canada this Fall. They are designed to pull Paint and Varnish off your shelves during the next months.

If all concerned get behind this big idea through the use of window displays, local advertisements, circulars and personal salesmanship, we will end up the drive to make 1922 the greatest paint and varnish year in a blaze of glory.

With banner crops money will be plentiful.

All together now for a big finish.

DON'T YOU PUT IT OFF — PUT ON A FALL PAINT CAMPAIGN

SAVE THE SURFACE CAMPAIGN

Selling Like Hot Cakes!

This will introduce to the Hardware trade our new SMP Hot Blast Electric Heater, which we are fortunately able to present at a time when a real, urgent need exists. They sell to the public at $5.00 in Eastern Canada. This low price, the efficiency and obvious splendid value of the heater has resulted in remarkably quick sales. They are selling "like hot cakes" and we are being taxed to our utmost to supply the heavy demand.

SMP *HOT BLAST* ELECTRIC HEATERS

This heater radiates the heat in all directions. It needs no extra wiring and is equipped with a heating element which we guarantee for a year. It cannot short circuit and has been fully approved by the Ontario Hydro Electric Power Commission (Approval No. 816).

They are light in weight, 12 inches high, and 8½ inches in diameter. The handle is always cool to the touch. They can be carried from room to room and connected by attached cord to any electric socket or plug. Each heater is equipped with 8 feet of electric cord.

Electric Heaters give quicker and more healthful results when there is moisture in the air. SMP Hot Blast Electric Heaters have a grill on the top where a kettle of water can always be kept boiling.

SMP Hot Blast Electric Heaters are selling very fast. We are convinced that immense numbers of them will be sold this Fall and Winter. Get your order in at once and so make sure of obtaining your supply.

Brass or Bronze
Weather Strip

Now is the time to display Weather Strip; chilly mornings make customers realize the early approach of winter and warn them to prepare. We stock the leading lines in Weather Strip and can ship promptly from stock. Herewith is shown the "Best," made of special metal and so constructed that it retains its spring indefinitely. It is made in 1 inch and 1¼ inch and 1½ inch widths.

Electric Heaters

Due to coal shortage Portable Electric Heaters will be sold as never before during the next few months. Aggressive merchants who go after this business, will find it very profitable. We stock all sizes and types of Electric Heaters and Electric Grates.

Majestic No. 7.

Ash Sifters

Daisy Banner Wood Sides and Ends

You may be quite sure that every last, least little bit of coal will be carefully hoarded this winter and that the ash sifter will be the hardest worked article around the house. This means business for you. Samuels' Ash Sifter is so easy to operate that a child can do it—and it is practically dustless.

Auto Tire Chains

Weed and Rid-O-Skid Tire Chains, cross pieces, hooks and missing links for repair. Are you prepared to handle the fall business in these accessories?

The Man Who Buys Paint Needs a Paint Brush

Many wide awake hardware men make it a point to suggest the purchase of a brush to every customer who buys paint—they find it pays.

Our stock of brushes is complete at all times.

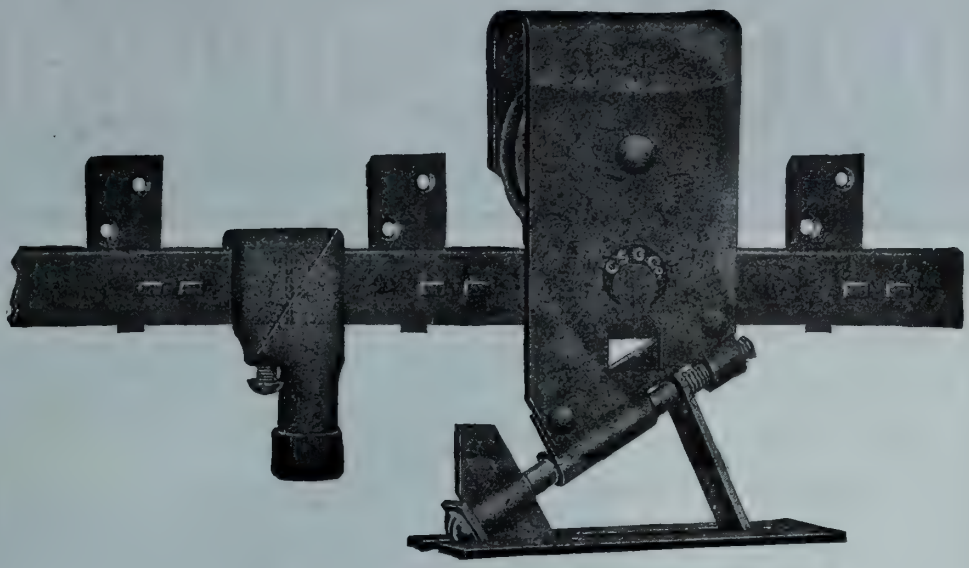
Your Jobber Can Give You or Get You
Bassick Casters

THE progressive dealer who has actually sold casters, not just matched a broken caster or filled out an odd set, has made Bassick Casters a fast-moving article to handle.

There are plenty of these dealers in the country and they have been making real money out of an item which hitherto was practically nailed to the shelf.



You can do the same. The next time your jobber's salesman calls, ask him to send you a line of Bassick Casters, which will meet all the requirements of any home.

These casters are properly packaged and popularly priced. They will prove a constant pleasure to your customers by eliminating the aggravations of the usually "neglected inch" shown in the illustration.

Bassick Casters

The "Superior" Parlor Door Hanger

Silence!

Day in, day out, for year on year, people move about the quiet house, casually opening and closing the sliding doors—casually, unthinkingly.

Noiselessly, smoothly the heavy doors slip backward and forward at the merest touch; no grating or jarring; no need for pulling and tugging.

For, out of sight and unnoticed, the "Superior" Parlor Door Hanger is functioning with smooth efficiency.

The Superior is fitted with fibre wheels operating on case hardened roller bearings. The bumpers are bound with rubber of extra heavy thickness and the adjustment screw—the simplest adjustment principle known—never fails to operate.

You can sell this hanger to every prospect who comes to your store.

Packed complete with track, screw, stops and guides.

Write to-day for catalogue and prices.

A Way to Sell More Starrett Ratchet Wrenches

You'll sell more Starrett Patent Ratchet Wrench sets if you play up its advantages to your garage and service station trade. Every auto-mechanic would like to own this tool but he's got to be shown that he's going to get his money's worth out of his investment.

We are showing him through the advertising in the magazines he reads—**you** can complete the sale by demonstrating the set itself to him.

You won't have to show him how useful the Starrett Ratchet Wrench will be to him—he can see its advantages at a glance. Show him the quality—the Starrett quality of every socket, handle and part of the 37 tools that make up this set. Show him the advantage of having a set that he can "treat rough" and yet be certain that it will be on the job for years to come. Show him that when he considers the actual service he will get from this tool—this Starrett Ratchet Wrench is the cheapest set he can get **at any price.**

Put a little extra effort on the auto-mechanic—he is your best customer for this tool.

Write for Catalog No. 22 M. A. and the Supplement describing the new Starrett Tools.

What a Money-maker for Dealers No. 4 has been

And no wonder! Only the cream of the entire Klein Plier line—a line that for 65 years has surpassed in quality—properly priced—backed with live advertising matter—goes into No. 4.

You can buy the No. 4 display board mounted with the six quickest selling patterns of Klein Pliers—the same board that has made the big No. 4 assortment a success—at $11.82 (F.O.B. Chicago) through your jobber, usual resale price $16.30 (F.O.B. Chicago).

Or, better yet, buy the complete No. 4 assortment, which includes a two-color No. 4 display board with 6 pliers already mounted, a stock of one dozen pliers, enamel blue steel sign, bronzite and two-color counter and wall displays—decalcomania transfers—window displays and counter booklets.

Only $35.00 (F.O.B. Chicago) through your jobber, usual resale price being $49.90 (F.O.B. Chicago).

Dealers have been making these two propositions a success for nearly a year!

Get YOUR No. 4. from your jobber today!

The quality in Klein pliers did not just happen. Many are the old employees that for years have been safeguarding in the forging, tempering and inspecting departments, the prestige of the name "Klein." Mr. F. Baumann is one of the old-timers. A few weeks ago he rounded out his *first 50 years with Klein!*

Cash In on the Coal Shortage!

Keep that Majestic Window for another week! It is your best Majestic Heater salesman—and will do a great deal toward helping you to cash in on the coal shortage. And if by any chance you did **not** have a Majestic window display during Majestic Week, it will pay you to put in a real, live window at once.

Thousands of folks realize the need for supplanting the use of coal wherever and whenever possible this winter, and sales prove that the Majestic Electric Heater is the popular substitute these cool fall evenings.

An attractive window display will serve to remind your customers to buy their Majestics early and get the good of them. Be alive to this extraordinary opportunity the coal shortage is placing at your door. Keep your Majestic Heaters moving. They should be your fastest moving stock just at present. And they will be if you keep them well displayed.

So it behooves you to get busy on that window display without any delay, if you want to really make the most of your opportunity to cash in on the coal shortage.

Galvanized Pails and Wash Tubs

We want to draw your attention to the quality of these Davidson Pails and Wash-tubs. The special hot process in which they are galvanized ensures the superiority and durability which are the outstanding characteristics of these lines. All seams are thoroughly well filled to avoid moisture collection.

Wash-tubs are fitted with wringer attachment and strong handles and can be had in four different sizes.

The pails are of a strong, serviceable weight and can be absolutely relied upon for all ordinary purposes.
The Davidson trade mark denotes quality.

TRADE FRAIM MARK

A Padlock of Cast Bronze

No. 848, Actual Size

Here is one of the long line of Cast Bronze Padlocks for which Fraim has been noted for these many years. Made of Bronze and Brass throughout, it is especially suitable for use where dampness or moisture demands a lock that **will not rust.**

The case and shackle are of heavy cast bronze. The shackle is securely locked at heel and toe and cannot be "rapped" open. No. 848 comes with two flat steel keys and No. 0848 with two malleable iron barrel keys.

The Price is Right—It Can Be Retailed for One Dollar

Send for our No. 28 Catalog, showing complete line of Fraim Padlocks and Night Latches.

Bob Says It's Great

Declares SELFBLO is a Wonderful Torch

Retails for $2.00
In Canada $2.50

Read What He Says:

After reading your ad. in Popular Mechanics I bought a SELFBLO alcohol Torch, and it sure does all you said it would. Some different from blowing your head off on a rubber tube. I was surprised to see how quick it blew such a hot flame. I believe it is hot enough for brazing. At least I'm going to try it some day. I'm glad to know that such a good tool has a trade-mark name, because I can tell my friends about it and know they will be sure to get SELFBLO. I wouldn't swap it for any tool in my kit if I couldn't get another.
Yours truly, Bob Mason.

There's a reason for what Bob says. Order six SELFBLOS from your jobber. They come packed in a handsome three-color counter display container, or write us direct for literature and prices. Order by trademark name SELFBLO. Our guarantee is your protection.

WAKYTE CLOSETS

A Real Sanitary Convenience

The Wakyte Closets are for installation where water works are not avaiable. It gives residents in such localities practically all the advantages and sanitary conveniences of an up-to-date plumbing system at a small cost.

A great number of dealers have built up a splendid business and are making money through the sales of the "Wakyte" Closet.

Surely you can do the same.

Write us for any further particulars.

We also sell the "Comfort" Weather Strip made from selected quarter-cut oak. A complete set consists of two pieces 7 ft. and two pieces 3 ft. long. Will appeal to all Buyers.

S. H. Whyte Mfg. Co., Ltd., Winnipeg, Man.

The Everlasting Veneer Toilet Seats

This is the strongest and cleanest toilet seat made. There are no cracks —made of 7 and 9-ply, air-seasoned wood veneer, held together by our special wood cement.
These seats are proof against heat, cold or dampness—will never crack, warp or split. They cost no more than the so-called "cheaper" toilet seats, and always bring repeat business.

Why Hardware and Metal has Such a Large Western Canada Circulation

THERE are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Western Canada.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh—and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the only hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

To Holders of Five-Year 5½ per cent. Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent. interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Dated at Ottawa, 8th August, 1922.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Vol. XXXIV. TORONTO, SEPTEMBER 30, 1922 No. 39

Smuggling of Auto Accessories?

Hardwaremen State Customers Openly Boast of Bringing in Goods Duty Free—A Matter That Should be Investigated

IF the undercurrent of dissatisfaction and complaint running through the hardware trade at the present time, is a true indication of the extent to which the motor accessory business has been disorganized through the alleged bringing into Canada, duty free, of motor accessories, it is certainly time the authorities took prompt and aggressive measures to stamp out the evil.

During the past ten years the hardware trade have gone extensively into the sale of motor accessories, tires, etc., and in a great many places are the leading distributors of these lines. A great many lines in motor accessories used here are not made in Canada and must of necessity be imported from the United States. There are also a great many lines of motor accessories which are made in Canada but similar lines are also made in the United States and retailed there at much lower prices than the retail prices in Canada.

Boast No Duty Paid

Retailers complain that the motor accessory business is suffering greatly through the public bringing in motor accessories duty free. There is a great amount of motor traffic back and forth between Canada and the United States. Many motor car owners are openly boasting in the retail hardware stores that they have brought in spot lights, footboard plates, stop lights, windshield cleaners, parking lamps, tires, and many other accessories without paying any duty, and for which they paid retail prices in the United States which make Canadian prices look ridiculous.

A retail hardware merchant stated to Hardware and Metal this week that one retail distributor of motor accessories has openly boasted that he makes periodical trips to the United States and returns with his car almost filled with motor accessories which he re-sells here at prices much lower than the prices quoted by the regular dealers who import their accessories in the regular way, pay duty on them, or buy them through established wholesale firms where the regular duty charges have been paid. This condition of affairs is not only meaning a great deal of loss of revenue, but it is creating a demoralized condition of business in many lines, and it is creating grossly unfair competition for established merchants who are conducting their business on a legitimate basis, paying duty and other charges which are a part of legitimate business.

False Impression Created

Not only is business being demoralized but a great many people who are bringing goods in this way are getting the impression that the retail hardware merchants and other distributors of motor accessories are securing exorbitant profits for the goods which they are selling. Many motorists have boasted that they not only purchase accessories for their own cars, but in many cases brought three or four extra of an article along, and have sold them at very low prices to their friends.

A hardware merchant while complaining about the evil, stated to Hardware and Metal that he recently visited the United States by motor, and returning through a point in Western Ontario with his motor car, he was amazed to find that the customs officers inspected only two out of five grips, and also only looked casually at two tires out of five tires which he had on his car. If this is the kind of examination which takes place in all cases, is it any wonder that huge quantities of automobile accessories are finding their way into Canada without duty being paid in the regular way, with resultant loss to the Canadian Government, and grossly unfair competition to established wholesalers and retailers of motor accessories who are attempting to conduct their businesses legitimately and on a basis which only enables them to secure a fair margin of profit on their investment.

These men have established businesses in Canada, they pay heavy taxes, they have their organizations for handling business as it should be handled if the laws of the country are rigidly adhered to. It is grossly unfair to these men if conditions of this kind can continue to exist. The duty should be either removed in all cases, thus affording Canadian distributors an equal opporttunity with the public for selling

Controversy Re London Situation

ON THE following pages will be found a statement from the President of the Ontario Retail Hardware Association, and also a statement by T. H. Purdom, on behalf of the London members of the Association. Since the first article appeared in the September 9 issue all parties have been allowed to give free expression to their views, because Hardware and Metal believes that an important merchandising principle is involved. The only restrictions made by Hardware and Metal, so far, have been the elimination of offensive personalities or anything which appears to us as being unfair and without a direct bearing on the case. This policy will be continued in connection with future reports.—Editor Hardware and Metal.

these lines, or it should be rigidly enforced in all cases and the clamp should be put on so tight that the general public will realize that if they wish to make purchases of this kind in the United States they shall have to pay duty in the regular way at the Canadian border. It is unfair to expect established merchants to pay duty and allow their customers to bring in the same goods without the duty.

Should Investigate Conditions

The customs authorities should give this immediate attention, should place extra officers if necessary to investigate this alleged condition and have it remedied without delay. Competition these days is keen for all classes of business men without having unfair competition of this kind. If duty is to be paid, let the tax fall upon all people alike. If goods are to be allowed free entry into Canada without customs duties of any kind, let the rule apply to all without discrimination of any kind. The merchant who buys legitimately, swears that his entries are correct and pays duty, should not be penalized because he is honest. He is penalized if he pays duty on these articles and the general public are allowed to bring them in free of duty.

It is hoped that the Customs Department will take such action as is necessary to promptly stamp out and eradicate the evil which it is claimed has already grown to large proportions.

Origin of London Trouble?

Sidelights on Affairs in London Twelve or Fourteen Years Ago When Signs of Friction Developed

HAVING passed through the usual preliminaries in a controversy such as that between the Ontario Retail Hardware Association, its London membership, and the Hobbs Hardware Company regarding the alleged retailing of goods at wholesale prices, the matter has now reached the point where the discussion will probably deal largely with the principle involved. In last week's issue Hardware and Metal stated that a phase of the matter has not been touched upon by either the Retail Association or the Hobbs Hardware Company. In a letter to Hardware and Metal this week, the President of the Ontario Retail Hardware Association deals with this principle, and has suggested that the matter be taken up by the Wholesale Hardware Association.

It was Hardware and Metal's intention to deal with the matter from this standpoint, but as the President of the Retail Hardware Association appears to have gone into the matter in detail, the question of the principle involved would seem to be the big issue from now on, and the smaller matters such as local discussions between the interested parties will pass into the background as not having any great bearing on the question as to whether or not a wholesaler should sell retail through a wholesale warehouse when not operating a regular retail store.

This is a matter of policy, which is of great interest to practically every wholesale and retail hardware concern across Canada. Further developments along this line will be watched with interest.

There is one phase of the London controversy which has not yet been mentioned but which Hardware and Metal believes should be mentioned briefly in order that those following the controversy, should have as much information as possible to enable them to arrive at a fair judgment regarding the statements and claims made by those who up to the present have taken part in the discussion. It appears that some years ago, probably dating back twelve or fourteen years, price cutting among the retail hardware merchants of London was the order of the day. There was keen competition among the merchants and an advertisement in the local papers one day in which a retailer quoted a price would probably be followed up the next day by another retailer offering similar goods at a lower price. The same condition applied in connection with window displays. As an example, one merchant dressed a window with charcoal irons which at that time were big sellers, offering them at 79c. each. Within a few hours another retailer on the opposite side of the street dressed a window with the same kind of irons and cut the price 5 cents per iron. This was followed by merchant No. 1 changing his price to a lower price than that quoted by No. 2. This procedure was kept up until both merchants were selling irons considerably below the cost price. The same thing applied to lanterns and many other lines which were sold by the hardware merchants. A London man whose work brought him in touch with most of the retailers in London hearing complaints from these various merchants when he made his regular calls at their stores, suggested that they adopt a more friendly attitude to each other, eliminate suspicion, and form an association in which they could get together from time to time to discuss their grievances and plan for bigger things in the hardware trade. After certain preliminaries it was arranged to get the London retailers together and form an association. This was done and after a few meetings most of the London retailers got on a basis whereby they arranged to eliminate price cutting and to standardize their prices so far as possible on a basis which they thought gave them a legitimate margin of profit.

Around this time (about twelve or fourteen years ago) there were some rumblings of complaints among the retailers regarding the Hobbs Hardware Company selling to factories and certain contractors. At this time the Hobbs Hardware Company took into their employ a man who had previously called on the contracting trade for one of the retail hardware firms in London. This man was sent out to call upon the contractors and factories trade. The reason given for this was that certain Toronto and outside firms were coming into London, taking business away from London because these larger firms from outside points were able to undersell the London retail hardware merchants and therefore they would not get the business anyway. With a widening breach between the retailers and the Hobbs Hardware Company nothing appears to have been done by either party to come to a definite and satisfactory understanding. A little diplomacy on both sides at that time would probably have prevented what developed later into seemingly hostile competition. It would seem as though both sides were at fault at that time as will be explained further on in this article.

There were at that time and still are, two wholesale hardware firms in London, at least two firms of wholesalers as recognized by the Canadian Wholesale Hardware Association. The retailers after forming their association, continued to hold their regular meetings in the warehouse of one of these wholesale hardware concerns. While there is nothing to show that any influence of any kind whatever was used by this wholesale hardware firm, and that they merely loaned their large reception room to the retailers for the purpose of holding their meetings, and that the matter was only done out of courtesy, the judgment of the retailers in continuing year after year to hold their meetings in a competitive warehouse rather than in one of their own stores or independent meeting place, would leave them open to considerable criticism and charges of lack of judgment if harmonious feelings were desired in London.

On the other hand some of the Hobbs

Hardware Company travelers while calling on the retail trade soliciting their business did not show any aggressiveness or special desire to either secure business or heal the breach which at this time was rapidly widening and which frequently meant that the Hobbs travelers went out of the stores w' empty order books and with a feeling that seemed as though an organized attempt was being made to withhold orders from them. The present condition in London shows what can develop from a lack of co-operation and poor judgment.

It will therefore be seen that in the origin of the present controversy there was fault on both sides. A little closer co-operation and a better understanding of each other at that time would have eliminated the present trouble.

Some of the retailers admit that poor judgment was used at that time and since that time in holding their meetings in the building of a competitive jobbing house, particularly when strained relations existed with the other house.

They feel, however, that they are suffering as a result of the indiscretion of the men in the early days of the association, most of whom are not now engaged in the hardware business. Some have since died and others have passed out of the retail trade.

It is interesting, however, that even in recent months the meetings have continued to be held in the same way and manufacturers when visiting London in connection with the present controversy were surprised to find that the meetings with the retailers where the matter was to be discussed were held in the reception room of a hardware jobbing house. This is merely touching upon a phase of the hardware trade in London which has not previously been taken up in any of the charges or counter charges and is merely a side light on the conditions which have existed in London for many years and which had their origin twelve or fourteen years ago. The question of policy involved in the controversy is another matter.

President of Retailers Puts Question Up to Canadian Wholesale Hardware Association

Replies to Article in Last Week's Issue of Hardware and Metal —Says Question of Principle Involved

Hardware and Metal,
Toronto, Ont.

Gentlemen:—I have just read in your issue of September 23rd, Mr. Whitwam's reply to charges made before the executive of the Ontario Retail Hardware Association at our meeting in September—charges in connection with the retailing of goods by the Hobbs Hardware Company.

It is quite evident that Mr. Whitwam is trying to evade the point at issue, and I am amazed to note that he endeavors with a series of generalities to discredit the statements made verbally before the executive of the Ontario Retail Hardware Association by three London and one St. Marys retail hardware merchants, and ten or more other well-established hardware merchants in various places outside of London who have made charges over their own signatures. Can it be possible that Mr. Whitwam expects the trade generally to believe his statement and discredit the statements of these fourteen reputable hardware merchants?

The evidence as laid before us shows that they do sell retail. Mr. Whitwam states that they sold $35,000 worth in the month of June and expect to continue to do so. Will the retail hardware merchants in Western Ontario stand for this unfair competition?

Mr. Whitwam's statements are so contradictory that it is hardly possible to make much out of them. However, the charges made before the executive of the Ontario Retail Hardware Association still stand and have not been disproven.

Says Principle Involved

Apart altogether from the special features of this case, let us deal with the principle involved. Has Mr. Whitwam forgotten the obligations of a hardware jobber? Has he stopped to think why it is that hundreds of manufacturers looking upon him as a legitimate jobber—supposed to be performing the functions of a jobber—give him special discounts ranging from 15% to 30% lower than retailers enjoy on the same goods, believing that for these special discounts he will perform—in return for them—the function of a real jobber—that of facilitating the transportation and distribution of his products between the manufacturers and the retailer?

Is it fair then, to these manufacturers or to the retailers who are asked to invest their money in the manufacturers' products, that a jobber given these special discounts in return for service, seizes the opportunity to use his wholesale warehouse for the handling of goods—absorbing these special discounts in a way that was never intended by the manufacturer and demoralizing trade in cities, towns and villages within a radius of many miles of what is supposed to be a jobbing centre?

Privileges at Stake

The retailers are not poor losers but they want all the trade to know that they are forced to fight competition which in their opinion is not legitimate owing to the mis-use of privileges which are allowed to jobbers for services other than that of retailing goods to the public.

Manufacturers who permit this inequality to exist cannot expect the retailers to invest thousands of dollars in merchandise—and then be faced with the competition of one of the jobbers who, through his recognition as a member of the Canadian Wholesale Hardware Association, is given special discounts, delivery terms and other concessions which are not extended to the legitimate retail hardware dealer.

I believe this is the first case where a concern looked upon as a legitimate hardware jobber has openly defied the Retail Hardware Merchants and stated—quoting his own words—"That they intend to go right along as they have been doing and the retailers can do whatever they like about it" — which means doing a retail business in a wholesale warehouse.

The annual meeting of the Canadian Wholesale Hardware Association is to be held in Montreal the first week in October and I feel that the retailers can justly ask them to go on record and state their position as regards the legitimate function of a wholesale hardware firm.

If the function of a recognized wholesale hardware firm includes the retailing of hardware to the general public through a wholesale warehouse which has not a separate retail store, then the trade should be advised to that effect.

If this is not considered good practice the Canadian Wholesale Hardware Association should go on record as condemning it and I am sending a copy of this letter to their president and secretary, hoping that they will deal with it.

If this new order of merchandising is to be continued it is up to the retail trade to find ways and means to meet this very unfair competition.

As president of the Ontario Retail Hardware Association I feel that Mr. Whitwam's statement demands an immediate reply, so I am sending you this letter, but this matter will be dealt with more fully in the near future at a meet-

ing of the Ontario Retail Hardware Association.

Yours very truly
George E. May,
President Ontario Retail Hardware Association.

LETTER TO WHOLESALERS

Following are the letters which have been forwarded to the secretary of the Canadian Wholesale Hardware Association:

Sept. 25th, 1922.

James Hardy, Esq.,
c|o James Hardy & Son,
Toronto Street, Toronto, Ont.

Dear Sir:—As the secretary of the Canadian Wholesale Hardware Association, will you kindly bring this letter to the attention of the Association which, I believe, are holding their meetings in Montreal the first week in October?

Yours very truly
George E. May,
President O. R. H. A.

Sept. 25th, 1922

The Canadian Wholesale Hardware Association, Montreal, Que.

Gentlemen:—The retail hardware trade in the Province of Ontario are quite interested and concerned over the action of a wholesale jobbing house in selling retail out of their warehouse, and I feel that the retailers can justly ask you to go on record and state your position as regards the legitimate function of a wholesale hardware firm.

If the function of a recognized wholesale hardware firm includes the retailing of hardware to the general public through a wholesale warehouse which has not a separate retail s ore then the trade should be advised to that effect.

If this is not considered good practice then the Canadian Wholesale Hardware Association should go on record as condemning it.

I am calling a meeting of the Ontario Retail Hardware Association in the near future and I would appreciate it if you could let me have your reply at an early date so that I could bring it before that meeting.

Yours very truly,
George E. May,
President O. R. H. A.

London Retailers Claim to Have Proof of Retailing

Produce Photographs of Sales Slips Said to Represent Retail Sales at Wholesale Prices

THE FOLLOWING letters have been received by Hardware and Metal from Thos. H. Purdom, Jr., Sec.-Treasurer of the London Retail Hardware Association. Mr. Purdom was one of the deputation of London merchants, members of the Ontario Retail Hardware Association, who waited upon the executive of the Ontario Retail Hardware Association as outlined in a recent issue of Hardware and Metal:

Editor:—

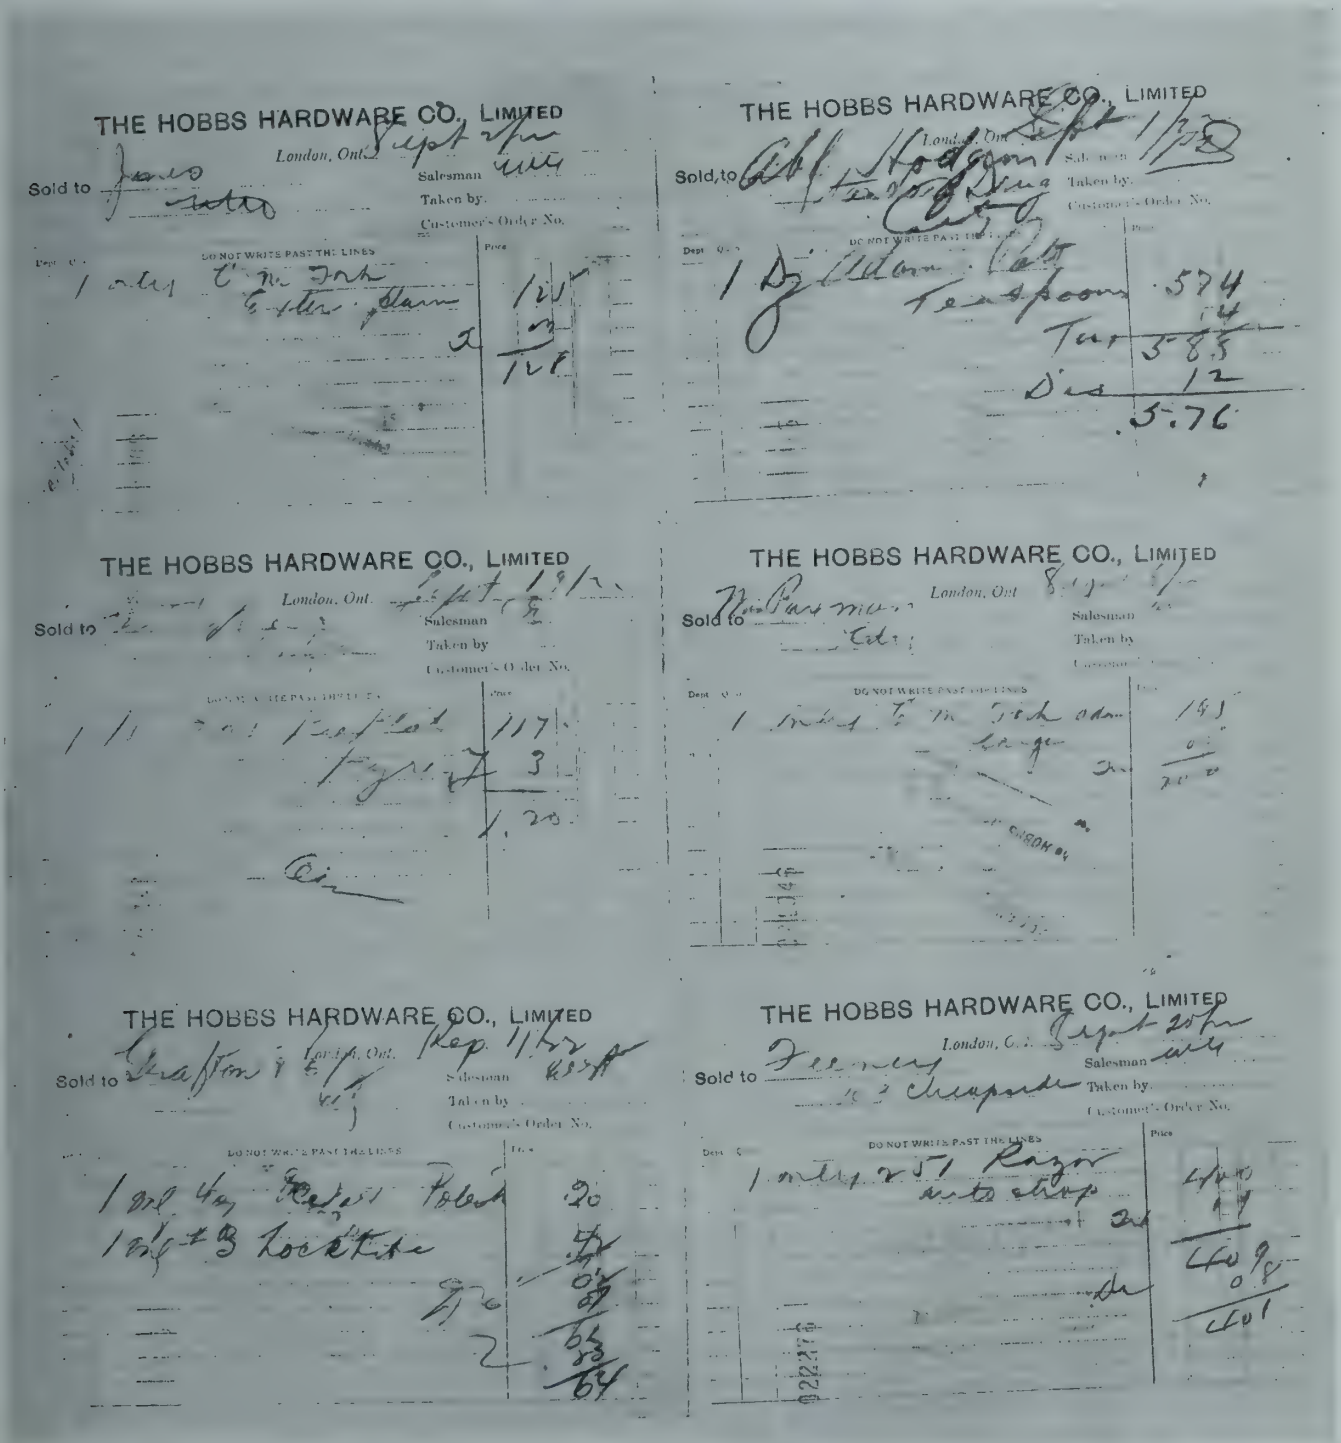
Hardware and Metal.

We feel it is our duty to reply to Mr. Whitwam's statements, and are also hav-

Reproduction of Sales Slips referred to by London retailers in Accompanying Article.

ing photographs taken of sales slips referred to in my letter.

"Unfair and Untrue" are not the proper words to use when Mr. Whitwam himself knows absolutely that the statements made before the executive of the Ontario Retail Hardware Association were more than fair and absolutely true, as we have receipted sale slips made out to the general public for the following:



Oneida Community Silverware.
1847 Silverware.
Pyrex Baking Ware.
Gillette Safety Razor.
O-Cedar Polish and Mops.
Auto Strop Razor.
Big Ben Clocks.

Mr. Whitwam calls the Retail Hardware men of London poor losers, but you can judge for yourself whether we are or not; all we ask for is fair play, and if we don't get it we will put up a fight for it, and we are sure that every manufacturer is with us.

You will notice in Mr. Whitwam's statement, he says his goods bear two marks. One is wholesale and the other one is retail price, and still he says he does not sell retail at all.

You will also notice he mentioned about a large contractor sending his man to get goods, and he asks to buy a jack knife, etc., and he says we cannot refuse to sell him; this is just a poor excuse and nothing more. Just imagine such a silly thing. You ought to go into the sales room and see for yourself as we have done, see the general public there buying everything from a needle to an anchor at wholesale prices. Ninety-eight and a half per cent. of these people have absolutely nothing to do with contractors.

Referring to the business done fifteen years ago has nothing to do with the present attitude that the Hobbs Hardware take out of this to-day, they are out to get the wholesale business and retail business too. They want the retailers to buy goods from them and they at the same time sell the goods to your

Reproduction of Sales Slips referred to by London retailers in Accompanying Article.

customers. It is just a question of whole hog or none.

With reference to T. H. Purdom making any statement to Mr. Whitwam about another wholesale house, meaning the D. H. Howden & Co., Mr. Purdom says that this is just a make up story on Mr. Whitwam's part, as the Purdom Hardware has been doing business with the firm of D. H. Howden & Co. for the past twenty-five years with the most pleasant relationship.

No promise of $100,000 worth of business, in fact no amount of business, was promised to the Hobbs Hardware Co., when we met them in their office, absolutely none. There was no talk of money at all, and in the next few months we gave the Hobbs Hardware $15,000 worth of business, and at the same time remember, they were also selling our customers at wholesale prices. Mr. Whitwam calls us poor losers because we complain about his firm taking the bread and butter out of our mouths. Can you blame us for complaining?

We never asked to have the contractors cut off when we held our meeting with Mr. Whitwam in his office; all we asked for was for them to stop selling to the general public and no response or heed has been taken, so therefore we are going to take this matter up with all manufacturers of hardware and ask for their support to stop this practice. "We are not poor losers, we are boosters for fair play."

We have had a photograph taken of the sale slips as positive proof of their selling to the public at wholesale prices. This matter will not be dropped until it is absolutely rectified.

Thos. H. Purdom, Jr.
Sec.-Treasurer.

Our Sales Policy

It is our policy to sell at Wholesale only. The question as to who is entitled to be considered as a Retailer is determined by the class of goods he carries on hand for resale.

A General Hardware stock is entitled to buy anything in our complete line, except Agency Goods in a town where an active Agency exists in any Agency Line.

Special Lines, such as Tin Shops, Grocers, Druggists, Jewelers, Garages, Sporting Goods Stores, etc., are entitled to buy at wholesale prices any class or line of goods that they have their money invested in or use in the conduct of their business.

Factories are entitled to buy at Wholesale prices such goods as they use for manufacturing their product or such tools as they use in the process.

Examples: Jeweler or Druggist buying Clocks and Watches, Chafing Dishes, Vacuum Bottles, etc., which are regular stock items with him, would not be entitled to buy at Wholesale prices for his own personal use or for use of his friends such items as Washing Machines, Lawn Mowers, Field Fence, Refrigerators, etc.

It is our policy that the Merchant in the town who has invested in this class of goods is entitled to the business.

A Manufacturer, as for example a Packing House, would not be entitled to buy at wholesale prices for the personal use of its hundreds of employes such items as a Cook or Heating Stove or a spade, Hoe or Rake—such sales are retail business, and as we have no Retail Department, or retail prices, we are put in the position of retailing at wholesale prices, if we allow such sales to be made, a position which is not only unfair to the established retail trade, but detrimental to the best interests of all, and at the same time causes a direct loss to our own house.

This policy applies both to the City and Country Trade. The special attention of City Salesmen and Employees is called to this policy because if carried to an extreme by the interchange of purchases at wholesale prices between jobbers and manufacturers of various lines, the time would soon come when the thousand of employees of such establishments would be getting their supplies at less than Retailer's cost and the successful continuation in business of retail merchants would be greatly handicapped.

Believing that all fair-minded Dealers and Manufacturers will see this policy in the same light that we do, and commend our position, we entrust each Employee to conduct himself in such way as will make every sale of our Company conform to this policy.

Townley Hardware & Metal Co.

Hardware and Metal reproduces here a Sales Policy of a United States hardware jobbing house, at the request of President May of the Ontario Retail Hardware Association. Mr. May states that he believes a policy of this kind would meet with the hearty approval of the retail hardware trade.

Binder Twine With or Without Profit

A SASKATCHEWAN hardware merchant has written Hardware and Metal regarding the sale of binder twine. Hardware and Metal will be glad to hear from other hardware merchants. The letter follows:—

The overhead cost of doing business to-day is just as high, if not higher than it ever was. At the same time the retailer's profit is lower than it ever was. This is caused to some extent through lack of confidence and co-operation among the merchants.

There is no reason why a merchant should be expected to handle any commodity without a reasonable profit, no matter how large or small the turnover nor the length of time it takes in turning over the goods.

At this time the writer has in mind Binder Twine which is only handled for a month in the year. We all know that it makes a large turn-over in a short period and can be handled on a smaller profit than goods that have to be carried month after month, year in and year out. But, why should it be handled with little or no profit when the investment is so large?

For the past ten years or so in a good many cases the profit on binder twine has been below ten per cent. and in most years nearer one per cent. gross profit, which is ridiculous.

Too many dealers have been handling twine simply as a service to the consumer or as a drawing card. In cases of this kind some dealers are apt to be left with a stock on hand to be carried for a whole year.

Lack of Confidence

The writer is not laying any blame on any particular merchants for the existence of this trouble for we are most all to blame. It may be a merchant in one town this year and in another town anther year.

The sale of binder twine is practically controlled by two concerns in Canada who set the price to the dealer at a profit to themselves. Is it not possible for them to set a minimum resale price to the consumer leaving the merchant sufficient profit to make it worth handling?

As retailers let us get together and arrange to handle this commodity at a profit and at the same time be fair to the consumer.

(Signed) A Subscriber.

Adcock & Company, Montreal, announce that they have just completed arrangements with the Iver Johnston Arms and Cycle Works, Fitchburg, Mass., whereby they will act as the Canadian representatives for this company.

Not Legal for Tinsmith to Make a "Still" Unless Properly Authorized

Special License With Annual Fee of $25, Also Bond of $2,000, Required by Inland Revenue Department—All Orders for Stills Must be Promptly Reported—Buyer Must Also Possess License to Operate Still

A FIRM conducting a tinsmith and plumbing department has written in to Hardware and Metal advising that they have been fined for making a still. Their desire is to secure information regarding their position in this matter, whether legal or otherwise.

In order to obtain a definite ruling on the subject, Hardware and Metal interviewed the collector, Customs and Excise offices, Toronto, and secured the following statement, which indicates that to conform to the law a special license is necessary before making any kind of a still, and such stills can in turn only be supplied to parties possessing the necessary license governing their operation.

"IT IS absolutely illegal for a tinsmith, or anyone else, to manufacture any kind of a still, unless they are protected through the possession of a special license authorizing them to perform such work," stated J. H. Bertram, collector, Inland Revenue Department, Customs and Excise Offices, Toronto.

Further questioning by Hardware and Metal elicited the information that "this is the law of the land, which has been in effect for thirty years or more, in fact ever since laws became generally recognized throughout Canada."

"Whether the tinsmith, or any other party manufacturing a still, knows the purpose for which it is intended to be used or not," stated Mr. Bertram, "it is a violation of this law, unless the tinsmith or party manufacturing the still has taken out a special license to do so."

Bonded for $2,000.00

"Such licenses are only issued to certain responsible parties upon payment of an annual fee of $25.00, together with a bond of $2,000.00."

"Under these regulations," continued Mr. Bertram, "they are required to report every single still they make and, of course, such stills are only to be made up for persons or concerns who possess special licenses to operate same."

"If a tinsmith or manufacturer holding a license to manufacture a still receives an order from any individual, this is reported to this department in the regular way and then, if such party does not possess a license to operate a still, it is confiscated by the government."

Must Report All Orders

"The purpose for which the still is to be used has no bearing on the case whatever," stated Mr. Bertram, in response to further questioning. "All orders received by anyone holding a license to make up stills must be reported to the Inland Revenue Department, and failure to do so involves a heavy fine as well as the revoking of any such license held by the tinsmith or manufacturer, as the case might be.

"The manufacture of stills by persons not properly authorized to do so invokes a heavy penalty by law, as this is a direct violation of the Statutes."

Information Available

Mr. Bertram further pointed out that these regulations were very strict in every sense of the word. "We do not receive very many inquiries of this nature regarding stills. The law regarding this matter has been in effect as previously pointed out for a large number of years."

A specially licensed tinsmith, making up a still for a properly authorized concern, would not be subject to manufacturers' sales tax, according to officials of the Customs and Excise Department, as in this case it is made direct and not for re-sale.

"The date of the order, the name of the party placing same, and all particulars are required to be reported to the Inland Revenue Department. Any person who is not absolutely clear upon any of the points involved can secure detailed information upon writing or inquiring at this office, but the law is plain, and there are really no technical points to clarify. It is illegal for anyone not possessing the proper license to make any kind of a still, and it is likewise against the law for anyone to order or operate a still who has not first taken the proper steps to comply with the license regulations."

Opposite Views Re "Sales Tax"

Retail Hardware Firms Express Views Regarding Application of Taxation—One Retailer Favors Collection of Tax by Retailers—Other Merchant Favors Tax at Point of Origin of Goods

VIEWS of many manufacturers, wholesalers and retailers, have appeared in recent issues of Hardware and Metal regarding the Sales Tax. Two of the letters received this week are from retail hardware firms, one in Alberta, the other in Nova Scotia. The Alberta merchant expresses the view that the tax should be collected at the point of origin of the goods. The Nova Scotia retailer is of the opinion that the tax should be collected by the retailers. Hardware and Metal will be glad to hear from other retailers regarding the points raised in the two letters which follow:—

Hardware and Metal,
Toronto, Ont.,

Gentlemen,—

RE SALES TAX COLLECTION

There is only one way to collect the Sales Tax regardless of what the rate may be fixed at and that is right at the point of Origin of the goods, from the manufacturer in the case of domestic goods and from the importer in the case of foreign goods.

1. This leaves no opportunity for pyramiding the tax as the present arrangement does.

2. It simplifies the work of every handler of merchandise in arriving at his costs.

3. It eliminates the duplication of Tax Reporting staffs that have to be maintained under the present arrangements.

4. It insures that the full tax is collected once but only once on all articles sold.

5. It will cost the Government less to collect the tax from the manufacturers only than from two sets of taxpayers. Possibly the saving in costs of collection will amount to more than the tax that the Govt. now loses on the jobbers' discount which seems to me to be the only point that Mr. Cluxton has made in his article in your issue of the 16th.

6. It would eliminate the present double tax on imported goods, once when the jobber passes them through customs and again when he sells them to his trade. It is going to be a long time before Canada or any other country is independent of imported goods and why they should be penalized as at present is unreasonable. Either put the regular tariff where it should be and eliminate the double Sales Tax or give them reasonable treatment.

(Continued on page 46)

THE SEAL OF APPROVAL

Read what well known hardware firms across Canada say regarding Hardware and Metal. Following are extracts from a few of the letters received regarding the Fall Buying Number:—

E. K. SPINNEY, LIMITED
Yarmouth, N.S.

"My experience with Hardware and Metal in the past has merited my hearty endorsement. There is no periodical of like character issued in Canada which conveys to the trade so clear and accurate a knowledge of business conditions in that connection."

Yours very truly
E. K. Spinney

J. S. MITCHELL & CO. LTD.
Sherbrooke, Que.

"In our opinion there is no better magazine to reach the hardware trade than Hardware and Metal. There are at least a dozen copies come into our store every week. Travelling salesmen each get a copy as well as the heads of the different departments."

Yours very truly
J. S. Mitchell & Co. Ltd.

WHOLESALE HARDWARE DEPT.,
HUDSON BAY CO.,
Winnipeg, Man.

"I would just as soon go without my breakfast as go without my regular weekly copy of Hardware and Metal. It saves me answering many questions by placing Hardware and Metal in the hands of our employees."

Signed: Mr. Lyon, Manager.

ROULEAU HARDWARE CO.
Rouleau, Sask.

"I find the 34th Annual edition of Hardware and Metal very beneficial to me as it covers important problems for every branch of the hardware trade. The advertisements in this big Fall number of August 19 are very good indeed, and often give suggestions which help to increase sales and keep me in touch with staple lines and manufacturers of same. The originator of the ad. on the front cover must be complimented."

Yours very truly
ROULEAU HARDWARE Co., Ltd.
Per. J. Nesbitt

W. C. AULD,
Youngstown, Alta.

"I have read quite a portion of your excellent Annual Fall Number and am particularly interested in the advertisements, the articles on store management, and the market reports."

Yours truly
W. C. Auld

McKENZIE & STEWART BROS.
Moose Jaw, Sask.

"I consider Hardware and Metal to be an invaluable aid to the Hardware trade. There is always something new to learn from every issue of Hardware and Metal."

Signed: Mr. Stewart.

W. H. THORNE & COMPANY, LTD.,
St. John, N.B.

"We are in receipt of the Fall issue of Hardware and Metal. We wish to compliment you upon the high class of all the advertising, the general make-up, and the information and opinions of the different individuals and organizations expressed throughout the issue. We look upon this issue with very much favor, and believe it is possibly your best production."

Yours truly,
W. H. Thorne & Co., Ltd.,
J. F. Tilton, Director

FLOCKHART BROTHERS
Sault Ste. Marie, Ont.

"We consider that you deserve great praise for the way in which you have gotten up the August 19th Annual Fall Buying Number. We find that your Hardware and Metal weekly is exceedingly useful to us, as it gives us prices on many articles that we continually buy. The supply and demand are usually forecasted, which is also an assistance to us."

Yours truly
Flockhart Bros.

BINNS HARDWARE
Newmarket, Ont.

"Your annual fall number of Hardware and Metal received and must say it certainly is a credit. The advertisements are particularly well displayed.

"The beautiful coloring on the outside cover is a work of art. Might say we value these numbers very highly, especially on account of the buying directory."

Yours truly,
G. A. Binns

JOHN BAILES & SONS,
Oshawa, Ont.

"We are very much pleased with your Fall Number of Hardware and Metal, and think it is the best you have ever gotten out. The cover is a work of art, and the advertising is most attractive, and we wish to congratulate you on such an excellent production."

Yours truly,
John Bailes & Sons

THE MACKENZIE HARDWARE CO.,
Kincardine, Ont.

"Your 34th Annual Fall Number has been received and has been read by all.

"The market reports are quite complete. The articles dealing with ad. writing, store management, paint and stove selling, are instructive and decidedly helpful. Particularly so is the article on efficient methods of controlling the business. The advertisements of the manufacturers are not only helpful in learning of the outstanding merchandise on the market, but give splendid suggestions for the retailer to follow in his own local advertising.

"Altogether we consider this a very helpful addition, which will be referred to many times during the coming months."

Yours very truly
A. C. Mackenzie.

R. HAWKINS,
Smiths Falls, Ont.

"I think your special Fall Number excels all previous issues. It contains much matter of interest to manufacturers, jobbers, travellers and retailers. The comprehensive market reports, the special articles, and also the opportunity for the exchange of views on matters of interest to those in the trade, and your fight for the interests of the Retail Hardware merchants, the splendid cuts and advertisements, the editorials, the artistic covers all combine to make a volume worthy of the high standard of MacLean's publications."

Yours very truly
R. Hawkins.

PORTEOUS HARDWARE CO., LTD.,
Grande Prairie, Alta.

"Your Annual Fall Buying Number is looked forward to by us each year with great interest. We recognize that the Hardware and Metal is a necessity to the retailer if he is going to remain in business and progress."

Porteous Hardware Co.

ADOLPHE HUOT, LIMITED,
Quebec, P.Q.

"We have received this number and are pleased to inform you that we have found same of great interest, and a number with such a make-up can only be of great interest to the trade. All sections of the paper are very interesting, and your company should indeed be proud of such a publication."

Yours truly,
J. Clifford Huot,
Pres. and Manager

THE CANADA PAINT CO., LTD.,
Montreal

"I take this opportunity of congratulating the editorial staff of Hardware and Metal upon the Annual Fall buying number which I consider the finest that you have ever turned out.

"The many suggestions for improved selling methods and the many articles on various subjects of interest and inspiration to the retailer, as well as wholesalers and manufacturers, cannot help but be of great value to your subscribers."

Yours very truly,
THE CANADA PAINT Co., Limited,
Royal Cluxton, Manager

THE SHERWIN-WILLIAMS CO.
OF CANADA, LIMITED
Montreal, Que.

"I wish to take this opportunity of congratulating you very heartily on the 34th Annual Fall Number, as I believe it represents the high watermark of excellence

with regard to your publication. The matter is excellent and has, I am sure, proved to be a mine of interest and information to the retailer. The quantity of advertising contained in this issue must also be a source of gratification, and in my opinion is an earnest indication of the improvement in general business conditions and a guarantee that in our own and allied lines of business we are on the broad path of progress and prosperity.

"With best wishes for your continued and well merited success," I remain,

Yours very truly
W. S. Fallis,
Vice-President and Man. Director

LACROIX & LEGER, LIMITED,
Montreal, Que.

"Congratulations on the whole is the only word that we can use for your 34th Annual Fall Buying and Directory Number, and I feel proud that this is a Canadian one."

Arthur Leger

GEO. E. POTTER,
Kitchener, Ont.

"Hardware and Metal is always welcome in our store and more so is the issue of August 19, the Annual Fall Number."

Yours truly,
G. E. Potter

T. I. THOMPSON, LIMITED,
Owen Sound, Ont.

"We wish to heartily congratulate you on the production of your 34th Annual Fall Number of Hardware and Metal. It exceeds anything we have yet received."

Yours truly,
T. I. Thompson, Ltd.

DUNDAS BROTHERS,
Cobourg, Ont.

"We wish to compliment you upon the very fine copy of the Fall Number of Hardware and Metal. This copy is well worth retaining as a guide for many lines likely to be purchased for the fall and winter trade, and should prove profitable to the advertiser as well as the buyer."

Yours truly,
Dundas Brothers

POOLE & THOMPSON, LIMITED
Montague, P.E.I.

"We are pleased to say that we consider your Annual Fall Number of Hardware and Metal as surpassing all your former efforts. We consider the advertisements very interesting and also the numerous articles with which the issue abounds. Careful perusal of those write-ups and interviews cannot help but be of value to any hardware and paint merchant.

"We continually refer to your latest market quotations and we consider them to be of inestimable value to us as to the prevailing market conditions."

Yours truly,
POOLE & THOMPSON, LTD.
C. C. Thompson

S. A. CROWELL & CO.,
Yarmouth, N.S.

"We consider the August 19th Annual Fall Buying and Directory Number of Hardware and Metal an especially valuable number."

Yours very truly
S. A. Crowell & Co.

J. HENRY & SON,
Orono, Ont.

"We received the copy of your Annual Fall Number, and found immediate use for some information that it gave us. It is very frequently referred to. We appreciated all the numbers, but we find this the best of all."

Yours respectfully,
J. Henry & Son

ADAMS & VANDUSEN
Picton, Ont.

"Copy of your Annual Fall Number received and we wish to compliment you on its make-up.

"We find all parts of particular value—it is hard to state which is the most.

"We enjoy the advertisements, not only for the goods advertised, but get ideas regarding display, etc., which are helpful to us in our own advertising. The articles on trade conditions, etc., by men who know what they are writing about, are of great value and interest. The whole number is interesting from cover to cover."

Yours truly
Adams & Vandusen

HEWITT & BLACK, LTD.
Medicine Hat, Alta.

"Our opinion of the 34th Annual Fall Buying and Directory Number of Hardware and Metal is that this issue is newsy and full of interest to those who like the hardware business, and the front page is particularly attractive. The advertisements are full of many of the lines that we should have in our store ready for the first call that we have on them for the fall rush.

"We keep these issues from year to year and refer to them during the year when some lines are called for and we know then just where is the best place to buy them."

Yours truly
HEWITT & BLACK, Ltd.,
R. C. Black
Signed. Mr. Lyon, Manager

BOX BROTHERS, LTD.
Souris, Man.

"The Fall Number of Hardware and Metal is very nice and complete and we congratulate you on getting out such a fine edition and on getting such a nice line of advertising. The most valuable pages are the "markets," which allow us to check up prices each week on a good many commodities."

Yours respectfully,
Box Bros., Ltd.

THE KINGAN HARDWARE Co., Ltd.
Peterborough, Ont.

"We are in receipt of your Hardware and Metal Fall Buying and Directory Number. May state it is a very interesting one. It should be in the hands of every hardware man."

Yours respectfully,
The Kingan Hardware Co., Ltd.

J. W. FLEMING & SON
Blenheim, Ont.

" We think the 34th Annual Fall Buying Number of Hardware and Metal a very valuable issue to the buyer. It is full of useful information."

Yours truly
J. W. Fleming & Son

GIBBS, BROWN & ODELL, LTD.
Hanna, Alta.

"The market reports are the most interesting to us and other reading matter. The advertising is good and the window illustrations are excellent. The cover is attractive."

Gibbs, Brown & Odell, Ltd.

ALF. OUTRAM
Port Hope, Ont.

"We beg to state that the Fall Number of Hardware and Metal is very instructive and interesting, and we congratulate you on such a fine book."

Yours truly
G. A. Outram

BOYLE & SON,
Napanee, Ont.

"The Fall Number should be a great help to all buyers, and the cover is a work of art. Too much credit cannot be bestowed upon you and your staff. Keep up the good work."

Yours truly,
Boyle & Son

A. R. A'BEAR,
Montreal, Que.

"I am delighted with the Annual Fall Issue of Hardware and Metal, and the information contained therein is most useful to every hardware dealer."

Yours sincerely

Price Cutting

THERE is a great deal of price cutting in the hardware trade at the present time. On many lines it is almost impossible to tell what is a fair and reasonable price. One of dozens of lines which might be referred to at the present time are wire nails on which there is a wide range of prices. At least one manufacturer has been selling wire nails direct to the retail trade at a price of 25c per keg lower than what has been generally considered the prevailing price for wire nails at the present time. Whether or not those firms asking the higher price are getting what might be called a long price, or whether the manufacturers selling at the lower price are selling at a loss, or on a very close margin, cannot fully be determined. A very unsettled feeling is created when conditions of this kind exist, and many retailers by keeping in close touch with market conditions are securing some very favorable prices. On the other hand it is known that some retailers have made heavy purchases on certain lines and the question arises as to whether or not they will be able to turn over the goods in a sufficiently short time to enable them to secure any advantage through the price concession which they secured by purchasing large quantities.

Beware of Baits

AS USUALLY happens when there is keen competition and an abundance of goods, many new firms have recently sprung into existence and are offering what are represented as great bargains to the hardware trade. In some cases catalogues, circulars, etc., are sent out, and from their careful preparation give the impression that certain well-known standard brands are being offered at exceedingly low prices to the trade.

A careful study of some of these descriptions show that there are loop-holes, and a purchase of the goods often proves to the merchant that he is not getting the particular brand of goods which he thought were offered in the catalogues or circulars which he received.

There are, on the Canadian market at the present time, a great many brands of inferior German and other lines which are very close imitations of some of our well-established, well-known products which have given satisfaction over a period of many years. It is therefore of the utmost importance that retailers should study carefully all sources of supply, and not be tempted by baits which are offered by comparatively unknown concerns, to purchase goods which may not give satisfaction. This is a time when close attention should be paid to purchases. There are many well-established reliable concerns whose integrity cannot be questioned, and who are in a good position to supply all the legitimate requirements of the trade. It is quite true that retailers must buy to the best advantage, but this is a time to beware of what appear to be tempting baits, but in reality are the offerings of concerns which are here to-day and gone to-morrow. Frequently their main object is to make a clean-up on some special importation which they have bought cheap and on which they hope to make a good killing while the going is good.

A Feature of This Issue

THIS issue of Hardware and Metal contains extensive matter of marked interest to furthering of paint and varnish sales. Many merchants will keep their copy on file where it can be readily referred to for the valuable information contained both in its editorial and advertising pages. No effort has been spared to make this issue a success. What the "Save the Surface" campaign will do for the retail merchant who links up in conjunction with this national movement is clearly indicated in the many striking examples of those who have increased the sales of paints and varnishes and considerably enlarged this department of their stores through adopting these methods. And what the retailer in general is accomplishing for the "Save the Surface" idea is also readily apparent, for it is the spreading of information and propaganda of this nature which will bring the general public to a realization of the vital need for "Saving the Surface," and teach their revised version of "Why We Paint," not for its decorative results alone, but for its preservative and protective value.

Waste Advertising Appropriations

THAT AN association organ should be that only and not pretend to give service to advertisers is the important principle which has been adopted by the Associated Advertising Clubs of the World in regard to "Associated Advertising" which in future will not sell space. This decision by an organization of leading American financial, manufacturing, mercantile and other business concerns is a highly important one in the field of advertising and publicity.

Congratulations to the Associated Advertising Clubs in taking this stand are offered by Printers' Ink which points out that the Clubs "can now take a fearless stand in their opposition to nondescript mediums which are organized and conducted solely for the purpose of producing revenue and for which there is no real need in the field."

Particular emphasis is laid upon Trade Associations as offenders in this respect. We read:

"Trade associations have been our greatest offender in this respect. Advertising-soliciting organs of this sort are started for many reasons, but generally with the hope that the revenue thus raised will help to defray the expenses of the Association. Thus the organization launches itself into a separate outside business about which it knows nothing and which it conducts merely as a side-line. The fact that in most cases these publications are money-losers does not deter others from trying to be the exception.

"From the advertiser's standpoint, the greatest objection to nondescript mediums is that they subtly dissipate appropriations. In one guise or another, these mediums levy peremptorily on the advertiser's funds and thus exhaust appropriations, leaving the advertiser with the mission of his selling campaign unaccomplished. This is one of the most crying evils in advertising. The Clubs and in fact every legitimate advertising interest, should join hands to stamp it out."

Keep the Slogan Intact

Honor The "Save the Surface" Design

By WM. C. DOVER, Associate Editor, Hardware and Metal

IN THE "Save the Surface and You Save All" campaign, there has developed a movement bringing material benefit and emphatic gain to all sections of the paint industry. These beneficial results have accrued to all in proportion, according to the share of co-operation and support with which they endorsed the undertaking.

It is also noted that up to the present, the "Save the Surface" idea has received the unanimous approval and enthusiastic backing of practically all associated in any way with the paint and varnish industry from the largest manufacturer to the smallest retailer. Each in turn, have felt during the past few seasons since its birth the evident results of the campaign, which has obtained a fair measure of success.

This colossal and uniform endeavour to "Save the Surface" contains as its basic foundation the "preservative value of paint." The preservation of property through the protection of adequate coats of paint, is the keynote of the campaign, and the objective is to spread this knowledge broadcast to the remotest corner of civilization, until it not only becomes a household word but is also a universally accepted truth. And in emphasizing the protective qualities of paints and varnishes, there has indirectly resulted an immense saving to the Dominion of Canada, and consequent benefit to the community at large through enhancing and insuring in this manner the value of property from coast to coast.

THE "Save the Surface" campaign has tasted the sweets of the fringe of success, but there yet lies ahead a tremendous amount of educational work to be done before the full glare of the spotlight of complete accomplishment will be directed upon this movement. Therefore, any adverse or thoughtless action that may tend to handicap the forward march of progress in "save the surface," will also unconsciously yet automatically mar the present effect and detract from the good that has already been accomplished in this direction.

As duly representative of this cohesive effort on the part of an international industry, certain distinguishing marks and an impressive slogan have been adopted, which have both become universally recognized as associated with this idea, and with that movement only. Founded upon such idealistic motives and with the endowment of special characteristics outlined herein, the "Save the Surface and You Save All" campaign rapidly advanced from the embryo stage, until today it contains promise of being able to develop — during the ensuing years—into an outstanding achievement in the business world.

ANYTHING which would tend to postpone the stage of accomplishment would no doubt be uniformly regretted by all associated with the paint industry. Any move, however innocent, which might detract from the future possibilities of furthering the aims of "Save the Surface" would undoubtedly be avoided by all connected with the idea and who have in any way felt the encouraging influence of its work. It is certainly to be regretted therefore, that signs have recently developed which indicate that the former uniform aim of the paint industry of this Dominion is in danger of being sidetracked through the unconscious preference for individual gain. However unwittingly any such action has been undertaken by the individuals concerned, the harmful effects of this development are nevertheless apparent. Undoubtedly any such action is merely a reflex of thoughtlessness on the part of those who may attempt to copy or misuse in any way the specific mark and slogan which is the identical property of the "Save the Surface" idea alone. But the fact remains that to utilize this distinguishing mark in any other manner than the original way for which it was primarily conceived, is to misappropriate the reward for the years of effort which have been put into this movement and the investment and organization which lies behind it.

The principle underlying the "Save the Surface and You Save All" could have been—perhaps also as literally—appropriated by other industries with possibilities of more or less success. Producers of facial and massage creams and other toilet preparations could have utilized this slogan. Again, it might have been aptly adopted by those interested in the sale of fertilizers designed for the saving of the soil, or the preservation of other matters. Boot and shoe manufacturers might have copied this Saving the Surface idea with only a slight variation in its characteristic truth to suit their own particular needs. Makers of floor coverings, linoleums and rugs had the same opportunity to copy the results and to garner the heritage of the paint and varnish industry. Dry-cleaning plants might have also adopted some partial formation of this specific mark and theory, for the general applicability of the slogan to other fields of endeavour in no way detracts from its effectiveness if applied to the needs of only one particular line at a time.

BUT no. They one and all allowed the "Save the Surface" idea in its entirety to remain intact; the sole possession of its originators. The movement, the slogan and the trademark each received the esteem and careful observance of other branches of commercial enterprise.

That such idealistic instincts should be reflected throughout the length and breadth of business in general, without any forcible supervision from those most directly concerned, should surely serve as an object lesson to guide the erring footsteps of those who might have gone astray within the paint industry itself, to a realization of the false atmosphere which surrounds any action of this nature. A review of the attitude adopted by other manufacturers merely emphasizes the impression which is being made by those who may be unwittingly encroaching upon possessions of the industry as a whole.

To find the first serious attempt at copying and utilizing the specific marks belonging to this idea being employed for individual purposes by those within the paint industry itself, who are in a position to know the entire facts in connection therewith, is doubly surprising. And the obvious conclusion is that this has been done—perhaps hastily—without due consideration. It may just be the mistake of innocent supporters whose viewpoint has not yet been tempered sufficiently by experience.

LET us for a moment consider the policy laid down by the advisory board of the "Save the Surface" campaign, stating the conditions under which the use of the slogan and design is permitted.

In paragraph One is noted the following excerpt:—"In order that no one individual, firm or corporation may appropriate a benefit which is intended tot be enjoyed by the entire industry, the use of the "Save the Surface" slogan (words or design) in any form—partial, complete, paraphrased or imitated—is unethical, illegal and strictly prohibited."

While in section Three, the following sentences are of importance and bear directly on this situation referred to:—"The slogan, where used, ... must always be in its standard form, with no change in wording. No additional words may be included within the design (sweep of the brush)."

THE future legitimate expansion of the "Save the Surface" campaign is threatened by even any suggestion, however slight, of action contrary to these instructions. If the valued work of the "Save the Surface and You Save All" movement is to continue untrammelled toward its goal, all forces and sections of the paint and varnish industry should unite in rescuing its slogan from the false clutches of imitation. If the merited rewards for the past few years of untiring effort are to be experienced and enjoyed in their full measure by all associated with the influences of the idea, then a unified and bold front should be presented against the threatened invasion of traditional rights. To the individual, to the various units and to the organization, the call goes forth:—"Save the 'Save the Surface' slogan and trade mark, or lose all the blossoms of the past, the bloom of the present and the buds of the future."

Do You Co-Operate With Your Salesmen?

Here is a Suggestion for the Merchant in Getting in Closer Touch With the Employees—To Help the Sales Force Get the Spirit of Their Employer—Transferring the Merchants' Enthusiasm to All Associated With the Store

DURING recent years Hardware and Metal has given prominence to a large number of articles showing why retail clerks should co-operate with their employers. This question has been discussed from various angles, many of these having appeared in the special department, "For the Man Behind the Counter."

This article, however, is intended primarily for the merchant, suggesting closer co-operation with the employees—making semi-partners of the sales force and enabling them to catch the spirit and enthusiasm of their employer in reaching the goal desired.

MERCHANTS who have been conspicuously successful frequently grant interviews to magazine or newspaper representatives, and these interviews provide interesting and beneficial reading for other merchants. An interview that probably has impressed many merchants was published recently, quoting a nationally prominent merchant as saying that he attributed his unusual success to "the co-operative idea."

This merchant said he ascribed the success of his business to his happy faculty of being able to secure co-operation from his clerks. No matter how many sensible selling plans he evolved early in his business career, this merchant found the results disappointing. For some reason the plans did not work out as well in actual practice as he had expected while mapping them out with his pencil. Careful scrutiny of the plans "before and after taking" convinced this merchant that every plan had been practical. He sought the reason for their failure and decided that his sales force had not caught the spirit of their employer.

Setting the Goal

As soon as he was convinced that he had located the trouble this merchant systematically began transferring some of his own enthusiasm to his sales force. Peppery bulletins were distributed among the employees. Gradually the salesmen caught their employer's viewpoint and they "got wise" to the goal their employer had set for his organization. A remarkable increase in sales was evident within a week and this increase remained in evidence until this merchant retired from business.

Another merchant who was experiencing difficulty in getting his sales force to co-operate evolved a scheme that proved surprisingly efficacious. His plan undoubtedly will prove interesting and suggestive to other merchants similarly situated.

First, this merchant set a goal for himself and for his sales force.

He called his salesmen together in the rear of the store one dull afternoon and asked every employee to come to the store next morning just five minutes earlier than usual. He requested every employee to bring with him just one suggestion that appealed to the originator as likely to increase the store's sales next month.

A Good Resolution

Next morning the merchant was momentarily disappointed when only one salesman responded to his request for the suggestions he had asked for the day before. It developed, however, that the salesmen had arranged to meet the night before to "get together" on a practical plan for swelling the store's sales. The salesman who responded had been appointed spokesman for the entire sales force, and the plan he unfolded before his employer had been evolved by all the salesmen the previous night.

These salesmen had unanimously adopted a resolution that they would exert every effort in future to keep in mind that every customer coming into the store represented a definite investment by the store.

For instance, the salesmen figured that it cost the store $1,100 for overhead expense, which included advertising, lights, water, heat and rent. With this monthly expense of $1,100 as a basis, the salesmen decided that if 2,200 customers came into the store during a month, each customer represented an investment of 50 cents.

Every salesman in the store resolved that he would sell every customer at least enough merchandise to offset this investment of the store. Strict adherence to this resolution to interest every customer in sufficient merchandise to cover the store's overhead expense on him has resulted, the merchant says, in a very perceptible increase in sales. Naturally the salesmen do not achieve their ambition with every customer, but that unanimous resolution has had the effect of indelibly impressing upon every salesman that it costs the store something to "wait on" a customer.

This same group of salesmen later resolved that too few customers came into the store. Realizing that an increase in the number of customers meant a decrease in the store's overhead expense on each customer, the salesmen evolved a plan to induce more customers to enter the store.

Each week every salesmen jotted down suggestions for window displays. These were turned over to the men detailed to arrange the displays, and records of the store show that more than 50 per cent. of these suggestions have been adopted. Records also show that a marked increase in the number of customers has been registered. As no increase in advertising appropriations was made, this co-operative window display idea is entitled to the credit.

This spirit of co-operation has now extended to other phases of the business. A salesman who succeeds in selling a difficult customer "tips" off his fellow salesmen concerning his method. Re-arrangements of stock occur frequently and every change soon is conceded to be an improvement. Suggestions from the salesmen in this store have revolutionized the business.

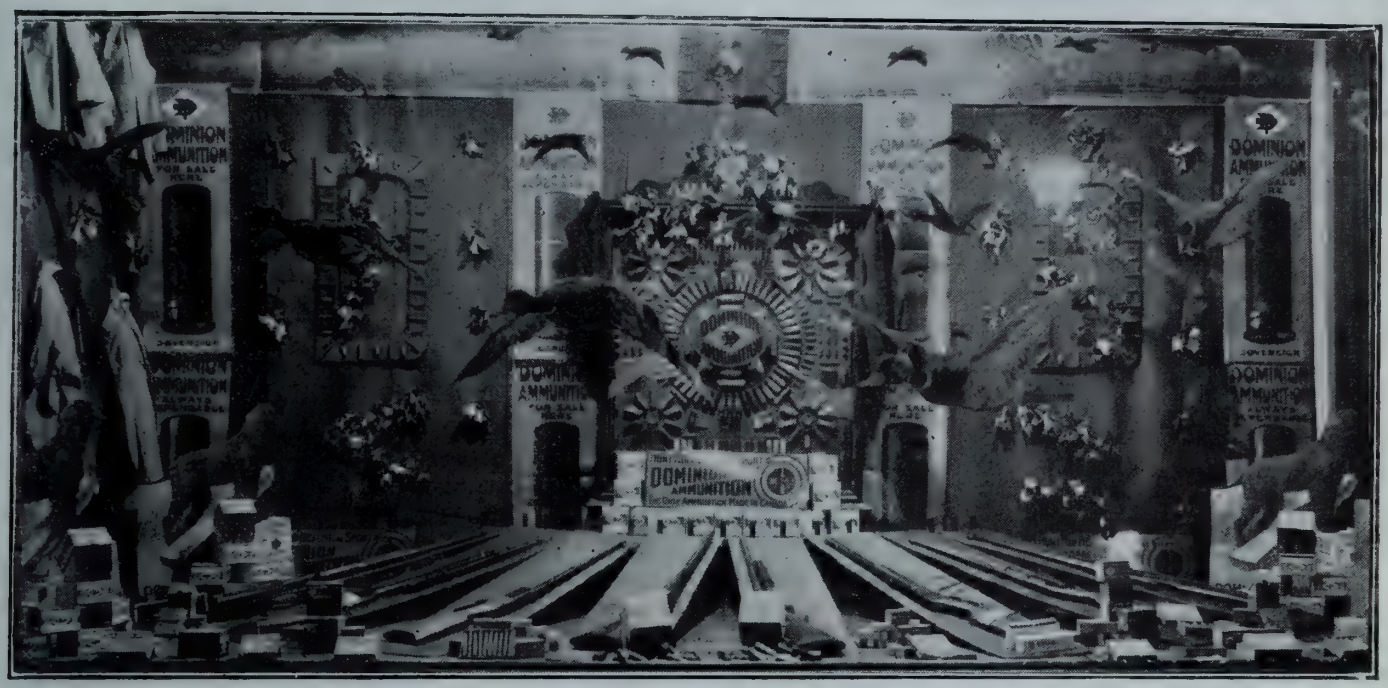
Making semi-partners of the sales force frequently proves a wise move, as merchants discover by actual experience.

OPPOSITE VIEWS RE SALES TAX

(Continued from page 41)

I could elaborate at length on all of the above points but I believe that all who have given the matter consideration and have no axe to grind but only the financial interest of the country in mind cannot but agree that for economy, simplicity and effectiveness this tax should be collected once only and that when the goods first find their way into circulation in this country.

Yours truly,
Jas. S. Orr.



The Editor, Hardware & Metal,
Toronto.

Dear Sir:—

"Have read with interest the suggested amendments to Sales Tax, from the pen of Mr. Cluxton.—Mr. Cluxton, in a masterly manner, has outlined the amendments most favorable to the manufacturer which is only natural, he being one of them. I imagine we would all do the same. It would seem to me that the manufacturer has entirely lost sight of the difficulties of that most humble man and much abused man, by the consumer, the Retailer. We, speaking for the trade, and I think that you will find very few exceptions, do not wish to shun our responsibilities but it would seem as if the manufacturer has lost sight of the fact that until he is ready to retail, he is dependent on the retailer, either direct or through the

(Continued on page 72)

Suggestions for Seasonable Window Displays

This window contained an excellent assortment of ammunition, shot guns, rifles and general shooting accessories. Special effort has been made to put in an attractive background, while an idealistic result was achieved through the suspension of several life-like figures of ducks "on the wing." The cut-out of the hunter's dog adds the finishing touch to a display calculated to arouse the interest of the Fall sportsman.

Stoves, ranges and heaters offer a big field for seasonable window displays, and this illustration contains numerous other fast selling lines of Fall hardware, arranged in easy, yet effective styles. Active work on the part of the merchant should result in developing much business in the various products included above.

Events in the Trade

BUSINESS CHANGES

L. V. De Grandpre, hardware, Montreal, has assigned to Vinet & Dufresne.

The firm of Dubuc & Giroux, hardware, Montreal, has been dissolved.

The Hamilton Hardware Co., Hamilton, Ont., has been sold by H. F. Prelipp to B. Baxter.

SUFFERED FIRE LOSS

Considerable damage was caused by fire in the hardware store owned by Jos. Major, 1712 Church Ave., Montreal, on Tuesday this week. The flames apparently originated in the basement, but no cause could be ascertained.

HARDWARE STORE ROBBED

The hardware store of the Canadian Investment Co., at Huntoon, Sask., was recently entered by robbers and goods to the value of $75 were reported missing, while the cash register with the money it contained was also removed by the thieves.

ROB OSHAWA STORE

The hardware store of R. S. Virtue, Oshawa, Ont., which was recently entered by thieves, was again the objective of burglars, about $17 in cash being taken.

PERSONAL

W. G. Harris, president of the Canada Metal Co., visited the Montreal branch this week.

A. T. Barnett, assistant purchasing agent Lewis Bros. Ltd., was married in Montreal on Thursday of this week, to Miss Margaret McCormick, also of this city.

John Richardson of Richardson & Bureau, Montreal, returned on Monday of this week from an extended visit to England and other European countries.

E. H. Johonnot, director of sales, Dominion Cartridge Co., is severing his connection with this firm on October 1, to enter business for himself in Los Angeles, Cal., as a manufacturers' representative. He started as salesman for the Dominion Cartridge Co. sixteen years ago, and continued in this capacity until he was appointed Western manager with headquarters in Winnipeg. He was later transferred to Montreal receiving the promotion to director of sales.

Frank H. Butcher, formerly representative of the Canada Paint Co., Ltd., in Eastern Ontario, has taken over the agency for the Beeby Range Company, Limited, of Ottawa.

PERSONAL

Gordon S. Eaton, for several years past the manager of the hardware department of the E. J. Coles Co., of Woodstock, Ont., has removed to Hamilton, where he will enter the retail business on his own behalf. Prior to his leaving for Hamilton, Mr. Eaton was honored by the members of the staff o the E. J. Coles Co., who presented him with a leather club bag, along with their best wishes for his future success.

WESTERN CANADA NEWS

D. V. Thompson, manager of the J. H. Ashdown Hardware Co., Edmonton, Alta., is on a business trip to head office, Winnipeg.

Winnipeg.—Building permits issued during the week demonstrate that there will be considerable construction work carried on for the next month or more. Permits for the week reached a total of $104,900.

MERCHANTS' ASSOCIATION GROWS

The annual report of the Merchants' Association of Montreal, read at the annual meeting of that body and presided over by W. A. Doig, records substantial growth of the organization, and a satisfactory year, both as regards finances and work accomplished.

CANADA'S TRADE IMPROVES

That Canada's foreign trade is on the up grade is shown by August returns when imports and exports have a value of $140,741,000, an increase of $9,560,000 over July and of $7,300,000 over the June figures. Compared with August trade in 1921, there was a gain of $14,000,000 last month. Although these values are considerably less than two or three years ago, the material fact is that the gain is continuing in these later months. Another feature is the excess of exports over imports, the returns of the month under review showing that the former exceeds the latter by $6,000,000.

DISPLAYS FIREPLACE FIXTURES

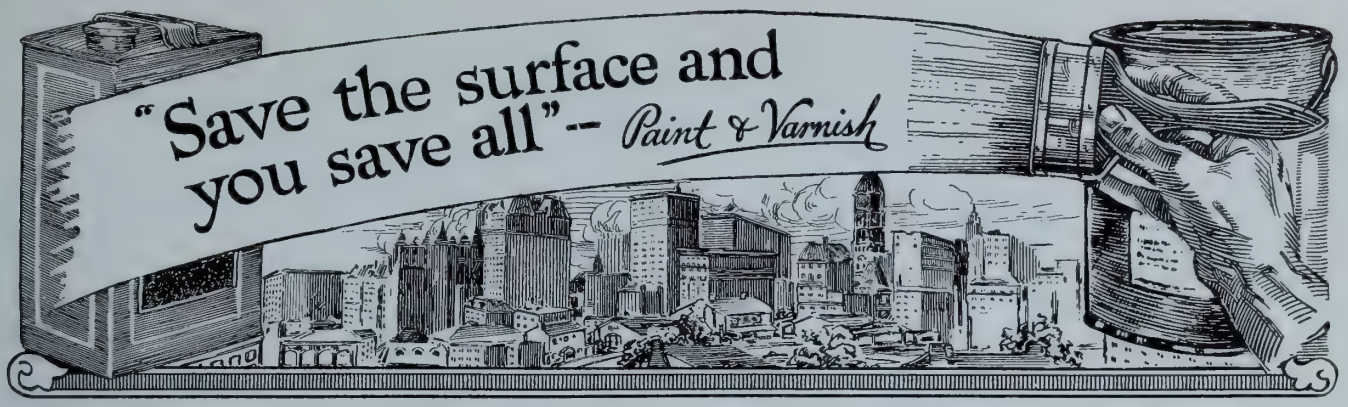
Kingston, Ont.—The coal shortage is boosting the sale of fireplace fixtures here. The firm of McKelvey & Birch took the occasion to make a special display in their local newspapers this week for the sale of basket grates, andirons, fenders, fire sets, coal hods, and spark guards.

SCARFE'S RETAILING PAINTS AND VARNISHES

Scarfe & Company, Ltd., Brantford, Ontario, have announced the opening of a retail store to sell their products to the public at 109 Church St., Toronto.

U. S. STEEL CORP. MAY AGAIN RAISE WAGES

New York.—Although the United States Steel Corporation advanced wages of unskilled and other labor on September 1, reports are in circulation again predicting that another increase in wages may be expected within the near future. It was asserted that, despite the increase announced by the corporation, and immediately followed by the independents, many steel companies are still handicapped in their operations because of a shortage of labor.



EXHIBITS AT CONVENTION

One of the special features of the Retail Merchants' Association convention to be held in St. John, on October 10th and 11, will be an exhibit made by manufacturers and wholesalers in the convention hall. This is a new department and is expected to prove interesting, considering that there will no doubt be a large percentage of the New Brunswick retail merchants present, representing all classes of business. There will also be an address by E. M. Trowern, secretary of the Dominion Board, and arrangements are under way for an address by J. A. Banfield, president of the Dominion Board.

ELECTRICAL HOME IN MONTREAL

A new electrical home, arranged for exhibition by the Electrical Co-operative Association, was formally opened by acting Mayor H. B. Seybold, sales manager of Starke-Seybold, Ltd., Montreal. The house, is primarily designed to show the advantages of having sufficient wiring to insure outlet for lighting; fixtures and appliances located in convenient and acceptable places, and also to enable the public to become more familiar with a home that is fully equipped with electric power.

Features in the house include, self-lighting clothes cupboard, electrically wired dining room tables, tea-wagons, electrically equipped sewing room and laundry, a kitchen supplied with electric range and dishwasher, and also a number of smaller articles such as devices to enable the housewife to whip cream, make mayonnaise and sharpen cutlery. The dressing tables are supplied with small electric hair dryers, vibrators, violet ray sets and curling tongs. In the nursery are found electric milk warmers, heating pads and a portable heater. The bathroom contains shaving requisites, including a heated water supply obtained from an electric heater in the basement.

Awards in "Save the Surface" Contests

Prize Winners "Save the Surface" Window Display Contest

First prize, $50.00, Falconers, Limited, Winnipeg, Manitoba.

Second prize, $40.00, Smellie Bros., Russell, Manitoba; window trimmed by L. V. Smith.

Third prize, $25.00, W. H. Lake, Queen St. West, Toronto; window trimmed by M. H. Schaefer.

Prize Winners "Save the Surface" Newspaper Advertising Contest

First prize, $50.00, Mills Hardware Co., Limited, Hamilton, Canada.

Second prize, $40.00, The Paint and Arts Supply, Calgary, Alta.

Third prize, $25.00, Smellie Bros., Russell, Manitoba.

ANNOUNCEMENT of the prize winners in the Save the Surface window display contest and newspaper advertising contest appears on this page, and the prize winning window displays and advertisements are reproduced on the following pages.

Six cash prizes were offered by the Save the Surface Campaign Committee, three prizes of $50.00, $40.00 and $25.00 in the window display competition, and prizes of a similar value in the newspaper competition.

The competition in the window display contest was open to any dealer or dealer's clerk. A condition of the competition was that the Save the Surface window trim and slogan should be a part of the display. Preference to be given to those windows which illustrated to the greatest advantage the idea of protection and preservation as embodied in the Save the Surface idea.

In the newspaper competition it was open to any dealer or dealer's clerk, for the best paint and varnish advertisement appearing in the local newspaper. A condition of the contest was that the Save the Surface slogan must form a prominent part of the advertisement. Awards were to be based on the uses of the Save the Surface argument in the most unique and novel way to attract the attention of the local trade.

Greater interest was exhibited in the window display competition than in the newspaper competition and an examination of the three prize winning windows will show that there was keen competition and that the hardware trade can certainly link up to splendid advantage with the Save the Surface campaign, through the medium of good window displays.

The winning displays will furnish ideas which may be copied by hardware window trimmers in all parts of Canada. They furnish ideas which may be used to advantage in window displays at almost any season of the year.

A very close examination of the displays is necessary in order to observe many of the splendid selling features. It is unfortunate but nevertheless true that in the reproduction of a window display many splendid features are lost and very close examination is necessary in order to get a true perspective of the window as it actually appears.

Hardware and Metal in reproducing the prize winning windows on the following pages, hopes that they will furnish many ideas for window trimmers in other parts of the Dominion. The "Save the Surface" campaign committee deserve credit for the great interest which they are exhibiting in the hardware trade and for their effort to secure the cooperation of hardware merchants and clerks, which is a very necessary and important link if the best results are to be achieved by all interested in the "Save the Surface" campaign. The campaign is one which if carried on successfully will not only produce splendid business for all paint and varnish manufacturers, wholesalers and retail hardware merchants but will also prove of inestimable value to the entire Dominion of Canada, and on this account is worthy of the support of all those who have the best interests of Canada at heart.

The judge of the contest was G. D. Davis, manager of Hardware and Metal, who made the final decision. The announcement of the contest stated that the Save the Surface Committee would act as judges. Asking Mr. Davis to act as judge of the contest the Save the Surface Campaign Committee through their secretary, Mr. Benison, wrote as follows:—"The fact that it has been the announced intention of the committee to judge these contests was not overlooked, but it was felt that owing to your peculiar aptitude in such matters and the facilities and experience you possess, you would be conferring a favor on the committee if you undertook this work and any decisions arrived at by you could in no way be considered as anything but absolutely impartial, whereas in the case of the committee their decisions might come under some criticism. You are at liberty to give such publicity to these views as you may see desirable. Expressing the thanks of the committee in your kindness in consenting to act."

Readers of Hardware and Metal will find in this issue not only the announcement of the prize winners and reproductions of their work, but also a great many other articles which should prove of real value to the trade during the fall and winter months. The "Save the Surface" idea if followed out offers an unlimited number of opportunities for retail hard-

(Continued on page 56)

ONE OF THE *many features of the above display is its effective simplicity. The entire display is well balanced and the onlooker is not confused by attractions which will divide attention or take the mind away from the big idea of "Saving the Surface and You Save All," which is the underlying keynote of the display. The background provides a very realistic reminder of some of the forces of destruction at work.*

First Prize Winner

ABOVE is shown the first prize winner in the window display competition. This display entered by Falconer's Limited, Winnipeg, tells the story at a glance. In entering this display C. C. Falconer described the display as follows:—

While we believe the photograph quite clearly pictures the lesson we are attempting to bring before our trade, nevertheless, we respectfully desire to draw your attention to a few matters pertaining to the subject for consideration of the contest judges.

Our Falkirk avenue store is located in a district populated by citizens of many languages and a large portion of them are not too familiar with the English language and we felt the need of making "The Save the Surface and you Save All" paint and varnish lesson striking, and illustrated with but few words, as well, using miniature buildings of a design common to such localities.

Further it is quite impractical to show but one kind of distressing weather in one season and we believe a scene picturing an angry storm approaching would have a more decided effect on the mind of the onlooker and instantly draw the proper decision as to which house surface would most satisfactorily resist the average weather conditions. We further attempted to link up the window with a nationally advertised line to reach the benefit of promotion work, and this will explain the bulletin sign shown in the rear. The cans of paint shown on each end of the photo. we felt, are quite necessary to link up the prospective paint used with the brand we sell. The illustration showing the bit of preserved property as a result of the "Save the Surface" has also grounds showing the lawn effect, gravel walk, and roadway. Due to the fact that the floor of our window is at a height from the side walk to insure passers by to get a quick view of the contents, the

In Window Contest

photographer was unable to arrange the camera close enough to get the lawn effect in the photo and at the same time produce the whole window which is 20 feet long.

We mention the matter of ground effect surrounding the painted house so as to produce a further thought, and this is, painting not only leads to Saving the Surface and decorating, but also generally brings about the tidying up and putting in shape of the grounds surrounding the property to the extent that the owner or tenant is classified as a better citizen.

We frankly ask your consideration for our Save-the-Surface Window as one teaching the lesson consistent with the class of trade which we are serving, which we feel is a point worthy of your consideration and in conclusion we assure you that our Save-the-Surface Window has been the best drawing window exhibit we have produced in our 15 years of business, and as a business builder, paint and varnish dealers should take advantage of the opportunity and link up closely with the Save-the-Surface propaganda and get in the way of the trade the Save-the Surface Campaign is causing.

Readers will notice the great care which has been taken in the arrangement of this window, the painting in the background representing the elements in their fury, the protected and the unprotected buildings, the results of neglect and the results of Saving the Surface, the neatly painted and well preserved fence and the unpainted fence which is rotting away owing to neglect, the neat show cards giving their messages briefly and to the point. Some of the details of the window show cards are lost in the reproduction but beside the painted and unpainted buildings is a card directing attention to the fact that rot and rust is the result of not protecting buildings.

(Continued on page 53)

THE FALCONER *window is an exceptionally large one, but window trimmers with smaller window display space, can follow out many of the ideas incorporated in the Falconer display. The buildings and surroundings picture actual conditions which may be found in almost any part of Canada. A vivid contrast is shown. The results of neglect as compared with adequate paint and varnish protection are immediately apparent.*

Second Prize Winner in the

THE SECOND prize in the Save-the-Surface Window Display Competition was awarded to Smellie Brothers Limited, Russell, Man.

This display was dressed by L. V. Smith, who has been asssociated with this company for several years. A description of the display furnished by the contestant reads as follows:

The object of the display is "Contrast" which is shown in the left of the photo by the unpainted building made of old shingles weather worn and broken. Display cards bearing the words "Guilty or Not Guilty?" "Left to the mercy of the weather," "Does your house need painting?" help to emphasize the need of paint and varnish. Old vines were used on the building and in and around the front were distributed old tins, bottles and debris, which greatly helped to produce the dilapidated appearance. The centre of the window was built up of a half circle colored alternately in blue, yellow, red and green, as design submitted. In the foreground were placed the models of a modern house and barn and paint display cards. Directly in the centre was placed a small revolving motor to which were attached four ribands bearing the same color as the background, the ends being fastened to the ceiling. A card worded "One good turn deserves another"—"Save the Surface and you Save All" was put on the plates which kept revolving.

The right section of the window was a model house nicely painted in cream with green trimmings, with white verandah and railing. A small set of Christmas tree lights was attached to the eaves which greatly added to the bright appearance.

Minor details such as small rain barrel, screen door, window curtains and shade were very favorably commented upon. The display was used in conjunction with the newspaper ad and was instrumental in selling several house painting jobs besides scores of smaller jobs inside.

Contrast Object of Display

A NUMBER *of novel effects have been employed in the above display, arranged by L. V. Smith for Smellie Bros., Russell, Manitoba. The object of the display is "Contrast." Quite a number of show cards, "Brighten Up Week" slogans, and "Save the Surface" slogans have been used in the display. In endeavoring to show a contrast in the larger buildings, it will be noticed that different types of buildings have been used, both in style of construction and design. There are several attention-getters in the display. An effort has been made to link up the "Brighten-Up" idea and the "Save the Surface" idea.*

The window is an exceptionally large one which offers splendid opportunities for display purposes. A number of the novel ideas in the window can be used to good advantage in other paint and varnish window displays.

FIRST PRIZE WINNER

(Continued from page 51)

Beside the painted building is a neat card directing attention to the fact "Your home will be well dressed, protected, and increased in value if furnished with a coat of paint and varnish."

In the centre of the window, but appearing in the reproduction as though at one side, is a Save-the-Surface slogan linked up at one end with a card "Look at this scene" and at the other end the

"Save the Surface" Contest

words "And on this." In these striking examples of results, we get a good idea of the truth of the saying, that a good illustration is worth a thousand words.

There are many small details in this window which show up under the magnifying glass, but which are lost in the reproduction. Details, however, are very important in the original display because the public are always keen to criticise anything which may be lacking in a display of this kind. Details in connection with the construction of these houses were carried out faithfully and in such a way that few, if any, criticisms could be offered. The surroundings were quite in keeping with the buildings, and the fact that the window was not over-crowded gave the passer-by or the prospective purchaser who stopped before the window, a big story quickly told and almost at a single glance.

Neglect Brings Decline in Property Value

MANY say that they cannot afford to paint, and that painting is a luxury. Such is not the case, and the old saying "A stitch in time saves nine" is very applicable in this case. A survey of the property in any locality will show a notable number of instances where painting is an absolute necessity, and the proper argument put up to the owners of property based on good sound facts such as are expounded in "Save the Surface" literature, will bring many property owners to the realization that their property has been burning up, due to progressive oxidization, and that they have stood by and watched this happen without giving it a thought.

HOUSE paint-sales cannot be developed by waiting for them to come into the store. Prospects can be sought out. Houses that look shabby can be noted and their owners called on. Often the owners do not realize the loss on their investments by lack of paint, or the enhancement that is possible by the right use of the right paint. This is a selling opportunity and duty that the live paint dealer will not neglect nor pass up.

With the keen competition which exists at the present time in almost every line of sales endeavor, it would appear to be good business to go right out after paint and varnish trade rather than to depend too much upon the trade which comes into the store voluntarily.

Many Good Displays in Contest

A LARGE NUMBER *of splendid paint and varnish displays were entered in the "Save the Surface" campaign window display contest. In several instances the entries were splendid paint and varnish windows, but the contestants had failed to combine in them the "Save the Surface" idea, as effectively as might have been done under the opportunities provided. On the other hand, there were many splendid displays which were linked up with the "Save the Surface" idea as required by the condition of the contest, and in several instances would have been entitled to honorable mention if there had been any award of this kind provided for. In all probability quite a number of these displays will be reproduced later, and will give some idea of the window trimming ability which may be found in Canadian stores.*

Third Prize in Window Contest

THIRD prize in the window display contest was awarded W. H. Lake, Hardware, Queen St., West, Toronto. The display was dressed by M. H. Schaefer. The description accompanying this photograph is as follows:

This window was dressed by our Mr. M. H. Schaefer and represents his original ideas, making use of materials readily at hand in any hardware store. The underlying idea was that of emphasizing the protective value of paint and varnish, and of showing vividly the deterioration resulting from insufficient use of paint and varnish, compared with preservation resulting from the adequate use of paint and varnish. Wide use has been made of the Save the Surface literature in the window to good advantage.

The house was made of smooth wood taken from packing boxes. The roof was stained green and the chimney was painted a flat red, marked off with drop black. The body of the house was painted cream trimmed with brown, the door was grained a dark oak finish, the verandah floor was painted porch green, the fence painted white. Green paper was used for grass and two plants were shown to give the setting a well kept appearance.

The barn showing an advanced state of deterioration was made of decayed wood with doors unable to be fastened properly. Dried moss was used to represent straw. The fences were of decayed wood, and the gates held on loose hinges.

A large card was shown on each building, one stating, "Mr. Jones did not paint," the other stating, "Mr. Smith painted." Considerable crowds gathered, there being four deep in front of the window at certain periods. Much business resulted, the clerks being kept busily engaged in the paint department during the week the window was in. Some joking took place among customers who answered to the names of Jones and Smith and some good natured banter resulted in helping to drive home a personal touch. We now have more of the Smith type of customers than Joneses due to our efforts through display and personal selling, to convince prospects of the great value of paint and varnish as a preservative as well as a beautifier.

Attached are some of the comments heard from those who saw the window.

Lady and gentleman stopped before the window. The gentleman pointing to the unpainted barn, remarks, "It's true to nature. You see them like that all over the country. See the difference when the building is painted up."

A customer by the name of Smith came into the store one day though he did not require anything, and said, "I am glad you put Mr. Jones' name on the unpainted house."

A customer buying some paint in the store, said, "It's a good thing my name is Smith."

In many cases children have made some interesting comments in bringing their parents to see the display. Many of these children have made requests for the house when we are through with it. It is significant that there has been no request for the barn.

In this window there is a contrast which can be seen at a glance. The simple statements "Mr. Jones did not paint" and "Mr. Smith Painted," tell a big story in a simple way. A close examination of this photograph will reveal that an effort has been made to tell the story effectively, quickly and simply to the throngs which pass on a busy city street.

DEVELOP RURAL FIELD FOR PAINT TRADE

Written by Royal Cluxton

THE FALL is rapidly developing into as important a season in the use of paints and varnishes as the Spring, and in appreciation of this fact the "Save the Surface" Committee decided to "play up" on the Fall painting idea as a part of every advertisement.

Another very important thing is that a larger portion of the "Save the Surface" advertising this Fall is concentrated in the rural or farm journals reaching the farming population of this great Dominion.

This is a field that has been sadly neglected in Canada;—at least 90 per cent. of Canadian farm houses and barns are unprotected against deterioration from decay and rust.

Necessary Paint Investment

Another fact that is of great interest is that not only is paint and varnish a necessary investment of insurance on the farm to prolong the life of the property and reduce the repair and replacement expense but what is of even greater value to the old folk is that farmers must realize that if they are going to keep their children on the farm they will have to make the farm "attractive" and home like. Youth loves life and color and it is high time for the Canadian farmer to change from some of his primitive habits and apply the paint and varnish brush freely both outside and inside.

If the old folk on the farm will take pride in the upkeep of the farm and make it look bright and cheerful there will be less trouble about keeping farm help.

The Fall is the ideal time for the farmer to apply the brush as he has the time now to do it and the weather conditions are even more ideal for this work than in the Spring.

The farm offers an enormous and interesting field for development in the use of paints and varnishes in Canada.

Prize Winners Newspaper Contest

Prizes in "Save the Surface" Campaign newspaper competition, were awarded as follows:—

First Prize, $50.00, **Mills Hardware Co. Ltd.**, Hamilton, Canada.

Second Prize, $40,00, **Paint & Arts Supply**, 125 8th Ave., Calgary Alta.

Third Prize $25.00, **Smellie Bros.**, Russell, Man.

First Prize Winner

Second Prize Winner

The contest was open to any dealer or dealer's clerk. In the first prize winning advertisement, the Mills Hardware Company feature "Save the Surface" arguments and emphasize the chief purpose of paint and varnish. Emphasis is also placed upon the preservative qualities of paints and varnishes, the value of paint and varnish in preventing deterioration of property, tne value of paint and varnish in increasing the value of property, and also points out that paint and varnish can be used on a great many kinds of surfaces in addition to wood, plaster, etc. Reference was made to the necessity of "Saving the Surface" of iron, steel, concrete, etc.

In addition to the introduction in this advertisement, considerable space is devoted to "Twenty Surfaces and How To Save Them." Twenty illustrated panels tell how paint and varnish can be used in a great variety of ways. One of the good features about this advertisement is that special attention is paid to the importance of emphazing the uses and necessitv of paints and varnishes on a large number of surfaces which are bound to interest a great many people. In addition to emphasizing the importance of painting and varnishing buildings, the advertisement tells how to "Save the Surface" of wire fences, beds, stove pipes, refrigerators, linoleums, radiators, and many other surfaces.

The second prize winner, headed, "Nature Set Man a Wonderful Example," also makes use of a number of "Save the Surface" arguments and deals specifically with surfaces which may be saved with paint and varnish.

Third Prize Winner

The third prize winner, that of Smellie Brothers, Russell, Manitoba, is novel so far as layout is concerned. The reproduction which is in greatly reduced form has an even better appearance than the original advertisement. The judge of the contest secured opinions from three advertising experts to assist him in arriving at a decision as to the value of the decorative features of this advertisement and the soundness and the value of the argument used in the advertisement.

AWARDS IN "SAVE THE SURFACE" CONTESTS

(Continued from page 49)

ware merchants to cash in on paint and varnish business during the fall and winter months.

As announced in last week's issue, any window trimmers or merchants who wish to secure copies of this section of the paper showing the prize winning windows and who do not wish to mutilate their file copies of Hardware and Metal, can secure reprints of this section showing the prize winning windows by writing to the editorial department of Hardware and Metal, 153 University Avenue, Toronto, Canada.

Windows Provide Direct Appeal

THE WINDOWS provide the hardware merchant with one of the most effective mediums which it is possible for him to have at his command in connection with stimulating Fall interest in paints and varnishes. A few years ago the average customer of the hardware store was in the habit of viewing paint displays in the windows of the store for a few weeks only during the Spring season; and with such an influence at work, it is not surprising that the result at that time was anything else but that paint trade would concentrate around that season and be comparatively scanty in volume during the remainder of the year.

The change of sentiment which has taken place in recent years is evidence of the effectiveness of the hardware merchant's efforts in his own locality. By the use of window displays of paints and varnishes at all times of the year, the judicious use of local newspaper space to point out the advantages of paint and varnish at other seasons—in the Fall as well as in the Spring—and the special personal effort by the merchant and his sales force, the tendency has been changed until now much painting is done during the Fall and even in the cold weather. Customers have been brought to a closer realization of the value of "Save the Surface" in the Fall.

There are a great number of arguments in favor of painting at this time of the year, as will be found from a close perusal of the pages in this section, and the windows provide a good means of setting forth these arguments to local prospects. There are other means of bringing these arguments to the notice of prospective customers, but it will be found that the windows will be very helpful in this respect and frequently they can be made to support effort expended in other directions. The farmer will be greatly interested in knowing that he can greatly lower the overhead charges on his buildings and equipment by keeping buildings and implements well preserved with paint, varnish, etc. The housewife with a small family will be interested in knowing that there are floor finishes which will be unmarred with the tracking in of wet boots from the fall rains and winter snows. For the fall housecleaning the housewife will also be interested in wall finishes which can be easily applied, and the property owner will be interested in the value of paint in protecting property exteriors in view of continued high costs of construction. These points can all be effectively illustrated in the fall window displays and attention to them will be fully justified by results.

How Spreading the "Gospel" of "Save the Surface" Brought a Thirty Per Cent. Increase in Paint Sales

Watch for the Next Issue of Hardware and Metal

AN ARTICLE showing how the business in the paint department of the McClennan Hardware, Peterborough, Ont., increased over thirty per cent., will appear in the October 7 issue of Hardware and Metal. This represents the result of speaking to every customer that comes into the store—no matter what for—regarding the value of paint as a protection and preservative. That this method has brought responsive dividends within an appreciably short space of time is already apparent, the record of last year having been already surpassed by thirty per cent., with the best part of the season's activities ahead. Remarks by B. W. McClennan on how these results have been achieved, together with illustrations of the "Save the Surface" department and paint displays, will also be numbered among the features of this article.

Resisting the Effects of the Elements

Preservative Value of Paint and Varnish the Keynote in the "Save the Surface" Campaign—Broadcasting Knowledge of Surface Preservation Filling Decided Need in Paint Industry

Written for Hardware and Metal by A. J. WEBB

WITH the approach of winter, a strong and determined effort is being made to influence the property owner, who has not painted, to the advisability of doing so before the approach of the winter months. That this is really good advice cannot be denied, and it is here where the efforts and steady work of the Save the Surface committee is going to count.

For several years now this effort, steady, conscientious, logical and continuous, has been put forth and spread broadcast over the Dominion of Canada, and it may well repay us to briefly glance over just what it has accomplished.

Up to the time the Save the Surface committee really took hold of this proposition, paint was almost universally looked upon as a beautifier. It was very rarely indeed, outside of certain technical groups, that one heard paint referred to from the view point of its preservative qualities. Some of the professions, such as engineers, builders, contractors and so forth, had, of course, long known of the value of paint and varnish as a preserver, but it was not the main opinion of the ordinary man in the street, who, almost without question, associated paint and varnish with a "spic and span appearance"—as more or less of a "renewer" rather than the vital conserver, which it certainly is. The Save the Surface committee however, with their splendid set of advertisements, the considerable data they acquired showing the value of paint, and their general propaganda, has entirely changed all this, and to-day, go where you will, you will hear paint and varnish referred to as a preserver of property, while the man who paints regularly is not now looked upon like he formerly was, as merely desiring to see his property in spic and span shape, but he is accepted and recognized as a man of common sense, sound views and one who is a direct asset to his community.

Filled Niche in Industry

The Save the Surface committee, and the Save the Surface work accomplished by them, have filled in a tremendous niche in the paint industry of the Dominion of Canada. Now that we are gradually accomplishing the broadcasting of the knowledge of the preservative qualities of paint and varnish (all credit to the Save the Surface committee for so doing) the paint industry may look forward to coming into its logical sphere, where it certainly is not at the present time and where it never would arrive while paint and varnish were looked upon from the purely decorative point of view.

There are innumerable loop holes by which the property owner can escape his duty of painting up, if it is only spoken of as a decorator—as a beautifier, but when we turn to the real function of painting, pointing out, as the Save the Surface committee do, that wherever the surface is left unprotected that assuredly the property owner is losing out, then indeed do we touch the owner in his most tender spot, namely his pocket.

Better Development Ahead

While the work of the Save the Surface committee by spreading the knowledge of the properties of paint and varnish as a conserver, has been enormous, yet much remains to be done before we cash in to the fullest extent on the efforts that have been made. Looking back over the few years during which this campaign has been in effect, no one can deny that results have been increased sales, increased knowledge of the values of paint, all of which must tend towards the better development of the trade in general, and ever increasing sales for the dealer. It is to be hoped that each dealer—each person interested in the sale of paint—will stand solidly behind the program that has been launched by the Save the Surface committee, and cash in on the results that can undoubtedly be obtained by so doing.

"Save the Surface and You Save All" is a slogan of peculiar appropriateness. In these seven short words are combined clearly and succinctly the wonderful preserving and conserving qualities contained in paint. If you do save the surface you do actually save all, and it should not be difficult for the paint men, for the paint salesmen, for the paint dealer, to pass on to the general public, the message contained in this now famous slogan. It is founded on fact. It is no mere "catch phrase," it can be analyzed, dissected in whatever way we will, and yet the basic truth underlying the use of paint will be found intact.

Spread the "Gospel"

During the forth-coming short season before the approach of winter is it not opportune that each dealer, each person handling the sale of paint and varnish, should point out to those property owners who have neglected to paint just what they are going to lose—just what attacks their property is going to have, and just what losses (in actual dollars) they are going to sustain. No one is immune, whether he be rich or poor. the man that owns a row of houses is no better off in this respect than the artisan who has painfully saved up sufficient to purchase his own humble home. Decay and disintegration are no respecters of persons and unless the property of each and everyone of us is protected by a good coat of paint, then indeed losses cannot be avoided. Let us demonstrate at every point the value of paint and varnish as preservers. Point out the inevitable losses that are bound to accrue wherever property is left unprotected, and rest assured that the sales of paint and varnish will go on apace—each year they will grow, until finally the paint trade of the Dominion shall arrive in its proper legitimate sphere, which, we may add, should be very considerably higher than where it is at the present time. Let us all work enthusiastically, collectively and singly towards this object of spreading the gospel of "Save the Surface." Let us take our medicine by seeing that our own property is amply protected, and we shall then, unquestionably, reap the benefits to the full, which are contained in this great work.

Paint Manufacturers Take Stand on Sales Tax Question

Favor a Turnover Tax—Proposed Amendment to Present Act—No Option of Absorbing Tax

THE Paint and Varnish Manufacturers of Canada unanimously passed the the following resolution in convention September 21st, 1922,—

1st.—That we are opposed to the present complicated and expensive method of collecting the tax and favor a Turnover Tax to be applied to Manufacturers only and to Imports.

Failing in this, we ask that the present Act be amended to at least correct the present very unsatisfactory situation whereby Wholesalers holding Government Tax License have an advantage of 2¼ per cent. over Manufacturers in selling to retailers or consumers.

1st.—That the present Act be amended so that sales by manufacturers to wholesalers holding wholesale tax license for re-sale, be exempt from sales tax.

2nd.—That wholesalers holding Government Tax License collect 4½ per cent. Government Tax from retailers or consumers.

3rd.—That manufacturers continue to collect 4½ per cent. Government Tax from retailers and consumers.

4th.—That the collection of 4½ per cent. Government Tax by wholesalers and manufacturers be compulsory and with no option of absorbing a part or all.

Novel Ideas Which Aid the Merchant

Prize Competition for Best Decorated House

A PROMINENT lead in the campaign for "Saving the Surface" can be frequently established by retail hardware merchants through the announcement that a prize or prizes will be offered for the best and most attractively decorated house. Regulations governing a local competition of this nature are simple and limited; one being that the paint requirements must be purchased at the store putting on this campaign, and another that a time limit be set, thus encouraging the maximum amount of paint sales within a given period. The idea can be enlarged upon, according to the locality. If a prominent official, such as the mayor, can be secured as judge and the competition is advertised thoroughly, it should stimulate much interest in the possibilities of home painting and decorating.

Essays on the Value of Paint Protection

ANOTHER hardware merchant in a western town announced that cash prizes would be given to school children for the best essay on the value of paint as a preservative. This competition was divided into two classes—boys and girls. The age limit was between twelve and fifteen. In many cases, it was noted that where no idea of the "Save the Surface" qualitities of paint existed, the children usually made inquiries, sometimes through the hardware merchants, but generally of their parents or teachers. Thus a great deal of publicity was secured for the attributes of paint and varnish as a preservative, because parents and teachers who were lacking knowledge in this respect were compelled to study such factors in order to satisfy their interrogators. In this case, the chairman of the local school board acted as judge, and simultaneously with the competition, a strenuous campaign for fall paint activity was launched by this progressive retailer.

Instruct Customer in Method of Application

GIVING special care to the fact that customers who have been attracted by the "Save the Surface" idea will be able to apply the paint in such a manner that will easily achieve this object, is another method of bringing about satisfied paint customers who will not only bring in repeat business, but will also influence their friends in favor of the merchant who exhibits detailed attention to his customers' needs. If customers after purchasing paint, find that this is not as durable as was claimed by the merchant, or that particular surface they wished to protect did not receive the maximum degree of improvement from the application, they are apt to lose some faith in the basic principle of surface preservation on which they should be thoroughly sold at all times. Proper instruction in the correct application of the paint, therefore, is as necessary as seeing to it that the customer secures the right paint for the particular job he or she has in mind.

"Save the Surface" by Good Example

THAT the merchant selling paint must first himself be thoroughly sold on the "Save the Surface" principles, is considered one of the primary elements in a campaign for increased paint and varnish sales this fall. Faith in the proposition is absolutely necessary to permanent success, and to impart this faith or belief to salesmen and customers alike is a secondary phase in the expansion of the paint department activities. To this end, a good example in saving the surface of the store, both interior and exterior, is helpful. Brightness serves to attract, while the preservative value can also be fully emphasized. Delivery wagons, motor trucks, or other store accessories, also receive more or less casual notice of the prospective paint customer, and if the painting of the store or the stores' possessions has been neglected, this can hardly be counted upon as a helpful factor in influencing the prospective customer to paint and preserve his property now.

"Show 'Em How" by Your Personal Effort

A GOOD example in painting can be carried one step further in the direction of the merchant who lives apart from his place of business. If he owns a house, and neglects to paint it, he is passing up a wonderful opportunity for "showing 'em how." On the other hand, having painted any house of which he may happen to be the possessor, he has created a splendid advertisement for the protective and preservative value, as well as decorative attributes of paint, which should bring adequate returns over the counter. Such an example will serve to spread the Gospel of Saving the Surface far more effectively than mere precept could be expected to do, and it also includes a thorough knowledge and belief in the subject of paint on the part of the merchant.

Paint Insurance is Modern Necessity

"PAINT Insurance" is another potent argument in the extension of paint sales by the progressive retail merchant. Hammering home this fact in window displays, local advertisements, and numerous other methods has been the keynote to successful retail paint salesmanship. Almost anyone will admit the value of insurance, the large majority having been educated to this fact in fire and life insurance, as well as other lines. To insure buildings against fire is considered of vital importance by most property owners, but to insure against decay the hardware merchant can point out that loss through fire annually is much smaller than the terrific losses each year occasioned through neglect and deterioration.

Satisfactory Service in Small Purchases

MANY merchants have noted good profits in the sale of paint accessories, and such sales frequently lead to bigger things in the paint department. Putty, lead, window glass, brushes, turpentine, linseed oil and similar items frequently lead to the introduction of sales in shellac, stains, varnishes and paints, if not immediately, then at a later date. This is where courtesy and service exhibited by the salesman towards the small buyer, will also bear the right kind of fruit. The preliminary impression of the ability of the paint department to satisfy, is usually carried around in a remote corner of the customer's memory, and the need for further supplies of paint of any kind, is a gentle but most effective reminder.

Sell Finished Effect of Painted Surface

THE DEALER who sells a can of paint, varnish, enamel or stain should realize that he is not selling just so much material, but he is selling the customer a finished effect on a certain surface. When a customer wants some varnish for a floor, show him a sample of flooring (several pieces of flooring about 14 inches long, tongued and grooved and cleated in back) which are on hand, finished with the floor varnish you sell. The prospective customer thus sees exactly how the floor will look when finished with that particular varnish. The same plan can be carried through in selling enamels, stains, house paint, floor paint, automobile finishes, etc. It requires some time to get these samples, but they are very effective in closing a sale and in interesting new prospects.

to Increase Paint and Varnish Sales

A Property Improvement Club in Your Town

IN SOME communities hardwaremen have by co-operation assisted in bringing about a plan whereby those property owners who ordinarily might be unable to immediately finance the thorough painting of their properties, can secure the advantages of adequate paint protection before any deterioration sets in. This plan is the formation of a "Property Improvement Club" as a bank savings plan. It is found that people will save when they have a definite object in view and a convenient method of saving. As an indication of the extent to which people make use of such plans is the fact that last Christmas over 72,000 people in one of our larger cities received checks from banks as results of their weekly deposits in Christmas Savings Clubs. In much the same way the banks can be asked to organize Property Improvement Clubs which people can join on the basis of depositing 1, 2, 3, 4 or 5 dollars per week, for 50 weeks. The banks advertise why painting and repairing are important if property is to be conserved. In return for this the local paint trade distribute the bank's folders, put window cards in their windows, endorse the plan in meetings of paint dealers and paint clubs, in some cases devoting co-operative advertising in the newspapers to it, and help in every way to get the public to join a Property Improvement Club.

Prospect Card for Unconvinced Ones

SUPPOSING the paint salesman makes an active effort to interest a prospect in the brand of paint carried, extolling its merits and driving home the financial and enjoyment features of a newly, nicely painted home. If he fails to make the sale he should not let the matter drop. Make out a prospect card on which are blank spaces for the following:—Salesman's number, date, name of prospect, address, what interested in, information from, remarks. A space at the bottom of the card for promotion effort leaving space for date of letter sent, whom to notify, transferred and filed by, and date.

Labor Gives Place of Honor to "Save the Surface" Float

ABOVE illustration shows the float which headed the Painters' and Decorators' Unions section of annual Labor Day parade in Toronto. It is significant that Labor as a unit thus gave official recognition to a float which represented the "Save the Surface" idea, and which carried the emblem of this campaign in a prominent position. Painters and decorators have been among the ever-increasing number to benefit materially and directly through the stimulus to trade provided by the spread of "Save the Surface and You Save All" propaganda. The wholesaler and retailer are distributing channels in placing paints and varnishes before the consumer. Labor in this special group, however, can be looked upon as one of the important mediums of application. While in many cases the purchaser of paint products becomes sufficiently enthusiastic to the extent of performing efforts to Save the Surface, many others turn to the professional painter and decorator where extensive work is concerned. The more paint and varnish that is sold, therefore, indicates the provision of more work for the craftsman, and the genuine support of Labor to the "Save the Surface" campaign is the legitimate result of adopting this ideal for the industry as a whole. The float was arranged for the occasion by the Canada Paint Co., Limited.

Markets at a Glance

THERE have been more changes of an upward nature in the hardware markets this week than for some considerable time. In spite of the fact that the large majority of recent price changes have been increases, this tendency is still strongly in evidence and all current revisions place quotations on a higher level with but one exception.

THE budget of advances include the following items: Brass and copper rods and tubing, eavestrough, conductor pipe, ridge roll and valley, the Enterprise line of food choppers, crow bars, grub and pick mattocks, grub hoes, claw and tamping bars, rock and clay picks, Coe's knife-handled wrenches, skate screws and Jenkins knives. As briefly outlined in last week's issue, practically all tinware and enameled ware lines are advanced between five and ten per cent. In the ingot metal markets, prices on antimony and spelter are also climbing.

A NUMBER of rumors indicating pending changes of an upward nature are apparent, these affecting tarred felt, coal oil and ready roofings, while further advances in the future are considered possible on bolts and nuts, and other companion types of brass compression work.

SIGNS of unsettlement are still strongly in evidence in the wire nail market, the current base quotation being purely nominal and shading of this level to the extent of fifteen and twenty cents per keg being quite common. The lone reduction is on the Monty line of wood planes.

THERE is a very firm tendency in various iron and steel products and it is stated that some higher prices on wrought piping and kindred lines would not be surprising. Pipe fittings are described as firmly entrenched at the recent increased levels. The general feeling in bar iron is that prices have ceased to climb. The sheet markets remain active, with current quotations firm. In scrap materials, some signs of improvement are now recorded.

Montreal, Que.

MONTREAL, September 28.—The current hardware markets are again featured by a lengthy list of price revisions, most of the changes again showing the upward swing of the markets. As outlined last week, a general advance is quoted in prices of enameled ware and tinware, varying from five to ten per cent. Many of the lines are increased about eight per cent. Another important price change is announced on crowbars, grub and pick mattocks and grub hoes, all these goods registering higher prices. Advanced quotations are given on Jenkins valves, also on claw and tampering bars. Coe's knife-handled wrenches are increased in price, while a reduction is announced on Monty wood planes. This line of carpenters' planes is reduced ten per cent.

CROWBARS ADVANCED TO $8.00 PER 100 LBS.

Montreal.

An increase of twenty-five cents is made in quotations on crowbars bringing present price to $8.00 per 100 lbs.

HIGHER BOLT AND NUT PRICES PROBABLE

Montreal.

In discussing the probability of a further revision to higher levels on bolts and nuts with local manufacturers this week it was stated that while there is no present indication that higher prices will be announced in the near future, the undertone of the market has again developed a very firm tendency. Since the last revision, not many weeks ago, costs have materially increased and it is noted that advances have been recorded on American markets. With this tendency continuing it was thought altogether likely that Canadian manufacturers would follow suit. In one quarter it was reported that new higher prices were expected at any time.

FIFTY-CENT ADVANCE IN GRUB AND PICK MATTOCKS

Montreal.

Quotations on grub and pick mattocks show an increase of fifty cents per dozen, and both lines are now quoted at $9.75 per dozen.

STRONG COPPER MARKET FIRMS UP FINISHED GOODS

Montreal.

The undertone of brass and copper goods, such as sheets, rods and tubing, is described as firm, strength being added by the improved position of the virgin metal on primary markets. Although the buying movement of copper is limited at present there is a firm tendency both on domestic and foreign markets with a strong outlook for future, especially in the United States where supplies are not as heavy as formerly. It is pointed out by distributors of the finished products that quotations have shown little if any change locally for some time past, and with a continued firming in primary circles, revisions to higher levels would not be surprising. Unchanged quotations are as follows:

	Base
BRASS—	
Sheets, base	0 24
Rods, ½ to 6 inch, round	0 22
Tubing, Seamless, base	0 30
COPPER—	
Rods, ½ to 2 inch	0 29
Soft sheets, plain, 16 oz. and heavier, lb.	0 30
Plain tinned, 16 oz. and heavier, lb.	0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are for full sheets or bars. Cuts 5c. per lb. higher.

FAIR ACTIVITY REPORTED IN RANGE BOILERS

Montreal.

Range boilers quotations remain at the revision of two weeks ago when both the standard and extra heavy were quoted approximately 10 per cent. higher. The movement of these products is slightly improved over the past summer months, building operations of the dwelling house type requiring supplies, and a better call for installations in older houses before the colder weather sets in is being felt. The firm position of galvanized sheets and other products entering into the manufacture are said to be maintaining a fairly strong undertone in these goods. List prices with recently revised discounts are the following:

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 45 per cent. Extra heavy. 35 per cent.

STILL NO CHANGE IN BAR IRON PRICES

Montreal.

Local distributors of bar iron and steel products are watching the continued advance in base prices on other domestic markets with interest, but up to the present no change locally has been made. When the variation between these centres and the price locally was pointed out to one large dealer, he stated that undoubtedly replacement costs warranted a higher selling figure, but apparently local distributors were willing to sell at little or no profit. Increased prices have been expected on local markets for some weeks past because of the continued firming in production circles, but these have been withheld and even at the present time there is no definite indication in sight of developments in this regard. In the meantime producers state that the undertone of the market remains very firm, so much so that another advance in quotations to the distributing trade is not unlikely at any time. Following are unchanged price levels:

IRON AND STEEL—

Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

NEW HIGHER QUOTATIONS ON GRUB HOES

Montreal.

New higher prices are now given on grub hoes, showing an increase of fifty cents per dozen. The 3½ lb. hoes are now $7.75, 3 lb., $7.25 per dozen.

VERY FIRM TONE IN WROUGHT PIPE MARKET

Montreal.

Wrought iron and steel pipe is again attracting attention, the market being in a very strong position. Although the present basis on which wrought piping is now selling, list No. 56, was only announced to the trade a few weeks ago, a further revision in an upward direction would not be surprising in the near future. Domestic producers draw attention to the fact that iron pipe has been recently advanced on American markets, while steel piping is expected to show higher prices in the not far distant future. Demand at the mills in the south has been exceptionally good during past months with deliveries in some instances many weeks behind. Mills locally also report a good movement for this season of the year.

ALSO STRONG TENDENCY IN PIPE FITTINGS

Montreal.

As in the case of wrought piping, fittings have again developed a very strong undertone. Since the revision of two weeks ago, when prices in general were brought to higher levels, production costs are said to be steadily on the increase. When discussing a further advance in these products with local manufacturers it was stated that there was no definite indication of such a change at present, but undoubtedly the tendency was upwards. There is a fair amount of business in fittings for this season of the year at the following discounts:

PIPE FITTINGS—

Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, small	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%
Dart Unions, blk., ¼ to 2 in.	331-3%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, black and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ; in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., running thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—

Price list effective June 1st, 1922. Discount 70 per cent.

NEW DISCOUNT ON COES' KNIFE HANDLED WRENCHES

Montreal.

Through a revision in discounts, higher prices are now quoted on Coes' knife handled wrenches. These are now quoted at less 30 per cent., former discount being 37½ per cent.

REDUCTION IN PRICES ON MONTY WOOD PLANES

Montreal.

Announcement is made by the manufacturers of Monty wood planes that prices on their line of carpenters' planes are reduced approximately 10 per cent.

JENKINS VALVES ON HIGHER PRICE BASIS

Montreal.

In sympathy with a stronger tendency in the undertone of brass valves, the Jenkins line have been advanced approximately ten per cent. Virgin copper, the basic metal in the manufacture of these goods, has displayed a firm market tone for some time past, and this tendency is now assisted by increased production costs in forming higher market values. Quotations on other lines of compression goods are unchanged, and there seems to be some difference of opinions with regard to the future trend of these products. While there is a tendency towards higher prices, the opinion is expressed that price levels will remain unchanged, for the present at least. Following are present discounts:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	41%
Bath cocks, quick opening	41%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks, standard	50%
Radiator valves, standard	58%
Do., removable discs	58%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins gate or straightway	16%
Jenkins iron body, globe and angle	5%
Jenkins iron body, gate	25%

HIGHER PIG LEAD PRICE FIRMS LEAD PRODUCTS

Montreal.

Further strength in lead on primary markets add a firmer tendency in lead and zinc products. Quotations on ingot lead advanced recently on both European and American markets, this resulting in a substantial increase in local quotations. Spelter is also making further gains, while other metals which enter into the manufacture of these lines are reported on a steady to firm market tone. Quotations are unchanged, but following price levels are considered very firm.

LEAD AND ZINC PRODUCTS—

Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs. sq. ft., lb.	0 10½
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¼
Do., 4 to 8 lbs. sq. ft., lb.	0 9½

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 25
Do., stricty, lb.	0 22
Do., commercial, lb.	0 21
Do., wiping, lb.	0 21
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

CLAW AND TAMPING BARS REGISTER ADVANCE

Montreal.

Advanced quotations are given on claw and tamping bars. These are now quoted at $11.50 per 100 lbs.

SHEET STOCKS ARE GENERALLY IN FAIR SHAPE

Montreal.

All lines of sheets are unchanged on the local market this week, following the advance in galvanized sheets one week ago. Recent arrivals of this product from overseas have replenished stocks to an extent, and while certain firms report a temporary shortage of a few of the best selling sizes of galvanized, the trade in this locality are apparently suffering little through delayed deliveries from southern market centres.

Distributors now report a better call for Canada plate. Although much of this business was booked at an earlier date, there are a number of dealers who did not anticipate requirements, and are now entering the market for immediate deliveries. Prices in general remain firm at following levels:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 25	7 75
26 gauge	7 00	7 50
24 gauge	6 40	6 90
22 gauge	6 05	6 55
18—20 gauge	5 35	5 85
Other Brands—		
10¾ oz	7 00	7 50
28 U. S. gauge	6 60	7 10
26 U. S. gauge	6 30	6 80
24 gauge	6 15	6 65
22 gauge	6 15	6 65
18—20 gauge	6 00	6 50
16 gauge	5 85	6 35

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 50
20 x 28 IC, 112s	13 00
20 x 28 IX, 112s	15 00
20 x 28 IXX, 56s	9 00
20 x 28 IXXX, 56s	9 75
TERNE PLATE—	
20 x 28 IC, 112s	14 00

PRICES HIGHER ON ENTERPRISE CHOPPERS

Montreal.

Announcement is made of a ten per cent. advance on Enterprise food choppers, which goes into effect immediately.

HIGHER PRICES ON SOME INGOT METALS

Montreal.

Although there is a certain quietness in the ingot metal markets, prices in some instances are somewhat higher, doubtless owing to increased duties in the United States. The war situation, if it shows further development, may also further affect prices to some extent.

Higher Prices on Enameled and Tinware

Price Advances of From Five to Ten Per Cent. on Most Staple Lines—Galvanized Ware Remains at Recent Revision

AS ANNOUNCED in last week's issue of Hardware and Metal, prices on practically all enameled ware, granite ware and tinware products have been advanced. With few exceptions all lines are now from 5 to 10 per cent. higher, the more staple and better known products showing a price increase of approximately 8 per cent. This is the most general revision made since the announcement in December last year when nearly all products in both tinware and enameled ware were reduced in price. Since that date changes of a more minor nature have been made, including a revision to higher prices on certain copper goods early this year and a reduction in galvanized ware in June last. The latter line of products was again revised earlier this month, bringing prices to a higher level, and it is noted that these goods remain unchanged at the present time.

Manufacturers point to the higher cost of raw materials, particularly the various sheets used, as responsible for the present revision. The undertone of the market in general has been gradually strengthened by the advancement made in sheet markets, and other iron and steel quotations. From a production standpoint, the coal situation has a more or less direct bearing on the matter, fuel costs being higher, especially in more recent weeks.

It will be remembered that in December a substantial reduction was made, approximately 20 per cent., and manufacturers claimed that their lines were brought down to rock bottom in anticipation of market levels for future months. However, it is pointed out that rather than a continued easing in raw materials, prices remained steady for some time followed by an advancing market, until current levels are considerably higher than they were twelve months ago.

Following are revised quotations:

WARES—
- Britannic, list plus 5 per cent.
- Scotch Grey Ware, prices on application.
- Colonial, 35 per cent.
- Imperial Ware, 35 per cent.
- Pearl, 35 per cent.
- Diamond, 12½ per cent.
- Premier, 12½ per cent.
- Canada ware, 12½ per cent.
- Crescent, prices on application.
- Crystal, or whiteware, 50 per cent.
- Japanned ware, plus 10 per cent.
- Japanned ware, white, list plus 20 per cent.
- Plain and Japanned Sprinklers, list plus 10 per cent.
- Stamped ware, plain, 50 and 5 per cent.
- Stamped ware, retinned, 40-12½ per cent.
- Copper bottoms, plus 5 per cent.
- Tinners' Trimmings, plain, 50/5 per cent.
- Tinners' trimmings, retinned, 40/12½ per cent.
- Tinners, trimmings, general plus 5 per cent.
- Factory milk cans, list, plus 15 per cent.
- Milk can trimmings, list plus 33 1-3 per cent.
- Cream cans, write for prices.
- Railroad cans, write for prices.
- Sheet iron ware, list plus 10 per cent.
- Pieced ware, ordinary, list, plus 30 per cent.
- Pieced tinware, C.B., list, plus 40 per cent.
- Fry pans, Acme, 30 per cent.
- Fry pans, Quick Meal, plus 5 per cent.
- Spider, steel, plus 5 per cent.
- Fire Shovels, Japanned, list, plus 10 per cent.
- Steel Sinks, galvanized, plus 10 per cent.
- Steel Sinks, painted, plus 10 per cent.
- Light Galvanized Pails and Tubs, 10 per cent.
- Heavy Galvanized, Pails and Tubs, 10 per cent.
- Hollow Ware, net list.
- Garbage Pails, 10 per cent.
- Japanned Coal Hods, list plus, 40 per cent.
- Paper lined boards, 35 per cent.
- Wood lined boards, 10-10 per cent.
- Copper boiler, prices on application.
- Copper tea kettles, 5 per cent.
- Copper tea and coffee pots, 5 per cent.
- Stove and other pipe, 5 per cent.
- Stove pipe elbows, black and galvanized, 10 per cent.
- Galvanized coal hods, list plus 40 per cent.

Toronto, Ont.

TORONTO, September 28.—Practically all the market changes recorded this week are in the nature of advances. Higher price levels are now in effect on the following budget of hardware lines; eavestrough, conductor pipe, ridge valley and nosing, brass and copper rods and tubing, grub hoes, clay and rock picks, mattocks, crow bars and skate screws, while spelter and antimony feature the ingot metal markets with proportionate gains. Advanced quotations are in effect on practically all enameled ware and tinware products as briefly announced in last week's issue. Other increases are rumored to be pending on tarred felt, coal oil and ready roofing, while in addition, brass compression goods reflect a firm market tone and upward revisions on companion lines are considered probable.

HIGHER QUOTATIONS ON BRASS AND COPPER

Toronto.

Owing to recent developments in the virgin metals, copper and brass rods and tubing are now advanced in price to the extent of one and two cents per lb. The tone of ingot copper has continued to register strength during recent weeks and this tendency is now reflected in the prevailing quotations on the semi-finished products. No variation is announced on sheets, as an upward revision on these was put into effect a few weeks ago. While virgin copper is now showing some slight signs of weakness, this condition is looked upon as temporary, the statistical position being much firmer than was the case some months ago, when large stocks of scrap copper had to be disposed of. These supplies have now disappeared and with normal requirements

being in evidence during the ensuing week, no marked development of an adverse nature is anticipated. The current demand, however, during the winter months for both copper and brass goods, may remain moderate and such quiet conditions tend to detract from the present strength. New local prices follow:

BRASS—

Sheets base, per lb.	0 23
Tubing, base, per lb.	0 30
Rods, base, per lb.	0 22

COPPER—

Rods, base, per lb.	0 30
Soft Sheets, plain, 16 oz. and heavier, per lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 33

PRICES ON SKATE SCREWS NOW HIGHER

Toronto.

There has been a slight advance in quotations on skate screws, the revised price level being 48 cents per one dozen cartons.

RUMOR OF PENDING CHANGES IN ROOFINGS

Toronto.

The opinion has been expressed in certain distributing quarters that some advances in prices on ready roofings may develop in the near future. This rumor is stated to be based upon the developments in primary production centres, where an increase of between ten and fifteen cents per roll is forecast. No active confirmation of such a pending change has come to hand.

GRUB HOE PRICES AT HIGHER LEVELS

Toronto.

Quotations on grub hoes have also climbed this week, the revised local levels on these products being given on the current market quotation pages.

ROCK AND CLAY PICKS AT HIGHER QUOTATIONS

Toronto.

An increase of fifty cents per dozen is now in effect on both clay and rock picks. Revised local quotations on these products are given as follows:

CLAY PICKS—

5 to 6 lbs., per doz., $8.25; 6 to 7 lbs. per doz., $9.00; 7 to 8 lbs., per doz.; $10.00.

ENAMELED WARE AND TINWARE PRICES RISE

Toronto.

As briefly announced in last week's issue of Hardware and Metal, quotations on practically all enameled ware and tin ware lines have been advanced approximately five per cent. Changes of a slightly higher nature are recorded in the revised discounts now in effect on these products, which include graniteware, enameled ware, tinware, japanned ware, and companion lines. The new quotations are contained on the current market pages, as well as elsewhere in this section.

BASE PRICE OF $3.40 QUOTED ON WIRE NAILS

As intimated in previous issues of Hardware and Metal, much unsettlement exists in the wire nail market. The present situation has not been clarified since reference was made several weeks ago to the practice of shading the current base quotation. The present level of $3.65 Toronto, is purely nominal, as one local wire nail manufacturer has been known to sell retailers wire nails at a price as low as $3.40 base. Other distributors admitted to Hardware and Metal that difficulty is being experienced in keeping to the $3.65 level, shading of this to the extent of fifteen and twenty cents per keg being the usual practice, it having reached the stage where such price cutting is quite common.

MAY BE INCREASE ON TARRED FELT

Toronto.

An increase in the quotation on tarred felt is stated to be pending on local markets, the extent of this anticipated rise being 25 cents per cwt. This change has not yet been placed in effect, but the current trend of the market is described as decidedly upward

MATTOCK PRICES NOW FIFTY CENTS HIGHER

Toronto.

Both cutter and pick mattocks have been advanced in price, the extent of this change being fifty cents per dozen. The current higher quotations follow:

Cutter and pick mattocks, $10.00 per dozen.

CROW BAR PRICES ALSO SHOW ADVANCE

Toronto.

In conjunction with the general increase in prices on other products of this class, crow bars are now fifty cents per dozen higher. This change brings into effect the quotation of $8.50 per dozen locally.

BAR IRON PRICE AT $3.40 NOT UNIFORM

Toronto.

Generally speaking the local bar iron and steel market is without important feature. Prices are firm but unchanged. Although some advances were announced last week on steel bars, it has developed that the price of $3.40 is not representative. Certain distributors continue to adhere to the $3.25 quotation. It is a fact, however, that the $3.40 price obtains in certain quarters, as when the hardware trade and small lots feature the demand.

There is a feeling in the market that the pig iron situation should develop an easier tone now that strikes have been settled and coal is more easily available. It is pointed out, however, that accumlated orders must necessarily be disposed of before new business can be considered. Average current quotations follow:

IRON AND STEEL—

Mild steel bars, base	3 35	3 40
Mild steel bands, 3-16 in. base		3 90
Bar iron, base	3 35	3 40

Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

SHEET MARKETS REMAIN ACTIVE; PRICES FIRM

Toronto.

Sheet markets remain active at the advanced prices as announced recently. It is felt that fair-sized stocks have been produced throughout the country, and that existing figures represent the peak. There are dealers, however, who think otherwise. It is stated that the current demand remains brisk, and well up to expectations for this season of the year.

The steel market seems to have been fairly well equalized by the increase in production that has just occurred since prices have not materially changed in the past fortnight and there is no definite upward or downward trend apparent at present.

Interest exhibited by steel buyers is confined almost entirely to prompt and early deliveries, little business being offered for December or first quarter. In some quarters the showing is interpreted as indicating that there will be a readjustment in the market before business for 1923 is taken on a large scale. Sheet prices follow:

BLUE ANNEALED SHEETS—

10 gauge, base	4 50
12 gauge	4 55
14 gauge	4 60
16 gauge	4 65

BLACK SHEETS—

18-20 gauge	5 30
22-24 gauge	5 35
26 gauge	5 40
28 gauge	5 50

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's	Hd.
28 gauge		7 75
26 gauge		7 50
24 gauge		6 90
22 gauge		6 55
18 and 20 gauge		6 05
	Premier and	Apollo
10¾ oz.	7 15	7 65
U. S. 28 base	6 75	7 25
U. S. 26 base	6 45	6 95
22 and 24	6 30	6 80
18 and 20	6 15	6 65
16	6 00	6 50
12 and 14	5 85	6 35

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown in 20c. per 100 pounds.

MAY BE EARLY RISE IN COAL OIL PRICE

Toronto.

Recent advices received from southern gasoline markets indicate that both "gas" and coal oil prices are very firm. It is anticipated, however, that an advance in the price of kerosene will likely develop in the near future. There is also a much better demand for coal oil at this time of the year, while stocks are moving in a satisfactory fashion. It is considered doubtful whether gasoline will develop any higher prices, as the heavy season for this product is nearing the close.

Gas oil is also firmer. Many small consumers are using this oil to heat their homes and apartment houses, and consumption is of fairly generous proportions for this time of the year considering that the cold weather has not yet arrived.

SCRAP MARKETS SHOW SIGNS OF IMPROVEMENT

Toronto.

Generally a fair business is being done by local waste material firms, despite the facts that consumers on the whole have continued purchasing according to requirements only and that car and fuel shortage have been conditions to contend with.

Reflecting the upward trend of virgin metals, both lead and zinc scrap quotations are relatively higher this week.

Copper scrap showed every indication of becoming stronger and some fair-sized parcels were disposed of, but it later closed with the market slower and consumers showing no disposition to purchase. Red brass also slumped after having been in fair demand.

Cast iron still continues strong, with an upward tendency. There is an advance in cast iron of $2.00 a ton. This is a notable advance in the market, which was already strong and high. The usual averages of dealers' buying prices for fairly large quantities are as follows:

SCRAP MATERIALS—		
Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	20 00	21 00
Stove plate	16 00	17 00
Grate bars	12 00	13 00
Standard car wheels	15 00	16 00
Scrap Metals		
Heavy copper and wire	10 75	11 25
Light copper	9 25	9 75
No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 25	7 50
Light brass	3 50	4 50
Heavy yellow brass	5 50	6 50

Scrap zinc	4 50	4 75
Scrap Rubber		
Boots and shoes	2 00	....
Lumbermen's rubber boots	1 25	1 50
Auto tires	0 25	0 50
Solid tires	6 60	1 00

BRASS COMPRESSION GOODS REFLECT FIRM MARKET

Toronto.

No further developments have been recorded in the market for brass compression goods since the increase on certain lines of valves announced last week. In conjunction with this upward revision, it was anticipated that similar changes may take place on companion lines, but no announcement to this effect has as yet materialized. The following are, therefore, current local discounts on these products:

COMPRESSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in.	50%
Do., 2½ in. to 3 in.	43%
Globe angle and check valves, standard	25%
J. M. T.	10/10
J. M. T. C.	16/10
J. M. T. Gate Valves	16/10
Jenkins gate or straightway	16/10
Jenkins Globe	10/10
Radiator valves, standard	58%
do., removable disc	58%
Emco check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco swing check, ⅜ in. and ½ in.	40%
Do., Do., other sizes	33%
Webber gate valves	33%
BASIN COCKS:—	
No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

PRICES ON ANTIMONY AND SPELTER CLIMB

Toronto

Very little new activity has been manifested in the non-ferrous metal markets during the week. About the same amount of business is moving while prices remain practically unchanged, except in the case of lead and antimony, where slight advances are recorded. Orders are well scattered.

Tin has continued to fluctuate, first showing a recovery and later weakening again. Spelter, however, is still climbing.

COPPER.—A firm tone prevails in the copper market, with both statistical and commercial positions remaining on the road towards general improvement. There is just a moderate domestic demand, but prices have practically no variation, the local level being unchanged at 17½ cents.

TIN.—Local quotations on tin are slightly higher this week, this change reflecting the recovery recently recorded in primary market centres. It is noted, however, that the current undertone of tin is sagging again, but these fluctuations have not been of marked extent. The new domestic quotation is 36½ cents.

LEAD.—This metal remains unchanged in price on domestic markets at $7.50, but it also retains the strength recorded during recent weeks. The call for lead is described as in excess of the offerings on southern primary centres, in spite of the firm prices.

SPELTER.—This metal is very strong, both on primary and domestic markets, and quotations in both instances are reaching a higher level. The new local price is 9 cents, this development indicating that the market is firmly established at the gains recorded. There is stated to be no signs of abatement in the current demand.

ALUMINUM.—This market has generally remained unchanged, both as regards prices and current conditions. Previous local levels continue to hover between 20 and 21 cents.

The Swing of the Price Pendulum During the Past Twelve Months.

WHILE THE existing price levels on the majority of hardware products are considerably below the average quotations prevailing one year ago, yet the current prices indicate a decided upward trend if a comparison is made month by month. In the first week of August, 1921, the composite price level stood at 211, when based on the index figure of 100, as representing the pre-war average of 1914. The prevailing level is at 185.83, or an approximate decline of twelve per cent. in the past year. A slightly greater reduction, however, was in effect during April and May of the present year, when the index figure representing the average price trend on fifty hardware lines reached the mark of 184.5. During the last three months, therefore, the upward climb of quotations has been more pronounced, such basic materials as iron and steel goods supplying the premier developments in this direction. Following is a brief but comprehensive table showing the relative index figure of current prices, and the rise and fall during the past year, as compared with pre-war standards and the highest levels reached in 1920:

Month.	Year.	Index.
August, (Base)	**1914**	**100**
October, (High Level)	**1920**	**268**
August	1921	211
September	1921	206
October	1921	203
November	1921	202
December	1921	200
January	1922	194
February	1922	189
March	1922	186.27
April	1922	184.53
May	1922	184.51
June	1922	184.75
July	1922	185.05
August	1922	185.83

London, Ont.

LONDON, September 28.—A good movement of seasonal hardware lines is reported this week. Electric and oil heaters and also stoves and stove accessories are among the leading sellers. Hardware prices are very firm with higher prices quoted on several lines including linseed oil, turpentine, window glass, picks, mattocks, grub hoes and crowbars. Collections are reported good.

CLAY PICKS ALSO ADVANCED IN PRICE

London, Ont. —

Quotations on clay picks have been advanced, and these products are now fifty cents per dozen higher. The revised local quotations are given herewith. The variance in prices on picks above factory quotations is accounted for in freight, these being otherwise f.o. b. factory.

CLAY PICKS—

5 to 8 lbs., $8.25 doz.; 6 to 7 lbs., $9.00 doz.; 7 to 8 lbs., $9.75 doz.

ROCK PICK PRICES HIGHER

London, Ont. —

Local prices on rock picks have been advanced, the increase being fifty cents per dozen. Revised prices follow:

ROCK PICKS—

5-6 lbs., $8.25 doz.; 6-7 lbs., $9.00.; 7-8 lbs., $9.75 doz.

FIFTY CENT INCREASE IN MATTOCK PRICES

London, Ont. —

New prices at a higher level are now in effect on mattocks. These revised quotations, f.o.b. London, show the 5½ lb. mattock at $10.00 per dozen and the 6 lb. mattock at $10.50 per doz. This is an increase of fifty cents.

PRICES ON GRUB HOES ALSO CLIMB

London, Ont. —

Grub hoes have been advanced in price this week, the new local quotations being given below.

GRUB HOES—

3 lb., $7.50 doz.; 3½ lb., $8.00 doz.; 4 lb., $8.50 doz.

PRICES ON CROWBARS NOW HIGHER

London, Ont. —

An advance of fifty cents per cwt. is now quoted on crowbars, these products being priced at $8.50 per 100 lbs.

MAY BE RISE IN ROLLER SKATE PRICES

London, Ont. —

There is a fair fall sale at present noted for roller skates. Quotations are considered likely to advance in the near future. Prevailing levels, however, follow:

ROLLER SKATES—

No. 3 Plain Steel Wheels, $1.00 pair.; No. 5 Ball Bearing Steel Wheels, $2.10 per pair.

ADVANCE PRICE LEVELS ON CORN BROOMS

London, Ont. —

The lower priced line of corn house brooms has been advanced to the extent of fifty cents per dozen, this change bringing current levels to $5.00 per doz.

UPWARD REVISION IN GLASS DISCOUNTS

London, Ont. —

Owing to the improved demand for window glass, prices have been advanced through a revision in discounts. The quotation on both imported and domestic window glass are revised as follows:

WINDOW GLASS—

Domestic Glass, less than 25 cases, list less 5 per cent. 25 cases and over, list less 10 per cent. Belgian glass, less than 25 cases, list less 15 per cent.; 25 cases and over, list less 20 per cent.

FOX GRASS HOOKS AT LOWER LEVELS

London, Ont. —

For present and spring delivery, the Fox line of English grass hooks are quoted at reduced price levels. New prices follow: No. 2, $4.65; No. 3, $4.85; No. 4, $5.25.

WHITE LEAD IN OIL ENJOYS FAIR SALE

London, Ont. —

The sale of white lead in oil continues good, with a better movement noticeable as the season progresses. Following are current price levels:

WHITE LEAD IN OIL—

	Tons Per 100 lbs.	Less Tons
Pure	13 55	13 90
Elephant	14 05	14 40

FALL SALES START FOR ELECTRIC LAMPS

London, Ont. —

A good fall sale has commenced for tungsten electric lamps. Prices on these products are as follows: Holland lamps, 10, 15, 25, 40 and 60 watt, in cases of 100, $0.24 each. Smaller lots, $0.26 each.

BUILDERS' HARDWARE IN BRISK DEMAND

London, Ont. —

Dealers report that the carpenters' tools and builders' hardware sales continue to record a marked volume each week, and in some cases increased activity in noted. Prices on these lines are very firm.

Winnipeg, Man.

WINNIPEG, September 28.— Current hardware business continues seasonably good and steadily increasing as Fall lines start to move. Reports covering Western conditions show improvement and when crops are harvested a revival of business is expected. Wholesalers state that buying is on a somewhat broader scale although quantities are limited.

Barb wire has shown an advance. The tone of the wire nail market is firm and higher prices are expected. An improvement in the demand is noted for stoves, heaters, coal hods, lamps and lanterns.

PUTTY PRICES NOW REGISTER DECLINE

Winnipeg. —

There has been a decline of 50c on putty. One hundred pound irons are quoted at $5.50 while 25 pound irons are quoted at $5.75.

LINSEED OIL PRICES SHOW NO CHANGE

Winnipeg. —

There is no change in quotations on linseed oil. Raw is quoted at $1.15 with boiled at $1.18 per gallon.

TURPENTINE PRICES REMAIN FIRM

Winnipeg. —

Reports from the south state that Southern markets are ruling firm. There is a steady movement and quotations at $1.95 per gallon show no change.

FIRMER TONE ON GALVANIZED SHEETS

Winnipeg. —

Western manufacturers report that there is a fair demand for galvanized sheets and there is sufficient quantity on hand to meet the trades requirements. The tone of the market is firm and upward tendencies can be expected.

LAMPS AND LANTERNS IN SEASONABLE CALL

Winnipeg. —

With the approach of fall the sales of gasoline lamps and lanterns have been stimulated, in a noticeable degree, according to current information secured from both wholesale and retail sources.

COAL HODS NOW IN POPULAR DEMAND

Winnipeg. —

Wholesalers report an active enquiry for coal hods. Galvanized standard open 17 inch is quoted at $9.97 with standard funnels at $12.27.

HIGHER WIRE NAIL BASE EXPECTED SHORTLY

Winnipeg. —

The undertone of the market for wire nails is ruling firm. Higher prices are expected. There is a good demand.

BARB WIRE SHOWS ADVANCE IN PRICE

Winnipeg. —

An advance of 20 cents has been put into effect on barb wire. Lyman four cattle two point—$3.95 and Baker two point has advanced to $3.90. Plain twist and galvanized show no change in price.

Calgary, Alta.

General Hardware Trade in West More Brisk in Country Localities

CALGARY, September 28.—The summer weather of the past week enabled threshers to make up time lost because of rain, and grain is beginning to move in heavy volume. Railway reports show big increases in shipments; a movement which will continue heavy until navigation closes. Cash returns have not reached the point where any general liquidation is noticeable, and this period is probably a month away. The necessary expense however for labor and supplies has started a circulation of money that is helping to make general trade more brisk, especially in the districts apart from the city. Jobbers report the booked orders for such distinctly fall lines as glass, heaters, lanterns, stove pipes and elbows, etc., to be fairly satisfactory in volume, with the individual orders smaller than usal, showing evidence of careful buying and a tendency to let the jobber carry the stock. Sorting on all lines usually booked in quantity should continue brisk throughout the season. We have got through September without the usual week of frosty weather, and the general hustle for certain lines of goods found needful with first frost is still ahead of us.

Kitchen hardware continues one of the most active lines. Jobbers and retailers both remark on the steady movement in graniteware and tinware lines and all kitchen sundries. One jobbing firm reports the sale of a surprising quantity of aluminum assortments to retail at a flat price per article. The retailer has used these assortments for well advertisel sales and that they have been successful is apparent by the number of repeat orders.

Jobbers' prices have followed market advances fairly closely, although in some cases a month has gone by before local markets have taken on the higher levels of eastern markets. It is not noticeable so far that the retailers are passing on the higher prices to any extent. As stocks are replenished of course this will have to come, but at present many retailers feel the higher levels are temporary and due for readjustment in the near future and will not disturb present selling prices until he has more evidence that present markets will hold good for some time to come.

Price Developments

Changes are effective this week on practically the whole line made by the graniteware and tinware manufacturers. Advances vary from about five to ten per cent. on the different sections of the catalogue. This change is of immediate interest to all retailers as the lines as reported above have shown a satisfactory activity throughout the season. New prices F.O.B Calgary, Edmonton and Lethbridge are as follows:

Pearl or Imperial Ware	10, 10, 5 off
Diamond or Canada Ware	Plus 2½
White Ware	20, 20, 10 off
White Ware Dec.	Plus 22½
Japanned Ware	Plus 32½
Japanned Ware, White	Plus 42½
Stamped Ware Plain	40, 7½ off
Stamped Ware Retinned	30, 15 off
Copper Bottoms	Plus 12½
Tinners' Trimmings, Plain	40, 7½ off
Tinners' Trimmings Retinned	30, 15 off
Tinners' Trimmings General	Plus 20
Milk Can and Dairy Trimmings	Plus 57½
Factory Cans	Plus 32½
Pieced Tinware	Plus 55
Pieced Tinware with Copper Bottoms	Plus 62½
Acme Fry Pans	15 off
Light Steel Spiders	Plus 22½
Stove Shovels	Plus 32½
Sinks	Plus 27½
Sheet Iron Ware	Plus 32½
Galv. Pails, Tubs, Garbage Cans	Plus 10
Galvanized Ware	Plus 7½
Oil Tanks	Plus 45
Japanned Coal Hods	Plus 62½
Galvanized Coal Hods	Plus 62½
N. P. Tea Kettles & Tea Pots	Plus 12½
Machine Oilers	Plus 25
Paper Lined Stove Boards	22½, 2½ off
Wood Lined Stove Boards	2½ off

The market advance on galvanized range boilers has been made effective on local markets, the new levels totaling about an even ten per cent. over recent quotations. This line shows a steady demand for current requirements with no inclination to buy quantities beyond 30 day needs. Current quotations Calgary, Edmonton and Lethbridge follow:

Gal. Range Boilers	Standard	Ex. Heavy
30 Gal.	12.00	16.00
35 Gal.	16.00	19.25
40 Gal.	19.25	22.50
52 Gal.	27.50	30.75
66 Gal.	41.00	
82 Gal.	47.00	
100 Gal.	71.00	
120 Gal.	85.75	
144 Gal.	99.00	

A good many retailers who have catered to the needs of poultry men will be interested in new prices just issued on incubators and brooders. This business has reached a nice volume in this province and the hardware store is now looked upon as the regular source of supply. The new prices show a decline of 15 per cent. on the Buckeye line of incubators and brooders and are as follows: Style E. Incubator No. 14, $15.25; No. 16, $25.35; No. 17, $34.25; Standand Incubators No. 1, $32.95; No. 2, $40.80; No. 3, $53.40; No. 4, $62.50; No. 5, $98.15; Brooders, No. 27, $15.60; No. 28, $17.90; No. 29, $20.25; No. 20, $10.10; No. 21, $13.15; No. 22, $17.60; No. 18, $20.20; No 19, $25.20; No. 25, $28.10.

Vancouver, B. C.

Distinct Signs of Improvement Noted in Vancouver Hardware Circles

VANCOUVER, B. C., September 18.—There appears to be a distinct improvement in Vancouver this week in hardware circles. Although the volume of sales has been scarcely worthy of a blaring of trumpets, yet the optimistic reports coming from the prairie as to the big crop yield and its probable ultimate effect on coast trade, are such that the trade is looking to the future trade with a much more evident feeling of confidence. Within a few weeks, the exodus from the prairie to the coast will begin and with more money in circulation, hardwaremen figure they will get a part of it.

Discussing trade conditions with one of the largest distributors on the coast this week, Hardware and Metal was told that sales up to the end of August were fully up to last year which represents an increase of nearly twenty per cent. in cash value. This wholesaler stated that city business was good and that collections were, if anything, on the improvement. Vancouver Island which has been on the quiet side, is ordering a little more freely due to the activity of the mines and logging camps. As an example, the output of logs from Cowichan Lake over the C. P. R. branch line has jumped to a million feet a day which is just double the output earlier in the season.

Mining in the Cedar Creek area in the Cariboo is said to be petering out and this is reflected in hardware orders which have dropped to a minimum. Along the Grand Trunk and in the Okanagan, business is slack, merchants in the fruit district being slow in meeting their commitments on account of the big crop and cheap prices.

Distributors have been helped during the last couple of weeks by the departure of the last boats for Dawson before the freeze-up. It is always a rush at this time of year, for many of the far northern traders have left the placing of orders for their winter supplies until the closing trip of the season. Mining camps in the north and boundary are keeping up their activities started early in the year and coast dealers continue to feel the effects of this business.

Stoves, furnaces and other heating appliances have moved out well at unchanged prices though about ten per cent. cheaper than at this time last year. The six days ending September 25 are being observed as Electric Week and special inducements are being shown by many electric stores.

In the china and glassware section of the trade, sales are reported to be well up to the average. Dinner sets are being offered by several stores as "specials."

A Hastings street store is offering the stock of a local concern for two days only at advertised prices of fifty cents on the dollar. It includes general hardware, sporting goods, cutlery, glassware, stoves, ranges and auto accessories. Aluminumware is again being featured.

St. John, N. B.

Opening of Big Game Hunting Season Brings Many Tourists to Maritimes

ST. JOHN, N. B., September 28.—This week will see the arrival of many tourists from across the border who will come here to hunt big game in the favorite game resorts of the province, as the regular season will open on Monday, October 2. Already several non-resident hunters have gone into the woods, having taken advantage of the extra time granted by the taking out of a special license upon the payment of an additional fee. Some of the favorite districts of the tourists and sportsmen who come into the province each year are the Tobique, Restigouche, Cains River, Cannan and Miramichi. Jack Dempsey, with a party of sportsmen, visited the sporting department of W. H. Thorne and Co., Ltd., at the invitation of the sporting goods salesmanager, and the party declared themselves very favorably impressed with the large and complete stocks of sporting goods handled by the merchants of St. John. Mr. Dempsey left St. John for a trip in the woods, where he and his party will spend two weeks hunting.

Residents of the Maritime Provinces are very much interested in reports of Dr. W. H. Collins, director of the geological survey department of mines. After surveying the mineral industry in New Brunswick and Nova Scotia, he reports new coal beds, the existence of which was unsuspected, and enormous deposits of oil shale in both provinces, associated with coal measures. These were not yet being mined, he stated, but they constituted the basis of an important future mining industry.

The paint business is keeping up well in St. John, and many property owners are at the last minute protecting their buildings from the winter weather soon to be here. Coming along one short street, Hardware and Metal's representative last week saw no less than seven houses being painted in a stretch of about one hundred and fifty yards. The hardware stores now all have a fall appearance, window trims all indicating that it is time to fix up the home for the coming cold weather.

A very fine display of heaters, self feeders and ranges was noticed this week in Emmerson and Fisher, Ltd., also their newspaper advertising has been featuring heating stoves along with other fall goods. W. H. Thorne and Co., Ltd., are largely advertising oil heaters as being very necesary and economical at this time of the year, enabling one to get up, dress and shave in comfort without having to use a coal fire. T. McAvity & Co., Ltd., are specializing just now on sporting goods, and are using large space in the local newspapers, advertising the fact that the hunting season is now open and that they are well stocked with rifles, guns and ammunition.

Several large shipments of plate glass were noticed in the St. John freight sheds, consigned to local merchants. A good deal of plate glass has been used in St. John this year, as many merchants have been putting in new store fronts, and in two or three cases where there has been fire damage, the windows have in every case been replaced by more modern fronts, set in tiles and copper, with prism-lights set in copper running across the top. This method of lighting allows the daylight to penetrate to the back of the store, and is a great improvement over the old method of encasing the window from top to bottom, making the rear of the store very dark. One merchant stated that there had been more new store fronts installed this year than during the last three years all put together.

Business all round seems to be picking up in good shape, although the boot and shoe dealers claim that they have not yet seen much improvement, but it it felt that theirs is yet to come. Tourist traffic has been very heavy, and a good deal of money has been left in New Brunswick by the visitors. The St. John Board of Trade held a very successful convention during the week of the exhibition, and the Retail Merchants' Association is to hold theirs during the first week in October.

Hamilton, Ont.

Advancing Level of Commodities An Incident of Improving Times

HAMILTON, September 28.—Current reports indicate that retail trade continues on the road to improvement, more activity being recorded during the present month. There is still room in many directions for considerable betterment, according to practically the majority of recent reports. Wholesale trade, however, is also gradually increasing at this season of the year, and while buying was formerly limited to immediate needs only, it is stated that retailers are now preparing to purchase ahead more generally. Industry is proceeding at an active rate, but collections are yet considered as only fair, although some improvement in this respect has also been noted in several quarters.

Seasonal activity is being recorded in ash sifters, and weather strip is also in a popular movement. Current reports indicate a good interest in fall lines, such as shells, cartridges, shot guns, rifles, various lines of cutlery, builders' hardware, buck saws, axes, cross-cut saws, electric bulbs, lamps, lanterns and heaters.

The danger of a secondary inflation movement contained in the current market developments is generally being discounted. A survey of existing conditions indicates that except for the temporary influence of the recent coal and rail strikes, the advancing level of commodities is merely an incident of improving times.

During recent weeks there have been indications that many merchants are improving their stocks, carrying more widely diversified lines than for a considerable period. This would give the impression that the outlook for future trade is favorably regarded and that collections are showing a steady improvement.

The upward climb of pig iron prices during recent weeks has indirectly resulted in firmer quotations on various manufactured products, pig iron being reflected in production costs. Since the effects of the coal strike have been more pronounced in the steel industry, domestic pig iron prices have gradually risen until the prevailing level is approximately thirty per cent. higher than the quotation in effect early this year. In conjunction with this situation, the supply of pig iron has gradually diminished until the current demand is in excess of the supply. This scarcity is naturally being felt at producing centres.

There is still quite a lot of painting going on in different sections of the city, although the rush is about over with the professional painters. There is also a good amount of building going on as compared with the last two or three years during the fall seasons. Employment conditions are fair, and the merchants are beginning to feel the benefits of more spending power than when labor conditions are bad. The vacation season is now over, and with all their travellers now covering their territories, the jobbing houses are becoming more active than they have been during the last two or three months.

PRATT & LAMBERT, INC., SALESMEN AT CONVENTION

Industrial salesmen from New York, Buffalo, Chicago and Bridgeburg, Ont., representing the Eastern, Central, Western and Canadian divisions of Pratt & Lambert, Inc., met for a two-day conference at the Buffalo plant, September 21-22.

Weekly Paint Markets

Montreal

MONTREAL, September 28.—The outstanding price change on the paint markets this week is a further advance in turpentine of ten cents per gallon. Local price levels vary to an extent among distributors, but it is noted that all dealers quote a uniform advance. The market in the south continues firm with a good demand both on domestic and foreign markets. The trend of the linseed oil market is still an uncertain one, and during the past week after showing a further advance the market broke and present seed quotations are about fifteen points below the high mark reached in the middle of last week. With the new seed crop expected on eastern markets within the next week or so it would naturally appear than an easier market will continue, but local crushers state that the situation is very uncertain and factors are liable to develop which will cause a fluctuation in either direction. With the new tariff arrangements in the United States, it is stated that importations of English oil to this market may become more extensive, and locally developments in this regard will be watched with interest. White lead in oil is much firmer in price owing to a marked advance in pig lead quotations, with trade progressing along seasonal lines. Window glass quotations are unchanged with a decided improvement in demand.

FURTHER INCREASE IN TURPENTINE PRICES

Montreal.

Turpentine prices are again increased ten cents per gallon on the local market. There is still a variation in quotations among local distributors, but it is noted that the above advance has been put into effect by all dealers. The undertone of the market in southern primary centres has been very firm during the week, prices recording a continued upward climb, particularly towards the latter end of the week. The movement of turpentine in the south is exceptionally good, both domestic and foreign markets providing an active demand.

Stocks locally are in fair shape, and while not by any means heavy, are quite ample for present requirements. Demand continues in seasonable proportions and following are revised quotations:

TURPENTINE—		
1 barrel lots	1 75	1 80
2 to 4 barrel lots, per gal.	1 73	1 78
Broken lots	1 85	1 90

SUDDEN BREAK IN SEED: OIL NOT YET AFFECTED

Montreal.

To substantiate the statement made by certain crushers last week, that the flax-seed market might be full of uncertainties and surprises during the coming weeks, is the weakness again evident during the past few days. Towards the close of last week the market registered a further advance, but was closely followed by a sudden break and the market level is now fifteen points below the mark of three days ago. To some this sudden reverse has not come as a surprise, the health of the previous rapid rise being thought questionable, especially in face of favorable new crop reports. New seed is now reported as entering ports at the head of the lakes and should reach here within the next week or so.

It was noted last week that oil prices did not closely follow the trend of flaxseed, quotations on the oil products registering only a three cent advance to a corresponding increase of approximately fifteen points on the seed market. It is for this reason, according to local dealers, that prices are now unchanged notwithstanding the easing of seed prices.

Another factor which, while not receiving serious consideration at the present time, may have its effect on domestic oil markets in future, is the importation of English oil. This foreign product during past months was more in evidence on American markets than on this side of the border, one of the reasons for this doubtless being the lower duty. By the new tariff arrangements however, oil entering the United States is now subject to a duty of 24¾ cents per gallon, or an increase of 14¾ cents. The preferential tariff allowed exporting to Canada at $1.25 per hundred pounds, or about 11 cents per gallon. It can be readily seen then that Canada now offers a more favorable market than the United States, and local crushers will watch with interest the future actions of overseas interests in this connection.

Unchanged price levels are the following:

LINSEED OIL—	Raw	Boiled
1 to 2 bbl. lots, per gal.	0 98	1 00
5 to 8 bbl. lots, per gal.	0 96	0 98

Less quantities, add ten cents per gallon.

ADVANCED PIG MARKET FIRMS UP WHITE LEAD

Montreal.

While the white lead in oil market has been described by corroders as firm since the revision some weeks ago, further strength is now added by an advance in pig lead prices. Owing to the war cloud in the Near East, quotations on pig lead registered a substantial increase on all markets, affecting market levels locally to the extent of $3.00 per ton. With linseed oil also displaying a firm tone in recent weeks, prices on the finished product are said to be much firmer at $12.25 in five-ton lots, $13.00 in one ton lots and $13.35 in less quantities.

NO CHANGE IN QUOTATIONS ON WINDOW GLASS

Montreal.

Although an increase in quotations on window glass has appeared on other domestic markets, local prices remain at 20 per cent. off the $6.00 list, with slightly lower prices quoted for quantity. There is some improvement in deliveries from the Belgian market, fair supplies being reported as now on the way with further heavier arrivals expected to take care of the more active demands in the following weeks. Factories at this source are gradually increasing their output and little difficulty in securing ample requirements is expected. With the first appearance of colder weather the movement of window glass should show an appreciable improvement from now on.

Toronto

TORONTO, September 28.—A new high mark for the season's turpentine prices constitutes the outstanding change in the current paint markets. This development reflects the rise in quotations at southern producing points, a condition which is in turn attributed to the limited offerings and the brisk current demand.

No change has been announced in linseed oil prices this week, but the feature in this respect is the marked recession in flax seed prices, this reversal in form following the rising market previously recorded.

As announced in last week's issue of Hardware and Metal, paint manufacturers have decided to make no further change in prices, existing levels remaining in effect, with orders for spring delivery being accepted on the basis of present quotations with April 1 dating. It was claimed by certain manufacturers that a further advance was justified under the current trend of raw material markets, but no decision in this direction was reached.

(Continued on page 72)

SERVICE

CONFIDENCE

FAIR DEALING

Can you do this?

Can you invest $500.00 of your capital in a paint stock and make it yield an average of $2000.00 a year?

When you can, you will have learned the **secret** of **making a real profit** on your Paint investment.

Neither Quality nor Advertising alone can consistently accomplish this.

There is a way, however, which, to the best of our knowledge, has been practically worked out by Lowe Brothers only.

If you are interested in knowing how, we would be happy to discuss the matter with you.

The Brush Department

Six Hundred Brushes to Select From

Paint and Varnish Brushes to the Value of One Thousand Dollars Were Effectively Grouped in an Attractive and Successful Window Display by the Trelford Co., Toronto—Moving Figure to Attract Interest of Passers-by

A UNIQUE display of paint, varnish, and sundry brushes which not only attracted the admiration and interest of passers-by but also resulted in stimulating current sales of these products, was conducted for a period of approximately ten days by the Trelford Co., 518 Yonge Street, Toronto.

One of the features of this window was the fact that around six hundred brushes were on display at one time for customers to choose from, and a further stock was on hand inside the store from which their requirements were supplied. The large display board in the centre and the two smaller boards on each side, which formed the background of the exhibition, contained altogether almost three hundred brushes, and a similar number were shown in various groups upon the floor of the window.

"We have found that putting in exclusive window displays of this nature succeeds in stimulating more interest and also result in a larger proportion of direct sales," stated Mr. Trelford to Hardware and Metal. "During the first couple of days this window had been in, marked attention was being given by many new customers to brushes of practically all kinds. Our trade in brushes at all times is fairly extensive, so that exceptional business would have to result for us to notice anything of this kind. That it has achieved its purpose in this respect, and will bring further results is to be expected. Sometimes we were so busy we had to take and sell the samples in the cases and display boxes, not having sufficient time at the moment to supply from regular stock."

The total value of the brushes on display in this window was approximately $1,000.00. This amount was based on resale prices. The various types of brushes displayed included paint and varnish brushes of different quality and style of bristle, while hygienic, kalsomine and paper-hangers' brushes, evinced in marked degree the effort to cater to house decorators in supplies of this class.

"Sales have not been restricted to any class of brush," stated R. A. Gregory, of the Trelford Co., when discussing the effects of the display upon trade. "The buying has been well spread out, and while paint brushes have been in special demand at this time, probably owing to the fact that these types are featured more strongly in the display, yet we are continuing to show good results in the movement of household brush requirements also."

It was stated that they found it rather difficult to keep any record of or find out what percentage of sales were attributed directly to the window display. Unless a customer specifically stated that "I see you have just what I require in the window," or something of that nature, the results were not immediately apparent, os they were too busy to notice what people paused to look at the window and then walked inside the store. It was noticed, however, that people were on hand and evinced a decided interest in the display at all times of the day.

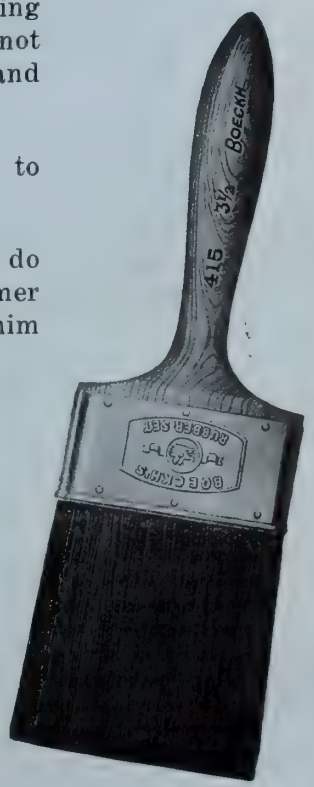
Inside the store a show case was placed in a position to attract the prospect's attention, while counter displays were also within easy range of vision.

Concentrating Effectively on Brushes

Exclusive display by the Trelford Co., Toronto, which succeeded in impressing upon customers and passers-by the fact that their brush requirements should be promptly supplied from the extensive stock and range on hand. Variety and quantity both apparent. Moving figure on left side of window immediately caught attention, the object being to divert this attention to the goods displayed

BOECKH'S BRUSH NEWS

"A Word in Time!"



A "word in time," like a "stitch in time" saves a lot of trouble. A little talk about the care of Boeckh's Brushes when selling them, is the "word in time" that saves you much trouble.

Boeckh's Brushes are **guaranteed**—but you cannot afford to sell a brush to a man and say, "This brush will last; it is guaranteed"—and let that man take it home, innocently soak it in water, leave it standing in soda, potash or hot lime, then return the brush to you next day, complaining that it was defective.

We guarantee the quality, workmanship and rubber setting of every one of Boeckh's Rubber Set Brushes, **but** we cannot guarantee that certain fluids, such as soda, potash, hot lime and certain coldwater paints, will not destroy the bristles.

Another important point in selling Boeckh's Brushes is to see that people buy the **right kind of brush for the job.**

A "word in time"—before the brush leaves the store, will do much to gain you satisfied customers. By telling a customer how to take care of the brush he is purchasing, you render him a service and add a "personal touch" to the sale.

TORONTO MARKETS

(Continued from page 68)

ANOTHER INCREASE IN TURPENTINE PRICES

Toronto.

The announcement of another increase in turpentine prices, provides the feature of the current paint markets. This development brings the local level to a new high mark for the season, the quotations noted on the local distributing centre still showing a range of around ten cents per gallon. The new levels, therefore, vary between $1.90 and $2.00 per gallon. The principal cause for the move in this direction is stated to be the increase in quotations at Savannah, southern producing centres recording a brisk demand with the offerings and supply only moderate. Prices advanced sharply and the prevailing tone is reported to be firm at the new high levels, according to recent advices from the south. This has in turn reflected upon the domestic market situation, and although deliveries have improved slightly, the rise and fall of prices at production centres is stated to be governing domestic quotations, especially when shipments are on a hand to mouth basis.

TURPENTINE—

1 barrel lots	1 90	2 00
2 to 4 barrel ots	1 89	1 99
5 gallon lots	2 05	2 15

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

RECESSION IN FLAX HALTS TREND IN LINSEED OIL PRICE

Toronto.

A marked recession in the flax seed markets has tended to offset to some extent the firmer tendency noted in the linseed oil markets last week. At that time, the increase reflected the sudden rise in the seed quotations, which was considered as an unhealthy sign in certain quarters. This view has been more or less justified, owing to the drop in price levels which has since developed. As oil prices, however, did not advance in proportion, at that time, no change is being made in the current levels. Unchanged prices follow:

LINSEED OIL—

	Raw		Boiled	
1 to 2 barrels	1 00	1 05	1 03	1 08
3 to 4 barrels	0 99	1 04	1 02	1 07
6 to 9 barrels	0 97	1 02	1 00	1 05

Less barrels, 15 cents per gallon.

BETTER CALL DEVELOPING FOR WINDOW GLASS

Toronto.

The opinion is expressed in many quarters that there is going to be an excellent demand for window glass this fall, and with the many difficulties that the manufacturers are confronted with, such as securing of raw materials, labor, fuel and inconveniences caused by transportation difficulties, there has arisen the need for anticipating requirements. With the increased cost of production there is stated to be a speculative feature in the glass markets.

No further changes have been announced since the recent new discounts went into effect locally. Distributors state that current supplies are in better shape to meet the prevailing fall demands.

EARLY FALL MOVEMENT IN PAINT PRODUCTS

Toronto.

Paints and the allied products are beginning to feel the fringe of the looked for active fall movement in these lines. Many distributors point out that the movement is apparently being spread over a longer period this year, the fall activity commencing earlier than usual, while it was also noted that the spring season was carried on well into the summer months. Preparations are undoubtedly under way among manufacturers, and in fact all sections of the trade, for brisk activity in paints, varnishes and enamels during the ensuing weeks, and a record volume of business in these products is anticipated in many instances. Prices remain unchanged at the revised levels announced last month.

SEASONAL IMPROVEMENT IN PUTTY MOVEMENT

Toronto.

A marked improvement is noted in many quarters in the current sale of putty. Since the recent price revisions on this product, bringing levels to a uniformly lower basis, the movement has improved from week to week, until prevailing trade is fast reaching satisfactory proportions for this season of the year. Prices follow:

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk bbls.	$3 70	$3 95	$4 20
100-lb. drums	4 20	4 45	4 70
25-lb. irons	4 45	4 70	4 95
Bladders in bbls.	5 45	5 70	5 95
Do., less quantities	5 70	5 95	6 20
1-lb. tins	10 45	10 70	10 95

Pure Linsed Oil Putty, $1.25 per 100 lbs. advance over above prices for similar quantities.

WHITE LEAD TRADE GAINING IN VOLUME

Toronto.

There has been no further development in white lead in oil since the recent extension of the forward booking date to November 30. Current trade is described as distinctly gaining in volume, and marked activity in this product is generally expected to develop during the fall season.

MAY BE RECOVERY IN SHELLAC PRICES

Toronto.

Shellac is still described as being in an unsatisfactory condition, owing to the weakness in market values and the seasonal quiet demand. That prices will in all probability develop higher levels in the near future, is the general impression of distributors who point out that the current low quotations are not expected to remain in effect for any considerable period. There has already been a slight improvement recorded in primary centres, with more inquiry from shellac consumers. Not only has the Calcutta market been firmer, but prices in London have stiffened and importers are taking a more optimistic view of the situation. At the same time most of the business now being done is of a jobbing character with most of the large consumers well supplied and some of the record makers, who take 60% of the imports, have been liquidating their excess holdings. Until these are cleared up, no great improvement is looked for. Current domestic prices follow:

SHELLAC—

	Pure White	Pure Orange
In barrels	5 10	4 60
One gallon jugs	5 40	4 90

MINOR FLUCTUATIONS IN PRIMARY ROSIN MARKET

Toronto.

Rosins present no new features of interest. Domestic quotations are fundamentally unchanged, but various fluctuations of a slight nature are recorded in primary centers. As one dealer pointed out ever since the preliminary advances in the prices of this commodity, the market has been one of no marked developments. It is reported that the foreign movement continues to absorb more of the offerings and the effect is gradual. The spreading impression that in many commodities a period of renewed inflation of values lies ahead is not without its effect on the rosin sentiment. The market continues to record little ups and downs that have been in evidence during recent months.

OPPOSITE VIEWS RE SALES TAX

(Continued from page 46)

jobber, for his business. Everything that he puts up to hinder the retailer is only hurting himself. Does he realize, in connection with this sales tax, that every increase in the tax means more capital tied for the retailer? Does he realize that if the tax is three per cent. and the goods have to be sold at big reductions that the price of the tax is not recovered at all and does he also realize that in the case of price marked goods he has to absorb the tax? The manufacturer uses up all the old price marked cartons before the adding of the tax to the resale price. Some think to reprint the cartons but the majority let the retailer bear the brunt. Now the manufacturer cannot get away from this fact, that he does not have to put the sales tax back on his shelves and wait months for his money back, but only has to put it up when the goods are sold and then gets it back, in most cases inside of thirty days. Perhaps many retailers will scoff at this but from a financial investment point a tax on the retailers sales from month to month is the easiest solution. If the manufacturer adds the tax into his cost the tax has to go on the shelves of the wholesaler and retailer as at present but a tax on the retailer's sales represents no tax investment by any party. In other words the humble retailer becomes an automatic revenue collector, without salary or graft, for the government."

Why Fall Painting Pays the Consumer

REASON NO. 1. In the fall, the surface is thoroughly dry. During the spring, a surface which needs repainting is sure to contain moisture and dampness or frost, and it cannot be successfully painted until it has thoroughly dried out.

REASON NO. 2. When the wood is dry, it absorbs more of the paint. The paint penetrates deeper into the wood, therefore getting a firmer hold on it, giving the paint coating greater tenacity or holding qualities.

REASON NO. 3. Paint cannot be applied as successfully in damp, cloudy or unsettled weather as in warm, sunny weather: in the fall the weather is more settled and uniform and is warmer, therefore it is an excellent time for painting.

REASON NO. 4. A house needs its protecting coat of paint more in the winter months than at any other time. A house in need of repainting should never be allowed to go over the winter without this protection.

REASON NO. 5. It is easier to keep moisture and dampness out by applying a coat of paint when the surface is dry than it is to get moisture or dampness out of the wood when you want to apply paint.

How Fall Painting Can Pay the Retail Dealer

REASON NO. 1. Change the painting habit of your customers to the fall by telling them why **"Fall Painting"** pays.

REASON NO. 2. Get the farmers into the habit of painting their barns in the fall. **Imperial Barn and Elevator Paint** is a good fall seller for this purpose.

REASON NO. 3. Tell the women folks to finish their floors, interior woodwork and furniture with **Floglaze** in the fall, and make home cheerful for the winter months.

REASON NO. 4. Double the yearly turnover of your paint department by creating the **Fall Painting** habit with **Floglaze.** Turnover is the key to larger profits.

REASON NO. 5. Keep the **Fall Painting** idea prominent in your advertising, window displays and selling talk. The universal use of **Floglaze** will help you to develop better all-year round business.

O.P.W.

The life of the paint is the linseed oil it contains. The pure oil takes too long to dry. Driers must be added to make it practical. Beware the driers. The cheaper driers continue their action long after apparent drying has ceased and the paint "dries out." Only the purest linseed oil and the best drying agents known to science are used in the O. P. W. Products.

Six things affect the durability of outside paint:
1. **Ingredients of the compound;**
2. **The surface upon which it is applied;**
3. **The manner of its application;**
4. **The consistency;**
5. **The exposure to which it is subjected;**
6. **The thickness of the paint film.**

NOT for today but for TOMORROW, sell your customers O.P.W.

Barrett Roofings, Cements Industrial Paints etc.

DURING the next few weeks there will be a big demand for roof repair materials. For many property owners have neglected to put on new roofs this summer and now they'll have to patch up the old ones to make them last through the winter.

The two famous Barrett Specialties described below are the greatest materials on the market for making old roofs last longer.

You can recommend these products to your customers with absolute confidence that they will give complete satisfaction. Send in your order at once, and be ready for the big rush.

Everlastic Liquid Roofing Cement

One coat of Everlastic Liquid Roofing Cement makes old prepared and "rubber" roofings almost as good as new. It forms a smooth, tough, durable surface that adds years of extra service.

Mention this to your customers. They'll thank you for the money-saving suggestion. Everlastic Liquid Roofing Cement is easy to apply and comes all ready for use in packages ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons.

Anyone can apply it

Plastic Elastigum Patching Cement

No wonder this famous Barrett product is called "the plastic cement of a thousand uses!" Patching leaks and holes in all kinds of roofs, repairing flashings, relining gutters and cisterns—these are a few of the uses for which it is unequalled. It's easy to apply and sticks to either a wet or dry surface. Don't be without a stock.

Relining a gutter with Plastic Elastigum

Sold in 1 lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. and 100-lb. packages, half barrels (about 300 lbs.) and barrels (about 600 lbs.)

Dollar Turpentine

is a fact and we can supply your full requirements promptly.

The specifications for quality imposed upon our Pure Turpentine make it an excellent thinner for paints, varnishes, colors, etc.

The price is $1.00 per imp. gal.

F.o.b. La Tuque, Que., in steel drums of 46 imp. gals. Large stocks are on hand for immediate deliveries.

We invite correspondence from all turpentine dealers.

BROWN CORPORATION

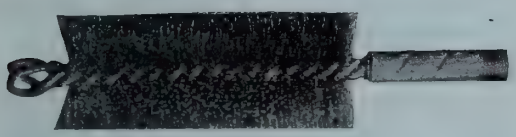
Quebec, P.Q.

LAIDLAW'S WIRE BOYS

Preventing Shipping Losses

Says B. T.—"Laidlaw's Bale Tie is my full name and I'm proud of it. My sturdy ties on bales and boxes hold secure the merchandise of Canada, whether in transit at home or abroad.

"Laidlaw's Bale Ties mean unbroken packages, speedier delivery and freedom from shipping loss."



Everything in Wire and Wire Nails.

THE

Laidlaw Bale Tie Co., Ltd.

Head Office and Works,
HAMILTON, ONTARIO

Say "Laidlaw Products" to your jobber.

Boiler and Tube Brushes

There is a lot of business to be picked up by having a good stock of these brushes.

Every furnace man needs one or two. Just display a few prominently in your store—and they'll sell themselves. They are an absolute necessity.

Incidentally we mention again that the CANADA line of brushes is the most complete.

Better write for particulars of our dealer proposition.

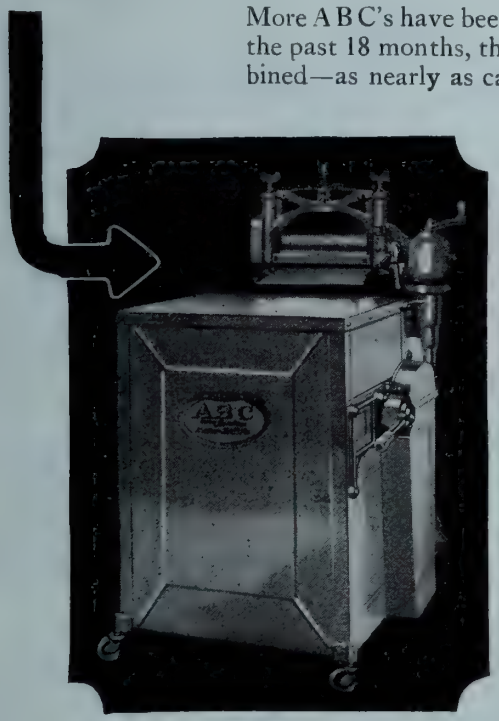
A B C's
Sure are Selling!

The finest washer built
Cylinder reverses after each revolution
Aluminum wringer—locks in any of 20 positions
50% oversize motor
All gears machine cut
Quiet and vibrationless in operation

At Vancouver, the David Spencer Company—a new A B C dealer—sold 18 *Super Electrics* at $180 each during the first two weeks. Latest reports indicate that this pace is being splendidly maintained.

Strickland, Swain & Patrick, recently appointed as A B C Distributors in British Columbia, are out to help their other dealers in a similar manner.

About fifty A B C *Alco's* have been sold so far this year by Ellis & Howard at Kitchener, Ontario—a city of approximately 20,000.



More A B C's have been sold in the Maritimes, the past 18 months, than all other makes combined—as nearly as can be determined.

Blackadar & Stevens, the A B C Distributors, are on their toes assisting our dealers along real specialty selling lines.

These are just a few examples. Space forbids quoting more. In every province, A B C's are selling fine. In fact the A B C Line is showing the most rapid gains in sales of any important line of electric washers on the market.

An established reputation, matchless values, a complete line, liberal dealer discounts and real co-operation—these are some of the principal reasons that are making the A B C Line the leader.

Get our proposition. It bristles with good features. Write or wire today.

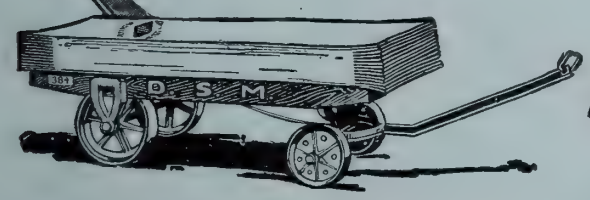
GAUGES

A little useful information on **Sheet Metal Gauges.**

Low numbers indicate heavy gauges, beginning at No. 10, which is 5.78 lbs. per square foot, and proceeding to No. 30, only .65 lbs. per square foot.

Standard Gauges are 10-12-14-16-18-20-22-24-26-28-10¾ oz. and No. 30.

Canadian Gauges Galvanized Sheets are generally heavier than corresponding English or Birmingham Gauge.



Roofing; On farm buildings, sheds, etc., No. 28 ga., equal to No. 26 English, is generally used. Factories and similar buildings use 26, 24 or 22.

Siding for farm buildings, etc., is made of No. 28 or 10¾ oz. English gauge.

Send for our complete table showing weight of all gauges and weight per sheet and bundle of standard sizes "Premier" Galvanized Steel Sheets. Mailed free.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

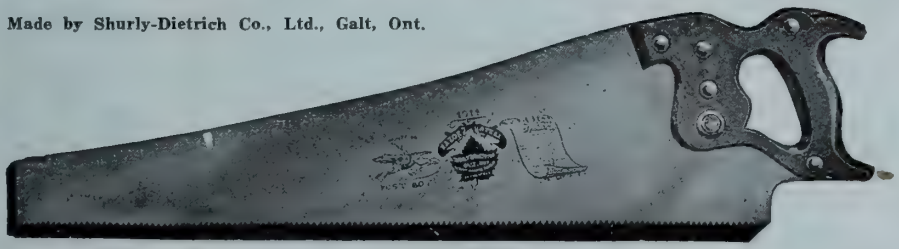
DIAMOND A BRAND — ASHDOWN'S GUARANTEE

Two Trade Winners
DIAMOND "A"
Ready Mixed Paint
and
KYANIZE Varnish

Kyanize KY-AN-IZE

Diamond A Paint is guaranteed absolutely pure and is sold subject to chemical analysis. Kyanize the most durable varnish made. Makes old floors and furniture like new.

"Save the surface and you save all" *Paint & Varnish*



The J. H. Ashdown Hardware Co., Limited
CALGARY WINNIPEG SASKATOON

MAPLE LEAF SAWS—The Proven Best

Made by Shurly-Dietrich Co., Ltd., Galt, Ont.

MADE IN CANADA

Since 1873

Maple Leaf Hand-saws have been made in Canada since 1873, by a Canadian company, supported by Canadian capital, and employing Canadian workmen. **Maple Leaf Saws are now** famous throughout the world, and wherever they are introduced they are taking first place against all competitors. Their superiority in workmanship, and the quality of steel used, makes them the favorite amongst carpenters, lumbermen, and all who use saws. The saw illustrated is our No. 1914 with the unbreakable handle which cannot work loose.

Northland Ski Manufacturing Co. — Northland — SKI — St. Paul, Minn. U.S.A.

World's Largest Ski Manufacturers.

Almost Time for

NORTHLAND SKIS

NORTHLAND SKI MFG CO.

23 Merriam Park - St. Paul, Minn.

OUR EAVETROUGH AND CONDUCTOR PIPE ARE NOTED FOR THEIR EASY FITTING QUALITIES.

Now is the time to order conductor elbows, ridge roll, valley iron, corrugated galvanized iron roofing and siding. All kinds of eavetrough and conductor pipe accessories, galvanized iron sheets, etc.

We ship while others are thinking about it.

WHEELER & BAIN, LTD. TORONTO

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

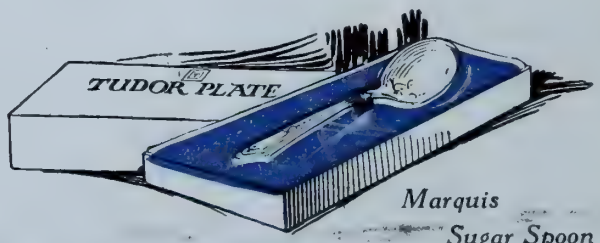
Tudor Plate

Oneida Community · Made

The New Anti-Tarnish Display Pack

Sealed-in-Sight · Stays Bright

AN exclusive feature of Tudor Plate. Each piece of platedware comes wrapped in a special glassine, anti-tarnish covering.



Absolutely prevents moisture or dust from reaching any piece.

A dealer never has to worry about cleaning platedware which he uses for display.

Each piece sold to the customer is as fresh and gleaming as when it left the factory.

The Anti-Tarnish Pack is just one of the many features that will help you put Tudor over big.

IMPORTANT: Patents have been applied for on all distinctive merchandising features of Tudor Plate in order that their use may be reserved for this line.

Vol. XXXIV. No. 40 THE MACLEAN PUBLISHING COMPANY, LIMITED PUBLICATION OFFICE: TORONTO, CANADA October 7, 1922

A Simple Argument--

1—Business Success depends on
Value to the Customer
Profit to the Dealer

2—The Agency for Dougall "Surface Protecting Products" assures
More Value to the Customer
More Profit to the Dealer

3—Because Dougall Products are
Simply the Best that can be made,
irrespective of price

4—And
The price is remarkably low

5—And because Dougall Advertising
Is sensibly planned and
loyally carried out

If you are interested in building your paint and varnish business on a firmer and more profitable basis, drop us a card.

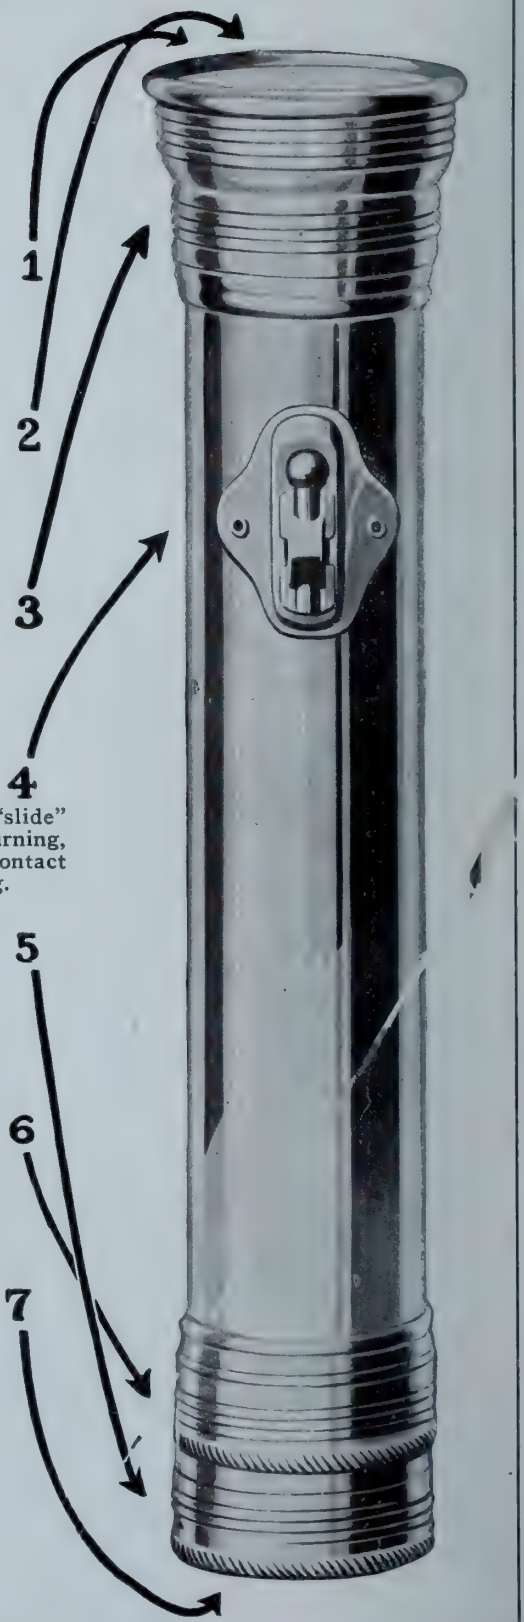
The Dougall Varnish Co., Limited

A perfect protection for every surface :: MONTREAL :: Associated with the Murphy Varnish Company, U.S.A.

There Is More Need Than Ever For EVEREADY Flashlights

WITH the hunting season opening up there is an increased demand for hunting equipment. No hunter or out-doors man should go into the bush without a good flashlight. For outdoors use there is no flashlight made which equals the Eveready Spotlight. It is no larger than ordinary three-cell flashlights yet it gives a searching beam of light that illuminates objects 300 feet away.

Every out-doors man will buy one on sight. Just focus the spotlight on to an object in the back of your store and he won't hesitate. Make sure that you have ample stocks to take care of your sales because every sale brings two or three more men into your store for a spotlight.



Get your stock of Eveready flashlights and batteries into good shape now and be ready for the demand. Your jobber can supply them promptly.

Canadian National Carbon Company,
Limited

Montreal Toronto Winnipeg

Seven Big Improvements for Better and Longer Service

1. New scientific reflector, concentrating the light rays to give more light and throw it further.
2. Special Eveready Mazda bulb of increased brilliancy and power.
3. Shock-absorber to prevent breaking of Mazda bulb if flashlight is accidentally dropped or jarred.
4. In addition to usual "slide" contact for continuous burning, spotlights have "flash" contact for intermittent lighting.
5. Compartment holding two extra Eveready Mazda bulbs, ready to instantly replace a burned out bulb.
6. Exclusive focusing device. Light instantly focused as desired, by turning end cap.
7. End cap stamped to show the renewal type numbers for battery and Mazda bulb required for this particular flashlight.

Nickel Type No. 2674

Helping You Sell More Roasters

Thousands of **SMP** Pearl Ware and Crystal Ware Roasters will be sold this Fall and Winter in Canada. As a means of creating even a greater demand, we are running a series of large, strikingly handsome roaster and roasting season advertisements in the daily newspapers of Canada from coast to coast this Fall.

The benefits of roasting fowl, beef, fish and other expensive dishes in **SMP** Crystal and Pearl Roasters are gone into in language that is bound to create the desire of possession in the minds of Canada's housewives. Here is one sentence, for instance:

"No longer need tender roasts of beef be ruined through improper roasting. With one of these splendid SMP Roasters in your kitchen, you can now roast fowl or meat or bake fish to perfection! The Roaster will do all the work. It bastes—the fat drips down from above. The roast comes from the Roaster tender, delicious, juicy, full of wondrous flavor. The juices and the flavor cannot escape. They are cooked right in."

These advertisements are going to make women want a Crystal Ware or Pearl Ware Roaster. They are going to increase the already heavy demand for **SMP** Roasters. And don't forget that all this extensive, continued advertising is to help hardware merchants sell more **SMP** goods. Naturally, the merchants who co-operate most fully with the advertising reap the biggest rewards.

The Sign of a Profitable Oil Business

If you are already handling Imperial Polarine Motor Oils (as you probably are) you can increase your sales by marking your store with suitable signs and by arranging proper displays to let the automobile, truck and tractor owners in your territory know that you sell these high grade lubricants.

Don't forget to hang up the Imperial Chart of Recommendations in a prominent place. It is important that you show every owner that you are equipped to sell him the proper grade of Imperial Polarine Oils for his different motor units.

More and more engine owners are turning to Imperial Polarine Motor Oils every day. Advertising now running in all of the leading papers will augment the demand this year. Hang out the Imperial Polarine sign and you can cash in on this demand.

Our salesman will gladly see that you are supplied with signs, charts and the other equipment needed to make your store "lubrication headquarters" in your district. Take it up with him the next time he calls.

Write for a copy of the illustrated descriptive catalog.

Gillettes sell well the year 'round—men must shave in cold weather or hot—but during the holiday season Gillette sales reach their highest peak.

Women, particularly, select the Gillette as a gift which will be most acceptable. (Over 60% of the Gillette Razors purchased at Christmas are bought by women).

This year, with the New Improved $5.00 Gillette and the $1.00 Brownie Gillette your sales should far exceed those of any previous season.

We suggest a check-up of your present stock and early orders to supply the demand of Christmas gift purchasers.

Galvanized Pails and Wash Tubs

WE WANT to draw your attention to the quality of these Davidson Pails and Washtubs. The special hot process in which they are galvanized ensures the superiority and durability which are the outstanding characteristics of these lines.

All seams are thoroughly well filled to avoid moisture collection. Washtubs are fitted with wringer attachment and strong handles. In four different sizes.

The pails are of a strong, serviceable weight and can be absolutely relied upon for all ordinary purposes.

"Contractors" Pails

A special Davidson line designed for Contractors and the building trade in general. Made of superior extra heavy material hot galvanized after being made up—cannot rust or corrode, having a strong seamless body with heavily wired top edge and fitted with solid iron rim to protect bottom. Wrought iron ears, rivetted four places and extra heavy bail handle. Body is decorated two bands bright green and a neat label.

A thoroughly workmanlike pail and one that will stand very heavy and rough usage.

In one size only—14 quarts Imperial Capacity, measuring 12½" high by 10¾" across.

Prices on application—prompt shipment guaranteed.

Files Are Unique Among Tools

Most good tools last a comparatively long time. A saw, a hammer, a chisel—each has a long life.

Files, by their very nature, must be frequently replaced. Hence, file users seek the best to avoid too frequent replacing.

All this means that if you stock one of these standard brands, you have steady, satisfied file customers. They give long, efficient service, and make firm friends.

TRADE RUNWELL MARK

SEMI-ROTARY WING PUMPS

Are BRITISH MANUFACTURE Throughout.

The "Runwell" Semi-Rotary Wing Pumps are **British Manufacture**, and by reason of their general adaptability for a variety of circumstances, where a reliable and efficient pump is necessary, are becoming increasingly popular. The pumps are liberally designed to withstand rough usage and to give the full capacity specified. They are subjected to a rigid examination and are also tested under working conditions.

The "Runwell" Semi-Rotary is easy to manipulate and is designed to raise more water than any other type of hand-operated pump. All pumps have counter flanges fitted to branches, tapped Briggs standard thread.

Your Profit on Bissell Sweepers is Real

IN THE first place they sell—and sell readily. They are staple. Bissells are the sweepers every **woman** knows and asks for. Moreover they are sold universally at the prices they are intended to be sold for and which provide for a good margin. So we say your profits in their sale are real. Rosy claims of large profits on unknown merchandise are paper profits which won't ring up in the cash register. Wise merchants don't count their chicks before they hatch. *"Put your sweeping reliance on a Bissell's appliance."*

You Pay Rent to Catch Trade—Be Sure You Get it

To be sure of maximum trade, you locate where the trade is. And then you must tell your trade that you want business. The simplest, as well as the most economical way is to install a Bowser Chief Sentry, now advertised nationally as being the most reliable gasoline pump for the motorist to patronize.

You can ride on this Bowser publicity only by installing Bowser equipment. Motorists are being taught to look for and find Bowser pumps to be sure of most miles per gasoline dollar.

With a Bowser, it is only a step from the curb to larger profits. Install a Chief Sentry at once. Cash in on the Bowser publicity and make your bank account grow.

Ask for booklet C-11 which describes the Chief Sentry's many points of superior mechanical excellence and tells how it insures accurate service—how the sight glass shows the customer the pump is full—how the tally bell announces delivery of each gallon of gasoline—how the dial indicators show the total amount purchased—how the water separator insures gasoline as dry and pure as when fresh from the refinery.

These five points of Bowser superiority will sell more gasoline for you and insure larger profits. Get the booklet at once!

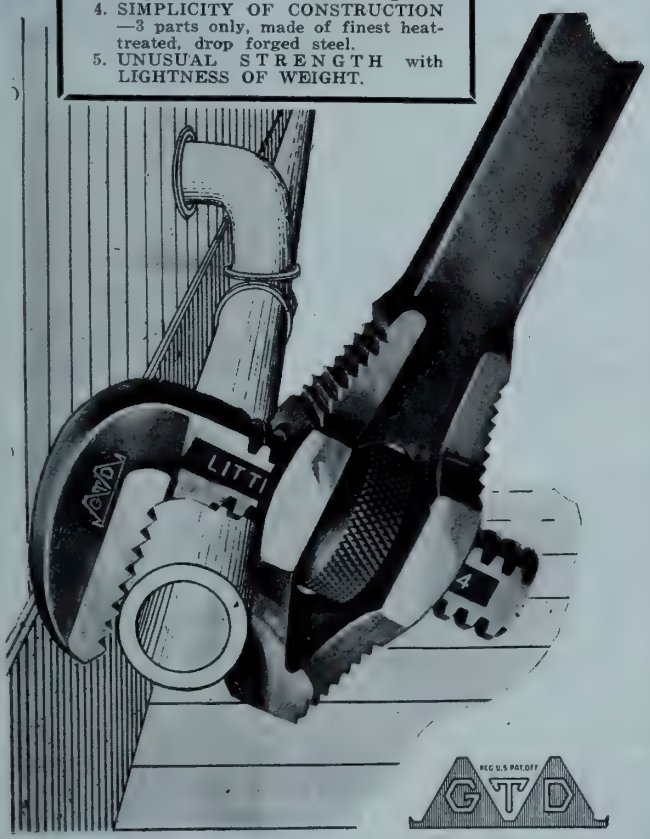
A New Pipe Wrench with End Opening Jaws



It may be used for any type of pipe wrench work. The end opening jaws, a special feature of construction, reach into cramped places just like a pair of pliers, and they grip firmly, instantly and independently of springs.

The "LITTLE GIANT" is sturdy and compact. It has no cumbersome frame—no springs—no rivets—having three parts only, two powerful drop forged jaws and a nut, all very carefully heat treated. Moreover, it is lighter than other wrenches of its size and supplies increased leverage because of the long handle. Made in 8, 10, 14, 18 and 24 inch sizes. Here is a wrench that will sell big entirely on its merit. Ask your jobber to show you samples, or write direct for full details and prices.

GREENFIELD TAP AND DIE CORPORATION
OF CANADA, LIMITED GALT, ONTARIO

FEATURES

1. GREATER CONVENIENCE in corners and tight places.
2. QUICK and INSTANTANEOUS GRIP and RELEASE that acts independently of springs.
3. INCREASED LEVERAGE because of greater effective handle length.
4. SIMPLICITY OF CONSTRUCTION —3 parts only, made of finest heat-treated, drop forged steel.
5. UNUSUAL STRENGTH with LIGHTNESS OF WEIGHT.

"Little Giant"

(Patented Feb. 4, 1913)

IT GETS INTO THE CORNERS

Those Inaccessible Soldering Jobs—

The kind that make you squirm and swear until they're done—those jobs are made *easy* and *simple* with Kester Acid Core Wire Solder. All you do is to apply a touch of heat and Kester Solder and the job is finished—*quickly, economically* and *permanently.*

The reason? Kester Solder has an *acid core* that feeds the proper amount of flux as the solder is melted, and in this way eliminates the troublesome pot of acid or paste and the messy swabs, sticks and brushes; besides the job is done in half the usual time.

Kester Solder comes coiled in one-pound cartons or on one-pound spools, but for quantity users it is more economical to buy it on five and ten pound spools.

Dealers everywhere stock Kester because it is a *clean, fast seller,* and brands their store as an establishment that caters to the modern mechanic.

the carrying out and improvement of the service and sales of the "1900" product.

Every merchant selling and servicing "1900" products should line up for the coming season for this product.

Christmas trade will be better all over this year. Washing Machine Christmas trade will show wonderful improvement if merchants carefully go into the possible sales for the "1900" line now, order their samples, and start the people thinking about the saving of labor and time, by investing in a Washing Machine of the quality and efficiency of the famous "1900."

For the town people the Water Power or Electric Washer.

For the villager, who has neither power nor water pressure, there is motion, makes satisfied customers and good profits for the merchants.

For the villager, who has neither power nor water pressrue, there is the famous Gravity Hand Washer, sold to hundreds of thousands of people on this continent, the simplest, fastest, easiest, and strongest Washer sold.

Beatty Bros., Limited, have purchased outright the entire business of the "1900" Washer Company in Canada. We propose to carry on the successful policy of the "1900" Company and to improve the goods as our experience warrants. We will carry out the guarantee of the "1900" Washer Company to the letter.

Unique Situation in Stove Business

Use of Substitutes this Winter Due to Fuel Shortage Makes Necessary Special Service to Stove Buyers—Electric Ranges, Gas Stoves and Wood Burning Heaters in Big Demand—Prices Stable Till End of Year—A Case Which Proves Success Depends on Individual Dealer

THE SHORTAGE of anthracite coal for domestic use in Canada as result of the recent mine strikes has produced a situation in connection with stove and furnace business which must be taken into consideration by hardwaremen engaged in the sale of these lines. Discussing the situation with the Toronto manager of a large manufacturer of stoves, ranges, heaters, furnaces, etc., Hardware and Metal was advised that though the miners are back at work in the hard coal areas, that a considerable shortage exists as result of the length of time they were idle and that car shortage and railway trouble have made the situation more acute. As result it is expected that many substitutes will be used, chief among which will be soft coal, semi-anthracite coal, coke and wood.

Some reflection of the prevailing sentiment as result of the coal situation is seen in the fact that sales of stoves and heaters specially designed for the use of wood have been particularly active. Electric ranges have also been selling very rapidly of late in all parts of the country. The spread of electric current into rural districts, the shortage of coal; the fact that very poor quality gas is being supplied in some parts and that the natural gas supply in some places is gradually dying out, are all reasons advanced for this condition. This business is not cutting into trade in gas stoves, as might be expected, as they too are enjoying a very active trade. The fact that both these types of ranges are moving well, so well in fact that this manufacturer is unable to replace a number of sample stoves in his showroom, is indication that much renewal business is under way among houseowners and tenants and it is not so much a case of a growing preference for either the one or the other type of stove. This condition should relieve the coal shortage both directly and in saving of gas.

Business Active

Business in all lines of stoves, heaters and furnaces was said to be very active at this time on the basis of orders for immediate shipment. Little or no booking has been done though this has been the case for some time past. Business this Fall is reported by the manufacturer to be much ahead of last year, though 1921 was an exceptionally poor year in this line of business. This condition applies equally to all the lines mentioned. This firm is confident of the opportunities which exist for business in these lines and are very busy on production. Considerable stocks of stoves and heaters were carried over by some dealers while in other cases little or no stock was held over until this season. After surveying the field closely this official pointed out that this was just a reflection of the spotty trade which existed in stoves last year and that where stocks were carried over it was either due to injudicious buying or due to the shortcomings of the merchant in being unable to sell an average stock.

Prices throughout the whole list of heaters, ranges, furnaces, etc., were said to be stable at present levels at least until the end of the year. Retailers have been looking for some downward revision of prices on these lines but recent increases in foundry iron, Canada plates, black sheets, and fuel used in the foundries have precluded any such movement. These have tended to offset any expected declines but this situation has also left little justification for increases in price, at least, until the end of the year. Price revisions on raw material now being worked on were anticipated. At the end of the year, it was pointed out, some advances may be made.

Repair Business Steady

Business in repair parts continues with little variation from average. Last year when general business conditions were much poorer than at present an increase was noticed in repair part trade due to the fact that people were fixing up old stoves rather than buying new ones. While there is a continued good business in repair parts, the fact that sales of new stoves have increased indicates the widening field for business in both new equipment and repair parts.

That retail dealers in stoves and furnaces have the success or failure of their trade practically altogether in their own hands, was the contention of this manufacturer. He cited many comparative cases indicating that one merchant could develop successful business where another complained of bad business and whose records showed up poorly. He also outlined cases where due to inefficient service work on the part of some stove dealers the customer failed to operate the stove correctly and be-

came dissatisfied while another user of a similar type of stove had perfect satisfaction because of being correctly informed as to the use of the range. He pointed to cases where the first orders for repair parts are coming in from some customers for a stove which has been in use for twenty-five years whereas others with just as good a stove have had new grates and other repair parts for it each year of the four it has been in use.

Success Depends on Individual

Illustrating the fact that in the stove business particularly, success depends upon the individual merchant, this official stated that some years ago an individual went to the president of his company and stated that he was contemplating starting up in the retail stove business and would like to handle the company's line. His request was acceded to and a list of towns given him in which the company had no agents. Some time later this individual bought a business which his father had conducted many years before and went to the manufacturer to put in his order for stoves. There was already an agent of the company in that town and he was doing a fair average business but it was agreed that the new merchant would also handle the line. In the first year the new merchant doubled the best year's sales of that stove as made by the old established dealer and the second year he did seven times the business done in the best year by the first agent. His success has continued in proportion and it has been due entirely to his untiring efforts to dig up prospects. He divided his selling into three parts: 1. Getting to know the prospect. 2. Securing prospect's attention and developing it into interest. 3. With his knowledge he thinks up some sure-fire method of definitely clinching the sale.

In connection with repair business this merchant followed a plan of buying up old stoves from customers to whom new ones were being sold. These were bought as old iron and the merchant then secured the necessary repair parts, rebuilt them and sold them as second-hand stoves carrying a certain guarantee from him. By following this plan he was able to allow customers something off the price of their new stove and he in turn made a very fair profit on the considerable turnover of repair parts which he handled.

With the foregoing in mind and in view of the improving condition in both city and rural districts due to better business and the splendid crop being harvested, it was the opinion of this official that hardwaremen who go after stove business aggressively and intelligently have an excellent opportunity to turn in a record business during this fall and winter season.

Use of Coal Substitutes

In view of the likely use of substitutes for coal in furnaces and heaters, he ad-

(Continued on Page 45)

Discuss Advantages of Turnover Tax

Steps Being Taken Among Manufacturers to Eliminate Many Difficulties of Present Taxation Measures—Turnover Tax on Manufacturers and Importers is Found

EDITOR'S NOTE. — Hardware and Metal understands that efforts are being made toward concerted effort among manufacturers in this country to get together on some kind of a Turnover Tax that will be satisfactory to everyone. In the following article are outlined some of the advantages of the Turnover Tax as enumerated by Royal Cluxton, manager Canada Paint Co., Montreal, who has made an investigation of the subject:

1st. Saving in time and expense of clerical staff in figuring up and classifying invoices as to different per cent. of sales tax that applies to each sale.

2nd. As an illustration, we have to make up five separate journals each day in order to meet the Government Auditor's requirements, whereas, with a tax on our turnover we would eliminate this extra expense and annoyance. It takes all of the time of one of our best clerks to make up these journals and part of the time of almost the entire staff of the sales department, involving a substantial increase in staff and expense.

3rd. Simplify the work and expense of our cashiers and the employees in his department.

It takes the assistant cashier one week out of every month checking up the discounts and credits before paying the Government this tax.

4th. Eliminate the endless correspondence and discussions with jobbers and retailers relative to their requests for special consideration in the absorption or partial absorption by us of this tax.

5th. Eliminate the unfair competition caused by many manufacturers and wholesalers who, by absorbing all or part of the tax, or by special allowance are forcing other manufacturers or wholesalers into the same unsatisfactory tactics.

6th. Eliminate the present unfair position where the manufacturers of Canada find themselves on account of wholesalers with Government Tax License only collecting 2¼% from retailers and consumers, whereas, manufacturers have to collect 4½%.

7th. The Government will eliminate the very heavy expense and endless discussion and annoyance that it is laboring under in its endeavor to collect the revenue under the present intricate and extensive system.

Hardwareman Figures in Odd Insurance Case Judgment

OTTAWA, Ont.—An important judgment, one which establishes a precedent in the province of Ontario, was rendered by Judge Mulligan in Division Court, when he sustained the action brought by the Imperial Life Assurance Company against Louis Leblanc, hardware merchant, 1,109 Wellington Street, for payment of a premium of $35 on an insurance policy.

Some time ago Leblanc made application to the company for an insurance policy to the value of $1,000. He made the application in writing and the policy was duly delivered to him, and a part payment was made. After keeping the policy in his possession for two weeks, Leblanc decided he would rather insure with another company and sent back the policy to the plaintiffs, refusing to pay the balance of the premium. He based his refusal on the grounds that it had been represented to him by an officer of the company that his signing the application for the policy did not bind him to take it, unless he chose to do so.

In the argument before Judge Mulligan, the defence failed to show that there had been any misrepresentation of the facts in connection with the policy. The court held that as the company could have been held liable for the payment of the $1,000 named in the policy, had Leblanc died while it was in his possession during the two weeks, that a contract had been entered into which was binding also on the defendant.

Judgment for the amount claimed with costs was given in favor of the Imperial Life Assurance Company.

The importance of the judgment is based on the fact that in past years there have been many cases where persons have applied for insurance policies in a manner similar to that quoted in the action, and have then succumbed to the advances of the agent of another company, and the first company has been put to a lot of trouble.

This is the first case of its kind to be brought before the courts since the revision of the Ontario Provincial Insurance Act three years ago, and was taken in the nature of a test case.

Discussion at Postal Conference at Ottawa Centres Around Suggested Trebling of Present Weight Limit on Parcel Post Between Canada and United States—Suggest Increase of 11-lb Weight Limit on Domestic Parcel Post—Increase Indemnity for Registered Articles

OTTAWA, Ont.—A conference of Dominion Postal Officials was held here this week at which a number of subjects of interest to retail merchants were discussed, these being chiefly in connection with the C.O.D. system of parcel post, indemnity for loss of registered articles, uniform registration service and additional services which the post office might render.

The first topic taken up by the conference was the new C.O.D. system, the probability of its success and continuance. All aspects of the C. O. D. system were discussed and numerous suggestions were made in connection therewith. Subsequently, the conference discussed the adoption of a uniform registration system for the whole of Canada. In opening the discussions, L. N. Gaboury, division superintendent (Eastern Canada), held that such uniform registration was not only desirable but a necessity.

Following somewhat extended discussion, a vote was taken on the question, the conference deciding in favor of a single numerical system without acknowledgment.

Parcel post limitations later came under consideration. The point was taken that the present 11 pound limit of weight per parcel was inconvenient to the public; and the conference went on record that it should be increased. The limit of size, however, is to remain the same.

Increase Indemnity for Registered Articles

Important changes in regard to registered articles met with the approval of the conference. Votes taken favored:

(1) Increase in the maximum indemnity for the loss of registered articles. The present maximum is $25. The new maximum suggested is $100.

(2) Indemnity to include abstraction and damage.

In regard to the last-named vote, indemnity is now paid only if the registered article is totally lost. Should the decision of the conference be adopted, indemnity will be paid if the contents are missing or damaged.

Forbid Sending Money in Unregistered Letters

A proposal came from Montreal that the sending of money and valuables in unregistered letters and parcels be forbidden. This, it was urged, would greatly reduce thefts and abstractions.

Suggestions from the United States postal authorities as to the present four pounds six ounces weight limit on parcel post between the United States and Canada were the occasion for a wide divergence of views. Estimates of the effect of increasing the maximum weight on parcels from the United States varied greatly. Officials from some parts of the Dominion claimed that if the maximum were increased from four pounds six ounces to 11 pounds the incoming volume would be increased from five to six times. "The increase in weight," said W. J. May, Acting Inspector of Railway Mail Services, London, Ont., "would benefit mail order houses of the United States. Unless the Canadian department receives quite a large proportion of revenue on parcels mailed in the United States, Canada would be the conveyor of the United States mail." Canada, it was further stated, was now receiving about 2,000,000 pounds more in parcel mail from the United States than she was sending.

The view that increase in maximum weight would largely increase the incoming volume was, however, contested. T. T. Bower, Postmaster of Winnipeg, argued that the volume would not be largely increased, as there would be one where there are two.

May Bring Back Penny Post

Economies being effected in the post office department under Hon. Charles Murphy and his general superintendent, T. P. Coolican, may bring back the days of penny postage. The two-cent stamp was brought into fashion by the late Sir William Mulock, postmaster-general in the Laurier government and it was discovered that, instead of decreasing the postal revenues it increased them. The three-cent stamp is a product of the war. The war is over and the reduction of the rate to the old two-cent standard is in contemplation, though the reduction may not be brought about for some time yet.

Year's Record of Mail Carried

More than 500,000,000 letters and postcards, and some 250,000,000 newspapers are carried through the Canadian mails in the course of a year's business, according to figures presented by the Post Office Department to the conference of postal officials. In addition 50,000,000 parcels and 250,000,000 circulars, etc., are handled. The statement giving approximate figures for a year's business showed that in the course of twelve months 10,000,000 money orders and 6,000,000 postal notes are issued. There are 12,200 post offices operated, and 12,400 mail routes.

The summary of a year's business was given to the postal officials as indicative of the place of the post office in the business life of the Dominion. Translated into dollars, the mail service expenditure for a year was stated to be $15,000,000, and the annual cost of rural delivery service $1,750,000.

Postage stamp sales in the course of a year, it was pointed out, reach the enormous total of $28,350,000, while money order transactions entailed the changing hands of $270,000,000. Postal note transactions totalled $25,000,000, and there was on deposit in the post office savings bank approximately $25,000,000.

Place Jobber and Manufacturer on Parity in Collecting Sales Tax

REFERRING to the application of the Sales Tax and the suggested revisions outlined in recent issues of Hardware and Metal, a prominent manufacturer expresses the opinion that, "If any move should be made to amend the Sales Tax, thus making it compulsory to pass on the full amount of the tax, it should be doubly necessary to have any such amendment provide that there be no tax on sales from the manufacturer to wholesalers and jobbers on goods purchased for resale. The whole 4½ per cent. should be collected by the jobber on his sales to the retailer, the same as the manufacturer collects 4½ per cent. when selling direct to the retail merchant. That would put the jobber and manufacturer on a parity, in the event of it being made compulsory to pass on and collect the full amount of the Sales Tax."

Hardware Profits Largest in Year 1916

Investigation of Hardware Trade Conditions Over Last Ten Years Shows Hardware Profits Averaged 5.35 Cents Per Dollar of Sales—Reducing Various Costs and Bringing Turnover and Stock Investment to Right Relation—Some Manufacturers Mislead Retailers

EDITOR'S NOTE:—An exhaustive report has been secured by Hardware and Metal from the Joint Commission of Agricultural Inquiry dealing in detail with various factors concerned in the marketing and distribution of hardware and other merchandise. While these enquiries have been conducted in the United States, conditions in the hardware trade are sufficiently similar to make the result of this inquiry very interesting to Canadian hardware merchants. For this reason the report is outlined fully in the following article:—

THE retailer performs the final function in distribution of essential commodities and gives fulfillment to all preceding efforts by making merchandise available to consumers at the time, place, and in the form required by them.

The retailer's true function is that of serving as a purchasing agent for his community; as such he selects and carries a reserve supply of merchandise to meet the requirements of the individual consumer.

When the retailer enters business he assumes the responsibility of performing a public function, that of providing commodities and services to his community, economically and conveniently, and maintaining such environment as is necessary and desirable to the consumers who support him. If he fails in his responsibility and performs only as a distributing agent for the manufacturer, he ceases to be an economic factor in the community which he serves.

One of the outstanding defects in retail distribution is the retailer's failure to purchase stock in a manner that will provide a steady, even flow of merchandise to the consumer without accumulation of surplus stock, which ties up capital and credit and adds to his cost of operation. It seems probable that the greatest factor of waste in distribution is in idle merchandise stock on the shelves of the retailers and the warehouses of the wholesalers. Idle merchandise accumulates a burden of interest, insurance, rent, taxes, depreciation, shrinkage and obsolescence, in addition to tying up an unnecessary amount of capital and credit. When this burden is permitted to develop, it must be passed along to the consumer if the retailer is to remain in business.

Chart D 4.

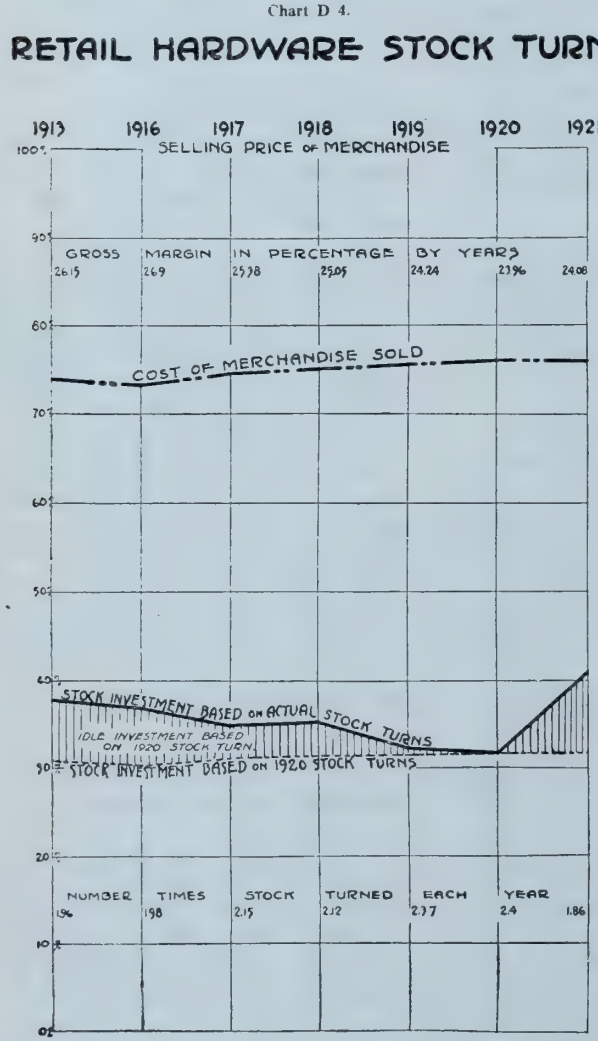

Chart D 4 shows a comparison of the stock investment in hardware based on actual turns with the stock investment based on the greatest turn shown during the period 1913-21 inclusive. This shows the gross margins received, cost of merchandise to retailer, stock investment, stock turn figure and amount of stock investment required to maintain stock turn equal to highest frequency shown during this period.

Some Manufacturers to Blame

The policy of overpurchasing reflects the practice of manufacturers who make inducements to retailers to purchase in larger quantities than they can dispose of quickly. Merchandise investment reaches its highest point of efficiency when stock turns exactly correspond with the merchandise requirements of the community and the facility for purchase without exhausting stock.

Chart D4 shows a comparison of the stock investment based on actual turns with the stock investment based on the greatest turn shown during the period 1913-1921, inclusive, on hardware.

It is the purpose of these figures to show for the years 1913 and 1916-1921: (1) The gross margins received, i. e., the difference between the selling price and the cost of the merchandise; (2) the cost of the merchandise delivered at the retailer's door; (3) the amount of stock investment; (4) the stock turn figure, i. e., the number of times merchandise stock is turned per year; (5) the amount of stock investment that would have been required to maintain stock turn equal to the highest frequency shown during the period covered by this investigation.

TABLE D8.—Cost of operating retail stores, by percentage of each dollar of sales.

	1913	1916	1917	1918	1919	1920	1921
	%	%	%	%	%	%	%
Clothing	25.90	25.20	25.90	26.50	24.00	25.70	24.03
Hardware	20.13	18.60	18.25	18.52	18.40	19.50	24.90
Shoes	24.14	24.45	24.21	24.07	23.78	25.25	26.88
Dry Goods	26.90	26.30	27.40	27.30	25.60	26.00	(1)
Groceries	14.70	15.20	15.50	14.30	14.20	14.60	16.80

1 No data.

The aggregate of these idle stock investments constitutes a heavy burden upon retail distribution, requiring greater credit, larger loans, greater cost of insurance, unnecessary warehousing and handling. It represents larger charges for interest on investment in merchandise and a greater allowance for depreciation of stock than efficient merchandising would justify. In many instances, such investment in surplus stock

Profit	6.80	6.86	6.36	5.93	6.56	4.03	1.13

Chart D 5 shows the distribution of the consumer's dollar by retail hardware and other trades from 1913-21. It is explained by Table D 1 below chart.

consumes all of the retailer's capital and credit and makes it impossible for him to take advantage of cash discounts and protect his credit standing.

Wants Cash Discounts

To some extent, surplus stocks are developed through the retailer's desire to secure quantity discount in the belief that he can thereby successfully meet competition and undersell his competitors. To do this, however, he would have to dispose of merchandise within a reasonable time or lose the earning value of more rapidly turned capital.

Chart D 7.

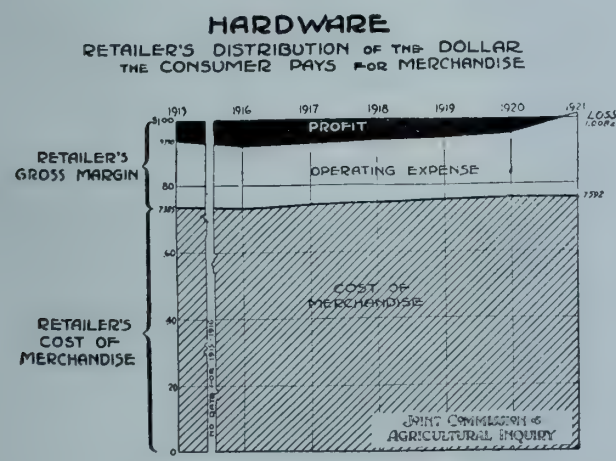

TABLE D3.—*Consumer's dollar spent for hardware.*

	1913	1916	1917	1918	1919	1920	1921
	Cents.	Cents.	Cents.	Cents.	Cents.	Cents.	Cents.

Profit	6.02	8.30	7.13	6.53	5.84	4.45	[1] 1.82
Total	100.00	100.00	100.00	100.00	100.00	100.00	100.82

[1] Loss.

Chart D 7 shows the distribution of the consumer's dollar spent on hardware in various years. It indicates that hardware profits were largest in the year 1916 when they averaged 8.3 cents profit out of each dollar. Average profit for the entire period was 5.35 cents per dollar of sales. See table D3 below chart.

Quantity discounts are offered in two forms, cash discounts from the invoice, or a merchandise discount, sometimes termed a "free deal." The latter, however, is a disappearing evil in merchandising, and should be discontinued, because it results in the dealer ordering a larger quantity than his community can absorb within a reasonable time, and adds to a surplus of merchandise a further supply of the same kind of merchandise thereby aggravating an already overstocked condition. The "free deal" practice is dishonest because it purports to be a gift of merchandise, while as a matter of fact the price which the retailer pays includes a profit for the manufacturer on the entire amount of merchandise delivered, including that which purports to be free.

TABLE D11.—Hardware, Retail.

	1913	1916	1917	1918	1919	1920	1921
Cost of merchandise	$99.72	$110.77	$128.50	$153.38	$179.41	$205.24	$196.47
Margin	$35.36	$40.76	$43.71	$51.25	$57.36	$64.77	$62.38
Per cent.	26.2	26.9	25.4	25.1	24.2	24.0	24.1
Sellig price	$135.08	$151.53	$172.21	$204.63	$236.77	$270.01	$258.85

Slow stock turns sometimes result from the retailers purchasing in excessive quantities directly from the manufacturers, with the purpose of securing a quantity price, when it would be more economical to purchase more frequently and in smaller quantities from a near-by wholesaler.

In a previous chapter, we have referred to the disadvantage of future purchasing in anticipation of an unknown demand.

As purchasing agent for his community, the retailer should

Chart D 14.

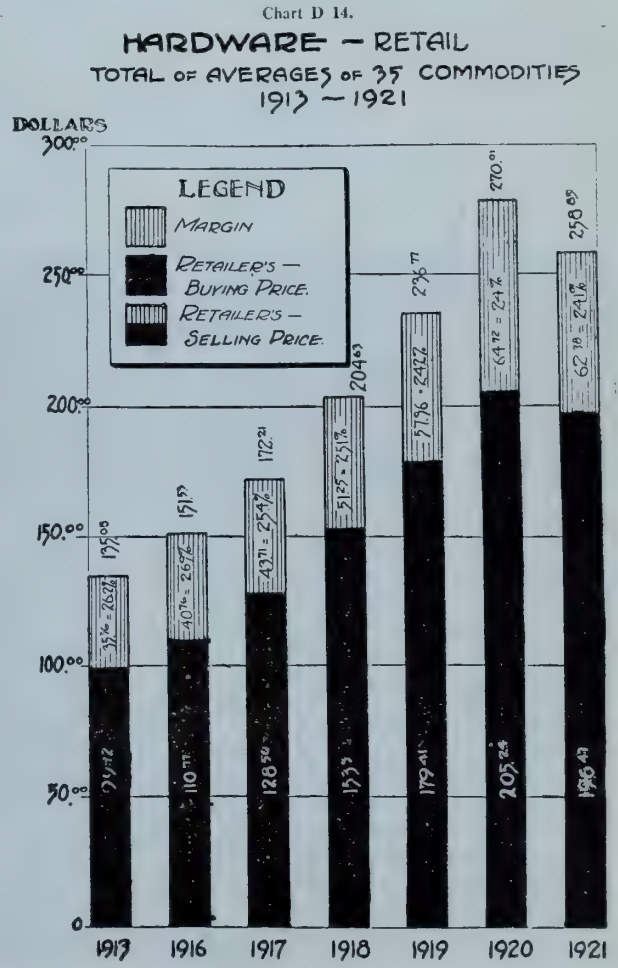

Chart D 14 shows the fluctuating prices on hardware and reflect the price which the retailer paid, the price the consumer paid, the amount of margin and the percentage of margin to sales price. It represents the total of averages of 35 commodities from 1913-21. It is explained by Table D 11.

be in a position to quote prices on such articles in his line as he does not carry regularly in stock. Failure to do this lessens his service to the community and makes it seem necessary to the consumer to purchase through other channels. In certain fields this service has been developed by wholesalers through a system of distributing price information by mail, covering a wide range of articles that the retailer does not carry in regular stock. In addition to this, the service is valuable in that it advises the retailer of price declines which he would not ordinarily observe before repurchasing.

The retailer can qualify as purchasing agent only as he becomes acquainted with the needs of the community, and this information cannot be secured by remaining behind the counters of his store and waiting for consumers to announce their requirements. The retailer cannot properly anticipate the requirements of the consumers in his community without becoming familiar with the demands and new requirements that result from changing economic conditions.

To this end the retailer should co-operate more closely with community organizations whose purpose it is to improve social, civic, commercial, and industrial conditions. In agricultural communities the retailer should maintain contact with farm demonstrators, agricultural colleges, and workers, with a view to assisting in activities that tend to improve production, marketing, transportation, and social conditions on the farm. In co-operating with such organizations he is helping to create greater opportunity for his own success.

Co-operative Buying

There are occasions when consumers feel that the retailer is not functioning satisfactorily as a purchasing agent, and there develops a disposition to create a co-operative buying organization in the belief that it would function more satisfactorily and economically. When proper relations exist between the retailer and consumer, there is neither apparent need nor advantage in creating a new agency to perform the functions of purchasing agent.

As these facts become more clearly understood by consumers there should be better support of local distributors, and this support would naturally be given to the retailers who function most efficiently as purchasing agents, with the gradual elimination of those retailers who merely serve as distributive outlets for the manufacturers.

The services rendered by the retailers are of three types: (1) Fundamental services; (2) services resulting from consumer demand; (3) services resulting from competition.

The fundamental service consists of the retailer's investment of capital in merchandise in anticipation of community requirements in quantity and variety to permit inspection and selection before purchasing. With a knowledge of merchandise and the sources from which it can be secured, the retailer contributes to the convenience and comfort of the community he serves.

The service which the retailer renders in response to consumer demands consists of the following elements: Credit to the consumer who finds it inconvenient to pay cash for purchases as they are made; delivery of merchandise for the consumer who finds it inconvenient to accept merchandise at the time and place of purchase; guaranty that the merchandise is of the quality, quantity, and value which the consumer believes he is purchasing.

Competition Increases Services

The services which result from competition tend to maintain a comparative level of selling price of similar articles and similar service in the various stores. However, in the competitive effort to attract consumers from one store or one locality to another, new services are created which ultimately are adopted by the majority of stores in order to avoid the loss of patronage. This form of competition tends to increase investment in fixtures, convenience, and waste space utilized for such purposes as rest rooms, play rooms, writing rooms, restaurants, etc.

These services may to a certain point attract trade and produce an increased volume of business, with some modification of operating cost. But when such services are instituted by one retailer and duplicated by others, they tend to create a burden of operating expense that cannot be economically supported by a community.

Composite chart D5 of the distribution of the consumer's dollar by retail dry goods, grocery, shoe, clothing, and hardware dealers shows for 1913 a gross margin of 29.16 cents, of which 6.80 cents was profit, while for 1921 the gross margin was 25.52 cents, of which 1.13 cents was profit. In 1913 the operating expenses, exclusive of profit, was 22.36 cents, and in 1921, 24.39 cents, showing an average increase of operating cost of 2.03 cents and a diminishment of profit of 5.67 cents, while the proportion of merchandise included in the consumer's dollar increased 3.64 cents. Out of the profit must be deducted such items as shrinkage in inventory value of merchandise, Federal tax, and stock-moving reductions in response to price declines or movement of stock accumulation. See Table D1.

Profits Largest in 1916

The distribution of the consumer's dollar spent on hardware is outlined in Chart D7. This chart shows that hardware profits were largest in the year 1916, when the retailer averaged 8.3 cents profit out of each dollar paid him by consumers for merchandise. From this point profits declined steadily as increased costs of operation and merchandise absorbed them. In 1921, due to a marked decrease in volume of sales, the ratio of operating expenses to sales increased materially, resulting in a loss for that year amounting to 0.82 cents on a dollar of sales in the hardware trade. Average profit for the entire period was 5.35 cents per dollar of sales. See Table D3.

Retailer Can't Control All Factors

It is obvious that the retailer cannot control all factors that enter into his operating expense. Items of taxes, insurance, "Workmen's Compensation," light, heat, water, telephone, collections, rent, repairs, depreciation of merchan-

Hardwareman Says West Now on Firmer Footing

THE MONTREAL Board of Trade Centenary Trans-Canada party arrived in the city Saturday. During their journey across the Dominion the party of 125 had traveled for thirty days, covering, by train and boat, 7,275 miles. Members, on their return, report that the trip was an entire success, both from a pleasure and educative point of view. In discussing the impressions which the West left with the eastern business men, Lieut.-Col. Robert Starke, president Starke-Seybold, Ltd., who was one of the party, stated that from every appearance the West in general would be placed on a much firmer footing after the present crop had been fully harvested.

"The vast areas which we passed through showed that the big yield this year is not confined to certain sections, but is generally good. This naturally has meant a better feeling throughout the provinces, and while it was stated in certain localities that this year will bring them to only a partial recovery from their past indebtedness, characteristic of the westerner, they will go ahead and buy on the prospects of another season. Dealers, too, look with confidence on the prospects of trade during this fall and winter, realizing at the same time that their credit will now be greatly helped."

Continuing Col. Starke stated that there was a general crying need for increased immigration. Farmers with their great areas to be harvested were handicapped for help just at the time when it was required, and in traveling through the country one could not help but realize the need of more men of the farming class to cultivate and harvest the vast stretches, parts of which were not yet yielding the amount of grain which should be taken off.

Follow-Up System For Electric Washers

Preliminary Demonstration Followed by Subsequent Calls and Entry of Prospects' Names on Filing System, Results Justifying Time Taken—Survey Indicates Big Possibilities

A RECENT survey of the electrical field from the standpoint of appliances now in use and the prospects for the sale of other appliances indicates where the effort of the hardwaremen selling electrical goods may be placed to best advantage. This survey indicates that 36 per cent. of wired homes have electric washers whereas washing takes about four hours of the housewife's weekly work; 71 per cent. of homes wired have electric irons and 4 per cent. have ironing machines while ironing takes five hours of the weekly labor; 40 per cent. of wired homes have electric vacuum cleaners while sweeping and dusting occupy ten hours a week; only two per cent. of wired homes have electric dish-washing machines while dishwashing takes fifteen hours a week. Only two per cent. of wired homes have electric ranges while cooking takes twenty-five hours work a week.

This survey also indicates that far from being anywhere near the saturation point, only a very small number of homes are using dishwashers, electric ironers, washing machines, vacuum cleaners, irons, etc., compared with the number owning automobiles, phonographs and such articles. Furthermore, only about half the houses occupied are wired for electricity though thousands of others are being wired each year as electric current extends further into the rural districts.

Plan Sells Electric Washers

Discussing the subject of electric washer sales with a hardwareman, a plan recently tried out by this retailer was outlined. He had sent out a salesman to call from door to door and demonstrate the type of electric washer he was handling. This plan was conducted for some months and the salesman had called upon a large number of prospects but not a single order was forthcoming. Though this state of affairs appeared somewhat discouraging it was continued because the merchant had absolute faith in the salesman. His prospects were made up of a list of all users of electric current, he concentrating upon those who did not at the time use a washer. Results came later and in such quantity as to fully justify the action taken by the retailer. Many sales came in the following months and the demonstration work done by the salesman was responsible for each. His work had started people thinking but it was realized that the outlay even on an easy payment plan loomed rather large in view of rather poor business conditions and it was necessary for most of the prospects to consider the matter for some time before deciding on making this expenditure. Naturally the attributes of the victrola or piano or other article which came into comparison were much discussed, but it is an indication of the result which will follow efficient demonstration that the advantages of the washing machine were so instilled in the minds of the prospects that a good proportion of them made the purchase.

The Prospect Card

Following the canvass a complete card index was kept and each card was started with the entries made by the salesman who did the demonstrating and who had first hand knowledge of the requirements. This card provided for date, name and address and a blank as to what the person was a prospect for. On the body part of the card was space for entries at various dates as to what the prospect had to say. At the left was place for date called on and on the right was place for date when the prospect should be called on again. An experienced salesman could tell at a glance just what shape each prospect was in. The card after being entered is filed to come up on the day when follow-up is to be made.

The use of the cards enabled the firm to segregate the better class of prospects and to concentrate attention on the most likely ones. Five files were then used, first in alphabetical order; second the follow-up file indexed according to date, the "sold" file for future reference, the "sold to competitors" file and the "not interested" file.

This merchant found that such a campaign well repaid him for the trouble taken and the concentration of interest at housecleaning time and at Christmas always developed some sales from the list of prospects.

How Quebec Hardwareman Goes After Hunting Trade

With the hunting season in full swing the windows of retail hardware stores may be suitably arranged with such unique displays of hunting equipment as that depicted herewith by A. G. Letourneau, of Victoriaville, Quebec. This merchant does a considerable business each fall in ammunition, guns, camp supplies, hunter's personal equipment, etc., and much interest is stirred up by the use of such displays as this. The material used in such a window is easily procured and yet it gives a very natural setting.

A Distinct Loss to All

IT IS AN odd coincidence that the great fire which has this week swept across Northern Ontario, wiping out several established settlements, and the fires which threaten in many parts of the Maritime Provinces should come during the annual Fire Prevention Week. The catastrophe in Northern Ontario is said to be the worst in its history, exceeding that of a few years ago. Aid is being rushed by both the Provincial and Dominion governments and it is to be hoped that no pains will be spared to provide generous aid immediately to relieve the hundreds of sufferers. Besides burning up much valuable timber and reducing to ashes many thriving settlements engaged in bringing into use our extensive natural resources, many splendid retail hardware and other stores have undoubtedly been destroyed. In this respect the loss is not only to the country in general but directly to the hardware trade. Steps should be taken to remove the danger of such far reaching holocausts.

Making It Easy for Mail Order Firms

AT THE later sessions of the Postal Conference at Ottawa a number of suggestions were made, but fortunately not acted definitely upon, which are of prime interest to retail hardwaremen. A suggestion, for instance, was made that the maximum weight of four pounds, six ounces, as now applying to parcel post between Canada and the United States, be increased to eleven pounds, this being the maximum weight now applying to domestic parcel post. There is no doubt that such a step would greatly increase the volume of merchandise coming into Canada from the United States and be a distinct advantage to U. S. mail order firms doing business in this country. One authority has estimated that such action would increase the volume of such business five to six times and that Canada would be called upon to bear increased liability as conveyor of additional U. S. mail unless arrangements were made for granting a larger proportion of revenue for carriage of such parcels on this side of the border. Hence it appears that not content with adjusting the regulations to benefit Canadian mail order houses by granting C.O.D. privileges, there are those who would now make the way as easy as possible for U. S. firms to do a mail order business in Canada even though this country assume greater liability as result.

There is a provision in the regulations that a salesman coming to solicit business in Canada for a foreign company must establish some headquarters in this country where records of the business are kept. Even this helps to encourage the establishment of warehouses, offices and factories in Canada but by the suggestion now made, mail order firms across the line would be given increased accommodation for soliciting business in Canada without the necessity of having any Canadian establishment.

The suggestion was also made that weight of parcels carried in Canada be increased over the present maximum of eleven pounds though the same limit of size of parcels is to be observed. It has generally been recognized that the express companies are best fitted to handle parcels of a weight over eleven pounds and under that which would be classed as freight. That is their business and they have the conveyances and shipping facilities to take care of it. If the limit of weight is to be much increased it will not be long before the government parcel post service is encroaching upon its own express service, and the disastrous results of such duplication of effort have already been made apparent.

Parcel Post Shows Big Deficit

IN CONNECTION with the introduction of the new C.O.D. Parcel Post service in Canada, as outlined in recent issues of Hardware and Metal, it is interesting to note that postal officials in the United States are finding it necessary to increase rates on Parcel Post in view of deficits which have followed its operation. Rates in that country on such mail matter are being advanced to cover an annual deficit of nearly seventy million dollars. The increase will mean an average of $3 a year to every family. The U. S. Postmaster-General makes it plain that the Parcel Post service has not been paying its way. Steps have been taken to establish responsibility for the deficit and it has been found that first class mail is paying a profit; that second and third class are at least making expenses; that special services cost the country two to three million dollars a year and that Parcel Post is carried at a considerable loss. It is not known yet exactly what the increase will be but it has been estimated that increased rates of three cents a parcel will be necessary to cover the deficit.

The situation in Canada is similar in some respects, notably the fact that the Parcel Post branch of our mail carrying service has also been operated at a loss. Yet despite this fact the new C.O.D. service has been introduced since October 1 bringing with it increased accommodation for mail order houses and large city department stores who seek business throughout the country in direct competition with local retail stores. This accommodation brings with it a responsibility to the government which did not exist under the former plan, and it leaves the strong likelihood that the government may be unable to secure 100 per cent. collections. If the attempt is being made to put the parcel post service on a paying basis by endeavoring to increase the volume of material carried, it is questionable if this can be accomplished at rates which have so far shown a deficit, to say nothing of the increased liability to the carriers under the new plan. The discussion of the subject at the conference of Dominion Postal Officials in Ottawa this week will be read with interest.

Opportunity for Hardware Business

CANADA'S Minister of Trade and Commerce is proceeding to Australia to negotiate some preferential trade agreement by which the commercial conditions of Canada may be improved. We sell a wide variety of lines to Australia notable among which are a number of lines of hardware including drills, tubing, cutlery, aluminum, cream separators, steel wire, bar iron and steel, nails, tools, brushes, tires, explosives, etc. Our exports to Australia have gradually increased from approximately three million dollars in 1912 to eighteen million dollars in 1921. Imports increased from four hundred thousand dollars in 1912 to four million in 1919 but have since dropped off to about eight hundred thousand for 1921. From the standpoint of Canada's producers of iron and steel products such a trade agreement with Australia would be particularly advantageous.

Much Protest Over New Gasoline Pump Regulations

Retailers Object to Clause Stating That Pumps in Future Must be Placed on Sidewalks—Works Hardships With Merchants Who Have Pumps Already Installed

MONTREAL.—The proposed new by-law governing the installation of gasoline pumps in Montreal, is being received with considerable discussion on the part of many merchants, and disfavor is found in many quarters. A delegation of the Montreal branch, Retail Merchants' Association of Canada, recently waited on the special aldermanic committee and fully discussed the measure, recommending certain changes. The by-law is by no means a new one, it being brought to the attention of the city council two years ago, and again revived earlier this year. On both previous occasions action was deferred, but from present indications it would seem altogether probable that the law will be put into force on this, its third appearance, it being met with favor by the council with a few minor changes.

Provision is made in the new law that no reservoirs be installed under public property; that pumps must have an electric light on top of them illuminated for the same period as the street lights; that the centre of the pump must not be less than eighteen inches from the edge of the sidewalk and be at least five feet from any building, with the reservoir pipe at least four feet under the sidewalk. Permits to instal will only be given to the owners of the property at which the gasoline is to be sold, and accompanied by a plan and full details of the requirements.

Sidewalk Pumps

In discussing the proposals with M. Lapointe, local secretary of the R. M. A., it was pointed out that the clause which states that all gasoline pumps must be placed on the sidewalk was the one meeting with disapproval from the association. Many merchants who were now selling gasoline had their pumps installed inside the building with an overhead lead pipe to the edge of the pavement. This allowed them to sell the gasoline from the inside with no obstruction whatever to the sidewalk traffic. Under the new law they will be compelled to move the pump at least five feet from the building which means a complete tearing-up of the system. The worst feature is that many of these dealers will not be able to use their old pumps, as the specifications of the sidewalk pump call for a totally different apparatus than many of them are now using.

Merchants in Downtown Section

It is also clearly stated in the by-law that permits will only be granted in cases where a pump on the sidewalk will not hinder traffic or prove a nuisance in any way. At the present time there are a number of merchants in the downtown section, and even in the residential section, of Montreal selling gasoline. The question might well be asked, where will these dealers place their pumps? It is questionable whether a permit would be granted to such a store, certainly not on some of Montreal's busiest thoroughfares.

By-laws in Other Towns

Although other centres, particularly in Ontario, have a by-law much the same as the one now proposed for this city, Mr. Lapointe said that pumps on the outside might be satisfactorily worked where the climate was not so severe. In Montreal, Ottawa and other eastern cities the weather conditions were much more severe than they were in most Western Ontario cities and towns, and selling gasoline on the edge of the sidewalk is a little different in these places than it would be locally. In mid-winter, with the temperature well down below zero, there would be little encouragement for the merchant to go outside and draw gasoline. Then, too, it was always noted that where a gasoline pump is situated the sidewalk becomes very slippery because of the tramping from the added traffic around this point. Certain cities compelled the merchants to clean the ice and snow from the sidewalk in front of their premises, but unfortunately Montreal had not yet enforced such a law.

Mr. Lapointe further stated that in all probability the association would deal further with the question before any action was taken, and he hoped to get a strong representation of merchants to again go before the city council and ask for further changes in the by-law, especially dealing with the question of merchants who already have their pumps inside their buildings.

WANT GASOLINE TINS PAINTED RED

North Bay, Ont.—Arising out of a recent tragedy at Sturgeon Falls, in which two young boys were burned to death in their father's home and other members of the family barely escaped with their lives as a result of an error in using gasoline instead of coal oil in the kitchen stove, a resolution was introduced at a meeting of the North Bay Board of Trade, recommending that all cans containing gasoline be painted red with white or black markings, and that anyone purchasing gasoline must contain it in a can of this description.

Advising Customers Business is Now on "Cash Basis"

AN INCREASING number of hardware stores are going on the cash basis of conducting business and enquiries have frequently come to Hardware and Metal as to the method to be employed for making this change and the announcements to be made to customers so as to avoid any semblance of friction. C. H. Horsley, hardware merchant of Castor, Alta., has placed his business on the cash basis since October 1, and the following is the announcement he made through his local newspaper:

> To Our Friends and Customers:
>
> We herewith announce that on and after October 1st our business will be run on a strictly cash basis. During the time we have been in Castor we have tried to give you the best value for your money and have come to the conclusion that the only way in which we can get down to rock-bottom prices is to buy for cash and to sell for cash. The expense of maintaining credit accounts is no small item. We know by eliminating this expense and also bad accounts we can offer very much better values.
>
> Municipal accounts, building accounts, outside workshop accounts such as tinsmithing, plumbing, etc., will be payable on completion of the work or first of the month.
>
> It will pay you to get our prices under the cash system, the credit system entails a great deal of expense and lost time which our customers will save by paying cash. Often an account will require before it is collected an expense of 15 to 20 per cent. The cash system means this expense will be done away with and the saving given to our customers.
>
> We take this opportunity of thinking you for your patronage of the past and trust we may have the pleasure of serving you in the future under our money saving Cash System.

The above may offer a suggestion for such announcements by other hardwaremen contemplating such action.

Events in the Trade

BUSINESS CHANGES

R. H. Breeze, hardware, Danforth Ave., Toronto, Ont., has been succeeded by J. H. Nichol.

Paisley, Ont.—A quick change in business occurred when Fraser Bros. disposed of their hardware stock and trade to Mr. L. O. Charlesworth, of Glencoe, after a few hours business parley. The new proprietor, who has about twenty years' experience in this line, has now taken possession.

MOVES TO NEW PREMISES

Bridgeburg, Ont.—The Twentieth Century Store is enlarging its stock of hardware and woodenware and is moving to larger premises now being vacated by W. M. Hogg.

FIRE LOSS

Owen Sound.—The warehouse of the Keenan Wooden Ware Mfg. Co., entirely filled with the company's products, was completely burned with loss estimated at $50,000.

DOMINION INCORPORATIONS

The Economic Patent Kettle Co. Ltd., head office Calgary, capital $30,000, to manufacture metal goods of all kinds, kettles, boilers, furnaces, etc.

PERSONAL

George Henderson, president of Brandram-Henderson, is visiting their Maritime branch this week.

James A. Hossack, sales manager, Lufkin Rule Co. of Canada, leaves this week for a trip through Western Canada.

C. S. Phoenix, of the Steel Co., of Canada Ltd., has been transferred from the Hamilton office to the sales department in Toronto.

Chas. Adcock of Adcock & Co., Montreal, is on a business trip through the Western provinces, and will call on the principal jobbing houses from Winnipeg to the coast.

Jules C. Paquette, formerly associated with Lewis Bros., Montreal, is now representing the Sorel Lock Limited, manufacturers of locks, Sorel, Que. Mr. Paquette's territory is the province of Quebec.

The announcement is made that C. J. Stover has been appointed manager of the Consolidated Asbestos Company, replacing Major-General Sir John Carson, K. C. B., who is retiring on account of illness. Sir John, who has been ill for some time, is a director of many industrial corporations, and a well-known figure in the financial life of the Dominion.

NORTHERN ONTARIO FIRE

One of the greatest forest conflagrations in the history of Northern Ontario, has destroyed Haileybury, North Cobalt and many other smaller centres including Heaslip, Brentha, Elk Lake, Charlton, Earlton Junction, Thorneloe, Uno Park and Englehart. Many deaths have been reported and relief trains are being rushed by the provincial and Dominion governments. No definite details as to the losses among retail merchants in these districts are available at time of going to press.

BURGLARS STEAL BRUSHES

Hamilton, Ont.—Burglars visited the warerooms of Meakins & Sons, 77 Dundas Street, and walked off with five dozen of the most expensive brushes in the shop, valued at approximately $275.

STEEL MERGER OFF

The proposed merger of the Inland Steel Company, the Midvale Steel and Ordnance Company, and Republic Iron and Steel Company, will not be effected. The situation arising from the action of the Federal Trade Commission in declaring that such a merger would be illegal was declared responsible for the decision.

ANNUAL MEETING OF THE CANADIAN HARDWARE ASS'N

The annual meeting of the Canadian Wholesale Hardware Association is being held in Montreal this week. At the time of going to press the meeting was still in progress. Thomas M. Birkett of Thomas Birkett & Sons, Co., Ltd., Ottawa, Ont., was re-elected president of the association. At the annual banquet, Sir Henry Drayton was present as the guest of honor. A complete report of the convention will appear in next week's issue of Hardware and Metal.

ST. JOHN HARDWAREMAN ADDRESSES ROTARY CLUB

Miles E. Agar, one of St. John's leading hardware merchants, gave an address on "Trade of Old St. John" at the weekly luncheon of the Rotary Club. Mr. Agar dealt in a very interesting manner with the methods of doing business in the olden days, and said that it was with a good deal of pride that he recalled the names of St. John residents who had been in business seventy-five and a hundred years, and were still going strong, although in most cases of course the founders had passed away, but the businesses still carried their names. There are about fifty of these old firms still in existence, Mr. Agar stated.

MARITIME BOARD OF TRADE TO HAVE SECRETARY

At the Maritime Board of Trade convention held in St. John, N. B., it was decided to have a permanent secretary. This step was considered necessary for the successful carrying out of a progresive campaign to boost the Maritimes, and build up trade with the three provinces, New Brunswick, Nova Scotia and Prince Edward Island.

RETAIL MERCHANTS TO FORM BRANCH IN CONNECTION WITH CHAMBER OF COMERCE

Hamilton, Ont.—An enthusiastic meeting was held in the Chamber of Commerce by a representative gathering of retail merchants for the purpose of forming a retail merchants' section of the Board of Commerce.

The meeting was presided over by J. R. Watson, who informed the members that there were at least 200 retail merchants members of the local Chamber of Commerce. The advantages of forming a local retail merchants' section were discussed, and it was decided that a committee be appointed to select 40 names from the 200 to be balloted on by all the members. Fifteen of the forty would form the executive of the new section. The committee appointed was: J. R. Watson, W. J. Hobson, Fred Cloke, F. H. Healey and G. J. Kingdon.

OPPOSE TAX ON BICYCLES

London, Ont.—The Canadian Bicycle Dealers' Association, on the occasion of their convention in London, mingled business with pleasure in interesting quantities and altogether had a great time.

It was decided that bicycle week would be the second week in May. Next year this annual institution will be known as Canadian bicycle show week and in addition to the general arrangements for it, dealers in various cities and towns will have spring openings of their goods in that week.

On motion of B. B. Halladay of Weston, the association voiced its disapproval of the proposed provincial tax of $2.50 on each bicycle, embodying in the resolution that, as bicycles are now largely used in business and by juveniles, such an imposition was unfair. They also expressed approval of a municipal license fee of 50 cents per year. Mr. Ferries also moved for the appointment of a membership secretary and the increase of the executive committee from nine members to 12.

BUSINESS CHANGES

J. L. Vokes & Sons, hardware, Toronto, are moving from their former location at 68 King street, W., to new premises at 106 York street.

PERSONAL

W. A. C. Hamilton, secretary of the Consumers' Cordage Co., Montreal, left this week on a month's trip through the western provinces to the coast.

J. H. Conover, general manager, and T. Houghton, sales manager, the Martin-Senour Co., Montreal, are on a visit to the Maritime Provinces this week.

SUDDEN DEATH OF JOHN P. SEYBOLD

John Phillip Seybold, director of Starke-Seybold, Ltd., and representative for the Province of Quebec of the Independent Cordage Co., Toronto, and Plymouth Cordage Co., Welland, Ont., died suddenly from heart failure while in his office in Montreal. He was apparently in his usual health up until the time of death, as two of his sons called on him at his office only a few hours previous.

Mr. Seybold was born in Montreal in 1848, and was a life-long resident of the city. As a youth he started in the hardware business, and was first employed with the old firm of Joseph N. Hall & Co., after which he went into the retail hardware business for himself on St. Joseph Street, now Notre Dame. On the death of J. N. Hall he engaged with his father, the late Christian Seybold, in the wholesale hardware business, under the firm name of Seybold, Son & Co., on St. Paul Street. Later they moved to larger premises at 478 St. Paul Street, which were burned in the Board of Trade fire a few years later.

The firm then erected a modern structure on the same site, as Seybold & Sons Co., Ltd., which in 1907 was amalgamated with the Starke Hardware Co., under the present firm name of Starke-Seybold, Ltd., on St. Peter Street. At this time Mr. Seybold retired from active connection with the new firm, and formed a new business affiliation, as representative for the Province of Quebec of the Independent Cordage Co., Toronto, and the Plymouth Cordage Co., Welland, Ont. This business soon grew beyond his strength, and he was joined by his son, E. L. Seybold, under the firm name of J. P. Seybold. Two other sons, Herbert B. and Gordon C., continued the family interest in Starke-Seybold, Ltd., with Lieut.-Col. Robert Starke and the late William Starke.

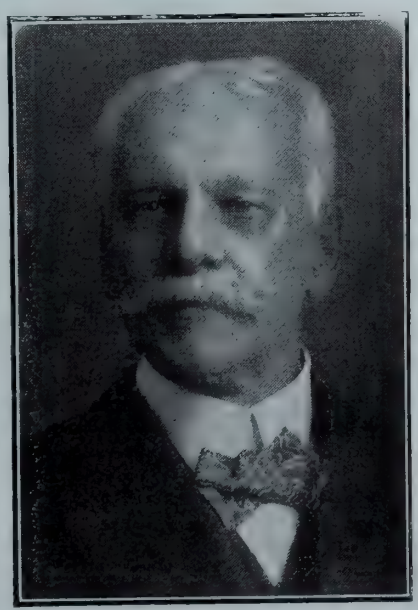
Mr. Seybold is survived by his widow, four sons, Ald. Herbert B., Gordon C., E. Leslie, all of Montreal, and J. Clifford Seybold of London, Ont., and one daughter, Mrs. George E. Blackburn, Westmount.

Western Canada News

WESTERN CANADA NOTES

Alf Babb, hardware merchant of Portage La Prairie, was a caller at the J. H. Ashdown Hardware Co.

The Canadian Metal Tie Co., Ltd., was incorporated in Victoria this week with capital of $500,000. The head office is to be in Vancouver.



Harry Moulden, western representative of Taylor-Forbes Co., and Dowswell Lees & Co., spent a few days in Calgary among the trade on his return from western coast points.

R. A. Graham, secretary-treasurer of The J. H. Ashdown Hardware Co., Ltd., Winnipeg, is in Calgary this week on a tour of inspection of this company's western branches.

C. H. Tewksbury, vice-president of the Boston Varnish Company, is spending a few days in Calgary in the interest of the business of his firm, and incidentally looking up his old friends made in earlier days.

A. G. Richards, manager of the plumbing and heating department of Marshall Wells Alberta Co., Edmonton, visited the trade for a day on his way through to Winnipeg.

At the regular weekly luncheon of the Vancouver Electric Club, which occurred on the anniversary of the birth of that pioneer of electrical science, Michael Farraday, an interesting address on his life was given by J. Francis Bursill. President Pym was in the chair.

THE LATE JOHN P. SEYBOLD

PRAIRIE CHICKEN SEASON OPENS

The season for shooting prairie chicken, partridge and grouse of any variety, except ptarmigan, opens October 15, and not October 1, states J. H. Evans, Manitoba deputy minister of agriculture. The open season, he said, is from October 15 to 22, and the total bag must not exceed 25 birds.

WANTS LOWER EXPRESS RATES IN WEST

Moose Jaw, Sask.—The Moose Jaw Board of Trade decided to make an attempt to have the express rates reduced.

After a discussion on the subject, the secretary of the local Board of Trade was instructed to communicate with the Associated Boards of Trade of Saskatchewan, asking that body to co-operate with the local Board of Trade in an effort to get the Board of Railway Commissioners to consider the reduction of express rates.

RETAIL CLERKS IN EDMONTON BATTLE OVER HALF HOLIDAY

A verbal battle was staged in the Edmonton council in connection with consideration of the half-holiday question. R. McCreath, appearing for the retail clerks and the Trades and Labor Council, which had protested against the action of council in suspending the weekly half-holiday by-law, pointed out that the clerks had been granted the right of a holiday by a plebiscite taken two years ago. Also the resolution of the joint committee, which had asked for a holiday until September 30, had been ratified by the city council. The clerks were reasonable, he said, and if the merchants had a reasonable proposition to make the clerks would be disposed to consider it. He held that it was wrong for the city council to suspend the by-law because of the objections of a few disgruntled merchants.

W. A. Carmichael, president of the Retail Clerks' Association, traced the history of the half-holiday dispute here. In Calgary, Medicine Hat and Lethbridge the half-holiday was in effect all year,

APPOINTED CANADIAN REPRESENTATIVES

While on his recent trip to England and the continent, John Richardson of Richardson & Bureau secured the Canadian agency for Henry Rogers & Co., Wolverhampton, Eng., cutlery manufacturers and exporters of metals, chains, anchors and ship chandlery. They will represent this firm throughout the Dominion with the exception of British Columbia, the trade being already taken care of in this province.

New Hardware Goods

Offered to Canadian Hardwaremen

BEACON COMBINATION PARKING AND STOP LIGHT

The parking light of this device is made in one piece connected with the stop light portion and held in position by a broad nickeled clasp. The stop light portion is of drum design and flashes red stop signal when the brake is applied by means of a switch carried underneath the car. The parking light shows red to the rear and white to the

front and is fitted with a 2-candle-power bulb, effecting a considerable saving in storage battery capacity over the lighting of head and tail lamps. The shell of the Beacon light is made of high grade tempered rolled steel. The switch is steel encased and is entirely enclosed preventing dirt, etc., from putting it out of order. Made by the Beacon Stop-Lite Motor Lamp Mfg. Co., Cleveland, Ohio.

"REMY" TRANSMISSION LOCK FOR FORD CARS

This lock consists of a transmission case cover having on its under side a forged steel bolt and a malleable iron cross-bar. The bolt and bar are operated by a key turning in a locking cylinder which projects above the floor board of the car, near the foot brake pedal. When the device is locked, the bolt moves forward and engages the teeth of the flywheel, and the cross arm slides under the sides of the transmission case opening. The makers point out that this renders it impossible to start the motor or remove the lock. It fits into the top of the Ford transmission case and is installed by screwing it on in the place of the original cover. When installed the lock lid comes just above the floor board near the brake pedal. Made by the Hercules Mfg. Co., 2128 Northwstern Ave., Indianapolis, Indiana.

SIDE OUTLET PLUG

A new side outlet plug has been placed on the market by the Anylite Electric Company of Ft. Wayne, Ind. This product is designated as the "Anylite

TP-2." Its construction is similar to that of the "Anylite" twin plug, the cover being of cold molded insulation and the legs of hard vulcanized fibre. The lower leg is threaded for a shade holder so that the lamp and shade are held in correct relative position, the tap for appliances being made above the shade.

"PERFECT" WAX POLISHER

Messrs. Braun & Bonnick, Ltd., Toronto, are introducing to the market their new "Perfect" wax polisher. One of the features of this type of floor polisher is the fact that the handle is forked at the lower end, and clamps on to both sides of the top. The manufacturers point out that this insures an

even pressure when in use, either pushing or pulling the brush.

The grooves in the top of the polisher permit the steel fork to lie flush with the top, when the polisher is in use for floor surfaces under low furniture or obstacles. Heavy felt bumpers are also noted, these covering both ends as a protection against injuring woodwork. It is made in three weights, 15, 20 and 25 pounds.

NEW DOMESTIC GRINDER

The Luther Grinder Mfg. Co. of Milwaukee, Wisconsin, have recently announced a new four-inch tool grinder for domestic use to the trade.

IDEAL MOP WRINGER

A new patent "Ideal" wringer mop is being distributed by the Ideal Aluminum Products Ltd., Toronto. This mop is fitted with rubber rollers, the same as used on a washer. According to the manufacturers' description, this mop can be easily wrung out, without the hands coming in contact with water. It is also claimed that hot water or water mixed with chemicals can be safely used.

Metal Mendit, is another product added to the Ideal line. This is described as a simple mender for leaky utensils, irrespective of their metal composition. It is an aluminum solder and heats quickly.

STARRETT 1-INCH MICROMETER

A new one-inch micrometer has been placed on the market by the L. S. Starrett Co., Athol, Mass. The frame is drop forged and is ribbed to provide added rigidity, and is finished in black enamel. It is claimed to have a longer life due to the fact that the contact points are .270 in. dia. with a screw of .312 in. dia. Decimal equivalents are marked on the thimble. The micrometer can be obtained either with or without a ratchet stop.

FUEL ELECTRIFIER

The Bukolt Manufacturing Co., have recently placed on the market a device for heating and vaporizing gasoline fuel by means of electric heat before it reaches the cylinder. It is claimed that this is accomplished by means of a heat coil of special material which produces heat at the least resistance. The apparatus includes a wire ball forming a screen through which the fuel must pass. This ball is heated red-hot and transforms the liquid into gas ready for explosion under cylinder pressure. The heat coil is placed and connected in between the carburetor and manifold on the charging line between the generator and battery.

PRICE revisions on the current hardware markets are again of a varied nature, but, as has been the case during recent weeks, the number of advances is far in excess of the reductions. Higher levels are now in effect on common brass butts, including standard narrow, middle, broad, desk and shutter butts, and a similar upward change is also noted on radiators and boilers. The chief downward revision is found in the spring booking prices on rubber lawn hose, a reduction of between ten and fifteen per cent. being announced. That some higher levels will also be made effective in the near future on chain is rumored, while the manufacturers of Superfex stoves announce that an increase is pending.

THERE has been a lull in the activity on the domestic bar iron markets, and, while trading in sheets is still reported brisk, the march toward higher quotations has halted, temporarily at least. The steady trend on lead and zinc products is chiefly due to the upward climb in primary metals. Wrought piping is on an extremely firm price basis. A seasonal slackening is now evident in the demand for corrugated sheets. Manufacturers of the Mephisto line of auger bits state that an advance in price will probably be announced in the near future.

THERE is still a good fall trade generally recorded for many lines of builders' hardware, including locks, butts, glass, nails, roofings, building papers, sash cord, sash weights, paints and varnishes. Reports from the west indicate that much of the threshing in the Prairie Provinces has been completed, and the balance should be done early next week providing the present fair weather continues. A splendid average yield of grain is being marketed, and farmers who are finished with threshing are getting a lot of fall plowing done and in some districts the seeding of fall rye is general.

Montreal, Que.

MONTREAL, October 5.—Market changes are again in an upward direction, and apart from actual price revisions there are other stable hardware commodities with a very firm undertone, and higher prices are considered pending. Eavestrough and conductor pipe have advanced quotations, these products now selling at seventy per cent. off list prices. The standard line of brass butts are higher in price, also skate screws. An early revision to higher levels is expected on "Mephisto" auger bits, while coil chain prices are reported as very firm.

There is an improvement in the scrap metal markets with lines of copper and steel much stronger in tone. Lead and spelter on primary markets still display a good amount of strength, and as a result the undertone of finished products is very firm. Roofing manufacturers state that a very strong tendency has crept into the market for their products, and advanced prices are thought likely at any time.

PROBABLE INCREASE ON "MEPHISTO" AUGER BITS

Montreal.

The manufacturers of "Mephisto" auger bits announce a probable advance in prices of from 15 to 20 per cent. in the near future.

COMMON BRASS BUTTS QUOTED AT HIGHER PRICES

Montreal.

An advance of approximately 15 per cent. is made in quotations on the standard line of brass butts, including narrow, middle, desk, broad and shutter butts.

ADVANCED PRICES ON TROUGH AND PIPE

Montreal.

An advance of a little over 10 per cent. is made in quotations on eavestrough and conductor pipe. The discount which was formerly 70 and 10 per cent. off is revised to 70 per cent. Conductor pipe elbows and sundry lines are unchanged at 60 per cent. off list prices. The undertone of the market for these materials has been very firm for some weeks past, and as pointed out in recent issues of Hardware and Metal new higher prices have been considered as pending. Flat galvanized sheets have been very firm in price, quotations recording various advances through the later summer months amongst different distributors. The present revision in trough and pipe is said to directly reflect the upward swing in flat sheets. Following are list prices and prevailing discounts:

EAVESTROUGH:

O. G. round and half round, per 100 ft. 8 in., $16.90; 10 in., $18.70; 12 in., $22.20; 15 in., $29.80; 18 in., $37.80.

O.G. Square bead, per 100 ft.: 8 in., $15.90; 10 in., $17.70; 12 in., $21.20; 15 in., $28.80; 18 in., $36.80.

Discount 70 per cent.

CONDUCTOR PIPE—Round, Plain and Corrugated. per 100 ft.; 2 in., $18.40; 3 in., $22.30; 4 in., $29.60; 5 in, $40.00; 6 in, $49.00; 6 in., $49.00.

Discount 70 per cent.

CONDUCTOR ELBOWS—

Plain or corrugated, price per doz.

2 in., $5.25; 3 in., $6.00; 4 in., $10.50; 5 in., $24.00; 6 in., $29.00.

Discount 60 per cent.

SKATE SCREWS QUOTED AT HIGHER FIGURES

Montreal.

Higher prices are now given on skate screws, these now being quoted at 55 cents per carton of one dozen packages.

SLIGHTLY IMPROVED MARKET FOR BOILER TUBES

Montreal.

The market for boiler tubes is now said to be in a slightly improved position, demand a little better than during the past summer months, and a strengthening tendency evident in production circles in line with other iron

and steel products of this nature. Stocks are now considerably less than formerly, and distributors state that local quotations will in all probability reflect the tendency in primary circles more readily in future. Following are unchanged quotations:

BOILER TUBES—	Seamless	Lapweld
1 inch	19 00	....
1¼ inch	21 00	....
1½ inch	20 00	....
1¾ inch	23 50	....
2 inch	20 00	19 00
2¼ inch	23 00	21 00
2½ inch	26 00	22 50
3 inch	32 00	28 50
3½ inch	37 00	33 00
4 inch	47 00	42 00

Prices per 100 ft. f.o.b. Montreal.

STEADY TONE IN COTTON WASTE MARKETS

Montreal.

A steady situation remains in cotton wastes, the undertone of the market continuing fairly firm with only minor fluctuations in raw cotton circles. Dealers are still of the opinion that prevailing prices will remain unchanged until later on in the year at least. Present quotations follow:

COTTON WASTE—	Per lb.
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13
X Press	0 11½
Colored—	
Fancy	0 13½
Lion	0 12
Popular	0 09
Keen	0 07½
Wool Packing—	
Arrow	0 24
Axle	0 20
Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

LEAD AND ZINC MARKETS IN FIRM POSITION

Montreal.

Lead and spelter on primary markets still contribute a firm undertone in lead and zinc products. The former metal is very firm on American markets, while London also reports substantial gains. Spelter has for some time past been displaying one of the strongest, if not the firmest tone of any metal on the ingot list. Manufacturers of the finished products state that they are now awaiting further developments, and in the meantime the market in general is in a very firm position. Following are present quotations:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs. sq. ft., lb.	0 10½
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¼
Do., 4 to 8 lbs. sq. ft., lb.	0 9½
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 25
Do., strictly, lb.	0 22
Do., commercial, lb.	0 21
Do., wiping, lb.	0 21
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

STEEL PRICES FIRM BUT UNCHANGED

Montreal.

Steel producers still report a firm undertone in the iron and steel industries generally, with little material change in the market for bar products. Pig iron remains at the recent advance, and the opinion is expressed in one quarter that the prevailing figure may represent the peak price. There is however, no indication of any easier tendency and it is probable that a much steadier market will be noted. Local quotations on the various lines of bar iron and steel remain unchanged, and one of the likely reasons now stated for the variation in quotations between the local market and other domestic centres is that a considerable quantity of these products has been available from firms who were anxious to dispose of their heavy stocks, and offered same at a reduced figure.

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

SLACKENING IN SEASONAL CALL FOR CEMENT

Montreal.

Current quotations on cement remain unchanged with the seasonal demand said to be somewhat less than a few weeks ago when contractors and other builders were rushing outside construction work through before a turn to colder weather and frost which is liable at any time now. Unchanged price levels are as follows:

CEMENT—	
Car load lots, per bag, f.o.b. steam cars	$ 0 92
Per bag, delivered	1 00
Less car lots, per bag, f.o.b., yard	1 00
Per bag, delivered	1 10

Less 5 per cent.

Rebate of 20 cents for empty bags.

CORRUGATED PRICES FIRM BUT UNCHANGED

Montreal.

Although higher prices are now recorded on eavestrough and conductor pipe, and other galvanized were recently revised to higher levels, corrugated sheets remain unchanged. The undertone of the market however is still described as firm with demand continuing quite favourable for this season of the year. List prices and discount are the following:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

AMPLE SHEET STOCKS AMONG DISTRIBUTORS

Montreal.

A little different aspect is now manifest in the local sheet markets, especially galvanized, when distributors state that owing to continued arrivals of fresh cargoes from overseas their stocks are gradually becoming heavier in face of a steady demand. Up until recently there has been little or no surplus on hand and the fact that stock replenishment has been of such proportions as to cause a surplus, with prospects of further arrivals from England, is looked upon in some quarters as sufficient for a turn in the market. Quotations for many weeks past have been on an upward climb, but it may be that this tendency is now nearing an end. It is also noticeable at the present time that price levels slightly lower are quoted by a few firms for attractive orders.

There is no change in quotations on tin plate or Canada plate, and following are prevailing average prices:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 25	7 75
26 gauge	7 00	7 50
24 gauge	6 40	6 90
22 gauge	6 05	6 55
18—20 gauge	5 35	5 85
Other Brands—		
10¾ oz	7 00	7 50
28 U. S. gauge	6 60	7 10
26 U. S. gauge	6 30	6 80
24 gauge	6 15	6 65
22 gauge	6 15	6 65
18—20 gauge	6 00	6 50
16 gauge	5 85	6 35

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 50

Welsh, polished, 60s	7 25
Galvanized, 52s	7 25
Galvanized, 60s	7 75

JUTE IS VERY FIRM ON ROPE MARKETS

Montreal.

With the active summer season for rope and twine now over, manufacturers state that prospects for later fall trade are fairly good, and renewed activity is looked for from now until the close of navigation. Among raw materials entering into the manufacture of these products, jute is very firm in price, this tendency gradually becoming more apparent from week to week. There is little change in the market tone of manila or sisal, both materials remaining steady to firm.

SLIGHTLY STIFFER TREND IN SOME SCRAP METALS

Montreal.

Reflecting the firmer tendency in certain virgin metals, such as lead, zinc and copper, these scrap materials are now displaying an improved market tone, although up to the present no change is made in former nominal quotations. Ferrous metals, especially cast iron waste, remains in a firm position, but buying in general is still of a very limited nature, and dealers state that this is really the obstacle in the way of an appreciable betterment. Following are dealers' average buying prices:

Automobile Tires	**0 50**
Rubber Shoes	0 02
Yellow brass	0 05 to 0 06
Red brass	**0 08¾**
Light brass	**0 04**
Scrap zinc	0 03¾
Lead, heavy	0 04½
Lead, tea	0 03
Light copper	0 08½ to 0 09
Heavy copper	0 11¼
Wrought iron, R. Rd., No. 1 per gr. ton.	**10 00**
Malleable scrap (ton)	9 00 to 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	**9 50 to 10 00**
No. 2 busheling	**3 00**
Boiler plate	8 00 to 9 00
No 1 machinery cast	**20 00 22 00**

PROBABLE INCREASE IN CHAIN PRICES

Montreal.

Present quotations on coil chain are very firm, and changes to higher levels are said to be pending. Manufacturers have advised distributors of the stronger tendency in the market, owing to higher raw material and production costs, and point to the increased levels on American markets as an indication of the trend of these materials.

INGOT METALS REMAIN IN FIRM POSITION

Montreal.

Recent advances in certain ingot metals are holding fairly well, antimony and spelter still reported in firm market positions, with a further increase in prices on the former metal again this week. Tin has shown recent signs of strengthening after a period of fluctuations.

TIN.—Tin has been somewhat firmer in London during the past week, and higher prices are anticipated. Demand is only moderate but despite this, prices locally are said to be more in line for an advance than a recession. Market is quoted at 36½ cents.

COPPER.—This metal is rather dull and producers appear willing to sell over the next few months at to-day's figures. Production is a little heavier and this has a tendency to keep prices down, although the market otherwise is considered in a fairly firm position. Quotations remain at 17¾ cts. for electro, and 17½ cts. for casting.

SPELTER.—Although on a higher price basis than formerly spelter is a little easier with spot metal quoted at 6¾ cents, East St. Louis. This higher level of prices is said to be partly caused by higher duty, but apart from this the market is firm and higher than the English market. Consumption is fairly good locally with stocks none too heavy. Price is firm at 9 cents.

LEAD.—This market continues very strong in the United States, but the London market is a little quieter and Canadian prices are now based on English competition. The higher duty now in force in the U. S. may divert foreign lead to Europe and this will probably result in lower prices in future. Local quotation 6¾ cents.

ANTIMONY.—Antimony is firmer owing to the increased duty in the U. S., and stocks have been somewhat depleted. Demand locally is very good with markets higher at 7¼ cts. for Chinese, and 7¾ cts. for high grade English.

ALUMINUM.—This market is also a little firmer in the United States, but locally prices have not advanced to the same extent, owing to importation from Europe. Local market is quiet at 22 cents.

Toronto, Ont.

TORONTO, October 5.—A variety of price changes continues to appear on the current hardware markets and while revisions are not quite so numerous this week, the developments announced provide special interest in view of the fact that both advances and declines are recorded. As briefly included in last week's report, eavestrough and conductor pipe are approximately ten per cent. higher, while through a general revision in discounts, radiators and boilers are also increased. An upward revision is now evident on standard common brass butts. Higher levels on Superfex stoves are reported pending, while a similar change in chain prices is expected. Booking prices on rubber lawn hose are from ten to fifteen per cent. lower. While a brisk volume of trading is apparent in sheets, certain distributors are stated to be contemplating a slight downward revision in prices on galvanized, competition being keen and the season fast drawing to a close.

LULL IN ACTIVITY IN BAR IRON MARKET

Toronto.

Local activity in bar iron and steel is described as considerably quieter, this change being attributed in certain quarters to the reports of possible warfare in the Balkans, while other warehouses ascribe this condition as a parity to the situation which has developed in primary steel centres. A more or less sudden reversal of form has taken place and while no weakness has been apparent, yet prices have ceased to climb. Locally, the base quotation varies between $3.25 and $3.40, with the former level being noted on larger purchases. Following are unchanged average quotations:

IRON AND STEEL—		
Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90
Bar iron, base	3 25	3 40
Angle iron, base	3 35	3 50
Horse shoe iron		3 90
Tire steel		3 50
Spring Steel	7 00	8 00
Sleigh shoe steel		3 40
Cold drawn steel		4 50
Hoop steel	4 25	4 50
Norway iron		12 50
Toe caulk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

REVISED PRICES ON TAYLOR-FORBES MOWERS

Toronto.

Following is the revised price list for the season of 1923 on the Taylor-Forbes line of lawn mowers. The discount to the retail hardware trade is twenty-five per cent., as announced three weeks ago. These quotations are guaranteed by the manufacturers against decline to May 31, 1923:

LAWN MOWERS—

Adanac, 10½-inch Wheel 6½-in. Cylinder, 4 knives, each	17-in. $26.40	19-in. $29.00	21-in. $31.50		
Ontario, 7½-inch Wheel, 7 Knives, Each	12-in. $25.45	14-in. $26.00	16-in. $26.50	18-in. $27.10	20-in. $28.75
Empress, Ball Bearing, 10½-inch Wheel, 4 Knives, each	$14.00	$14.70	$15.50	$16.20	$16.90
5 Knives, each	$14.80	$15.50	$16.30	$17.00	$17.70
Woodyatt, 10½-in. Wheel, 4 Knives, each	$11.25	$12.00	$12.75	$13.50	$14.25
5 Knives, each	$12.05	$12.80	$13.55	$14.30	$15.05
Star, 9-inch Wheel, 3 Knives, ea.	$9.70	$10.40	$11.10		
4 Knives, ea.	$10.50	$11.20	$11.90		
Sovereign, 8-inch Wheel, 3 Knives, each	$9.50	$10.20	$10.90	$11.60	
4 Knives, ea.	$10.30	$11.00	$11.70	$12.40	
5 Knives, ea.	$11.10	$11.80	$12.50	$13.20	
Daisy, 7-in. wheel, 3 knives, ea.	$8.65	$9.00	$9.20		
5 knives, ea.	$9.45	$9.80	$10.00		
Philadelphia, 7½-in. wheel, 4 knives each	$12.50	$13.40	$14.20		
5 knives, ea.	$13.50	$14.30	$15.15		

Lawn Edger and Trimmer (Dominion), ea. $9.00

Grass Catchers, canvas, each:

No. 10 Noxall, 12-inch, $1.25; 14-inch, $1.25; No. 20 Noxall, 16-inch, $1.50; 17-inch, $1.50; 18-inch, $1.50; No. 120 Noxall, 19-inch, $2.50; 20-inch, $2.50; 21-inch, $2.50.

INCREASE PENDING ON SUPERFEX STOVES

Toronto.

The manufacturer of the Perfection line of oil stoves, ovens and cabinets, has announced that there will be no advance in prices to start the coming year. The basic cost of practically all raw materials, however, has advanced during the last few months, and it is stated that there is almost no possibility of lower prices for several months.

A further announcement is made to the effect that all orders for Spring requirements placed from now on will receive April 1 dating, while shipment

may be specified during December, January, February or March.

It is also reported that an advance of approximately ten per cent. will be made effective on November 1 on Superfex stoves and cabinets. Orders for Spring requirements placed prior to that date and if shipment is made before January 1, 1923, will be protected against this advance.

LOWER BOOKING PRICES ON RUBBER HOSE

Toronto.

Lawn hose prices for the 1923 spring season are reduced between ten and fifteen per cent. A special discount of 5 per cent. is being offered on orders placed prior to December 31, 1922. Following are the new revised quotations:

HOSE, LAWN—

3 ply—½ in., 8½c. per ft.; ⅝ in. 10c. per ft.; ¾ in., 11½c. per ft.

4 ply—½ in., 9½c. per ft.; ⅝ in., 10¾c. per ft.; ¾ in., 12½c. per ft.

5 ply—½ in. 10¾c. per ft.; ⅝ in., 12c. per ft.; ¾ in., 14c. per ft.

Corrugated—½ in. 12½c. ft.; ⅝ in., 14c. per ft.; ¾ in. 16c. per ft.

Less 5 per cent. for 500 ft. reels.

UPWARD REVISION IN PRICES ON BUTTS

Toronto.

A general upward revision has been made in quotations on common brass butts. The extent of the increase varies between ten and fifteen per cent. This affects the standard line, including middle, narrow, broad, desk and shutter butts.

LOOK FOR REVISION IN WIRE NAIL MARKET

Toronto.

The view is expressed in certain quarters that the recent unsettlement noted in the wire nail market, will be clarified in the near future and a uniform price again prevail. The local situation in this respect was outlined in last week's issue of Hardware and Metal.

REVISED DISCOUNTS BRING HIGHER TROUGH PRICES

Toronto.

The recent increases in galvanized sheets which constitute the primary element in the production of eavestrough and conductor pipe, have resulted in an advance of ten per cent. in the prices on trough, conductor pipe and nosing. Through a revision in discounts, these higher levels are now in effect, developing from the firm tone and strengthened position of the galvanized product market recently noted. Manufacturers and distributors report a brisk movement in these lines at this season, with the aggregate volume of trade being generally on a satisfactory basis. The marked activity in construction circles has been reflected in the seasonal demand for trough and pipe, and with building showing little or no signs of relaxing, the continuance of this movement in eavestrough and similar goods is looked for during the fall period. Following are prevailing list prices with revised discounts: It is noted that quotations on elbows and shoes remain the same.

TROUGH (Eave)—

O. G. Square Bead—

Per 100 ft.		Per. 100 ft.
8 inch $15 90	15 inch.....$28 80	
10 inch 17 70	18 inch..... 36 80	
12 inch 21 20

NEW DISCOUNTS ON RADIATORS AND BOILERS

Toronto.

Through a revision in discounts, higher levels are now in effect on radiators and boilers. This development has been outlined in recent issues of Hardware and Metal, it being pointed out that the higher prices on raw materials entering into these products has caused a corresponding advance in production costs. The undercurrent of strength in this direction has been apparent for some weeks past, and the present announcement comes as no surprise. Foundry iron and fuel, as well as other elements, constitute the principal reasons for these changes. To those interested, the following are lists with revised discounts:

RADIATORS—

Revised radiator list prices are for 1, 2, 3, 4 and 5column radiators per square foot.

38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in. $1.40; 16 in. $1.50; 14 in. $1.55; 13 in. $1.60.

Discount on 2, 3, and 5-column standard sizes, 55 per cent. for water and 56 per cent. for steam.

Discount on 1-column standard size, and 2, 3, and 4-column hospital sizes 47 per cent. for water and 48 per cent. for steam.

Discounts on 1-column hospital size, water, 33 per cent.; steam, 34 per cent.

Wall radiators—5 ft., $1.15; 6 ft. $1.10; 7 ft., $1.05; 9 ft.. $1.05; 12 ft., $1.05. Discount 52 per cent.

BOILERS—

Water:

Round, 60 per cent off list. Square, 20 per cent. off list.

Steam:

Round, 25 per cent. off list; square, 15 per cent. off list.

MAY BE EASIER TENDENCY IN SHEETS

Toronto.

An easier trend is noted this week in the sheet market, and stocks are stated to be accumulating in the face of a steady demand. That some easier prices on galvanized sheets will develop in the near future is rumored on the local market, and any change in this direction is directly opposite to the strength recently apparent in these markets. The reasons for this reversal of form are ascribed to the fact that the season is now getting somewhat late, and competition is relatively keen. In addition, prices on English sheets are said to be slightly lower and to meet this situation, distributors claim that some slight downward revisions are considered possible. No change of this nature has been made up to the present.

BLUE ANNEALED SHEETS—

10 gauge, base	4 50
12 gauge	4 55
14 gauge	4 60
16 gauge	4 65

BLACK SHEETS—

18-20 gauge	5 30
22-24 gauge	5 35
26 gauge	5 40
28 gauge	5 50

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's, Hd.
28 gauge	7 75

FAIR ACTIVITY NOTED IN RANGE BOILERS

Toronto.

Moderate trade is now reported in range boilers, with the recent advance in quotations giving this market an appearance of strength. Quotations on flat galvanized sheets continue very firm and this trend has a reflecting effect upon the manufactured galvanized lines in general. Trade in range boilers is described as very fair for this season of the year, with the seasonal movement keeping up well, owing to the improved demand caused through current building activities, which are continuing in many quarters in marked degree. The list and prevailing discounts follow:

RANGE BOILERS—

Size	List Price
5 gallon .. ..$	13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50

144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 45 per cent; Extra heavy, 35 per cent.

STEADY TREND ON LEAD AND ZINC PRODUCTS

Toronto.

Quotations on lead and zinc products generally remain unchanged on the local market. Although various fluctuations have continued to be apparent in tin on the ingot market, these changes are described as not of sufficient extent to reflect on solders and companion lines. Lead in virgin centres is still exhibiting a firm tone, while spelter has gained considerably in price. This tendency results in a firm undercurrent to these finished products, and tends to offset any easier market which might develop through variable tin quotations. Unchanged quotations follow:

LEAD AND ZINC GOODS—	
Lead pipe, list per lb.	0 13
Lead Waste, pipe, list, per lb.	0 14
Do., over 8 in., list per lb.	0 15
Lead pipe is subjected to a discount of	10%
Lead traps and bends	15%

Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 30
Do., strictly, lb.	0 22½
Do., wiping, lb.	0 21
Do., guaranteed, lb.	0 24
Do., commercial, lb.	0 21
Zinc sheets, per lb. 0 09	0 10

SLACKENING IN CALL FOR CORRUGATED SHEETS

Toronto.

No changes have been made in corrugated sheets, but some slight developments have taken place in the market tone. The demand for corrugated during the past week or so is described as quieted down considerably from the brisk activity noted in previous weeks. Consumers' needs are said to have been pretty well taken care of, and the rush for this season is considered over. There is still a fair amount of business for this season of the year, however, at the following unchanged levels:

CORRUGATED SHEETS—	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 26 U. S. gauge	8 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

WROUGHT PIPING ON FIRM PRICE BASIS

Toronto.

Manufacturers of wrought piping state that too much emphasis cannot be placed upon the firmness of existing price levels on pipe and the undercurrent of strength apparent in these markets. While no further upward revision is being contemplated at present, List No. 56 remains on a stable basis. It is pointed out that raw materials have increased in price approximately ten dollars per ton, while in comparison the quotations on wrought piping have only been advanced on the basis of $4.00 per ton.

The delivery situation is improving and orders are shipped within two weeks from date. With regard to a shortage of smaller sizes recently apparent, this condition is also being overcome, although stocks in some sizes are depleted as fast as renewed. The demand for pipe during the season has been mainly confined to smaller types represented in houses and similar buildings, heavy construction work such as calls for large and heavy make of piping being of a more limited nature.

WROUGHT PIPE

Price List No. 56. August 23, 1922.

NO CHANGES IN SOIL PIPE QUOTATIONS

Toronto.

The present situation of soil pipe and fittings is described as undoubtedly firm. The rising cost of fuel and foundry iron has placed production costs on a relatively higher level, while the current demand is reported brisk, especially for this season of the year. Fall building activities have kept up in remarkably good volume, both city and country districts taking full advantage of the fine weather in this respect. No further changes have been made in the discounts on soil pipe and fittings since the last general revision. Current quotations follow:

SOIL PIPE—	
2 inch	Less 33 1-3 per cent.
3 inch	Less 33 1-3 per cent.
4-inch	Less 33 1-3 per cent.
5 and 6 inch	Less 33 1-3 per cent.
8 inch	net
FITTINGS—	
2 to 6 inch fittings	Less 45 per cent.
8 inch fittings	net

COTTON WASTES REFLECT RISE IN RAW COTTON

Toronto.

The cotton waste markets are described as on a steady foundation, the recent upward tendency in raw cotton prices ultimately having a strengthening effect. While no variation in quotations has been announced on wastes, the market is stated to be steadily stronger, and the improvement in raw cotton circles is expected to be reflected throughout all manufactured cotton and other similar lines, including by-products. Following are current unchanged price levels on wastes:

Cream, polishing	0 18
White, XXX	0 18
XX	0 16
X	0 15
XC	0 14
XXX, extra	0 16
XX, grand	0 15

Fancy,	0 13½
Lion	0 12
Standard	0 10½
Popular	0 09
Keen	0 07½

COMPRESSION GOODS ON FIRM PRICE LEVELS

Toronto.

No further developments have as yet been announced on brass compression goods, the market for these products remaining on a firm basis. Recent gains in the virgin metal are now being reflected in semi-finished and manufactured brass and copper lines, and the existing quotations on valves and bibbs are described as undoubtedly firm. No further revisions in discounts have been announced since the change of two weeks ago. Following are prevailing quotations:

COMPRESSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in.	50%
Do., 2½ in. to 3 in.	43%
Globe angle and check valves, standard	25%

Emco swing check, ⅜ in. and ½ in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%
BASIN COCKS:—	
No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

MAY BE INCREASE IN CHAIN PRICES

Toronto.

An increase of 50 cents per cwt. is reported pending in quotations on chain. That a revision in this direction would be effective from early in October is also rumored. This change would be in line with the recent general climb of prices on manufactured steel lines which are reflecting to a greater or less degree the higher production costs in the steel industry.

FAIR DEMAND FOR NON-FERROUS SCRAP

Toronto.

The slight improvement noted in the scrap material markets, has not advanced to any marked stage, as yet. As a matter of fact current trading continues of a very moderate nature, it being only in some departments that a better feeling has been recorded.

The prevailing demand for non-fer-

rous scrap is reported as fair, while prices remain firm. On the other hand, however, the scrap rubber business is extremely dull. Steelmaking scrap has been disappointing to dealers, but demand for cast iron has been good. The following are the usual averages of dealers' buying prices for large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings, (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00

Lumbermen's rubber boots	1 25	1 50
Auto tires	0 25	0 50
Solid tires	0 60	1 00

FAIRLY FIRM TONE IN INGOT METAL MARKETS

Toronto.

The strong lead and spelter markets constitute the feature development in the current ingot metal markets. There have been no additional price revisions, however, although a slight undercurrent of improvement is also noted in several of the other non-ferrous metals, namely tin and aluminum. Generally speaking the ingot markets remain on a fairly firm basis.

COPPER.—The undertone in this market is generally reported to have eased slightly due to the smaller buying both on domestic and primary accounts. Certain brass manufacturers are stated to have secured stocks of scrap, but the chief factor is found in standard and refined being easier at London. Local quotations are steady at the unchanged level of 17½ cents.

TIN.—While the London tin market is described as firm, domestic conditions remain dull. There have continued to be minor fluctuations recorded. A reduction was noted in the world's visible supply of tin during September of 1,297 tons, and some improvement is looked for in the general position of this metal. Local prices remain at the level of 36 cents.

LEAD.—While marked strength was exhibited in lead in certain quarters due to shortage of spot, this market is now relatively quieter, although still on a firm basis. The prevailing local quotation of $7.50 is generally considered strong.

SPELTER.—The statistical position of zinc remains strong, but active demand from consumers has quietened down. There is no general weakening, however, prices both on primary and domestic markets holding unchanged at the recent higher levels. The local quotation is around 9 cents.

ANTIMONY.—Prices on antimony still climb, and as a result the new local quotation is 7½ cents. In comparison with former levels, this revision indicates that the undertone of this metal is stronger. The gain may not be permanently retained, however, as primary centres record that no great activity is in evidence, and offerings have appeared at slightly below the current level.

ALUMINUM.—Domestic trading in aluminum is stated to be as quiet as ever, no appreciable change having been recorded. Prices in the United States market, however, show signs of strengthening and slightly higher levels are rumored owing to advances in duty and tariff changes. The local level continues around 21 to 22 cents.

London, Ont.

LONDON, October 5.—Hardware business here continues good although colder weather would add many fall lines to the present good sellers. Electric heaters were in big demand during the past week.

Several price changes go into effect, including a ten cent advance on turpentine and new lower quotations on rubber garden hose for present and spring delivery.

MILLER PADLOCKS NOW TEN PER CENT. HIGHER

London, Ont.

New prices now in effect on the Miller line of padlocks show an increase of approximately ten per cent.

LOWER QUOTATIONS ON RUBBER LAWN HOSE

London, Ont.

New lower prices on rubber garden hose for the 1923 spring booking have been announced his week. For hose orders booked on or before December 31, 1922, a special discount of five per cent. is offered. Following are the new price levels:

LAWN HOSE—

Corrugated—

½"—12½c. ft. ⅝"—14c. ft. ¾"—16c. ft.
Less 5 per cent. in full reels of about 500 ft.

Plain—

3 ply—½", 8½c. ft. ⅝", 10c. ft. ¾", 11½c. ft. 4 ply—½", 9½c. ft. ⅝", 10¾c. ft. ¾"; 12c. ft. 5 ply—½", 10¾c. ft. ⅝", 12c. ft. ¾" 14c. ft.

RECESSION IN FLAX HALTS TREND IN LINSEED OIL PRICE

London, Ont.

A marked recession in the flax seed markets has tended to offset to some extent the firmer tendency noted in the linseed oil markets last week. At that time, the increase reflected the sudden rise in the seed quotations, which was not of lengthy duration. Current quotations follow:

LINSEED OIL—

	Raw Imperial Gal.	Boiled
1 to 2 bbls.	1 05	1 08
3 to 5 bbls.	1 04	1 07
6 to 9 bbls.	1 02	1 05

Less bbls. add 15c. gal.

MARKED INTEREST IN STOVE ACCESSORIES

London, Ont.

Stove cement and stove linings are numbered among the popular seasonal lines now recording brisk activity. Current quotations on these products follow:

STOVE CEMENT—
1 lb., $1.75 doz.; 2 lb., $2.75 doz.; 5 lb., $5.00 doz.

ASBESTOS STOVE LINING—
3 lb., $2.15 doz.; 6 lb., $3.25 doz.

ANOTHER INCREASE IN TURPENTINE PRICES

London, Ont.

The announcement of another increase in turpentine prices, provides the feature change in this week's hardware markets. This development brings the local level to a new high mark for the season, the quotations being as follows:

TURPENTINE—

	Imperial Gallon
1 bbl. lots	2 00
2 to 4 barrel lots	1 99
5 gallon lots	2 15

REVISED PRICE LISTS ON WARE PRODUCTS

London, Ont.

The recent new higher prices on graniteware, enameled ware, tinware, etc., are in effect here now. The revised price lists are in the hands of the trade.

FURNACE SCOOPS NOW IN POPULAR CALL

London, Ont.

Furnace scoops are now selling more freely. The long handle socket is quoted at $5.75 per dozen and the "D" handle socket at the same level.

SEASONABLE DEMAND FOR ELECTRIC HEATERS

London, Ont.

There is a good sale at present for electric heaters. The hot blast No. 20, is quoted at $3.35 each. The Majestic No. 7, single coil, at $7.25 each, and the Majestic No. 8, double coil, at $10.75 each.

ACTIVE MOVEMENT IN NAILS REPORTED

London, Ont.

Current reports indicate a good sale of nails at present. There has been no announcement of a change in price, the nominal level of $3.75 base on wire nails and of $4.60 base on cut nails still being in effect locally.

Winnipeg, Man.

WINNIPEG, October 5.—Business in the West continues to show an improvement. The majority of current price changes represent a general improvement to higher levels. Grindstone fixtures, padlocks and builders' hardware register advances. There is a firm tone evident in wire products and higher prices are expected shortly. All lines of picks have shown an advance of five per cent. Turpentine is ruling firm while linseed oil has shown a decline.

SLIGHT REVISION IN GRINDSTONE FIXTURES

Winnipeg.

Revised quotations are now in effect on grindstone fixtures. These show a slight variation on the various sizes, 15 inch is quoted at $9.60 with 17 inch at $10.00.

PADLOCK PRICES NOW ON HIGHER LEVELS

Winnipeg.

All makes of padlocks have been advanced in price, the extent of this advance is approximately 10 per cent.

BUILDERS' HARDWARE ON HIGHER PRICE BASIS

Winnipeg.

The upward trend of the steel market has been reflected in builders' and general hardware lines. Many lines of mechanics tools such as hammers, hatchets, wrenches, bench screws, have been revised. The advance is about 10 per cent. on these lines.

BOILER TUBES NOW IN FAIR DEMAND

Winnipeg.

Wholesalers report a steady demand for boiler tubes. The market is in a slightly firmer condition and is reflected by the higher replacement values and increases in production costs.

SEASONABLE DEMAND FOR BARB WIRE

Winnipeg.

There is a seasonable demand for barb wire and Lyman 4 point is quoted at $4.10. Glidden cattle 2 point—$3.90 and Baker 2 point $3.85.

ALL PICK PRICES SHOW SLIGHT ADVANCE

Winnipeg.

There has been an advance of practically five per cent. on rock, clay and coal picks.

BRISK SALES FOR AMMUNITION AND GUNS

Winnipeg.

Wholesalers report a brisk activity for guns and ammunition and with the frequent bookings the volume of sales is reported heavy.

LAMPS AND LANTERNS IN SEASONABLE CALL

Winnipeg.

The arrival of fall weather is stimulating the sale of gasoline lamps and lanterns.

ORDERS FOR COW TIES NOW BEING FILLED

Winnipeg.

Wholesalers report that orders for cow ties are coming in daily and that a heavy demand later on is expected.

FIRM TONE STILL EVIDENT IN TURPENTINE

Winnipeg.

Current quotations on turpentine are unchanged and are quoted at $1.95 per gallon in one barrel lots. Reports from the south indicate that the markets are holding firm.

DECLINE IN LINSEED OIL QUOTATIONS

Winnipeg.

There has been a decline in linseed oil prices this week. Raw is quoted at $1.10 per gallon with boiled at $1.13. Reports state that stocks are rather small and some crushers find that all they can do is to fill their contracts.

MRS. POTTS IRONS ADVANCE IN PRICE

Winnipeg.

There has been an advance of 20 cents per set on Mrs. Potts sad irons. No. 50 is quoted at $2.20 and No. 55 at $2.00.

St. John, N. B.

Good Season for Tourists Brings Trade to New Brunswick Merchants

ST. JOHN, N.B., October 5.—The Tourist Association of New Brunswick has given out the statement that this has been the best season for tourists since before the war, and that over thirty thousand tourists have passed through St. John, and that five thousand foreign automobiles have traversed New Brunswick's highways. This means that a considerable amount of money has been left with New Brunswick merchants, as it has always been found that the tourists are good spenders. The St. John bank clearings for the month of September were $10,929,371; last year for the same month they were $11,832,331. The Halifax clearings for September were $11,883,333, and in Moncton, N. B., they were $4,532,231.

If the farmers of the Maritime Provinces will guarantee shipments of produce, the Canadian Government Merchant Marine will inaugurate a two-boat steamship service, starting the end of October, between St. John and ports in the southern states. C. D. Shipley of Amherst said that the merchant marine would expect the farmers of the Maritime Provinces to supply produce each trip that would include 20,000 bags of potatoes, about fifty tons of hay, and about 5,000 bags of turnips. The proposed service would be between St. John and Norfolk, Baltimore. The C. P. R. bay steamer Empress, running from St. John to Digby, N. S., run ashore at Black Point, N. B., while enroute from Digby to St. John and caused considerable excitement. The steamer was proceeding along in a dense fog of the afternoon of September 29. There were seventy-three passengers aboard.

The Fraser Companies, Ltd., one of eastern Canada's largest lumbering concerns, have commenced cutting operations in the woods upon a scale sufficient to keep all their mills in operation next season. Donald Fraser of this company says that unless there is some immediate improvement in the shipping situation, lumbering operations in New Brunswick will be considerably hampered. He said that the car shortage was growing more acute, and was making it difficult and in some cases impossible to ship the products of the mills.

Walter G. Miller, of the local Canadian Government Merchant Marine staff, recently returned to St. John after a visit to Sydney, N. S., where he was superintending the loading of the Canadian Conqueror with steel for Australia and New Zealand. Mr. Miller stated that business, and especially harbour business is increasing, and that the British Empire Steel Corporation are gradually raising the amount of their output. The Conqueror took with her the largest cargo of steel products ever sent from this country to Australia. It included barbed wire, nails, staples, nail wire, and fence wire, and totalled 2,200 tons. She had also 450 automobiles and general cargo from Montreal. While in Sydney Mr. Miller also assisted in the loading of the Canadian Coaster with a part cargo of ammonium sulphate.

Tenders are being called for the erection of a new Town Hall at Port Elgin, N. B., the building to be of brick and concrete.

The natural gas supply of Moncton, N. B., may be serious this winter, and it may be that some measures will be shortly enforced to conserve it. In connection with the supply for the winter it is learned that an effort is being made by the N. B. Gas and Oil Co., Inc., to increase the present supply by the deepening of two of the wells at the fields in Albert county, and in addition a new well is being sunk. At present it is not known what result will attend these op-

erations, but it is hoped that new veins will be tapped. In order to conserve the gas supply several larger places of business have been requested to take their gas fixtures out, among which is the custom house, who have already had their fixtures removed.

In the hardware trade a fair demand is reported for all kinds of fall goods; orders are not heavy, but retailers are all buying to some extent. The market now presents an appearance of general firmness, and the feeling is that the general deflation has been completed for the time being. If business should fall off after the fall and winter demand has been cared for, there might possibly be a reaction again, but at this time of writing there is no doubt about the firmness of the tone of the market, which is principally due to what is going on in iron and steel. There is a ten per cent. advance in tin and enamelled ware, following a similar advance in galvanized ware. Sheets have a firm tone, as the mills are filled with orders for three months ahead.

The following prices are the latest quoted to the trade:

Bar iron, base, 3.30. Black sheets, 16 to 21 gauge, 5.05; 22 to 24 gauge, 5.15; 25 to 26 gauge, 5.20; 28 gauge, 5.35. Galvanized sheets, 16 to 21 gauge, 7.05; 22 to 24 gauge, 7.20; 25 to 26 gauge, 7.35; 28 gauge, 7.75. Solder, strictly, 29c. Sheet lead, 4 lb. and over, 12.00; 3½ lb., 12.15; 3 lb., 12.50; 2½ lb., 13.00. Sheet zinc in casks, 11c.; smaller lots, 12c.-13c. Poultry netting, 2 in. mesh, 18 in., 2.40; 24 in., 3.06; 30 in., 3.60; 36 in., 4.28; 48 in., 5.58; 60 in., 6.93; 72 in., 8.28; one inch mesh, 24 in., 6.30; 30 in., 7.65; 36 in., 9.00; 48 in., 12.60; 60 in., 15.30. Black Diamond files, 25-10% off list. Churns, No. 0, 11.25; No. 1, 11.25; No. 2, 12.24; No. 3, 13.23; No 4, 15.12. White lead, genuine, BB, 100 lb. irons, 14.85; 25 lb. irons, 14.85; 12½ lb. irons, 15.35. White lead, pure, B.B. No. 1, 100 lb. irons, 12.85; 25 lb. irons, 12.85; 12½ lb. irons, 13.35. Putty, standard, 100 lb. irons, 5.35; 25 lb. irons, 5.35; 12½ lb. irons, 6.10. Linseed oil pure putty, 1.50 advance. Steel thumb latches, No. 2, 2.25; No. 3, 2.85; No. 4, 4.20.

Vancouver, B. C.

Increased Sale of Heating Stoves, Furnaces and Accessories on Coast

VANCOUVER, B. C., October 5.—With the dropping of the thermometer in the interior of the province as well as on the coast due to the advent of the rainy season, there has been an increased sale of heating stoves, furnaces and electric appliances used in this connection. Dealers in these lines stated this week that trade was better than at this time last year, while there was an improved condition with regard to payment of accounts, particularly during the last couple of weeks.

Fruit is moving out of the Okanagan under an increasing volume and though the returns are small, the heavy crop will make up for the low prices. That the growers are taking more of an interest in the ultimate sale of their goods was evidenced this week when a delegation from Vernon, Kelowna and Penticton came to the coast for the purpose of inducing wholesalers and retailers to put on a special ten-day sale for the MacIntosh Red apple. Their efforts after several conferences were successful and twenty cars will be shipped in during the week of October 9. On these cars the growers will be paid twenty cents more per box than the ruling price, the distributors agreeing to cut their commissions in order to help move the fruit. This means a relief of that number of cars from the prairie market and the circulation of more money in the Okanagan which will have its effect on the hardware trade.

Activities in lumber and logging camps continue throughout the province and sales to these outfits are probably larger than usual, say the trade. The passing of the Fordney Tariff Bill is considered as favorable to the shingle trade, as after several years' campaign, B. C. operators have succeeded in getting shingles on the free list.

The shortage of tin plate has proven a decided hardship to interior canneries. One of the interior canneries has been seriously inconvenienced at the height of the canning season by the failure of American manufacturers to fill the bill. Coast fishing canneries have been bringing in their plate from Wales by boat.

Price Developments

Several changes have been noted in prices during the week. Tinware and enamelware have been advanced an average of ten per cent. and cut nails have been marked up fifty cents a hundred to a new base of $7. Linseed oil is ten cents a gallon cheaper in line with lower trend of flaxseed. A decline of a cent a pound on Church's alabastine is also recorded. Alarm clocks made at Peterboro are ten per cent. lower on an average, and sand papers are down the same percentage. Wrought black and galvanized pipe are approximately fifteen per cent. higher, one inch galvanized now being quoted at $14.39 per hundred.

Much attention is being paid to the sale of stoves. Retailers are pushing them specially. One of the larger stores is offering Victoria ranges, six-hole tops, large sized oven and warming closet at $70 and Fi-Re-Co heaters at $35. Equipped and installed Moffats are on sale by another store at $179, with six-hole Celtics at $62.50 and "Canada" B, 978, at $113.50. Saturday only, one of the electric houses is placing on sale a line of inverted lights at half the usual retail price, due to the discontinuing of one of their two stores.

Hamilton, Ont.

Improved Sentiment Among Buyers Helpful Factor in Hardware Trade

HAMILTON, October 5. — There have been more price changes of an upward nature in the hardware markets during the past two weeks than for some considerable time. In spite of the fact that the large majority of recent revisions have been increases, this upward tendency is still strongly in evidence, and the majority of current market developments continue to place quotations on a higher level. In addition, it is noted that rumors of advancing prices on numerous other hardware lines are more or less prevalent.

A local wholesaler points out that one of the outstanding factors in the present hardware market is the improved sentiment among buyers. This is said to be decidedly optimistic, in spite of the fact that prices are still climbing. Business in retail circles is described as satisfactory, while the volume of orders placed by retailers with wholesalers and manufacturers is stated to be larger than at any time this year. In connection with the tendency to advance prices, one viewpoint was expressed that this tendency has had the effect of increasing business. The element of uncertainty that was in evidence during the initial months of the year retarded selling to some extent and this factor has now disappeared.

There is a very firm tendency in various iron and steel products and it is stated that some higher prices on wrought piping and kindred lines would not be surprising. Pipe fittings are described as firmly entrenched at the recent increased levels. The general feeling in bar iron is that prices have ceased to climb. The sheet markets remain active, with current quotations firm. In scrap materials, some signs of improvement are now recorded.

The demand for automobile accessories continues fair, and some interest is now being shown in winter goods. It will be two or three weeks before the winter buying is in full swing, however, according to the past experience of a local jobber. The months of August and September were fairly good ones in the accessory branch of the hardware trade, and the indications are that, following a poor start, the year will be one of the best since

this business was first taken seriously by the jobbers.

Paint Lines Active

Paint departments are showing up well as compared to other departments. The small paint sundries particularly have been more than usually active. It is noticeable that the paint department in most retail stores occupies more space and is generally located in a more prominent position than was usually the case a few years ago. It would appear that the retailer had sensed the fact that every customer was also a paint prospect, whether they knew it or not, and the department's function was to make the abstract need a conscious one. Attractive paint departments are performing this function and account for this phase of the business being good for all year business rather than a distinctly seasonable one.

Calgary, Alta.

Warm Weather in West Holds Up Brisker Sale of Winter Goods

CALGARY, October 5.—Brisk buying of fall goods is still being held up by summer weather and merchants feel a cold spell is needed before the regular movement of seasonable lines hits the usual stride. Retailers are still using more advertising space than usual and show an inclination to force interest in general lines to tide over the between seasons quietness. Business in points outside the cities is improving in response to threshing conditions and the movement of grain. Jobbers are noticing this improvement while city retail trade will not react until farm hands are paid off, and the returns more final.

Contracts have been let for excavations and other preliminary work necessary to the construction of the Imperial Oil Co.'s new two-and-a-half million dollar refinery. Teams are at work and material gathered on the ground and this section of the city is taking on quite a busy appearance. The work is of a nature that can be continued throughout the winter months and will afford employment to some hundreds of men at a time when work of this nature is none too plentiful.

Merchants are expecting October to be a good ammunition month. Chicken and partridge will open and both are reported more plentiful than for some years. September weather has been too warm for good duck shooting, and old shooters have largely postponed the regular September trip until weather conditions bring down the northern ducks.

Some improvement is noticed in collections but the movement so far is more of a spotty nature than a general one. Quiet confidence however is expressed that the crop returns will go a long way towards putting general business throughout the province on a better basis.

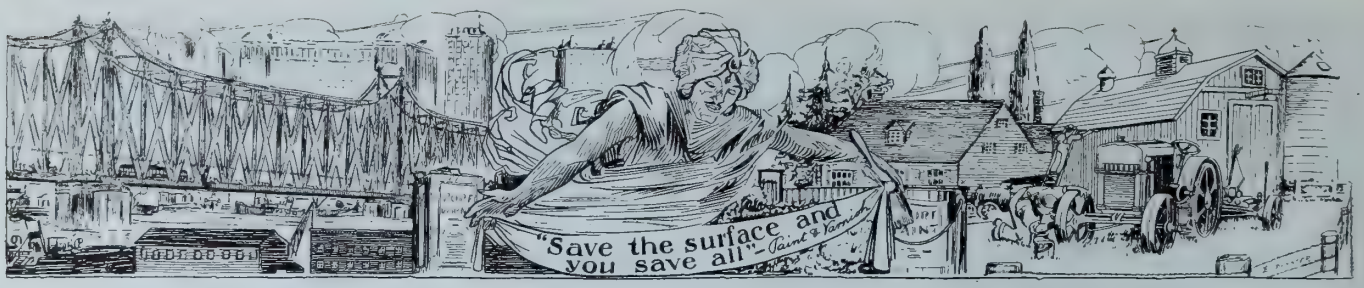
The car section of the Canadian Pacific Ogden shops have been ordered on full time for the first time in two years. A lot of necessary work is in sight and the announcement was a very welcome one to a large staff of workmen.

Jobbers are now booking barbed wire and nails for spring shipment although prices for future delivery have not been issued. A decline of 5 cents per spool on barbed wire is made effective this week for present delivery and ruling prices at head of lakes on Lyman are 3.60—Gildden 3.45—Baker 3.40 per spool. At Calgary, Edmonton and Lethbridge Lyman is now 4.85—Glidden 4.60—Baker 4.55 per spool.

Picks, mattocks, and grub hoes are advanced 50 cents per dozen and crow bars ¼ cent per lb., present prices on the line at Calgary, Edmonton and Lethbridge being as follows: grub hoes 9.25; grub and pick mattocks 11.55; railroad picks 5-6—9.80; 6-7—10.65; 7-8—11.50; rock picks 6-7—10.65; 7-8—11.50 per dozen Crow bars 10.25 per 100 lbs.

Hudson Bay axes, handled and unhandled recently advanced by 2.50 per dozen, are priced this week 1.00 per dozen lower; and stove bolts are advanced from 66 2-3 off to 65 off.

New prices are issued on glaziers' putty affecting the medium sized containers, which are under recent levels. Current market at Calgary, Edmonton and Lethbridge follow: casks 6.00; 100 lb. drums 6.50; 25 lb. irons 6.75; 12½ lb. irons 7.00; 5 lb. tins 13 cents each.



The factory advance on cast and malleable fittings of a month ago has just been made effective and new levels issued show advances ranging from 5 to 15 per cent over late prices. Jenkins, Lunkenheimer, and Penberthy valves also show advances averaging about 10 points; while Jenkins disc and standard pattern show no change. A fair movement of a sorting nature is reported on valves and fittings representing a very fair aggregate. Prices in effect at Calgary, Edmonton and Lethbridge follow:

Wrought iron nipples, up to 4 in..	45 off
Wrought iron nipples, 4½ and over	32½ off
Cast iron elbows, return bends, tees, crosses	5 off
Cast iron plugs	10 off
Cast iron eccentric reducers	5 off

Iron body foot valves	50 off

UNIQUE STOVE SITUATION

(Continued from Page 26)

vocates the study of various fuels so that advice can be given to buyers. He pointed to the importance of keeping soft coal, coke, etc., away from banking against the steel dome at the back on furnaces so constructed. Cast iron is generally used where fuel of such intense heat is in direct contact. It was said to be not so important that such fuel be kept from direct contact with the grates as they have free air under them. It was more important to keep the ash box cleaned out. Using soft coal it was advised to have fresh fuel added in the centre of the fire only leaving fire exposed at the sides to burn up the gases thrown off. Solvay coke is said to be a splendid fuel though the coke generally secured from gas companies is very smoky, due to containing so much volatile matter. The chimneys make a great deal of difference as if the draft is poor difficulty will be encountered with any fuel. Personal attention was often required to the individual case to take all these ponts into consideration in advising the practice to follow. In using some fuel from which there was a thick carbon deposit this official pointed out that the placing of a few small pieces of zinc on top of the fire assisted materially in keeping the flues and chimney clear of such deposit. Giving intelligent advice on the operation of the heating plant was pointed to as one of the ways in which the hardwareman may help to bring stove and furnace trade to his store.

Paint Trade is Increased 30 per Cent

In Business for Three Years, McClennan Hardware, Peterborough, Ont., Has Increased Paint Trade This Year 30 Per Cent. Over Last Year—Talks Paint to Every Customer Entering Store —Links up With Save the Surface Campaign

THOUGH only established in the hardware business for three years, the McClennan Hardware of Peterborough, Ont., has adopted such successful plans in connection with the sale of paint that sales for this year to date are thirty per cent. larger in volume than for the same period last year. A number of factors have contributed to this substantial increase in business and some novel ideas are found to underly this development.

Discussing the subject with B. W. McClennan, proprietor of the business, Hardware and Metal was advised that much of the credit for this increase in business is given the fact that Mr. McClennan takes advantage of every opportunity of speaking with every customer who comes into the store and no matter what that customer comes in to buy, the subject of paint is broached and possibilities investigated. As result of following this plan for many months, Mr. McClennan has found that there are many splendid paint prospects who are just sort of lukewarm toward the subject of painting, they hesitating to spend the necessary money to purchase paint until actually forced to. A few words pointing out that the money will have to be spent at some time and probably in greater quantity if property is continually neglected, has succeeded in developing many such prospects into enthusiastic paint users. It is found that this process is only required once as paint when properly applied in sufficient quantity justifies the expense involved.

Mr. McClennan's talk to prospects follows chiefly along the line of using paint as a protective and preservation medium. He follows closely the arguments advanced in connection with the Save the Surface campaign and when he has convinced the prospect as to the great need for adequate protection of property he discusses with them the different paints and varnishes for various purposes and outlines color schemes to suit their requirements. Keeping window displays of paint and varnish continually before the passers-by and linking up the subject of such displays with the subject of the advertisements has been found very effective.

The paint department in this store is located at the very front where it receives most attention from all customers entering the store. Customers waiting to be attended to when a rush is on look over the sample cans, color cards, etc., displayed in the paint department. Great care is given the appearance of this department when it occupies such a prominent location.

Advising every customer how to mix paint before using has been found to increase confidence among customers in ready-mixed paint. For some time customers reported poor results and improper mixing was found to be the one chief cause of such dissatisfaction. Now it is very uncommon for a poor report to be made on a can of paint sold. Better results in painting by following this advice have made more satisfied customers.

"Educating the people along the line dealt with in the Save the Surface campaign and linking up personally with the effort being made by that campaign has proved a wonderful help to us and we feel that next year's business cannot fail to be fifty per cent. greater than this year," said Mr. McClennan. "Our customers have not yet realized all this campaign really means to them and we are doing our utmost to link up effectively with it and spread the message of painting for preservation."

"Paint Now" is the bold sign appearing on the window of the McClennan Hardware, Peterboro, Ont., and a neat arrangement of paint, brushes, color panels, etc., appears to link up the actual material with the suggestion. Following out its policy of linking up with the Save the Surface campaign arguments, generous use is made in the windows of the campaign literature.

Auto Finishes

This season offers the best opportunity for selling Floglaze Home and Farm, Floglaze Exterior, and other Floglaze Finishes.

The many reasons why the Fall is the best time for applying paint are beyond argument.

The foremost of these is the fact that surfaces are drier, more ready to take paint than at any other season of the year, all moisture having been driven out by Summer's heat.

Just as the Fall season is the best time to apply paint, just so is Floglaze the finish that endures, the best material for producing maximum protection at minimum cost.

Our dealer's booklet "A Guide to Larger Profits" describes Floglaze for Exterior Surfaces fully. Write us for this book.

This neat arrangement in the paint department of McClennan Hardware, Peterboro, Ont., greets the customer immediately upon entering the store. No counters are placed here to obstruct the customer from closely examining the stock, color cards, etc. The shelves are kept well filled to support the firm's contention that it can supply all requirements.

HARDWARE PROFITS LARGEST IN YEAR 1916

(Continued from page 30)

dise and equipment, etc., are largely uncontrollable expenses. Minimum wage laws and competition for competent help tend to make wage expense a factor that can only be controlled to a degree by increasing the efficiency of the retail sales force, and by the elimination of extra services of a luxury nature. Interest on investment and borrowed money cease to be an expense burden when stock turn reaches an efficient frequency.

It is held by some authorities that money spent for advertising places no burden on consumers because the increased volume of sales obtained through advertising reduces the ratio of total expense to total sales. A community can absorb only a limited amount of merchandise, and where trade is diverted by advertising from one store to another it must increase the ratio of operating expenses of one distributor, if the ratio of another is decreased.

There is an element of service in advertising, by which consumers are notified of the presence of goods they desire, are reminded of their needs, and are educated to the use of better materials.

Waste can and does occur in advertising, nevertheless, and it is significant that those trades which are the most persistent and largest users of advertising space carry higher percentages of operating costs than appear in other lines.

In some localities retailers have successfully operated joint delivery systems, through which consumers have received satisfactory service, with a considerable reduction in cost to the merchants participating. Such efforts should be heartily endorsed by the consumer as they tend to lower the prices he pays for his requirements.

The cost of operating a retail store depends upon the relation between investment and volume of sales. Idle merchandise and tied-up capital inevitably increase operating expense. Frequency of stock turn and increased volume in relation to investment tend to reduce operating expense. Purchasing with knowledge of the requirements of the community avoids accumulation of unsaleable merchandise.

It is well to refer again to the fact that the more consumers concentrate purchases in their communities, the lower will be the operating expenses of local dealers, benefiting consumers through lower prices incident to lower selling expense.

Retailers add to the congestion of trade by advertising special sales on peak trading days.

Chart D14 shows the fluctuating prices on specified groups of hardware and reflect the price which the retailer paid, the price the consumer paid, the amount of margin, and the percentage of margin to sales price.

Above is a group photo of the annual picnic of the Flint Varnish and Color Works, including the plant and office staff, in Toronto, at High Park. In addition to the employes there were also in attendance the immediate families, altogether about 200, and the Flint cap with its slogan "If It's Flint It's Good" was very much in evidence. During the afternoon a number of sports were indulged in and many valuable prizes awarded. The feature of the occasion was a soft ball game between the single and married men, which went for six innings and was tied; on the flip of the coin the married men won. An unexpected event was the drawing for an electric stove held for the married women, which was won by Mrs. Young. A bountiful supper was served at six o'clock, after which the prizes were presented by J. J. Riley, General Manager. The committee in charge were as follows—J. H. King, chairman; Miss May Banks, secretary; Miss Jennie George, Frank Mugford, Sam Carson. The starter for the events, Ernest Brooks; judges, Messrs. Robertson, Mugford and Carson.

WHEN you wonder why your customers ask for Pratt & Lambert Varnish Products remember the Pratt & Lambert advertising in MacLean's, The Saturday Evening Post, American, Good Housekeeping and House Beautiful. And, at the same time, don't forget that the quality in P&L advertising is more than matched by the quality in every P&L can — a fact that makes a great deal of difference with present-day buyers.

Weekly Paint Markets

Montreal

MONTREAL, October 5.—Advanced prices on both linseed oil and turpentine feature the paint markets this week. Linseed oil shows a price increase of four cents per gallon, while the latter product records a rise of five cents. After the sudden break in the flax-seed market last week, there has been a gradual strengthening until at the present time the situation is described as quite firm, and although the new crop is now in hand local crushers anticipate a fairly firm oil market for the coming weeks. There has been little change in turpentine during the week, the market in the south remaining in a very firm position. Demand continues seasonal, and stocks are generally at a very low level. Stocks locally are depleted in some quarters, but further shipments are expected within the near future and generally speaking there are ample supplies to meet present requirements. A noticeable improvement is reported in shellac, the markets at primary centres now being described as firm. White lead in oil has a strong undertone owing to the continued gains in pig lead and existing price levels on linseed oil.

SEED MAKES RECOVERY: OIL PRICES ADVANCED

Montreal.

Following the break in flax-seed last week, when a decidedly easier tone crept into the market, a partial recovery is now noted, and oil prices are advanced four cents per gallon, raw oil in one barrel again passing the dollar mark. The seed situation is still an unsteady one, the market fluctuating at almost regular intervals. At the beginning of this week prices eased off a little, but not sufficient to materially affect the oil market.

Another factor worthy of note this week is the strengthening on the English oil market, prices showing a substantial increase. According to one local crusher this tendency on the foreign product had really a more direct bearing on the trend of oil prices during the week than the seed market. Competition from this source may become more extensive than it has during past months, but not if it is in the power of domestic crushers to check it. Prevailing prices are the following:

LINSEED OIL—

	Raw	Boiled
1 to 2 bbl. lots, per gal.	1 02	1 04
5 to 8 bbl. lots, per gal.	1 00	1 02

Less quantities, add ten cents per gallon.

IMPROVEMENT NOTED IN PRIMARY SHELLAC MARKETS

Montreal.

Reports from primary centres state that the shellac market has shown material improvement during the past week or so, the situation now being described as firm. European markets have advanced and importers on this side now look for higher prices. Quotations locally are nominally unchanged as follows:

SHELLAC—

In barrels	5 10	4 60
5 gallon jugs	5 25	4 75
1 gallon jugs	5 40	4 90

TURPENTINE PRICES ARE AGAIN ADVANCED

Montreal.

A further advance of five cents per gallon in turpentine is recorded on the local market again this week, prevailing price level has now reached a new high point, and the undertone of this product remains in a very firm position. Reports from the South indicate that stocks are still at a low ebb, and this is thought to be the greatest factor assisting towards the strong market which has been evident for some weeks past. Demand while not quite as heavy as a few weeks ago, continues fairly good through domestic consumers purchasing in small quantities, but frequently, for their requirements. Stocks locally are low in some quarters but further shipments are expected at the end of the week. Other firms report ample supplies on hand, and following prices are now quoted:

TURPENTINE—

1 barrel lots	1 80	1 85
2 to 4 barrel lots, per gal.	1 78	1 83
Broken lots	1 90	1 95

BETTER MOVEMENT RECORDED IN PUTTY

Montreal.

A quite satisfactory trade is now reported in putty, manufacturers and distributors stating that the movement is now well up to expectations, and continued activity is looked for during the following weeks. Prices are unchanged at the revision of a few weeks ago, as follows:

PUTTY—

Standard, per 100 lbs.	5-ton.	1-ton.	Less.
Bulk, per 800 lbs.	$3 25	$3 50	$3 75
Bulk drums, 100 lbs.	3 75	4 00	4 25
Bulk drums or tins, loose 25 lbs.	4 00	4 25	4 50
Do., loose 12½ lbs.	4 25	4 50	4 75
Tins, cased, 25 lbs.	4 75	5 00	5 25
Tins, cased, 12½ lbs.	5 00	5 25	5 50
Bladder barrels, 400 lbs.	5 00	5 25	5 50
Bladder cases, 100 lbs	5 25	5 50	5 75
5 lb. tins	8 00	8 25	8 50
1 lb. tins	10 00	10 25	10 50

Pure linseed oil putty, $1.25 per 100 lbs. advance over above prices.

STILL FIRM TENDENCY IN PIG LEAD MARKETS

Montreal.

There is still a very firm undertone in white lead in oil, due to the strong tendency in pig lead and existing price levels on linseed oil. The lead market in London records a steady gain, and according to local crushers, there are indications of still higher prices. The American market is on a much higher level than the English market, and while an adjustment from both ends might be expected, it is considered altogether probable that London will be advanced to a greater extent than a decline on this side. Trade in the finished product is making favourable progress, local producers stating that they are now working to capacity to supply the demand.

Toronto

TORONTO, October 5.—While there have been no actual price changes announced on the paint markets this week, yet the undertone and tendency registered in varying directions provides interest of note. In turpentine a decidedly firm tone remains, principally due to the fact that southern stocks are in a distinctly low state, and European requirements have continued to draw heavily upon Savannah supplies. Local supplies are stated to be low and new shipments are still slow in arriving.

Linseed oil prices are unchanged, with the tendency somewhat firmer at the revised levels of last week, owing to another minor recovery in flax seed prices. This market however, continues to fluctuate and the future of linseed quotations is difficult to determine. Shellac is described as registering a distinct improvement, and while no changes are made in domestic price levels, quotations are stronger in primary centres. Paint products in general are experiencing a brisk seasonal demand, with the call for window glass also now more satisfactory.

STRENGTH REMAINS IN TURPENTINE MARKETS

Toronto.

The undertone in the turpentine markets remains on a decidedly firm basis. This trend at southern primary centres is attributed to the low condition of stocks, chiefly brought about by an increased demand from European consumers. This has provided a strong factor toward the present local tendency, as

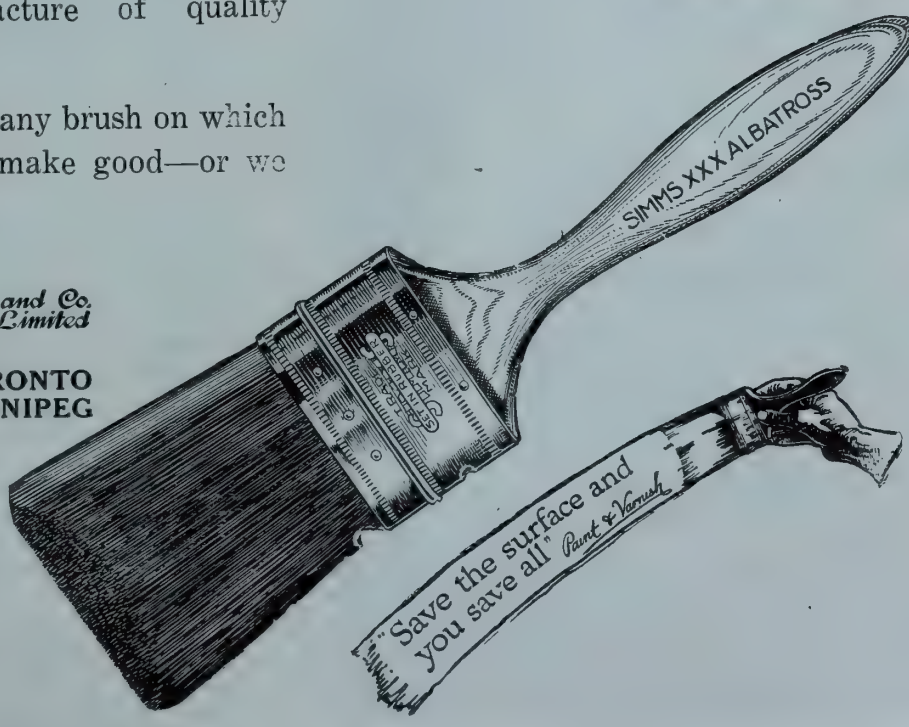
TRADE SIMMS SET IN RUBBER MARK

For 57 Years We've Been Painting This Sign



57 years ago we began to paint the name "Simms" in the public eye. It meant little to painters at that time because they had never tried the product on which it was stamped.

Year by year it has earned its recognition as the symbol of quality products until to-day it is known by painters throughout the length and breadth of Canada.

It is the embodiment of 57 years of successful manufacture of quality brushes.

It is a promise that any brush on which it is stamped will make good—or we will.

TORONTO MARKETS

(Continued from page 50)

supplies are still reported difficult to obtain, and the current demand is good, both on domestic and primary markets. That there does not seem much possibility for any lowering in turpentine prices for some time, was the opinion expressed to Hardware and Metal this week by a prominent distributor, this being due to the fact that supplies in southern production quarters are reported as inadequate to meet the requirements of consumers in general.

TURPENTINE—		
1 barrel lots	1 90	2 00
2 to 4 barrel ots	1 89	1 99
5 gallon lots	2 05	2 15

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

LINSEED OIL PRICES REMAIN AT NEW LEVELS

Toronto.

Prices on linseed oil remain unchanged this week, but the new levels announced last week are slightly firmer as the result of another slight recovery in the flax seed markets. The flax situation is described as unsteady, with fluctuations being recorded at intervals, which renders linseed quotations subject to revision from time to time. The changes this week, however, are not considered of such marked extent as to immediately affect existing oil levels. With the new crop appearing on the market in greater volume some easing in seed is more or less expected in certain quarters, while on the other hand the quiet demand for the by-products—cake and meal—serves to maintain the current oil prices to an extent. The prevailing call for linseed is described as fairly good for this season of the year.

LINSEED OIL—	Per Gallon Raw	Boiled
1 to 2 barrels	1 05	1 08
3 to 4 barrels	1 04	1 07
6 to 9 barrels	1 02	1 05

Less barrels, 15 cents per gallon.

FIRM UNDERTONE IN WHITE LEAD IN OIL

Toronto.

White lead in oil remains on a strong price basis, which is chiefly the result of the recent gains in pig lead. This added strength has been reflected in the movement of white lead in oil, while the seasonal demand and fine weather conditions have also assisted in the current activity. There has been no further revision in prices, which are contained on the current market quotations pages.

GOOD MOVEMENT IN PAINTS AND VARNISHES

Toronto.

The ideal weather experienced during the past week has been of great assistance to the fall movement of paint products. Manufacturers and distributors describe the movement as entirely satisfactory and brisk business is the general report in all sections of the industry. The announcement that there will be no further changes in price for this season has clarified the situation, according to the viewpoint of one local distributor expressed to Hardware and Metal, and this decision should also stimulate the movement of paints and varnishes at this season of the year.

IMPROVEMENT NOTED IN WINDOW GLASS TRADE

Toronto.

A brisk movement in window glass is now evident, the seasonal activity in both city and country districts being more pronounced. This condition is described as in keeping with general expectations in this regard. There has been no further announcement regarding prices, although some easier discounts on imported glass are evident in certain quarters. Present lists and discounts are contained in the current market quotation pages.

SHELLAC MARKETS NOW REPORTED IMPROVING

Toronto.

In keeping with the situation outlined in a recent issue of Hardware and Metal, a noticeable improvement is now reported in the shellac market. While domestic quotations remain unchanged, it is stated that the sagging tendency apparent during the past weeks, has now recovered, and primary centres are described as firm. European markets have continued the advance in quotations recorded recently and importers look for a reflection of this rise in domestic levels in the near future.

SHELLAC—	White	Pure Orange
In barrels	5 10	4 60
One gallon jugs	5 40	4 90

SEASONAL ACTIVITY IN PUTTY NOW EVIDENT

Toronto.

Putty is now generally reported to be registering seasonal activity. The current demand is said to be more satisfactory and in keeping with expectations of manufacturers and distributors in this respect. There has been no further development as regards prices, which are maintained at the following levels:

PUTTY— Standard, per 100 lbs.	5-ton lots	1-ton lots	Less
Bulk bbls.	$3 70	$3 95	$4 20
100 lb. drums	4 20	4 45	4 70
25-lb. irons	4 45	4 70	4 95
Bladders in bbls.	5 45	5 70	5 95
Do., less quantities	5 70	5 95	6 20
1-lb. tins	10 45	10 70	10 95

Pure Linseed Oil Putty, $1.25 per 100 lbs advance over above prices for similar quantities.

Pittsburg Markets

PITTSBURG, Oct. 4.—Steel markets have had another of the sudden shifts that are so characteristic. For six months mills have been straining every nerve to produce the last ton possible, in order to meet, as far as possible, the urgent requests of customers for deliveries, and during almost the entire period prices were advancing. The average advance on all steel products, for forward deliveries, was about $9 a net ton, or almost one-half again as much as the advances in the great market movements of 1909 and 1912, while using early delivery prices for the comparison, the advance was considerably more than $9 a ton.

By the sudden reversal that has occurred, mill deliveries on old orders are growing more prompt, many mills are eagerly seeking business, prices for early deliveries are declining, and a feeling is growing that prices for forward deliveries are likely to decline before there is another general buying movement.

Possibly this reversal is due to the increased production of steel since the coal strike ended, but this seems hardly sufficient to explain the change fully. Production was at about 50 per cent. of capacity at the end of August and is now at between 65 and 70 per cent. While this is a great increase, the 50 per cent. rate had been only a temporary affair. The industry was running at between 70 and 75 per cent. in June, and July showed an average rate of nearly 70 per cent. Thus the real picture shows, not that there has been an increase in the past 30 days, but that there was a period of just a few weeks in which production dropped. The present rate is hardly equal to the July rate and is well below the June rate, hence it should not, itself, make a surplus of steel.

The explanation of the sudden easiness of position the steel market has acquired seems rather to be that during the coal strike buyers were anxious to get all the steel they could, fearing an interruption of deliveries by the coal shortage while now, with the coal strike ended, they content themselves with such steel as they actually need at present. Possibly they are drawing upon stocks of steel previously accumulated.

Sellers of steel are laying much emphasis upon car shortage, presumably to encourage buyers to take heavy deliveries. The car shortage is not serious, as to its present influence, but it is serious in its menace of worse conditions to come, for inclement weather, due in say a couple months, always slows down railroad operations more or less. The demands upon transportation now are a little beyond the transportation capacity and if the demand for movement continues unabated and the capacity goes down there is going to be serious trouble.

Many of the mills, perhaps the majority, have more or less car shortage. At some sheet mills product to the extent of two or three weeks of production has accumulated. At mills making other classes of material there are no accumulations or only small accumulations, equal perhaps to two or three or four days of production.

No. 579

A Canadian Pro States:

"You Make The Best Golf Bags In America."

This is high praise indeed and we are proud of the tribute, the more so because it has been our endeavor, always, to do just that very thing—to make the best golf bags in America.

Our golf bags are designed according to the specifications of seasoned golf professionals. They are constructed from only the best materials and the workmanship on them can not be surpassed.

Strong, durable, light in weight, your customers will appreciate these better, Canadian Made Bags.

Plan Ahead for a Big VIKO Christmas

Advance planning wins most battles. That is, if you plan right and have the right kind of ammunition.

Plan your Christmas Viko siege on the gift pocket-books right now.

Here's what we are doing for your Viko Christmas:

1. Strong national magazine advertising which will feature Viko percolators — double boilers—tea kettles—tea pots—tubed cake pans—casseroles and syrup pitchers. Also miniature sets for the children (in brightly colored Nursery Rhyme cartons).
2. Special holly cartons for Viko utensils to make them more Chrismasy in display and as gifts when purchased by your patrons.
3. We have ready for you a striking Christmas window trim for Viko displays. Send today for it.

You know by now the advantages in offering the community VIKO, The Popular Aluminum, kitchen utensils. Write us today to co-operate with you for a big and profitable Viko Christmas. *Ask your jobber.*

The Cord With a Heart

This is the cordage—indoors or out—that actual tests have proven the best.
It excels in tensile strength—the heart is covered by braided, multiple plies of cotton under high tension.
It is weather—rot—stretch proof.
It is certainly the best cordage made.

TWO BEST SELLERS

PATENTED IN CANADA

Better Selling Value Than Ever

We have equipped our Steel Baths with **Pressed Steel Removable Legs** and 3 inch **Roll Rim** around the top, for which we have secured a Canadian Patent. This **Roll Rim** adds greatly to the selling value of

TWEED ENAMELLED STEEL BATHS

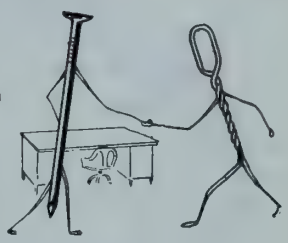
They now look like the expensive cast enamel baths but are the **same price** as before.
Our new patent Roll Rim Enamelled Steel Baths are now ready for shipment.—Order samples.

TWEED SANITARY CHEMICAL CLOSET

Stamped out of Black Sheet Steel and is very strong, durable, attractive, and guaranteed to be absolutely sanitary, and to satisfy every user or money refunded.

Up-to-date facilities and special machinery enable us to produce these superior grade closets at a very low price.

We will help you to get started by sending you circulars, talking points and cut for local advertising.



Large stock on hand, can ship promptly. Get after Fall business.

Write for catalogue.

STEEL TROUGH & MACHINE CO., LTD., TWEED

LAIDLAW'S WIRE BOYS

Bale Ties---

Says B. T.: "Right in this plant we make the best Bessemer Bale Ties that are produced in Canada.

"Laidlaw's Bale Ties are used for bundling Hay, Straw, Rags, Paper, Flax, Excelsior, Shavings, Leather Findings, Pulp, Tobacco, etc."

Everything in Wire and Wire Nails

IT PAYS A DEALER to be sure of his goods

The dealer who stocks the "Minimax" Washing Machine makes no error in judgment. It is an entirely reliable machine of the newest wing design, dolly type. Like all

Maxwell

Products, it embodies the most approved modern features—quiet action, compactness, a swinging, reversible, quick-release wringer, and adjustable "4th" leg for uneven floors and draining. The sheerest and the weightiest fabrics are washed by the "Minimax" with equal success.

TINKER TOM'S TALKS.

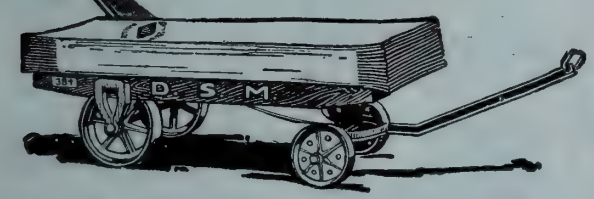
No. 379

WHY USE TONCAN?

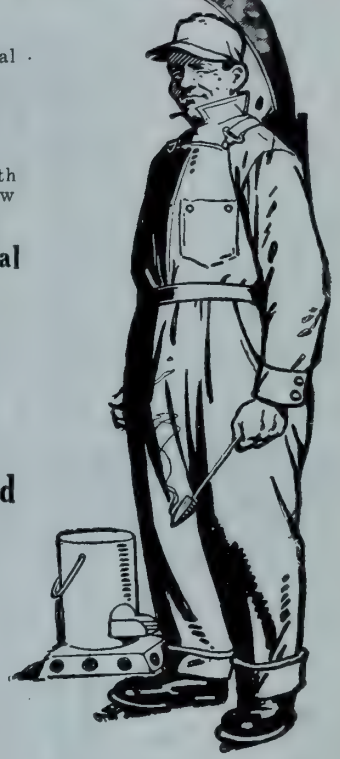
When you have a sheet metal job which requires the very best material to give reasonable life and service, use Galvanized Toncan Sheets.

Iron Plus Copper Resists Rust

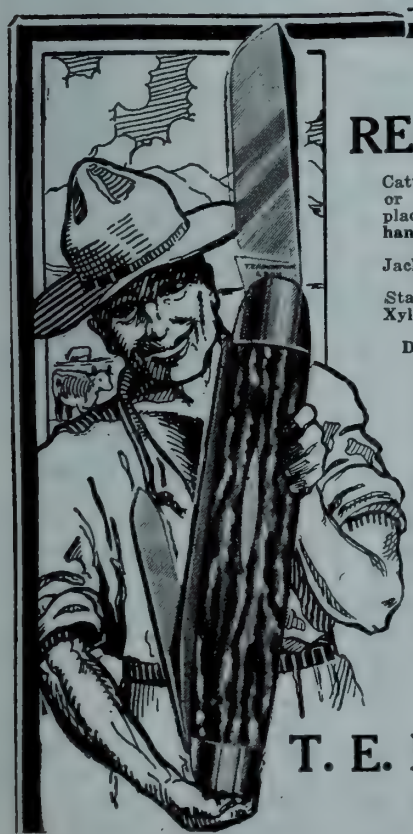
There's a reason!



64 years ago a flume was built in Columbus, Ontario, and banded with hoops of iron. These hoops are still strong and serviceable. Here's how they compare in analysis with Toncan—



Old Charcoal Iron		A Typical Analysis of Toncan Metal	
Carbon	.04%	Carbon	.03%
Manganese	.15%	Manganese	.12%
Sulphur	.040%	Sulphur	.038%
Phosphorus	.37%	Phosphorus	.010% or under
Silicon	.17%	Silicon	Trace
Copper	.09%	Copper	.20% or over



Toncan costs only a little more. Every jobber can quote you.

TINKER TOM

"COLE" PATENT

AND

ACME

WOOD SNOW SHOVELS

Our "Cole" Patent shovel has a broad, curved basswood blade with sides reinforced with iron plate, steel tips and wood or iron D grips. They are especially desirable for shoveling off sidewalks and light snow.

In the Acme shovel lightness and strength are so combined as to give a most serviceable shovel for all uses. Steel tips and wood D handles, blades of basswood and finished in varnish.

Wood shovels for the kiddies also.

Send for catalogue and price list.

It WEARS and WEARS and WEARS

The Lawson No. 800 ball bearing surface spring hinge is made extra strong, with specially hardened cam rollers and pins, plunger, center guide roller and main pintle—parts subjected to wear are thus protected, insuring long life. A sturdier hinge than any other of its type on the market. Further information on request.

Lessons From Lean Days

During the lean period from which we have just emerged, western merchants, wholesalers and manufacturers found that the goods they depended on to pay rent, wages and current expenses were the nationally advertised well-known lines. It was proven that when people buy most carefully, they select goods they have become familiar with through effective advertisements.

It was advertising that kept the doors open, that enabled retailers, in spite of adverse conditions, to carry on and the merchants who suffered the least were those who pushed the sale of popular products of recognized value and quality. By featuring these lines in their own advertising they cashed in on the demand created by general advertising and transformed the consumers' good impressions into actual purchases.

The Return to Prosperity

Now we are a long way on the return to prosperity. The basis of business is again sound. In most districts of the west farmers are purchasing their normal requirements and constructive retail selling is reaping a fair reward. A new era of opportunity is opening up.

More than ever is it true that advertised goods are the backbone of profitable business. If the lessons of the lean days are applied to present retailing, turnover and profits can be greatly increased.

The leading manufacturers and distributors in developing western trade prefer and use The Nor'-West Farmer which reaches more farm homes than any other paper. The money they spend is of direct benefit to every western retailer handling their lines and it pays these merchants to keep tab on the best sellers by watching the advertising in this paper.

Free Dealer Service

The regular issues of The Nor'-West Farmer, and a monthly letter reviewing current advertising, are mailed free to the retailers of Manitoba, Saskatchewan and Alberta. If you are not now on our list your request secures this free service.

The Nor'-West Farmer

The Pioneer Farm Journal of Western Canada

Winnipeg

If interested tear out this page and place with letters to be answered.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

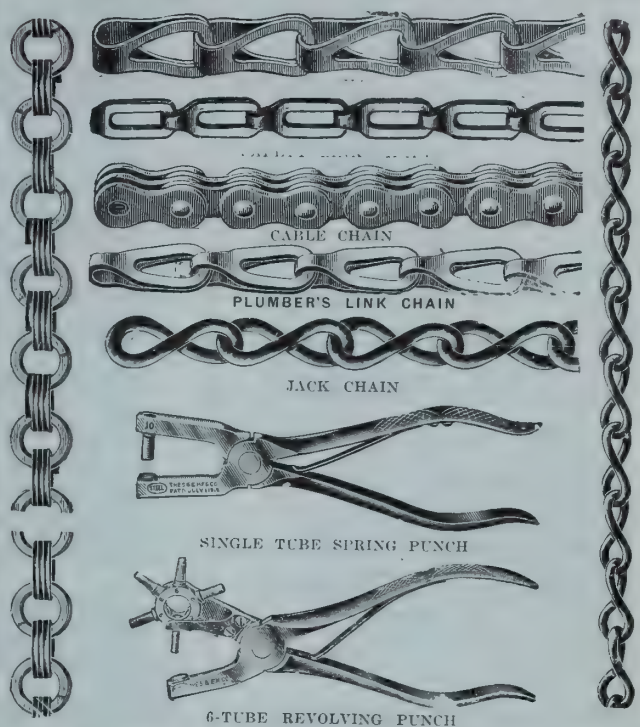
ACME WASTE MFG. CO., LIMITED
492 Wellington St. W., Toronto

Maple Leaf Stitched Cotton Belting
Longer Life



Maple Leaf Stitched Cotton Duck Belting, has proved itself, and satisfied critical mechanical men in hard machine-shop use where belting is severely tested. Its construction of stitched cotton duck wins out.

For the dealer it means new customers, profits and repeat orders.

Write Today.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

FORSTNER BITS

bore their way right through tough, hard, knotty cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

TAPES *and* RULES

Tell this to YOUR customers

Your customer may ask for "Armco" Ingot Iron, because for years he has heard it recommended as an iron that will last.

If he does, you ought to tell him what *you* know about it, too.

On the other hand, if he merely asks for the *best sheet iron,* and you use—as you will—"Armco" Ingot Iron, you should tell him all you know about it so that he will realize you are looking after his interests.

Tell him that if he wants his metalwork to last as long as possible, in defiance of weather, he must use an iron that will endure.

Tell him that "Armco" Ingot Iron not only resists rust, but, when galvanized, the coating and the base metal are properly alloyed with no tendency of the galvanizing to crack, split, or peel where the stresses come.

Tell him that you can do your best work only when you have the best materials. Explain to him that the small extra cost at first is as nothing compared to the extra years of service.

And lastly, tell him that it's also a matter of pride with you—that you'd rather turn out a job that you know is going to last than one where you will be called back to make repairs every few years.

Tell this to *all* of your customers.

From Raw Materials *to the* Finished Product

We manufacture our own linseed oil in our own mill

We corrode our own white lead—Guaranteed formula

Our own dry color manufacturing plants

An Organization that is Complete in Itself

B-H control of basic materials means much to the B-H agent. It makes it possible for us to supply our agents with a high quality product for every purpose in which a brush is used. We can effect quicker shipments, ensure a constant supply and guarantee the quality.

Brandram's Genuine B.B. White Lead, the world's standard for almost 200 years is corroded in our own plant in Montreal. We can therefore supply the ever-increasing demand for this popular White Lead and manufacture a sufficient quantity of it for use in B-H "English" Paint and other products of which it is the important base.

A constant supply of high quality Linseed Oil is also assured by our own mills at Medicine Hat. We also manufacture in Montreal our own dry colors. Not being compelled to depend on outside sources for supply enables us to offer our dealers throughout Canada, a better and more attractive dealer proposition.

We shall be glad to send you all particulars of our agency proposition. A request carries no obligation.

—And It Works Just as Well in Winter

"Hatch Garage Outfits" begin to show their real worth and stability, when winter comes.

Ice and snow cannot interfere with the smooth working of these Garage Doors; hangers cannot freeze up or jump the track.

Slamming or sagging of doors is absolutely impossible; at all times they slide easily and conveniently out of the way at the slightest pressure.

In cold weather this quick, easy opening and closing of the garage door is particularly desirable.

Every "Hatch Garage Outfit" is complete; ready for its simple installation. Packed complete in a box, it is easily and quickly handled, thereby cutting sales costs.

There is an attractive profit on this line. Write for catalog, prices and full information.

Hatch Garage Outfit consists of

3 Special Swivel Door Rollers.

3 Paris Special Garage Door Hinges.

3 Stay Rollers (floor guides).

2 Extra Heavy Garage Door Handles.

1 Safety Hasp (for fastening doors outside).

1 Hook and Eye (for hooking back swinging section outside).

Also 22 ft. of track in separate bundles—two 8-ft. and one 6-ft. lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

Westinghouse

Electric Ranges

Westinghouse Type MH Electric Range

An Idea that has met with success

A certain dealer hit upon a real idea for boosting the sale of Westinghouse Ranges.

He went to the high school, normal school and university in his town and succeeded in placing a Westinghouse Electric Range in each. As the domestic science courses in these institutions taught the latest ideas in cooking, these sales were not difficult.

Each girl who used the electric range soon found that the Westinghouse way was the only way to cook. She naturally told her parents about it.

In a few years when she has a home of her own, she will, of course, want a Westinghouse Range for herself.

Why not use this same idea to stimulate your sales of Westinghouse Ranges?

Guns to push now!—The most accurate, best built, most widely advertised, and fastest selling small caliber rifles are the

Marlin

.22 Repeating Rifles

You sell .22 caliber rifles! This means profits for you —we are advertising to millions of shooters these features of superiority in all Marlin .22 caliber repeaters:

Side Ejection—we discarded all old style top-ejecting guns 30 years ago; **Standard 24-inch Barrels**—we make no guns with stubby, sawed-off barrels; **Standard Length Buttstocks**—no short length, cheap-looking buttstocks on any Marlin guns; **Ivory Bead Sights are standard equipment!**—they cost extra on any other make; **Ballard Rifling**—that has made Marlin accuracy famous.

All Marlin .22 Repeaters use in the same rifle .22 Short, .22 Long and .22 Long-Rifle Cartridges.

Model 20

Model 38

Model 39

Model No. 20—a modern side-ejecting gun—not an old style, top-ejector. Has the fast-handling slide action, with visible hammer, for the shooters who prefer a visible hammer rifle, and has a full magazine that gives 25 shots at one loading. Standard length barrel and buttstock. Has Marlin accuracy and Ivory Bead sight. Ask about new lower price.

Model No. 38—is the wonderful new slide action Marlin repeater; hammerless, with instantaneous take-down—the cleanest and sweetest little rifle ever made. Has Marlin accuracy and Ivory Bead sight. Made with Round and octagon barrel. Ask about new lower prices.

Model No. 39—made with lever action, is the choice of expert and professional shooters and all others who like to use the lever action in a small game and target rifle as well as in their big game rifles. Side ejection, Marlin accuracy, Ivory Bead sight—the best made .22 rifle in the world! Ask about new lower price.

Send to us to-day for supply of catalogs and other interesting descriptive matter on the complete Marlin line for distribution to your trade.

A remarkable combination! Guns that set the pace in design, accuracy and workmanship—and the most widely advertised—sold at new prices that set the pace in fast and profitable sales.

Marlin

Repeating Shotguns

Made with every up-to-date feature and exclusive advantages not found in other shotguns.

Model No. 28, 12 Gauge Hammerless—the gun that won the World's Championship at the Olympic Games. The safest breech-loading shotgun ever built. **Solid Steel Breech**—solid top, side ejection; **barrel matted on top entire length**—a feature that costs $9.00 extra on other makes; **press-button cartridge release; automatic safety device** for protection against hang-fires; **double extractors** that pull any shell; the most practical and convenient **take-down**; quick acting **trigger safety.** This Marlin has better lines and more style than any other similar construction, and is a wonderful gun for ducks, geese, foxes, trap-shooting and all long-range shooting. Ask about new lower price.

Model 28

Model 42

Model 31

Model No. 31, 20 Gauge Hammerless—the only real 20 Gauge repeater—Handles the new powerful duck loads in 2¾-inch shells; also all ordinary 2½-inch loads. **Barrel matted on top entire length**—this desirable feature costs extra on other makes. **Solid Steel Breech**—not a shell of wood; **solid top; side ejection; press-button cartridge release; automatic safety device** for protection against hang-fires; **double extractors** that pull any shell; **quick take-down feature** for convenient cleaning and packing; quick acting trigger safety. There's no other "20" like this gun. Ask about new lower price.

Model No. 42, 12 Gauge Visible Hammer—A quick handling, hard-hitting, long-range gun—it makes kills far beyond the range of the average 12 gauge gun. **Solid top receiver;** closed-in breech-bolt that sheds all the rain, snow and sleet of good wildfowling weather; **side ejection**—ejected shells do not cross the line of sight; **double extractors; improved automatic safety device** that guards against hang-fires and defective cartridges; **chambered to handle 2¾ and 2⅝-inch shells; compensating device**—barrel always fits up tight on receiver. Has **matted barrel**—the matted barrel alone costs $9.00 extra on other guns. Ask about new lower price.

Canadas Most Modern Tire Plant

Firestone

A Monument to Canadian Industrial Accomplishment

The new Firestone plant at Hamilton, Ontario, is now in operation.

The factory itself with its last-minute equipment and efficient devices is a monument to what Canada can accomplish in the industrial field. The imposing building with its 155,000 square feet of floor space is constructed of Canadian materials. The machinery comes from Canadian makers. Workmen and executives themselves are Canadians.

Firestone Tires are truly a national product. Canadian manufacturers are supplying fabrics and pigments. Rubber comes to Canada direct from Singapore. Firestone Tires as manufactured in Canada to-day are complete confirmation of our country's industrial independence. Increased manufacturing facilities also mean that Firestone quality is now available at prices no higher than those asked for ordinary tires.

Ask your Firestone distributor for the latest merchandising plan and price schedule for these tires or write us direct.

BAR FOLDING MACHINE

No tinsmith can do his work properly without a bar folder, commonly called a tin folder.

It is used for the purpose of binding or folding the edges of sheets at various angles, turning flanges on straight sheets, etc. Also for rounding the edges when a wire is to be inserted.

We make all kinds of tinsmiths' tools and machinery.

Write for illustrated catalogue.

"By selling the Caloric we sell quality and make a fair profit. Have installed about 100, with 100% satisfaction to users."

THE HYSLOP HARDWARE CO.
New Westminster, B.C.

There are successful Caloric dealers in every province. Write for references.

Caloric dealers are making money.

That's the big reason why you should sell Calorics. Get into this profitable business **now.**

The CaloriC is the one distinct advancement in modern heating science—the heating system that is above competition — that imitators, strive as they may, have not been able to duplicate.

CaloriC patents are fundamental to successful pipeless heating—their practical superiority proven in more than 135,000 buildings in which the CaloriC is in use.

Hundreds of dealers who never in their lives had anything to do with heating plants have made big successes from the start with the CaloriC. Many have made independent fortunes. Why not you? The field is open—the profits generous.

Write to-day for details of the CaloriC dealer proposition; it may mean the start of the biggest business success of your life.

SIMONDS

The Everlasting Veneer Toilet Seats

This is the strongest and cleanest toilet seat made. There are no cracks —made of 7 and 9-ply, air-seasoned wood veneer, held together by our special wood cement.

These seats are proof against heat, cold or dampness—will never crack, warp or split. They cost no more than the so-called "cheaper" toilet seats, and always bring repeat business.

Have you written for our prices?

"What Will The Financial Post Do For Me?"

THE FINANCIAL POST will bring to you each week a wealth of news that you cannot get elsewhere: news of investments, business developments, financial matters. It will bring you the studied views of Canada's leading economic thinkers, men who tell you how national and political problems can be solved, how the turn of the affairs affects you personally.

It will bring you, too, a personalized investment service; it will tell you how to invest your savings to bring the greatest return; and how to avoid loss from poor investments. It will answer every question you may care to ask the editor regarding individual companies, about investment firms, about insurance, stocks, bonds, real estate and similar subjects that may vex you.

The Most Profitable Security of All

It is not a bond nor a stock nor a mortgage but it is the security afforded by sound and timely information on investments. This you can get from THE FINANCIAL POST, Canada's leading investment weekly. A very small investment here will yield you extraordinary returns. One bad investment may cost you a large part of one year's profits. Good investment, on the other hand, will bring you peace of mind and surety of financial success.

What You Get Each Week

News of stocks, securities and companies.

Review of business conditions.

Crop reports.

Reports on real estate and building throughout Canada.

Discussions on bond investing.

Insurance for buyer and seller.

Taxation problems.

Statistical information of value to every investor.

Weekly quotations on all securities.

Articles on immigration and other national problems.

Etc., etc., etc.

Subscribe Today for The Financial Post. It Will Bring You Weekly Messages of Real Help. Use the Coupon.

The PLUS Feature of The Post's Service.

Every subscriber has the privilege of submitting his own investment problems to the editor. You may ask as many questions as you like and they will be freely and thoroughly answered. This service alone is worth more than the subscription price.

GREASE CUPS FOR EVERY PURPOSE

No. 249

The No. 249 Ratchet Grease Cup is designed for use in places of vibration. The cap is fitted with a locking device that makes it impossible for the cap to jar loose.

A light, strong cup drawn from sheet metal. The locking device is entirely inside, nothing to catch dirt. Made in seven sizes and all finishes.

No. 200

The No. 200 Grease Cup provides an inexpensive and very serviceable general purpose cup; only two parts cap and base, nothing to get out of order. Drawn from sheet metal, brass and steel, it is light and extremely strong. Made in eight sizes: ¼ ounce to ½ pound capacity. Rough and blued steel and dull, polished and nickel plated brass finishes.

The Empress line of lubricators consists of more than twenty different styles of oilers and thirty types of standard grease cups beside many special styles. We also make spring shackle bolts and dowel pins.

Wholesale Hardware Merchants are Optimistic on Outlook for Business

Annual Meeting of Canadian Wholesale Hardware Ass'n. in Montreal Characterized by Expressions of Optimism by Wholesalers and Guests—Former Minister of Finance Says the "Corner Has Been Definitely Turned"—May Be Lower Tax Burdens—Canada's Position Rapidly Improving

ONE OF the most important matters discussed at the annual meeting of the Canadian Wholesale Hardware Association held in Montreal, was the question of taxation. The application of the Sales Tax came in for considerable comment and addresses were given by different manufacturers on the subject. A number of manufacturers were also asked to give their views regarding the manufacturer absorbing the Sales Tax on goods sold to the jobbers. There appeared to be a very wide difference of opinion as to the best method, some of the manufacturers taking the view that they could not absorb the tax while others who are absorbing this tax at the present time intimated that this could not continue. It was quite evident from the discussion that the matter is a serious one and important from both the standpoint of the manufacturer and wholesaler who in most cases has a very large turnover with a very narrow margin of profit.

There appeared to be a general feeling among the manufacturers and wholesalers present, that business conditions have improved greatly and that continued improvement will be shown from now on.

At the big annual banquet, wholesalers, manufacturers and agents laid aside their business worries and spent a most enjoyable envening. Plenty of good food and refreshments, music and song, together with the speeches of the guests and members of the association, combined to make the evening a most delightful one. T. M. Birkett, President of the Canadian Wholesale Hardware Association who was re-elected for a second term, occupied the chair. Mr. Birkett's opening remarks were as follows:

T. M. BIRKETT

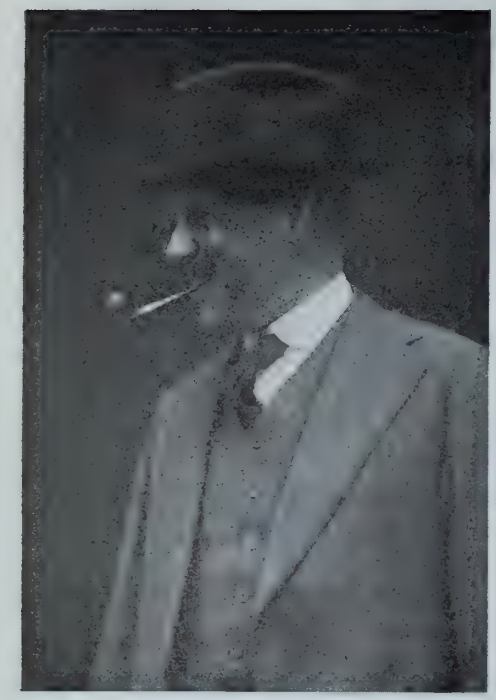
of Thos. Birkett and Son, Ottawa, re-elected president of the Canadian Wholesale Hardware Association for a second term. He was chairman of the annual banquet.

Speech by Thomas Birkett, Ottawa

"Gentlemen: We have in the last few years passed through a very stringent time, but I think that the dark clouds are now behind us, and I am going to make a guess that the jobbers at last, with the help and aid of the different manufacturers, are going to break even this year.

"We cannot help but regret very much the trouble which has developed in the Near East, and we sincerely hope that it will not develop to the extent of another war, and I think that the conditions could have been improved upon by the different powerful nations, if they had all had the backbone of the man whom I consider the greatest man, and whom I consider the greatest in history to-day. I refer to Mr. Lloyd George.

"As business men, should this trouble materialize we are bound to feel it, but I feel sure and I have a sincere hope that Mr. Lloyd George will be successful in showing all the other powers that he was not born yesterday, but has lived for many years and will live to see his efforts crowned.



"In attending the Rotary luncheon held in this hotel I was impressed by the remark of the chairman. He stated with all sincerity and with all truth that no matter what government was in power in Canada, if our boys choose to go to the help of the Mother Country and the government did not send them that party would not exist. I wish to convey from the members of the Wholesale Hardware Association the hope you will all have a very pleasant and most enjoyable evening."

Sir Henry Drayton Guest of Honor

The Guest of Honor was Sir Henry Drayton, former Minister of Finance

"Can a Man be a Christian in the Paint and Varnish Business?"

Read article on pages 56 and 58

SIR HENRY DRAYTON

former Minister of Finance and former Chairman of the Dominion Railway Board, who was the guest of honor at the annual banquet of the Canadian Wholesale Hardware Association. He gave interesting statistics bearing out the optimistic views expressed regarding the future.

and former Chairman of the Railway Board, whose name was linked up with the Toast of Canada, earlier in the evening. Sir Henry expressed most optimistic views regarding the future outlook and quoted some interesting figures supporting his views.

Chairman Birkett in introducing Sir Henry Drayton referred to him as a real fellow, and added that we all think we are pretty good fellows.

"I am not an orator so I now ask you to fill your glasses and drink a toast to 'Canada,' the Dominion of all Dominions.

"Now Gentlemen, the gentleman that I have referred to as a good fellow awhile ago I now have pleasure in introducing to you, Sir Henry Drayton."

Sir Henry Drayton Predicts Good Times

"Mr. Chairman and Gentlemen: The first thing I want to do is to thank you for the kind and gracious way in which you have received me. You know there are many compensations in this world of ups and downs. Of all the ups and downs I think the downs have it. There is a lot in the way you look at things after all.

"It is a great honour to me to have my name coupled with that of Canada. Canada is well on the march. We were well turned the corner last October, well turned the corner commercially, industrially and every other way. As the chairman points out you will do better this year, you will do a great deal better this year. I know that business is picking up, I know that there are several reasons for business to pick up; it should pick up in this country.

"You all know what Canada did between 1914 and now. You know what we had left in Canada after that exacting struggle. In 1913 Canada occupied the twelfth place in the list of exporting nations. There are a great deal more than twelve countries, there are a great many more than twelve older countries, there are more than twelve who are more experienced. In that year, 1913, as I say, we were twelfth in the list of exporting countries and our exports amounted to $335,000,000. The war is over and the country is on a peace footing, and at the end of the statistical year 1921, the increase in our exports was over $700,000,000, an increase of 214 per cent. I wonder if we ever properly realize what there is behind Canada, its wonderful resources and opportunities. The significant thing is that Canada advanced from twelfth position to that of sixth and that is where we stand to-day. We have a very magnificent record.

Big Increase in Farming

"You are very interested and justly indeed in the welfare of your country. You are interested in the welfare of agriculture and the extremely sudden drop in the price of farm products, but the thing above all others that makes us so sure of Canada is that in the year 1912 we had 35,000,000 acres devoted to farm crops and in 1921 we had 59,000,000 acres devoted to farming, an increase of approximately 59 per cent. during that war period. Think what this increase means, and so it is to-day our farmers can boast of 24,000,00 more acres of farm crops than previous to the war.

"Good times will come. Don't you think if any country deserves good times Canada deserves them? It is pretty bad for any man to live to himself, or any nation to live by itself, to the contrary a nation that is not living for itself but in the cause of civilization and humanity should deserve good times. Those times are here if we only have confidence and faith in one another.

"Let us see what we are doing this year. This year we have the largest wheat crop since 1915, and we have the largest oat crop this country has ever been able to produce. Take the rail-

OFFICERS OF CANADIAN WHOLESALE HARDWARE ASS'N. FOR 1922-23

President, T. M. Birkett, Thos. Birkett & Sons, Ottawa, Ont., (re-elected); Vice-President, S. Rae, D. H. Howden & Co., London, Ont., (re-elected); Secretary-Treasurer James Hardy, James Hardy & Son, Toronto.

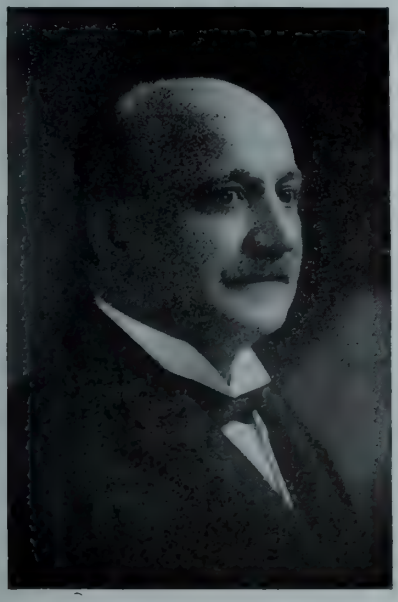
Executive Committee.—Geo. C. Davis, Frothingham & Workman Ltd., Montreal; Geo. W. Murphy, J. S. Mitchell & Co., Sherbrooke, Que.; Hector Prudhomme, A. Prudhomme & Fils Ltd., Montreal; J. McD. Wilson, Chinic Hardware Co., Quebec; A. J. Teakle, Herman Young Co., Quebec.

C. C. BALLANTYNE

former Minister of Marine and Fisheries, who was a speaker at the banquet of the Canadian Wholesale Hardware Association in Montreal.

SIMON RAE

of D. H. Howden & Co., London, Ont., who was re-elected Vice-President of the Canadian Wholesale Hardware Association for 1922-23.



roads, the latest available figures are for the period ending the 29th of last month. Last year down to the same day the C. P. R. loaded 15,157 cars and this year this system has loaded 22,555 cars. You have an increase over slightly 700 cars or almost 50 per cent. The National lines loaded 13,579 cars and this year they loaded 19,672 cars, an increase of almost 50 per cent. Now gentlemen, the barometer looks fair, all signs point to good conditions for Canada.

Meeting Financial Burdens

"You noticed the other day the refunding loan of $178,000,000 has been made a success. I would expect it to be a great success, and it should be a great success. Only the other day the Treasury of the United States asked for tenders for $200,000,000 of their certificates to run for a year. They offered them at 3¾ per cent. They received offers amounting to $579,000,000.

"With Canadian obligations carrying interest at the rate of 5½ per cent., and with one month's bonus thrown in, the loan should be a great success, and Dominion finances easier.

"They used to say many things to me, make all kinds of complaints about taxation. Well, the country needed the money. The taxation was necessary, and my successor needs more money than I did. I have a confession to make. When things were as bad as they were and all inventories were disappearing the nation's income shrunk the same as yours did. It was not an uncommon thing for customs revenues to go down $10,000,000 in ten days. Fortunes were written down by reduced valuations of inventories. It was my place and duty to raise all the money I could raise without injuring

ALEX. PRUDHOMME

of A. Prudhomme and Fils, Montreal, who emphasized the need of immigration in his address at the annual banquet of the Canadian Wholesale Hardware Association.

JAMES HARDY

secretary of the Canadian Wholesale Hardware Association, whose efforts on behalf of the organization over a term of years were much appreciated, according to the ovation extended him at the annual banquet.

the carrying on of mercantile businesses. Our country's business must come first. I overlooked some methods of taxation my successor has applied, the tax on drafts for instance (laughter). I had originally drafted a tax of .02 on cheques and drafts, but finally decided not to include drafts. You now have drafts included and by the way have you noticed that many of your customers who formerly paid by cheque are asking you to issue drafts? (laughter).

Revenues Are Increasing

"We had already turned the corner last October in our revenues, and our revenues are increasing, not only that, but expenses are on the down grade. They will have to come down, they cannot go up. During the war things had to be done, but they have been finished and substantial savings have been made in many departments. One thing above all that is going to make our own finances more sound than ever, and to reduce taxation is the railway situation.

"It is true we are going on to-day with a heavy overhead, but I am going to let you into a little bit of household bookkeeping. On the last day of last month a year ago we had disbursed $79,000,000, while for the corresponding period this year we have only disbursed $20,000 000, and this means the saving of further expenditures, so don't you get the feeling that there is no good in keeping on in business or in piling up reserves. I know the Minister of Finance is going to have pleasant surprises for you in his next Budget, that your tax burden will be lightened and you will be enabled to retain a larger portion of your profits. One thing more I can refer to. Once upon a time it was politic to say Canada was prosperous. To-day Canada is prosperous and the corner was turned last October.

The European Situation

"I am not referring to anything political but we have all been thinking of the situation in Europe. We have been thinking of things that have happened, of the possibility of things to come, we have been thinking of our national self-respect. But there is one thing above all others I know we have been thinking of, and that is the freedom of those seas, so justly important to common civilization. Possibly of all the prizes of the great war is the knowledge that from henceforth there will be no danger or improper use of the Dardanelles. There is another thought, that above all nations that seem specially charged to-day with the duty, perhaps not charged, but perhaps taking that duty of trying to see that the world is kept safe, of trying to see that war shall cease and that nation is our own Mother Country. That little Island to which the world owes so much is still unselfishly on the job.

"She has done perhaps more than any other nation has done, having spent the lives of her best, and also her millions, she is still standing first for the sake of our common humanity, Christianity and civilization. Our hearts have gone out to her, and in the confidence that Great Britain seeks no selfish aim or no selfish war. The wars of conquest are past, but there is still room to strike a blow for the weak and the helpless, and Great Britain will find her children where they always were."

C. C. Ballantyne is Optimistic

C. C. Ballantyne, former Minister of Marine and Fisheries, introduced by Chairman Birkett, also expressed ex-

S. H. ALEXANDER

of Wood, Alexander and James, Hamilton, Ont., who spoke at the annual banquet of the Canadian Wholesale Hardware Association in Montreal.

ceedingly optimistic views regarding the future. His address was as follows:—

"President and Gentlemen: I certainly feel very much at home around this festive board to-night. I see many old business associates with whom I have done business for thirty years or more. I thank you for having invited me here to-night. I also wish to take advantage of this opportunity of offering my congratulations to you, Mr. President, as chairman of the Wholesale Hardware Association. I also congratulate you on the wisdom of your selection of the principal speaker of this evening.

"It would seem that it is ten years or more since I have been a guest here, but it is my fault, as I have been honored with an invitation to be your guest whenever you have held your annual banquet. However, I was called upon some five years ago to prepare for other duties for which I was not accustomed to and I went prepared to do my bit.

"I have greatly enjoyed your hospitality, the liquids and your excellent songs. Now just another word in reference to the ups and downs referred to by Sir Henry Drayton. I am also among the 'downs.' Nevertheless it has brought happiness in its wake for I am once more attending to business. In business we have attached a great deal of importance to our turnovers. I concur fully in all Sir Henry has said to you to-night regarding the improvements in trade and the bright future for business men in the years to come. If our turnover is high we look for a large gross profit and a large net profit. There are increases in the various businesses I am connected with. Canada has truly turned the corner and we can look forward with absolute certainty during the next year and the years to come.

"I feel satisfied you will do more than break even. The Canadian Wholesale Hardware Association and its members form a very important part in the commercial life of Canada. Those who have travelled throughout Canada have noted the big developments of the wholesale hardware business. When we look at the large wholesale hardware houses in Vancouver, Calgary, Edmonton, Winnipeg, London, Hamilton, Toronto, Montreal, Quebec, St. John and Halifax, we realize the important role you play in the development of Canada. In the hard times you had to exercise good judgment, and be lenient with your debtors. This applies particularly in Western Canada, where the wholesalers have had to carry large debts on their books. You have done very much in carrying on the business of Canada, and on carrying on during the trying times and putting Canada in the better position she is in to-day. Your association has prospered due to your initiation and good judgment, and in my business I have also come into close contact with your Secretary, Mr. Hardy, and you will endorse my views that no more able or thorough man could be placed in charge

GEO. C. DAVIS

Frothingham & Workman, Ltd., Montreal, re-elected to the Executive Committee Canadian Wholesale Hardware Association for 1922-23.

of your affairs than our good friend Mr. James Hardy."

Senator Webster Speaks

Senator Webster, introduced by the chairman, stated that he had not expected to be called upon as a speaker and it came as quite a surprise to him. He referred to his association with the hardware trade many years ago and also the pleasure it gave him to get out among the trade when he belonged to the Dominion Travellers' Association. Senator Webster spoke as follows:—

"Why am I here? It is because of the reason of my assoication with the hardware trade many years ago. They were perhaps the happiest years I ever spent when I worked in one of the hardware warehouses, in carrying pliers upstairs, rolling nails into the cellar. It is to me quite a delight to see so many of the young hardware men of that day who are to-day proprietors. I must say I never anticipated in those days of packing cutlery and other goods, of being associated here to-night at your annual banquet.

HECTOR PRUDHOMME

of A. Prudhomme & Fils, Ltd., Montreal, who was re-elected to the Executive Committee of the Canadian Wholesale Hardware Association for 1922-23.

"I have much pleasure in remembering those days of long ago, when we met with the competition such as has been spoken about to-night, but the merchants overcame their difficulties and struggles, and I am satisfied that as Sir Henry Drayton said 'there are good times ahead for all of us.'

"We are desirous of having the best laws possible for the Dominion of Canada, and we recognize we have a wonderful country. On the return of prosperity Canada will stand out foremost of all nations of the world.

"I was much impressed on going on a tour this summer of the way Canada was held in high esteem in Scandinavia, Holand and other countries, and I had the opportuity of speaking about Canada and her resources. The desire was evident to know all about Canada, and a desire to come out to this fair Dominion. So I trust proper immigration laws will be enacted, for this country needs millions more of population and we must attract to this country men who will really take their place in our citizenship. Barren lands will be occupied by settlers, who will be customers of the men in the hardware business."

Maritime Visitors

The association had as guests two members of the Maritime Wholesale Hardware Association, these being Messrs. McAvity and Guy Morton, the latter being President of the Maritime association. Mr. Morton spoke briefly as follows:—

"There are a good many reasons why I should not have attempted to make a speech to-night. I am not an orator. Our chairman has told us many things of interest.

"I do wish to express my pleasure at having been able to attend here to-night. It is a long time since a member of the Maritime Association has attended your banquet, but that is our fault. We are a long distance from here, and I wish to thank you for your courtesy on behalf of my collegues, Mr. McAvity and myself. We have an annual meeting every year. We do not stage a banquet like this, but we hie away to a watering place each summer and we will be pleased to see all members of the Wholesale Hardware Association at any of our gatherings." Voice: (we'll all come down). Mr. Morton: "Come along, we'll make you welcome. Don't forget your golf sticks."

Address by Wm. McMaster

The chairman referred to the fact that Mr. Ross McMaster was to have been one of the speakers but that he found it necessary to leave early on ac-

count of a trip which he was taking to the west. The chairman stated however that they were fortunate in having Mr. William McMaster there and the latter on rising received a hearty ovation. Mr. McMaster addressed the gathering as follows:—

"I realize that I stand up with great diffidence as I am surrounded here by ex-Ministers and Senators. I wish to express my thanks to the president and the members of the Wholesale Hardware Association. I know the nature of gatherings of this kind. The men in the trade get to know each other better. In everything there is always that human element existing, for when we are getting together we can rub off things that at a distance seem unsurmountable.

"There is compensation coming to the hardware trade. Price cutting is a thing of the past, and is not flourishing under present conditions. The jobber realizes the necessity of co-operation between jobbers and manufacturers. The jobber and the manufacturer can work together to the advantage of both, and I feel there are many ways of

GEO. W. MURPHY

J. S. Mitchell & Co., who was elected to the Executive Committee, Canadian Wholesale Hardware Association.

smoothing troubles out to mutual advantage.

"In a trip I took to the Orient last winter, I found Canada stood very high in the esteem of Australia and New Zealand. New Zealand wanted to trade first with Great Britain and afterwards with Canada. New Zealand has more in common with Canada than Australia and Canada is taking a place in the world's trade. I might also refer to your guest of honor. I have during my long career of business had occasion to go before the Minister of Finance, and while Sir Henry did not give us all we asked for, at the same time when we went away we felt that we had no kick coming."

Charles Britton

Charles Britton of Gananoque, introduced by Chairman Birkett as the man who had ushered him into the Canadian Hardware Association about twenty years ago, made a plea for a greater degree of Christianity and good fellowship among business men. He also paid a glowing tribute to the stand which Great Britain has always taken in her fight for the rights of the weaker nations. Mr. Britton who is eighty years of age made a strong plea for greater unity among the nations and the elimination of war. Mr. Britton also advised the young men present to respect their seniors and give heed to the advice of older, experienced business men.

Need of Immigration Emphasized By Alex. Prudhomme

"We have heard Sir Henry Drayton with a great deal of attention and what he had to say to us," stated Alex. Prudhomme, of A. Prudhomme & Fils. "I was greatly interested in the figures he gave us when he showed us how the Dominion of Canada had developed her export trade.

"The Dominion of Canada is a very wonderful country, as we have unlimited resources in mines and agriculture, and to the full development of our wonderful heritage there is a need of immigration. A few months ago I had occasion to make a trip to the Maritime Provinces, which is the first time I had ever visited them. I was highly impressed with the Provinces of Nova Scotia and New Brunswick, but I noticed particularly how sparsely settled these fine provinces were. We have need for more men and women, women in particular, for what is a man without a woman? We must have the first quality of immigrants, and if we can get them in sufficient quantities we shall make a wonderful success of our country.

"We need the good sound immigrants to help us build up Canada, to feed our trans-continental railroads, and by doing this the burden that we are carrying to-day will be a burden no longer.

"I might say to Sir Henry Drayton, as he might be again a Minister of Finance, that the French Canadians are very proud of the Province of Quebec, which I am glad to say has a surplus. Quebec during the past twenty-five years has developed steadily and surely. We have splendid schools, good roads and a province of prosperity, so that I hope that when Sir Henry Drayton is Minister of Finance again he will have a lender from the Province of Quebec to his own government.

"Quebec has had splendid crops this year. The farmers depend on hay, cheese and other products for their income. In previous years many farmers did not have enough grain and hay to feed their cattle and many who had always paid cash for their supplies were obliged to ask credit from the men they bought from.

"However, the crops this year are splendid and will enable them to pay off any debts which they have contracted. The French-Canadians are conservative and their finances as a rule are always good. The lumber situation is improving and there will be increased prosperity and splendid business during the coming year."

Ovation for James Hardy

During the evening, several references were made regarding the splendid work which Mr. James Hardy had done for the Association, and when Mr. Hardy was called upon to speak, he received a hearty ovation.

"I desire to thank you all," said Mr. Hardy, "for the kind ovation, and I can assure you of my appreciation. I think I have been present at every banquet this Association has had. In fact I was the original secretary, and probably William McMaster will recollect a conversation we had when he wanted me to fill the position of secretary.

"I do think in the position I have held that I have been able to assist in stopping a lot of stringent abuses, and the work has always been a pleasure to me."

A Good Story Teller

"I can say with the utmost sincerity."

ALBERT J. TEAKLE

The Herman Younge Co., Quebec City, who has been elected to the Executive Committee, Canadian Wholesale Hardware Association.

said S. H. Alexander of Wood, Alexander & James, "that this is one of the happiest nights of the year to me. It is a night when we can show in a tangible way our feelings to the Manufacturers' agent. Here it is that we get the drops of crumbs from the rich man's table, but we hope to get dollars. We get together and have a heart to heart talk. I must also refer to the special honour paid to this Association when Sir Henry Drayton came to talk to us."

Mr. Alexander convulsed the crowd with several witty stories, one of which dealt with a Scotchman who was looking for a shilling which he had lost in the oats.

Toast to Chairman

W. P. Kearney, vice-president and general manager of the Dominion Chain

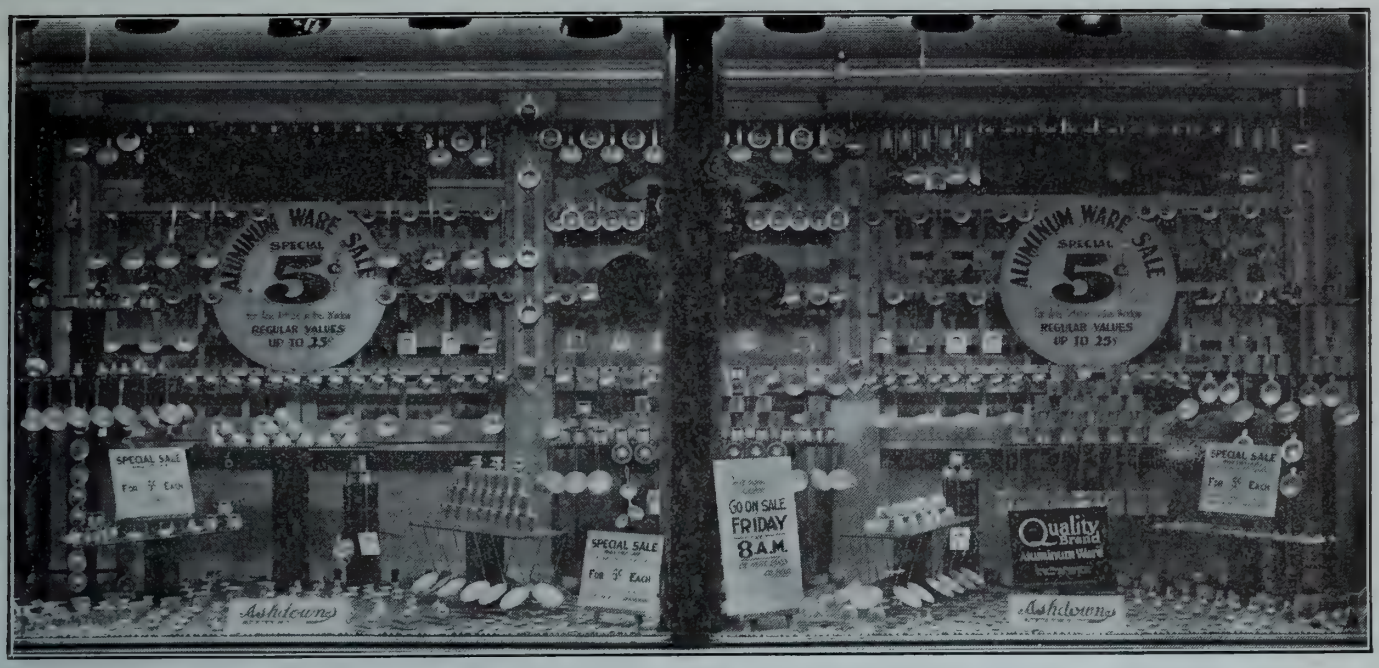
Short and Snappy Campaign Sells Large Volume of Aluminum Kitchen Utensils

Grouping of Aluminum Ware at Bargain Prices and Concentrating Ads and Window Displays on This Line Result in Big Turnover of Merchandise—Large Volume at Small Margin of Profit is the Secret—No Telephone or C.O.D. Orders—For Fall Preserving and Housecleaning

Some original ideas of display are developed in this arrangement of aluminum ware which give it an effectiveness seldom achieved. This is a grouping of utensils having regular value up to $3.50 for a set price of $1.39. Banners bearing the words "Special Sale" were placed in the windows and an announcement when the sale would commence. Such displays were used in conjunction with newspaper ads by Ashdown's (retail hardware) in Winnipeg and the sale brought a large turnover of goods plus a great deal of valuable publicity. Window was arranged by A. Ordronneau.

A NUMBER of retail hardwaremen have recently been conducting special sales of kitchen utensils by the grouping of certain articles at a fixed price. In most cases these sales have been put over in a big manner and a considerable turnover of business has been done. The photographs shown in this article illustrate the wide range of articles of aluminum ware which can be included in a sale of this kind, these being grouped at a price of $1.39 in one instance and a five-cent sale in the other case. Most effective window displays played no small part in the success of such a sale as conducted by the Ashdown retail hardware in Winnipeg.

In each of these cases arrangements were made for a supply of aluminum ware of a large variety which was put on sale at a price of five cents, a similarly large assortment at 49 cents and another lot which sold at $1.39. Discussing the sale with W. J. Illsey, manager of this store, it was pointed out to Hardware and Metal that these prices are of course optional with the dealer putting on the sale, but the object is to make a quick, snappy turnover at a small profit rather than a slower sale at a larger margin of profit. It is necessary to bring to the notice of every prospect the fact that this sale is something original, that it offers unsurpassed opportunity for completely stocking the kitchen with those utensils which lighten the labor of preparing foodstuffs. An appeal may be made to the pride of the housewife in having a complete array of such kitchenware and being able to put in a complete supply at a cost ordinarily equal only to that of a few of the articles, but the chief idea is to stimulate prospects to immediate action.



No C. O. D. or Phone Orders

Mr. Illsey states that the articles shown in these windows were strongly advertised in the local newspapers for two days prior to the sale and the goods were on exhibition in the store windows at the same time and up to the afternoon prior to the opening of the sale. No goods were sold until the morning of the opening at eight o'clock and no C. O. D. or telephone orders were accepted. One of the ideas is to use such a sale as a drawing card to bring customers into the store where they would become better acquainted with the stock carried, the location of the various departments, and offer the store an opportunity to make them feel at home so that there would be less hesitancy on their part in coming into the store on future occasions or of immediately linking it up with requirements of hardware as they become apparent.

In some cases these sales were conducted with many other stipulations such for instance as no delivery and no wrapping, but in the case of the Ashdown store it was not felt necessary to take these extreme measures.

Mad Rush of Customers

"The results of the publicity were very noticeable," said Mr. Illsey. "On Friday morning as soon as the door opened we had a mad rush of customers and they came in crowds until well on in the afternoon. They then came in

Few people will appreciate that such a large range of utensils of aluminum ware are available at a price of five cents each. This display is most effectively arranged showing a wide variety of utensils ordinarily priced up to twenty-five cents each. The displays were used for several days preceding the sale and did much to stimulate the turnover. A brief snappy campaign is required to put across such a sale. Window was dressed by A. Ordronneau.

lesser numbers right through until six o'clock. We sold out the bulk of the goods in the one day and were highly pleased with the publicity gained as well as the profit, although the latter was not on the ordinary basis of advance. We believe that judging from the results of this sale that while times are supposed to be hard the public are open to buy and have money to spend for real bargains in merchandise."

These sales have met with such success that they indicate the value of concentrating all attention on one group of articles. The advertisements and window displays contained no other articles to detract attention from the main object of the sale. The photographs indicate what attractive windows can be arranged with a wide range of kitchen utensils and the bargain idea influences a great many people. At this time of year when the preserving season is in full swing and when Fall housecleaning will soon be undertaken such a sale can be conducted with splendid results.

Fifty Stove Sales From a Demonstration

After Discouraging Start Hardwareman Tells How He Has Built Up Active Stove Trade—Profitable to Sell on Terms—Satisfied Customer Next Door to the Prospect Helps Make the Sale

VISITING the stove department of a hardware store this week, Hardware and Metal was interested in hearing how this merchant, who has had good success in developing stove business, handled his customers.

A customer entered, stating that his wife had seen a range at the fair and he wanted to investigate its merits. There was righteous enthusiasm expressed in the salesman's tone when he replied, "Well, it is one line which will certainly bear investigation."

Enthusiasm, which means active expression of belief, has been one of the basic principles on which this merchant has built a stove business that is worthy of mention. He has a line in which he and his salesman believe; advertising is concentrated on that line, and quality talk is concentrated on that line.

From Four Sales During Demonstration to Fifty

There is a great deal of discussion from time to time by hardware merchants as to the advisability of holding demonstrations. In this respect the record which has been made by this merchant should prove of interest.

Five years ago he held his first demonstration. The line was a new one in the town, and therefore new to the store. The result of one week's hard, conscientious work was four sales. Rather a discouraging beginning, but the firm does not know the word "quit." Through the next year they kept the line continually before the public and the next demonstration produced eight customers, barely enough to make it pay. The next year the number was again doubled, making the sales sixteen. The next time twenty-four ranges were sold, next thirty-five and last year they reached the high mark of fifty, these figures being for the week's work.

"Satisfied Customers the Best Advertisement"

The results are a splendid example of what perseverance and confidence may attain. There are too many men who would have grown lukewarm after the first failure, and been tempted to give it up as a bad proposition after the second.

You cannot build a successful stove department in a week or a year. It is only consistent, continued endeavor which brings success. Each year sees the number of stove sales grow larger, sees the firm more firmly entrenched in their position.

The motto of the store is, "A satisfied customer is the best advertisement." In no department is this so thoroughly cared for as in the sale of stoves and ranges. If a customer makes a complaint regarding a range that complaint is adjusted just as speedily as possible. Should a range fail to wear according to expectations the worn parts are replaced without cost to the purchaser. It is true that sometimes this works an injustice to the firm, but in the end it pays.

The merchant's argument that a firebox has been ruined by burning grease on it, may be perfectly correct and rea-

sonable, but it does not prevent your customer from telling her friends not to buy from you because the stove she bought did not prove satisfactory.

The store has followed the procedure of satisfying customers even if it had to pocket an unjust loss, and this merchant says that the plan is the most advisable one.

Find it Profitable to Sell on Payments

Hardware merchants frequently discuss the feasibility of selling stoves on easy payments and offer many reasons as to why they should not do so.

Most frequently they say that they do not want to sell stoves and have to take them back, yet if they do sell them they must have either money or the goods. That principle is very good but it does not follow that you cannot sell stoves on payments to people from whom you will not have to take them back.

There are a great many people of comparatively small means who cannot pay for a high priced range in a short time yet who want to buy the best. They are people who are morally responsible

(Continued on page 45)

Tourists Buy Many Accessories in Canada

Total Figures Show 617,285 Motor Cars Entered Canada in the Year and Each Visiting Car Spent $180 While in This Country—Want Extension of Lights on All Vehicles Regulations

THE DIRECT bearing which the construction and maintenance of good roads has on attracting tourist traffic is instanced in a summary of the official figures of American tourists visiting Canada in 1921, published in the current issue of Winnipeg Canadian Finance. During that year the government's figures showed that 617,285 automobiles entered Canada.

The figures respecting the influx of tourists recently issued by the Federal officials estimate that $108,326,600 was brought into the country in actual money spent by the visitors, the estimate being based on an average per diem expenditure per passenger. The sum of $180, it is estimated, was left in the country by each visiting car, the amount representing money expended by the visitors for necessities. It is pointed out that gasoline, oil and sundry expenses are connected with the operation of a car and hotel bills.

One of the most striking demands noted by the Ontario Legislature's Committee on Highways Legislation Consolidation is that for lights on all vehicles. Upon their return from a trip through Ottawa, Belleville, Kingston and Brockville, members remarked upon the frequency of such recommendations from constables and motorist organizations.

The committee, of which Hon. F. C. Biggs is Chairman, will visit the western end of older Ontario, working toward Niagara Falls. Their findings will probably be presented to the Legislature in the form of a private bill.

"Sport Business Beyond Expectations This Fall"

The hunting season is in full swing in most parts of the country and guns, ammunition, hunters' equipment and other such requirements are moving out well according to word received. The Proudfoot Hardware of Saskatoon, Sask., goes aggressively after this business making good use of such window displays as this. His business in such sporting goods has been beyond all expectations this year he states. and the credit for much of this is given to attractive window arrangements. A natural setting is given with the use of grain sheaves, animals, prairie scrub, etc. Note the wide range of articles including hunters' clothing, cartridge belts and pouches, thermos bottles, ammunition, guns, rubber boots, gun cases, revolvers, spring sport scales. Mr. Proudfoot has recently bought this business from Mr. Holding who remains in the employ of the store. Mr. Proudfoot was formerly in business in Herschell, Sask., for 7 years but sold his business to R. Tompsett who was formerly in business at Tamping Lake, Sask.

TORONTO, SATURDAY, OCTOBER 14, 1922

Fall and Winter Trade

WITH the Autumn season now at hand, merchants begin to feel a fresh stimulus to business and prepare for an active fall and winter trade. Summer vacations are over and the hot weather has practically passed. There is a general feeling that it is the proper occasion to put forth greater effort to secure a bigger turnover. During the summer period there is often a disposition on the part of the public to withhold from extensive buying. But with the approach of colder weather, the pressure of numerous seasonal requirements compel attention to household needs. Furnace time is fast approaching and heaters, stoves, stove accessories, ash sifters and similar goods again become prominent. Many fall lines provide popular opportunities for stimulating the volume of trade and commencing the fall and winter period with marked activity.

Preventing Fire Waste.

DURING THE past decade in Canada more than 3,000 persons have lost their lives in fires and insurable property having a value of over $250,000,000 has been destroyed by fire. Hardwaremen handle many commodities, the use of which, if abused, will bring danger of fire. Instruction as to use at time of sale will not only guard against such loss but give the customer more confidence in the retailer's advice. Then, too, the retail hardwareman is interested in fire losses from the standpoint of selling articles the purpose of which is protection, such as stove boards, asbestos sheathing, fire extinguishers, etc. The majority of fires are the result of inexcusable disregard of the most elementary safeguards and can be easily prevented. Retailers can play an important part in such prevention.

Definite Signs of Improvement

ALL SIGNS point to continued improvement in basic conditions in Canada. At the annual gathering of the Canadian Wholesale Hardware Association optimistic reports were given by hardware wholesalers from various parts of the country. Sir Henry Drayton, former Minister of Finance, and other prominent governmental officials gave data confirming these optimistic reports. Sir Henry Drayton pointed to definite signs that a clean cut tendency toward better conditions was apparent some months ago and this is being continued. National financing has been much aided by means of new tax impositions during the past year and revenues have been such that the likelihood of a reduction in taxation next year was mentioned. Should this prove to be the case it will be one of the first steps toward removing the burden of taxation on its people which any of the countries engaged in the recent great war, have taken. It should do much to assist the return of improved trading conditions and give a buoyant spirit of confidence to all.

The great wheat crop in Canada has been moving east at the rate of nearly two million bushels per day recently. Estimates of the size of the yield have placed it above the 393 million bushel crop of 1915 which was the largest in the history of the country, Although the acreage sown to wheat this year is considerably greater than that of 1915, the average yield per acre will be somewhat lower.

The Dominion Bureau of Statistics has published a preliminary estimate of the yield of cereals, placing the wheat crop for all of Canada at 388,733,000 bushels from a sown acreage of 22,630,900. This is an average of 17.25 bushels to the acre in comparison with 13 bushels to the acre last year when the total yield was 300,858,100 bushels from an acreage of 23,261,-224.

The visible supply of wheat in Canada is estimated at 3,-865,000 bushels greater than at the same time a year ago. The American visible supply on the same date showed a decrease of 10,934,000 bushels from that of September, 1921. According to Broomhall's estimate, the world surplus at the first of September was 776,000,000 bushels, and of this amount North America had 488,000,000 bushels.

This bountiful wheat crop has played no small part in righting conditions in this country.

* * * *

FOLLOWING the example of the motor car manufacturers, the bicycle manufacturers have announced lower prices. They expect such action to assist in widening their market and doubling sales within the next three years. There is a noticeable revival of interest in bicycling due perhaps to necessities of economy and to increased transportation fares in cities.

IT IS REASSURING to note that while professional stock manipulators figured a certain prominent Canadian steel producer could not continue its dividends and showed their sentiment by driving the price of this stock to considerably lower levels a few days ago, that this producer declared a continuance of usual dividend rates. In view of the fact that this company did not earn certain dividends paid last year, the present action indicates improving conditions and confidence in the future of the steel industry in this country.

INDICATION that all the rejections of incorrect weighing machines by Inspectors of the Department of Weights and Measures are not against the retailers' interests, is found in the fact that out of the five to six hundred weighing machines found incorrect in Toronto retail stores last year, three out of five of them were registering against the interests of the merchant, or in other words were giving overweight. There is little complaint to be made against an inspection service which protects the merchant in this manner.

THE ASSOCIATED Boards of Trade meeting in Owen Sound, Ontario, passed a resolution calling upon the Ontario Government to enact province-wide daylight saving legislation. Opinion among retailers throughout the province has been very much at variance over the advisability of enforcing such legislation and it is doubtful if it is wise to adopt it in a few places only, such as was the case this last summer. However it is questionable whether much notice will be taken of the action of the Associated Boards of Trade in the matter because of the fact that the farmer government in Ontario is unlikely to take action on legislation to which so much hostility has been shown throughout Canada and the United States on the part of farmers.

Events in the Trade

BUSINESS CHANGES

W. G. Butler, hardware and tinware, of Perth, Ont., is removing to Ottawa, Ont.

The tinsmithing and heating department of the firm of Ingram & Davey Ltd., hardware, St. Thomas, Ont., has been taken over by Alexander Lewis and Harold Holton, who have been associated with that department as foreman and assistant foreman. Arrangements have been completed to carry on the business in the same quarters under the name of Lewis & Holton.

PERSONAL

T. B. Williamson, of the H. S. Howland & Son Co., Ltd., Toronto, is touring by auto to Atlantic City to attend the convention of the American Wholesale Hardware Association next week.

H. H. Lyman, of Lyman Sight Co., visited the Montreal office of Hardware and Metal last week. Mr. and Mrs. Lyman are on their honeymoon trip to Toronto, Montreal, Three Rivers and Quebec.

W. A. May, hardware merchant of Creemore, Ont., has just returned, in company with Mrs. May, from a three months' vacation through the West.

TAYLOR HARDWARE AT COBALT IS BURNED

Cobalt, Ont.—Fire broke out in the George Taylor hardware store here. Panic-stricken at the sight of flames in the centre of the town, the thousand refugees from Haileybury, and citizens who feared another disaster, commenced to take their belongings from their dwellings and hurry to places of safety. With considerable difficulty firemen persuaded them that the fire would be confined to the building in which it had broken out.

The hardware store, which is one of the largest in Northern Ontario, may be a total loss. The cause of the fire is not known.

ROBBING THIS STORE BECOMING A HABIT

The hardware store of Geo. H. Dawson, Milton, Ont., was again visited by thieves on the morning of October 10. Auto tires, guns, cutlery and flashlights to the value of approximately $200 were reported missing. This is the fourth time in the last three years that this store has been the object of similar robberies.

RE-ORGANIZATION OF ONTARIO RETAIL FIRM

The retail hardware firm of Ingram & Davey Ltd., St. Thomas, Ont., has been re-organized. George A. Ingram, president of the old firm, is retiring from active business and George W. Davey, vice-president and general manager, becomes head of the new company, which is being incorporated under the name of the Davey Hardware Company, Limited.

Mr. Davey will have associated with him as members of the new firm, his brother, E. A. Davey, secretary of Ingram & Davey, Limited, for many years, and his son, G. Lawrence Davey. An Ontario charter has been applied for and the new organization will be completed as soon as it is received.

In conjunction with the business change, the company has disposed of its tinsmithing and heating department. Under the new management, many important changes are planned in connection with the store.

New departments are under consideration. The erection of a mezzanine office, across the rear of the main floor of the store, will be started in the near future. It is stated that this will give more room for stock.

The history of the Ingram & Davey firm dates back a quarter of a century.

GEO. W. DAVEY

President of the re-organized firm of the Davey Hardware Company, Ltd., St. Thomas, Ontario, formerly known as Ingram & Davey, Limited.

HARDWARE AND TINSMITH BUSINESSES DESTROYED IN NORTHERN BUSH FIRES

Among the hardware and tinsmith firms whose stores were burned in the bush fire which swept Northern Ontario were the following:—Norfolk and Rochester, Haileybury; Reilly-Allard Hardware, Haileybury; W. Meaney, tinsmith, Haileybury; H. N. Williams, hardware, Englehart. The branch of the Imperial Oil Co. at Haileybury was also destroyed.

OBITUARY

Donnacona, Quebec.—Edmour Cote owner of the hardware business of Cote and Frere is dead.

MAYOR AT FUNERAL OF LATE JOHN P. SEYBOLD

Montreal.—Attended by many business men and associates the funeral of the late John P. Seybold, whose death was announced in last week's issue of Hardware and Metal, took place on Saturday afternoon from the family residence, 3 Forden avenue, Westmount.

Mayor Martin and members of the executive committee were present from the City Hall to show their sympathy with Ald. H. B. Seybold in his bereavement.

Four sons were the chief mourners, Alderman Herbert B. Seybold, Gordon C., Leslie E. and J. Clifford Seybold of London, Ont., with his brother J. Arthur Seybold, Ottawa, two grandsons, Edward and Hugh Seybold, and his brother-in-law, G. Ernest Blackburn.

FREIGHT RATES AGAIN

Woodstock, N. B.—A meeting of potato shippers and railway representatives was held last week to discuss freight rates. The shippers stated that there was a danger of losing the potato industry in New Brunswick owing to excessive rates.

WESTERN CANADA NOTES

D. A. McDonald, manufacturers' agent, Winnipeg, is on a business trip to Calgary and Edmonton.

P. J. Sutherland of Sutherland Bros., hardware brokers, Winnipeg, has just returned from a six-weeks' business trip as far west as the coast and reports that all along the line business is showing an improvement.

Lower Prices Help Revive Cutlery Trade

Stimulate Trade by Educating Buying Public That Prices Have Been Reduced to Within Reasonable Reach of Former Levels—Christmas Season Should Bring Revival

ACCORDING to Canadian representatives of English cutlery manufacturers and hardware jobbing houses, cutlery is not yet selling in quantities that can be compared with pre-war years. Jobbers are reported as even sacrificing their stock in the hope of establishing a market, but with results which are far from encouraging.

The chief reason given by retailers for not buying was that the public were not willing to pay prices asked. A farmer would pay 50 cents to $1.00 for a jack knife, but was reluctant to exceed this amount. A lady would purchase a set of cased carvers from $5.00 to $10.00, but beyond this figure was generally considered too high.

"What is really required to-day to remedy the situation, and bring cutlery sales to their former sales-volume is to educate the buying public that it is reduced, and on many lines purchases can be made within reasonable reach of pre-war prices. It is recognized that the retail dealer is the chief factor in doing this and where stocks of high priced goods are still on hand, the distasteful procedure of getting rid of this at sacrifice prices usually has to be carried out," said one representative to Hardware and Metal.

It was also pointed out that what cutlery the trade were demanding especially in pocket knives and jack knives, was chiefly of the cheaper class, as imported from Europe.

Fall and Christmas Trade

The fall of the year, and up until Christmas, is the season for carving sets. Before the war most hardware stores sold these in good quantities, and some merchants even specialized on them. High prices, and inability to purchase in recent years, have also had their effect, and trade in these has been greatly hampered. In the past year or so merchants have bought limited quantities but prices on them were high. Many of these same sets are now on the market at much lower prices than last year, and if the public can be shown that reasonably priced carvers are obtainable, this year should again bring good sales returns in a line which was formerly considered one of the uppermost in the cutlery department.

There are two things which are repeated in the description of nearly all successful stove departments. Those are the record of customers, and clean displays. The reason is that you can rarely find a successful department in which these features are not evident.

In this day of keen competition nothing should be neglected which may be brought to bear upon a customer. The ability to point out neighbors of a prospect who have bought a similar range will turn many a sale.

GEO. A. INGRAM
Retiring president of Ingram & Davey, Ltd., retail hardware firm, St. Thomas, Ontario.

FIFTY STOVE SALES

(Continued from page 42)

and will pay if given time. This merchant uses care in extending such credit and has very little complaint. His requirements are one-third cash in all such instances. A "retain title" note is signed for the balance.

The same charge is made in this store for both time payment stoves and regular credit, but a discount of 5 per cent. is given customers who pay cash for their stoves.

WHOLESALERS EXPRESS OPTIMISM

(Continued from page 39)

Co., Niagara Falls, Ontario, took the opportunity of proposing a toast to the Chairman, Thos. Birkett. In well chosen remarks Mr. Kearney proposed the health of the chairman which was endorsed by hearty cheers and tiger by those present. In a happy reply Mr. Birkett referred to "Bill" Kearney as his old college chum.

Presentation of Razors

The Auto Strop Safety Razor Company gave, with their compliments, one of their razors to each man attending the banquet. In making mention of this, President Birkett stated that he hoped everyone present would turn up in the morning with clean faces as a result of using the gift from the Auto Strop Company, and on a motion from the President a standing vote of thanks was taken for their thoughtfulness.

Sir Henry Drayton, the guest of honor, was presented with a gold plated razor.

Jimmy Rice, entertainer, accompanied by a number of other artists provided a varied and pleasing program of music.

HARDWAREMAN ACTING MAYOR OF MONTREAL

Herb. Seybold of Starke-Seybold Ltd. Montreal has been acting Mayor of the city and has presided at quite a number of important functions during the past few weeks. He represented Mayor Mederic Martin at the inauguration of the Biological Building at McGill University and also at the third annual convention of the Purchasing Agents' Associations in Canada. Herb (as he is familiarly known) won a sweeping victory in the election in Montreal and has received congratulations from a host of his friends in the hardware trade.

"Camouflage"

ANOTHER example of the fact that "Five and Dime" stores of the chain variety do not always compete successfully with the prices of goods in the average retail hardware store, was supplied in a comparison recently made by a customer desiring screw hooks. Entering a 5c, 10c and 15c store on Yonge Street, Toronto, it was found that a small screw hook was priced at eight for five cents. This worked out at seven and a half cents per dozen. Desiring a little larger size, the customer went on to a retail hardware store and secured the size desired at the quotation of eight cents per dozen.

This merely serves to emphasize that the general public can secure relative value wherever the purchase is made, whether it be the chain, departmental or retail hardware store. It also demonstrates the fact that if hardware men adopted the practice of putting up smaller quantities of goods at prices in proportion, such a method would naturally give rise to the general impression that the goods were on a lower price level, whereas this is only "camouflage." In the example quoted above, it is seen that when worked out to a common basis, the hardware store gives the better value.

Letters to the Editor

THINKS CO-OPERATIVE SELLING NECESSARY

As a great many small manufacturing establishments have had to suspend operations during the last two years owing to smaller demands for their product and bad debts, it might be of interest to those remaining in existence to consider whether some better and cheaper way of marketing their product cannot be adopted.

Because there were so many difficulties involved in making a profit out of the business, I was connected with in the past I have come to the conclusion that for a country so vast and thinly populated as Canada the ordinary method of marketing will not answer, and the following comments and a new scheme is suggested.

The most important items confronting the small business man are: 1. Selling, 2. Distribution, 3. Collections.

The story of business life would be complete if you add manufacturing, but this is the least of one's troubles as a rule.

If you cannot afford to send an adequate sales force on the road to cover Canada thoroughly, you try to sell agents, jobbers or wholesale houses. With some, of course, you are successful, but others, and this may mean the majority, do not feel interested in the small number of lines you make.

These are days of small buying even for big houses and the cost of laying down a one or two case lot of your goods 1,000 or 1,500 miles away makes the price almost prohibitive.

Perhaps you conclude your failure to sell is the result of not advertising, so you do what you can, an occasional half or full page, but your pocket-book is not very full and if you continue it has to be on such a small scale that it is missed ninety-nine times out of one hundred.

Near home results are better, but if you are running salesmen on salary and expenses ask them to be frank and tell you whether they do not lose out sometimes because of the lack of weight behind them.

Long Hauls Boost Price

For distribution the long hauls certainly boost the price and the only way to reduce this cost is carload shipments. Even with your local trade this also has an effect particularly on freight lots under one hundred pounds weight.

Collections on first class accounts are just as easy for small amounts as they are for large, but there is a higher percentage of cost involved for you all the same. Bank charges, mailing invoices, statements and letters, sending drafts, etc., will cost just as much for $10 as for $100.

Having pointed out some of the troubles and difficulties, I want to offer a scheme which should materially help to overcome a great many of these difficult problems.

Supposing your annual output averages around $50,000 a year and nine other companies of associated but non-competitive lines and similar turnover combined together on these problems. You then have a half million proposition to consider.

Assume that each individual company to produce its present turnover employs two salesmen with salary and expenses averaging $300 per month per man. Total cost selling, salesmen only, $72,000 a year.

Two men cannot cover Canada properly. You are only touching the high spots. Combine the efforts of these ten organizations, however, and place ten men on the road and even assume that they cost 10% more, there is still only a total cost per year of $48,000, a saving of $24,000, which is one third of the cost now.

With ten men carrying the combined lines, the ground will be more thoroughly covered, and the prestige each man will have will be enhanced tenfold also. Big buyers are usually such busy men they have not time to spend as a rule with a salesmen carrying just a few lines, and the consequence is that even if the salesman penetrates to the inner sanctum he is more or less made to feel that the interview must be a very brief one with the regrettable fact that often the talk is barren of results.

It is easy to see from the argument on selling by direct representation how also your trade or consumer advertising could benefit in the same way. Constant reiteration is the keynote of good advertising. If you cannot do this your efforts are more or less wasted. If the same amount of money spent individually was done collectively on this advertising end of your products there is not much doubt that you could put it across.

Catalogues and periodic sales letters of course enter into this also, but the same arguments apply.

Some of you may consider that individual efforts produce the best results as it is not possible for one man to make specialties of a large range of samples. Do not forget, however, that where you formerly had one or two men working for you, under this scheme you now have ten.

Distribution

It is quite logical to assume that the total volume of sales made would increase, but to what proportion I would hardly like to offer an opinion. This point, however, brings up the question of distribution and even if it were not possible to make carload shipments to one buyer it certainly is within the bounds of possibility that it could be done to all the large centres in this country. Without entailing any large expense, warehouses could be used at certain points and stock kept there to be drawn on as necessary for repeats or small orders.

Collection of Accounts

It is more or less easy for a concern buying from a small manufacturing establishment to shelve the accounts for an almost indefinite period and even to want special dating, and terms other than those arranged, and in a great many cases get away with it.

These are practices taken from the writer's own experience and although the percentage is not large yet every case that occurs means a distinct loss of the interest on the money invested in that particular order not to speak of the annoyance and extra office work entailed in obtaining satisfaction eventually.

Supposing however the man needs some other line produced by another member of this co-operative scheme, there would be less possibility of the tactics referred to being employed in the first place and far less chance of its being a long drawn out affair if he found out that because of the attitude he has adopted his supplies in the other lines are shut off.

Some of you may say that what has been suggested would not be possible under the arrangements you are now working on because of the bulk of your business coming from the wholesale houses.

You would, however, have your own wholesale houses under this arrangement with a voice in their operations.

I have so often had the statement made to me by wholesale houses that Canadian manufacturers determine their prices on the basis of the laid down cost of the imported articles plus a little something extra by way of paying for sentimental or patriotic reasons.

Many a man has been wrongly punished on circumstantial evidence alone and possibly this accounts for such a widespread opinion of this nature.

Just look for a start at the tremendous difference in the market between ourselves and the States. We have about one tenth of the population and therefore logically one tenth of the output.

Production Keynote of Economy

Production is the keynote of economy in business, and if we had the same market there is no doubt our costs would be reduced.

Consequently the problem for the Canadian producer is not one of juggling with figures to keep prices up to the foreign level in order to pay large dividends, but if it is at all possible to produce any given article at a price that will compete with that imported.

During a very strenuous experience covering the last four or five years the organization I was connected with were seeking new lines to put on the market to counteract the decline in volume of those already made and the hardest part of the problem was not what we could make, but what it would pay us to manufacture.

So many of the lines investigated entailed too large an outlay for tools and equipment that it was very evident with the volume that could be obtained there was no possibility of making any profit at all if the price was to be a reasonable one.

Someone is sure to ask why not then boost your volume by export? The export question, the purchasing of raw material, and the segregation of particular parts of similar character into each factory for quick and cheap production are all points to consider in the final working out of these suggested changes to our small manufacturing business.

As a final windup to this proposal I submit a definite scheme that could be tried out for a period of any desired length without materially disturbing the economic construction of any organization.

The Plan

If it is found workable and a success it might be enlarged upon and placed on a more definite basis.

(1) That a separate company be founded for the purpose of selling, distributing and collecting accounts for any number of small concerns unable to bear this expense themselves.

(2) Each concern joining the organization to pay an entrance fee of $250 and to appoint one member to a general board of directors, without salary, to whom shall be given an equal voice in deciding any line of policy to be adopted.

(3) No further fees to be charged unless sanctioned by a 2/3 majority and all future expenses incurred due to selling, advertising, collections and office expenses to be borne pro rata by each concern according to the amount of business obtained by this new organization.

Payments of amount due by each concern to be made monthly as soon as statement is furnished.

(4) Each of the individual companies concerned may if they feel so disposed still continue to run their existing sales force as a separate unit but undertakes not to undersell or offer prices below what are fixed by the board of directors.

(5) Any profits resulting from the operations of this new organization to be distributed on the pro rata basis of sales made each year or if the directors see fit to use it as a reserve fund with the proviso that an account be opened in the name of each company and that they are credited with the proportion due them.

(6) That any individual concern may withdraw from the organization providing three months' notice is given and all arrears of money owing are paid and in the event of any profits being due this company at the end of the financial year they shall be paid over after balance sheet is issued together with any accrued profits from previous years.

(7) That a competent manager shall be appointed who shall devote the whole of his time and energy to the undertaking and be answerable to the Board of Directors only when in session and not as individuals.

He shall have full power to engage his own staff and do whatever is necessary but subject to approval of the directors of the Company.

This outline is of course merely given as a suggestion and may be modified to suit the need of those participating.

It is however a foregone conclusion that providing each unit of such an organization is determined at the start to make a success of such a venture and are willing to put all selfish thoughts and ideas on one side and work for the common good then such a scheme cannot help but be a successful and profitable one to all concerned.

Don't however try it unless you are willing to wait sufficient time to bring results.

Rome was not built in a day and it is next to impossible to get together a real first-class organization working smoothly inside six months.

Finally, if you want a larger turnover with consequent decrease of costs and overhead which means naturally more profits, seriously consider my suggestion.

Yours for a greater Canada.

F. TISSINGTON,
Sheet Metal Tools & Hardware Co.,
1191 Bathurst St., Toronto.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

GASOLINE COOK STOVES

A. E. Wrigglesworth, Sherbourne, Ont.—Please advise us the names of makers of gasoline cook stoves.

Answer.—Detroit Vapor Stove Co., Detroit, Mich.

CROQUET SETS

The Montreal Supply Co., Ltd., Montreal.—Kindly advise where we may procure croquet sets.

Answer.—H. Rademaker & Sons, Grand Rapids, Mich., and Walter Bentley Co., Niagara Falls, Ont.

COLONIAL LAWN MOWER

Simmons Bros., Kingston, Ont.—Will you kindly let us know who manufactures the Colonial lawn mower?

Answer.—The Coldwell Lawn Mower Co., Newburgh, New York.

STEEL SHAFT SPLICES

Messrs. J. F. Henderson, jobbers, Vancouver, B.C.—Can you supply us with the name of the manufacturers of steel shaft splices for repairing ends of broken buggy shafts?

Answer.—The Hercules Shaft Splice Co., Stratford, Ont.

ANOTHER extensive list of price changes serves to again emphasize the vital necessity of closely following hardware market developments week by week. The list of declines is more extensive this week than has been the case for some time past. Lower prices are noted on galvanized sheets, black sheets, blue-annealed sheets, gasoline, automobile tires and tubes, sand paper and emery cloth, hockey pucks, and certain makes of meat choppers. Cement quotations are slightly lower in some cases, while certain Winchester rifles and shot-guns are now reported on easier levels.

IN KEEPING with the majority of recent price changes, however, another heavy budget of increases is recorded. Practically all grades of rubber roofings are advanced between five and ten cents per roll, surfaced roofings and shingles, however, remaining unchanged. Building papers and sheathings, asphalt felt, tarred and carpet felt each register varying advances, while higher quotations are also in effect on Hot Blast heaters, fuel oil and sash weights. Tin and lead show strength in the ingot metals, certain slight advances being noted on tin. Certain sizes of boiler tubes are reported with higher prices, while it is stated that manufacturers are contemplating an advance on valves and compression bibbs. Lead and zinc products are now on a firm price basis, due to the continued strength of metals in primary circles.

HARDWARE business is generally reported very fair, and during the last few days considerable improvement is recorded in both wholesale and retail departments, this being attributed to the advent of cooler weather. Fall lines are reported moving nicely, with timely consumer interest being registered in stoves, stove accessories such as pipe, electric and oil heaters, and companion lines.

Montreal, Que.

MONTREAL, October 12.—A lengthy budget of price revisions appears on the local hardware markets. Changes in an upward direction are very prominent, and include such lines as rubber roofing, certain grades of building papers and sheathings, radiators and hot water and steam boilers. Carpet felt, tarred and asphalt felt are also higher in price. A slight upward revision is made in zinc and copper scrap on waste material markets, a strengthening tendency being evident in recent weeks. Manufacturers of oil and molasses gates state that an advance of over twenty per cent. is now effective in their prices but new net quotations are not yet available.

Lower prices are announced on sandpaper and emery cloth, garden or lawn hose for next season, and hockey pucks. Gasoline is reduced one cent. per gallon. Quotations for spring bookings on tires are also reduced. An upward revision in certain valves and bibbs is looked for in some quarters. There is a feeling among local distributors that the upward tendency apparent in the steel industry has nearly spent itself, and opinions are expressed that peak prices have been reached on such lines as galvanized sheets and bar products.

LOWER PRICES ON SAND PAPER AND EMERY CLOTH

Montreal.

Through a revision in discounts both sand paper and emery cloth are reduced in price. B. & A. sand paper is now quoted at less 17½ per cent., Imperial or Star at less 17½ per cent, and emery cloth at plus 7½ per cent.

REVISION IN TIRE PRICES EXPECTED IN NEAR FUTURE

Montreal.

Manufacturers of auto and bicycle tires announce that a revision in prices at an early date is probable. While present price levels are generally recognized as being on a fair basis when production costs are considered, keen competition and a rather unsettled market has been, and is still in evidence. According to one producer, "lower prices later in the month would not be a surprise." Bookings for next season will commence around the 15th of this month and this is thought to be near the likely date for any change.

LOWER PRICES ON HOCKEY PUCKS THIS SEASON

Montreal.

Manufacturers of rubber hockey pucks announce that quotations for the coming season will be somewhat less than prices ruling last year.

HIGHER QUOTATIONS ON TARRED ASPHALT FELT

Montreal.

Tarred felt and asphalt felt are advanced in price, both products showing an increase of twenty-five cents per 100 lbs. The former, in 7, 10 and 16 oz. weights is now quoted at $3.45, and asphalt felt at $4.00 per 100 lbs.

GASOLINE REDUCED ONE CENT PER GALLON

Montreal.

A reduction of one cent per gallon is made in quotations on gasoline, and motor grade is now quoted at 33 cents, higher grade at 36 cents. Coal oil prices are unchanged, this product still selling at 21 cents.

ROOFING ADVANCED FIVE TO TEN CENTS PER ROLL

Montreal.

As pointed out in recent issues of Hardware and Metal there has been a very strong tendency in the market for rubber roofing, and higher prices in most quarters were considered pending. Manufacturers now announce that quotations on the various weights of roofing in rolls will be higher, better grades being advanced ten cents per square and lower grades five cents. Surfaced roofings and shingles remain at former quotations. Following are new net quotations on the Barrett line:

ROOFING—Per roll.
Tomahawk 1 ply $1.30; 2 ply $1.55; 3 ply $19.0; Panamoid, 1 ply $1.45; 2 ply $1.80; 3 ply, $2.15; Everlastic, 1 ply $1.65; 2 ply $2.00; 3 ply, $2.35 Ready rofoing, 2 ply, $1.80; 3 ply $2.15.

PAPERS AND SHEATHINGS ALSO HIGHER IN PRICE

Montreal.

Higher prices are also effective on certain grades of building papers and sheathings. The No. 2 dry and tarred fibre papers are increased ten cents per roll while dry and tarred straw sheathing is advanced forty cents per 100 pounds. Following are present quotations.

PAPER—	Per 400 ft. roll.
Dry Fibre, Anchor No. 1, Empress, Cyclone	1 15
Do., Anchor No. 2, Elephant, No. 2, Jolliette	0 75
Do., Surprise and Stag	0 80
Tarred Fibre, Anchor No. 1, Cyclone	1 20
Do., Anchor No. 2, Elephant, No. 2, Jolliette	0 95
	Per 100 lbs.
Monarch Sheathing, white	550
Do., Gray	4 50
Red Star heavy tarred straw	3 80
Imp. white Sheathing	5 50
Imp. Gray Sheathing	4 50
Red tSar and Scythe brand rdy straw	3 55
Spruce Sheathing, 36" and 72" wide	6 00

SUBSTANTIAL ADVANCE IN OIL AND MOLASSES GATES

Montreal.

Manufacturers of the Perfection and Stebbins oil and molasses gates announce an increase of over twenty-five per cent. in prices on these two lines. New net prices are not available from distributing houses.

CARPET FELT NOW $4.00 PER 100 POUNDS

Montreal.

An increase of ten cents is made in quotations on carpet felt, and this is now quoted at $4.00 per 100 lbs.

STEADY TONE NOW SEEN IN CORRUGATED SHEETS

Montreal.

Changes in the market tone for corrugated sheet are that demand is somewhat quieter than in previous weeks, and that manufacturers now have more than ample stock of flat sheets on hand to meet requirements. The call for these products continued quite active until just recently, and stock replenishment has been permitted through the continued arrivals to this market of galvanized sheets. The undertone of the market is described as steady, rather than having a strong tendency as in past weeks. List prices and discounts are unchanged as follows:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

BOILERS AND RADIATION HAVE REVISED DISCOUNTS

Montreal.

Boilers and radiators are now quoted at higher figures through a revision in discounts. With the exception of larger sized square or sectional water boilers and round steam boilers a general revision is made. The undertone in the market for these lines has been very firm for some weeks past in line with practically all other iron and steel products, and manufacturers state that the only surprise is that increased levels were not announced at an earlier date. Current trade continues in fair seasonal proportions and following are list prices with new discounts:

RADIATORS AND BOILERS—
Radiator list prices are for 1, 2, 3, 4 and 5 column radiators, per sq. ft.
45 in., to 38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $1.36; 18 in., $1.40; 16 in., $1.50; 4 in, $1.55; 13 in., 1.60. Discount 55 per cent. for hot water, and 56 per cent. for steam.
Wall radiators—5 ft., $1.15; 6 ft., $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05; Discount 52 per cent.
Boilers—Round hot water boilers, sizes from 0 t o10, 60 per cent off list.
Square or sectional hot water or steam boilers, 15 in., 15 per cent.
Square or sectional water boilers, 19 in., to 36 in., 20 per cent.
Square or sectional steam boilers, 19 in., to 36 in., 17 per cent.
Ontario Government trimmings, 15 per cent.
Round steam boilers, standard trimmings, 28 per cent . Ontario Government trimmings, 25 per cent.
F.o.b. Montreal, Toronto, Guelph.

QUOTATIONS ON GARDEN HOSE ARE REDUCED

Montreal.

New season's quotations on lawn or garden hose are now issued, showing a reduction of from ten to fifteen per cent., with a special discount of five per cent. for earlier bookings. Following are new net prices:

GARDEN HOSE—	Per ft.
½" x 3 ply	0 08½
½" x 4 ply	0 09½
½" x 5 ply	0 10¾
⅝ x 3 ply	0 10
⅝ x 4 ply	0 10¾
⅝ x 5 ply	0 12
¾" x 3 ply	0 11½
¾" x 4 ply	0 12½
¾" x 5 ply	0 14
½" Corrugated	0 12½
⅝" Corrugated	0 14
¾" Corrugated	0 16

Shimpents made on or before May 31st, 1923, are subject to a special discount of 5 per cent when orders are placed on or before December 30th, 1922. 500 ft. reels, less further 5 per cent.

SCRAP MARKETS REMAIN SLIGHTLY IMPROVED

Montreal.

Minor price changes in an upward direction are made in quotations on copper and zinc in the waste material markets, this tendency reflecting the stronger tone in both metals on primary metal markets. Consumption of metals is slightly heavy, and this is said to be responsible for the general betterment. Iron and steel scrap is little changed although there is plenty of room for increased demand in these lines. Rubber waste continues very dull, and following are average dealers' buying prices:

SCRAP—	
Automobile Tires	0 50
Rubber Shoes	0 02
Yellow brass	0 05 to 0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 04
Lead, heavy	0 04½
Lead, tea	0 03
Light copper	0 08½ to 0 09
Heavy copper	0 11½
Wrought iron, R. Rd., No. 1 per gr. ton.	10 00
Malleable scrap (ton)	9 00 to 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 50 to 10 00
No. 2 busheling	3 00
Boiler plate	8 00 to 9 00
No 1 machinery cast	20 00 22 00

PRIMARY METAL MARKETS STRENGTHEN LEAD GOODS

Montreal.

There is still a strengthening tendency in the undertone of lead and zinc products due to the market tone of metals in primary circles. Lead is still on an upward trend, and spelter remains very strong. Tin is again displaying a firm tendency and this metal, which enters into the manufacture of solders quite extensively, causes a somewhat stronger feeling in the market for these products. Manufacturers describe the general market as firm but with no indication as yet of higher prices. Following are unchanged price levels:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs. sq. ft., lb.	0 10½
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¼
Do., 4 to 8 lbs. sq. ft., lb.	0 9½

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 25
Do., stricty, lb.	0 22
Do., commercial, lb.	0 21
Do., wiping, lb.	0 21
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

PEAK OF SHEET PRICES HAS BEEN REACHED

Montreal.

The feeling that peak prices on galvanized sheets have been reached is gaining ground among local distributing circles. Up to the phesent no general revision in prices has been announced, although certain firms are quoting slightly less for larger inquiries, but opinions are expressed that lower levels will be reached in the not far distant future. A recession of a marked nature is not looked for, but more in line with a gradual decline, due largely to distributors themselves. It is again pointed out that stocks are growing until even now they are considered heavy in some quarters, and the time will shortly be on hand when sales will experience a slackening and dealers will not welcome the idea of carrying heavy stocks over the quieter period of winter months. The English market has supplied ample requirements and shipments from this

source will in all probability continue in good quantity until the close of navigation. Domestic mills and centres to the south are also making progress in shipments so that the question of supplies is no longer attracting much attention.

The situation at the mills is still a fairly firm one, but further increases are not thought likely. A steady market for the following weeks at least appears more probable from this standpoint. Average local quotations are the following:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 25	7 75
26 gauge	7 00	7 50
24 gauge	6 40	6 90
22 gauge	6 05	6 55
18—20 gauge	5 35	5 85
Other Brands—		
10¾ oz	7 00	7 50
28 U. S. gauge	6 60	7 10
26 U. S. gauge	6 30	6 80
24 gauge	6 15	6 65
22 gauge	6 15	6 65
18—20 gauge	6 00	6 50
16 gauge	5 85	6 35

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

CHANCES OF FURTHER INCREASES IN STEEL THOUGHT TO BE REMOTE

Montreal.

Not only in the sheet markets are higher prices considered unlikely, but a turn in this direction is also noticeable in bar iron and steel products. To some prevailing prices have "weathered the storm" and when no change to higher levels was made when the situation was much firmer, it is considered hardly probable that any revision will now be announced when the tendency is not as strong. Underlying factors in the steel market generally have been interesting during the past two months. Up until two weeks ago there was a decidedly firm tone evident, said to be responsible to higher fuel and increased labor costs, but the fact that basic pig iron on American markets is now reduced $2.00 per ton causes a little different aspect to the market. Although this might be termed a sudden turn, advices from southern centres state that the former important coal question is no longer a serious one, the ability to secure cars for transportation now being the factor for consideration.

Toronto, Ont.

TORONTO, October 12.—A variety of price developments is again the premier attraction in the current hardware markets. Increases and reductions are numerous this week, the advances affecting such products as ready roofings, building papers and sheathings, carpet felt, tarred felt, asphalt felt, fuel oil and Hot Blast heaters. Certain sizes of boiler tubes are also recorded higher in price, a stronger undertone being noted in these markets. In addition, it is reported that some manufacturers are considering an advance at an early date in quotations on valves and compression bibbs.

The list of declines is more extensive than has been the case for some weeks. Galvanized sheets, blue-annealed and black sheets supply the feature reduction. This trend was pointed out in last week's market report. Other recessions affect sandpaper and emery cloth, gasoline, cement, and auto tires and tubes.

LOWER PRICES ON SAND PAPER AND EMERY CLOTH

Toronto.

Quotations on both sand paper and emery cloth have been reduced this week through a revision in the discounts. The new levels are as follows:

B. & A. sandpaper, list less 17½ per cent.

Star sandpaper, list less 17½ per cent.

B. & A. emery cloth, list plus 7½ per cent.

GASOLINE PRICE DOWN ONE CENT PER GALLON

Toronto.

With ample stocks of gasoline now on hand and the current demand for this product facing the stage where the winter months register a falling off in consumption, gasoline prices have experienced a downward revision this week. The local quotations are reduced by one cent per gallon, this change bringing the new level to 33 cents per gallon. For the last two or three weeks, gasoline has gradually assumed a slightly easier trend in primary centres and the present downward revision is not surprising.

UPWARD CLIMB OF FUEL OIL QUOTATIONS

Toronto.

With an increasing number of installations being made of oil-burning apparatus in domestic and other heating furnaces, fuel oil is now experiencing a brisk demand and prices have been advanced one cent per gallon on all quantities. This improvement is attributed in many quarters to the coal shortage, while it is also noted that the call for fuel oil is seasonably good at this period of the year. This change brings the current domestic price to $0.11.8 per gallon in barrel lots. The revised levels are noted on the current market quotation pages.

HOT BLAST HEATERS ADVANCED IN PRICE

Toronto.

An advance of approximately fifty cents each has been made on the hot blast heater No. 20. The revised net quotation per dozen is $45.15.

CEMENT PRICE EASIER; DEMAND SLACKENING

Toronto.

Cement prices have reached a slightly easier level, this recession being attributed to the recent readjustment in freight rates on certain basic commodities. A slight decline amounting to five cents per barrel is now in effect on the local markets, this change bringing prices to $3.63 per barrel in carload lots. The movement of cement is now reaching a more moderate stage as the volume of construction work requiring heavy quantities of cement is almost completed for this season, and requirements are now mainly in small lots. Following are the current price levels:

CEMENT—Carload Lots—	
Per barrel	3 63
Less Carload Lots—	
Per barrel, f.o.b. yard	4 35
Per barrel, delivered	4 55

Single bags, $1.15 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

ANOTHER REDUCTION IN AUTO TIRE PRICES

Toronto.

Lower prices on tires are being made effective from October 11, the average decline being in the neighborhood of five per cent. Tire manufacturers have announced that a better discount will be given to the dealer.

Keen competition is also stated to be a factor in making this decision to reduce quotations, and most lines and sizes are affected. Following is the new list which is representative of the revised quotations on the various makes:

PNEUMATIC AUTOMOBILE TIRES

Net Price List Effective October 12, 1922.

Size	CORD CASE Cross Rib	CORD CASE Cross Rib and A.W.T.	FABRIC CASE Rib	FABRIC CASE A.W.T.	TUBES Reg.	TUBES Heavy Tourist

37 x 5		62.25		50.00		6.20

MARKED PRICE RECESSION IN SHEET MARKETS

Toronto.

As pointed out in last week's issue of Hardware and Metal, an easier trend has now developed in galvanized sheets, which has resulted in marked declines being announced this week. This recession in price is in direct contrast to the strength recently apparent in these markets, when the quotations steadily climbed for several weeks in succession. The current reduction affects galvanized sheets to the extent of fifty cents per cwt., while a downward revision is announced on black sheets, the decline in this respect being twenty-five cents, with a similar change noted on blue-annealed sheets. Keen competition is stated to be one of the primary causes for this development, but the lateness of the season, combined with an improvement in supplies are described as other factors. Following are revised price levels:

BLUE ANNEALED SHEETS—	
10 gauge, base	4 25
12 gauge	4 30
14 gauge	4 35
16 gauge	4 40
BLACK SHEETS—	
18-20 gauge	5 05
22-24 gauge	5 10
26 gauge	5 15
28 gauge	5 25

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED SHEETS—	Premier and	Apollo
10¾ oz.	6 65	7 15
U. S. 28 base	6 25	6 75
U. S. 26 base	5 95	6 45
22 and 24	5 80	6 30
18 and 20	5 65	6 15
16	5 50	6 00
12 and 14	5 35	5 85

An extra 40c. per 100 lbs. is charged for key stone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown in 20c. per 100 pounds.

TEN CENT INCREASE IN CARPET FELT PRICE

Toronto.

In conjunction with the pending increases on roofings and building papers, current prices on carpet felt are scheduled to rise ten cents per cwt. This change brings the new level to $4.00 per 100 lbs.

STRONG UNDERTONE IN BOILER TUBE MARKET

Toronto.

Both the tone of the basic material markets and the improvement in demand, sustain the trend of current boiler tube prices. Some further revisions have been made in the list, following the slight upward change noted a few weeks ago. Distributors point out that the undertone is undoubtedly on a better basis than formerly owing to the general call for tubes required for repair purposes and also construction purposes at this season of the year. Raw material prices are also continuing their upward climb, and while the situation remains more or less nominal, the following average price levels are described as undoubtedly firm:

BOILER TUBES—

Size	Seamless.	Lapweld
¾ inch	$19 00	$.....
1 inch	20 00	.....
1¼ inch	22 00	.....
1½ inch	24 00	.....
1¾ inch	24 00	23 00
2 inch	22 00	19 00
2¼ inch	24 00	.....
2½ inch	26 00	23 00
3 inch	34 00	27 50
3¼ inch	36 00	33 00
3½ inch	38 00	32 00
4 inch	55 00	40 00

PRICES RISE ON BUILDING PAPERS AND SHEATHINGS

Toronto.

Building papers and sheathings are also reported higher in price, No. 2 tarred and dry fibre being advanced ten cents per roll, and dry and tarred heavy straw registering an increase of forty cents. These revised levels are containd in the regular quotation pages.

MAY BE ADVANCE IN COMPRESSION GOODS PRICE

Toronto.

Certain manufacturers of brass valves, compression bibbs and kindred lines, are stated to be considering a slight advance of a general nature in prices. The tendency in this direction has been noted in recent market reports appearing in Hardware & Metal, any movement of this nature being chiefly the result of the firmer trend in virgin metal circles. No revisions in prevailing price levels have been announced since the change in discounts on the Jenkins line of valves, and following are current quotations:

COMPRESSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass seam cocks, standard ¼ in. to 2 in.	50%
Do., 2½ in to 3 in.	43%
Globe angle and check valves, standard	25%
J. M. T.	10/10
J. M. T. C.	16/10
J. M. T. Gate Valves	16/10
Jenkins gate or straightway	16/10
Jenkins Globe	10/10
Radiator valves, standard	58%
do., removable disc	58%
Emco check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco swing check, ⅜ in. and ½ in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%
BASIN COCKS:—	
No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

ROOFING QUOTATIONS ALSO REGISTER ADVANCES

Toronto.

Ready roofings are now advanced in price, this development conforming to the forecast along these lines in a recent issue of Hardware and Metal. The extent of the increase amounts to ten cents per roll on the higher grades and five cents per roll on other grades. New prices are contained in the current market quotation pages.

TARRED FELT PRICES ON HIGHER LEVELS

Toronto.

As pointed out in a recent issue of Hardware and Metal, higher prices were anticipated on tarred and asphalt felt. This development has now materialized, the advance of twenty-five cents per cwt. being practically in effect, although the announcement to this effect is not yet general. Higher quotations are admitted, however, in most quarters.

BAR IRON QUOTATIONS AT TEMPORARY PEAK?

Toronto.

Current price ranges on bar iron and steel continue at $3.25 to $3.40, with the bulk of the business of any size being consummated at the former figure. It has been claimed in some quarters that another advance in quotations should be in order, owing to the current level at mill centres, but there is an undertone of reluctance evident throughout both the primary and domestic steel markets regarding further increases at the present time. The opinion has been expressed in other quarters that prices have reached their peak, at least for the present. Business has been coming along steadily, according to local distributors, with domestic mills still being somewhat behind in deliveries.

IRON AND STEEL—		
Mild steel bars, base	3 25	3 40
Mild steel bands, 3-16 in. base	3 75	3 90
Bar iron, base	3 25	3 40
Angle iron, base	3 35	3 50
Horse shoe iron		3 90
Tire steel		3 50
Spring Steel	7 00	8 00
Sleigh shoe steel		3 40
Cold drawn steel		4 50
Hoop steel	4 50	4 75
Norway iron		12 50
Toe caulk iron		4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

FIRM TREND REMAINS IN LEAD PRODUCTS

Toronto.

The recent firmness in the virgin metals and especially pig lead, has resulted in strengthening the current market position of lead and zinc products. Up to the present, however, no further revision in prices on the finished goods has been announced, it being stated that the movement in primary metal circles has not yet been of such extent as to affect domestic price levels. While some fluctuations have been noted, the general trend is in an upward direction, and the following local prices on lead products are considered quite firm. Business is described as well up to expectations, one distributor stating that "there is no marked activity but the trade is pretty good."

LEAD AND ZINC GOODS—	
Lead pipe, list per lb.	0 13
Lead Waste, pipe, list, per lb.	0 14
Do., over 8 in., list per lb.	0 15
Lead pipe is subjected to a discount of	10%
Lead traps and bends	15%

Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 30
Do., strictly, lb.	0 22½
Do., wiping, lb.	0 21
Do., guaranteed, lb.	0 24
Do., commercial, lb.	0 21
Zinc sheets, per lb. 0 09	0 10

NO MARKED ACTIVITY IN SCRAP METALS

Toronto.

In the current scrap material markets, it is noted that many dealers are not adopting such a bullish attitude as formerly, probably owing to the increased pig iron output. The scrap iron and steel situation is therefore, fundamentally unchanged, with trading only moderate. Due to the virgin metal conditions, non-ferrous scrap is on a stronger basis, but while the position is slightly improved, business with consumers is reported as only hand-to-mouth. Scrap rubber is said to be still at a standstill, tires and tubes being in very little demand. Following are the usual averages of dealers' buying prices for fairly large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings, (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	20 00	21 00
Stove plate	16 00	17 00
Grate bars	12 00	13 00
Standard car wheels	15 00	16 00
Scrap Metals		
Heavy copper wire	11 00	11 25
Light copper	9 25	9 75
No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 25	7 50
Light brass	3 50	4 50
Heavy yellow brass	5 50	6 50
Heavy Lead	5 25	5 75
Tea Lead	3 25	3 75
Scrap zinc	4 50	4 75

Lumbermen's rubber boots	1 25	1 50
Auto tires	0 25	0 50
Solid tires	0 60	1 00

TIN AND LEAD SHOW STRENGTH IN INGOTS

Toronto.

Fluctuating within narrow limits remains the order of the day in the ingot metal markets. Domestic trading in general continues on a hand-to-mouth basis, with the demand mostly for small lots. Tin is again strengthening, local prices having been advanced one cent. Lead markets are also showing strength.

COPPER.—Buying of copper is now spasmodic, with domestic interest only in small lots. Reports from primary centres record the fact that export orders are also smaller. A slightly easier undertone has been created by certain increased output of copper. The current local price remains unchanged at 17½ cents.

TIN.—Tin is again a little stronger this week, and the local price has advanced around one cent, this change bringing the average quotation to 37 cents. The London tin market is described as fairly strong, but fluctuations are apparently the order of the day, with the general result in a slightly upward direction.

LEAD.—This market has taken on a much firmer appearance lately. Trading is, however, quiet, the recent spurt having cleaned up most new business. The general tone of this metal, however, is considered firm, as no marked reaction is expected under existing conditions. The domestic quotation continues strong at $7.50.

SPELTER.—This metal is again quiet, but steady. Domestic quotations, however, are slightly easier in sympathy with the trend of prices in primary centres. Buyers in general have adopted a waiting policy and the lack of activity has resulted in the easier tone. Local prices are considered steady at between 8 and 9 cents.

ANTIMONY.—Antimony remains dull and unchanged in either market conditions or prices. The Chinese market is reported stronger, but consumer interest is apparently lacking. Local prices are unchanged at 7½ cents.

ALUMINUM.—Sales in this metal continue to remain light, and there has been no substantial change in current conditions. The domestic quotations are also steady at between 21 and 22 cents.

London, Ont.

LONDON, October 12.—Local business in seasonal hardware lines is showing considerable improvement. Price changes are light this week, most lines being firm in price and deliveries continue slow from many factories. Reports show collections good at present.

SASH WEIGHTS NOW ADVANCE IN PRICE

London, Ont.

Revised local quotations on sash weights register an advance of approximately twenty per cent. New prices are as follows:

SASH WEIGHTS—
Round, 3 lb. and larger, $3.15 per 100 lbs.; Sections, 1 lb., $3.50 per 100 lbs.; Sections, ½ lbs., $3.75 per 100 lbs.

MEAT CHOPPERS ALSO REVISED IN PRICE

London, Ont.

Prices on the Alexander work line of meat choppers have recently been reduced to the following levels:

MEAT CHOPPERS—
No. 5, $2.30 ea.; No. 10, $3.20 ea.; No. 12, $3.05 ea.; No. 22, $5.10; No. 32, $8.10.

NEW PRICES ON STOVE PIPE WIRE

London, Ont.

New prices now in effect on stove pipe wire show an advance of 25 cents per 100 lbs. This change brings quotations on No. 18, to $8.75 per cwt., and on No. 19, to $9.25 per cwt. Small lots are priced at 9½ cents per lb.

PRICES SLIGHTLY LOWER ON WINCHESTER ARMS

London, Ont.

A slight reduction has been made in prices on the Winchester line of rifles and shot guns. Following are the new net quotations on some of the best sellers:

WINCHESTER ARMS—
Rifles—Model 1890 x 22 Short-Long or W.R.F., $26.25 each. Model 1892 x 25/20 Rd. Bbl., 32 W.C.F., 38 W.C.F., 44 W.C.F., $33.75 each.
Model 1894 x 30 W.C.F., Rd. Bbl., 32 Special, $40.10 each.
Model 1894 x 30 W.C.F., Rd. Bbl., 32 Special $40.10 each.
Model 1907 x 38/55, 351 Automatic, $61.25.
SHOT GUNS—
Model 1897 x 12 ga., $49.00 ea.; 16 ga., $49.00 each.
Model 1912 x 12 ga., $57.75 ea. 16 ga., $57.75 each.

AMMUNITION RECORDS SEASONABLE MOVEMENT

London, Ont.

There is a brisk seasonable call for shells and cartridges. No change has been announced on prevailing ammunition quotations which are given below:

AMMUNITION—
Shells—Dominion Crown, 12 ga., $3.83 per 100 Sovereign, 12 ga., $4.68 per 100; Regal, 12 ga., $4.68 per 100; Dominion Canuck, 12 ga., $4.97 per 100.
Western New Chief, 12 ga., $3.83 per 100.; Western Field Load, 12 ga., $4.68 per 100.; Western Super X Load, 12 ga., $5.21 per 100.

BRISK SALES NOTED IN WINDOW GLASS

London, Ont.

A brisk sale of window glass is now generally reported, with price remaining unchanged at the recently revised levels, which follow:

WINDOW GLASS—
Domestic Glass, less than 25 cases, list less 5 per cent. 25 cases and over, list less 10 per cent. Belgian glass, less than 25 cases, list less 15 per cent.; 25 cases and over, list less 20 per cent.

SEASONABLE ACTIVITY REPORTED IN PUTTY

London, Ont.

A good seasonal sale is also in evidence for putty, with quotations remaining unchanged since the last general revision. Current prices follow:

Standard, 100 lb. drums	4 80
Do., 25 lb. drums	5 05
Pure, 100 lb. drums.	6 05
Do., 25 lb. drums	6 30

GOOD MOVEMENT OF WHITE LEAD IN OIL

London, Ont.

The continued warm weather has stimulated the sale of white lead in oil, and seasonal brisk trade is generally reported. Unchanged price levels follow:

WHITE LEAD IN OIL—

	Tons	Less Tons
	Per 100 lbs.	
Pure	13 55	13 90
Elephant	14 05	14 40

SEASONAL MOVEMENT OF NAILS KEEPS UP WELL

London, Ont.

A good sale of nails is continuing in most quarters, the demand keeping up well for this time of the year. Prices remain unchanged. The cut nail deliveries are improving, but a shortage is still reported in certain quarters.

Winnipeg, Man.

WINNIPEG, October 12.—Seasonable lines of Fall goods are in fair demand and bookings are favorable. The markets remain steady with many lines showing upward tendencies. Steam and water radiators have shown an advance of ten per cent. Quotations on standard brass valves are lower this week. Wrought piping maintains a firm tone.

RANGE BOILERS STILL IN GOOD DEMAND

Winnipeg.

The movement of range boilers is showing a slight improvement. The firm position of galvanized sheets and other products entering into the manufacture are causing these goods to maintain a steady tone. Range boiler quotations remain unchanged.

WROUGHT PIPING MAINTAINS FIRM TONE

Winnipeg.

The market for wrought iron and steel pipe continues in a strong position and indications point in an upward direction. Reports from American markets state that the demand has been exceptionally heavy during the past months and deliveries are behind.

PRICES ON SKATE SCREWS NOW HIGHER

Winnipeg.

There has been a slight advance of 5 cents per dozen in quotations on skate screws. The revised price level is now 55 cents per dozen.

STRONGER TONE TO PIPE FITTINGS

Winnipeg.

Pipe fittings have again developed a strong undertone. Production costs are steadily increasing and manufacturers are of the opinion that prices will advance. There is a fair amount of business for fittings at this season of the year.

RADIATORS SHOW AN ADVANCE IN PRICE

Winnipeg.

There has been an advance of 10 per cent. registered on steam and water radiators. Radiators 38 inches in height comprising 8 sections are listed at $1 per square foot less 44 per cent.

LOWER QUOTATIONS ON STANDARD BRASS VALVES

Winnipeg.

There has been a reduction on standard brass valves of the horizontal check with drip style. Half inch is quoted at $1.40. Three-quarters of an inch at $1.50 and inch at $1.75.

ANOTHER ADVANCE IN TURPENTINE PRICES

Winnipeg.

The undertone of the market in southern primary centres continues firm and prices recording a continued upward trend. The movement of turpentine in the south is active. Local stocks are in ample supply especially for immediate requirements. The demand continues in seasonable proportion. This firm tone has been reflected in an advance of 20 cents per gallon on the local market, making turpentine quotations $2.15.

LEAD SHOWING STRENGTH ON PRIMARY MARKETS

Winnipeg.

Advices received from primary markets state that lead is showing a firmer tone. Quotations are unchanged.

St. John, N. B.

Maritime Retail Hardware Merchants Link Up With Fire Prevention Week

ST. JOHN, N. B., October 12.—Last week, in St. John, two fine examples of co-operative advertising appeared in the local newspapers, coupled with the fire prevention board of New Brunswick campaign against fire, and the King's County Fair, held at Sussex, N.B.

During the fire prevention campaign, the fire marshal used large spaces in the local papers calling attention to the necessity of greater precautions, and pointing out the enormous loss from fire that the province experiences each year. Many St. John merchants took advantage of this campaign, and coupled up their advertising with this special occasion. Full pages were used by a group of merchants, all advertising merchandise necessary for fire prevention. Some of the advertisers of interest to the hardware trade were W. H. Thorne & Co., Ltd., advertising fire extinguishers. Gandy & Allison, Ltd., advertising flue linings, asbestos building boards, metal lath, slate surfaced roofing, etc. Estey & Co., advertising fire hose, pumps, metal lath, steel ceilings, fireproof doors, metal office furniture. Magee & Co., advertising gravel roofs. H. L. MacGowan & Son, advertising extension ladders. Canadian Fairbanks-Morse Co., Ltd., advertising forest fire pumping outfits. Frank R. Fairweather & Co., fire protection appliances.

Advertising of the above firms, together with other merchants not directly connected with the hardware trade, all appeared on the same full page. Other hardware merchants used fire prevention advertising in their usual spaces.

Kings County Fair also brought out a display of co-operative advertising. Those taking part of interest to the hardware trade were, The Renfrew Machinery Co., Ltd., engines and general machinery. Sussex Manufacturing Co., Ltd., refrigerators, school desks, school furniture, box shooks. W. B. McKay Co., Ltd., general merchandise. Fairweathers, Ltd., pipeless furnaces and general hardware. Sussex Mercantile Co., Ltd., general merchandise. Wallace Machinery Works, Ltd., boilers, root pulpers, threshers, wood cutters, mill supplies. This advertising all appeared on the same page, together with particulars of the fair.

A fair was also held at Loch Lomond, N. B., last week, and reported to have been very successful. The exhibits at this fair were mainly of interest to farmers, but many St. John merchants visited the Agricultural Hall in which the fair was held, and in several cases were the donators of prizes.

The coal situation in St. John is none too bright, but might be much worse. The situation has been greatly relieved by shipments of Welsh coal, a large amount of which local merchants have already on the way here. Samples of this coal has been tried out in self feeders, and found to be quite satisfactory. There had been some little doubt about this coal burning in a self feeder, and the first lot that came here was looked upon with a little suspicion by householders who were dependent upon feeders for the heating of their houses. The owners of furnace heated houses however, readily bought the Welsh coal, and since the demonstration, orders are now being placed for this coal for feeder use.

Messrs. McAvity and W. H. Thorne have been urging their customers, through their local newspaper advertising, to use electric heaters and oil stoves during the first spells of cold weather, and thus save their "precious coal" for the zero weather. Emerson & Fisher, Ltd., have been advertising that wood can be burned in their pipeless furnace.

The big event in St. John this week will be the convention of the Provincial Branch of the Retail Merchants' Association, to be held on Tuesday and Wednesday, October 10 and 11. It was announced that Hon. Fred Magee, of Port Elgin, N. B., would be one of the speakers at the banquet which is to be held at the close of the convention. Hon. Mr. Magee is one of New Brunswick's most successful merchants, and has taken an active interest in the workings of the association. Hon. Fred Magee is known to the hardware trade throughout the province, and many of the St. John hardware merchants are looking forward to Mr. Magee's visit.

Hon. P. J. Veniot was in St. John last week and talked regarding a business boom in Bathurst, N. B. The Minister of Public works said that building

operations in Bathurst during the past summer have been on a large scale. Many dwellings have been erected, and a new theatre built, replacing the one that was destroyed by fire last spring. The new hotel being erected will be completed by about December the 15th, and the Bathurst Lumber Co. are now working on their foundation for the newspaper mill. There are now more than one hundred men employed on the job.

The new skating rink at St. John, N. B., will be opened on November 6, Thanksgiving Day, by a big athletic meet. The building of this rink has employed a good deal of labor during the past few months. Howells Frechette, chief of the non-metallic minerals, ceramic and road materials divisions of the federal department of mines, was in St. John last week, after a short tour of inspection through the province. He stated that the limestone found in New Brunswick was a very good material for road construction, and for some purposes it was better than trap rock, which has always been considered to be the best.

The following are prices quoted to the trade up to October 9:

Black pipe, per 100 feet, ¼, 4.23; ¾, 4.32; ½, 5.57; ¾, 6.83; 1, 9.59; 1¼, 12.93; 1 1-6, 15.52; 2, 20.89; 2½, 33.03; 3, 43.20; 3½, 55.66; 4, 15.93; 4½, 76.80; 5, 89.54; 6, 116.47. Galvanized pipe, per 100 feet, ½, 7.60; ¾, 8.55; 1, 12.13; 1¼, 16.66; 1½, 19.92; 2, 26.81.

Blocks, common single: 3, .55; 4, .65; 5, .70; 6, .85; 7, 1.00; 8, 1.25; 9, 1.40; 10, 2.60; 11, 3.40; 12, 3.40.

Blocks, common, double, japanned sheaves: 3, 1.00; 4, 1.20; 5, 1.35; 6, 1.55; 7, 1.85; 8, 2.20; 9, 2.60; 10, 3.45; 11, 5.70; 12, 5.70.

Blocks, patent, single, galvanized sheaves: 3, .95; 4, 1.00; 5, 1.10; 6, 1.30; 7, 1.45; 8, 1.90; 9, 2.15; 10, 3.00; 11, 4.50; 12, 4.50.

Blocks, patent, double, galvanized sheaves: 3, 1.70; 4, 1.90; 5, 2.00; 6, 2.45; 7, 2.85; 8, 3.55; 9, 4.00; 10, 5.10; 11, 7.85; 12, 7.85.

Light Manilla paper bags quoted in full packages, add 10% for less than full packages. ¼ lb., .70; ½ lb. .84; 1 lb., 1.05; 2 lb., 1.35; 3 lb., 1.68; 4 lb., 1.97; 5 lb., 2.16; 6 lb., 2.94; 7 lb., 3.32; 8 lb., 3.86; 10 lb., 4.43; 12 lb., 5.13; 14 lb., 5.83; 16 lb., 6.32; 20 lb., 7.72; 25 lb., 8.42.

Framed buck saws, No. 50, 15.58; No. 45, 16.32. Buck saw blades, No. 26, 8.10; No. 45, 7.43. Saw rods 2.00. Saw frames, plain, No. 4, 3.60. Saw frames, red, No. 04, 4.10.

Game traps, Victors, 0, 1.90; 1, 2.20; 1½, 3.40; 2, 4.65; 3, 7.80; 4, 9.50; 91, 3.50.

Game traps, Star and Jump, 0, 2.50; 1, 2.80; 1½, 4.05; 2, 6.25; 3, 8.45; 4, 10.00.

Vancouver, B. C.

General Improvement Noted in Coast Hardware Trade: Prices Still Climbing

VANCOUVER, B. C., October 12.—A general improvement in lines associated with the hardware trade on the coast is reported this week. Some complaint is heard, however, as to deliveries from the east. It appears from advices received that manufacturers are still behind in their orders, due to the coal and rail strike and that preference is still being given contracts on which a premium was paid. Steel goods are mostly affected, it is stated.

The trend of prices continues upward, there being little indication of a lower list on anything of prominence. This week wire nails were advanced ten cents per hundred and almost the entire line of tinware and graniteware has been boosted ten per cent. Padlocks are the same percentage and plated butts have been jumped two to four cents per pair.

Unsatisfactory prices in the Okanagan for apples, from the growers' standpoint has had the effect of curtailing travellers' trips into that territory although in one or two instances representation is held on a commission basis. The growers are staging a "B. C. Apple Week" here, and are hoping to help marketing conditions to the extent of twenty carloads.

One of the interesting announcements of the week is made by the Electrical Service League of B. C., which from October 11 to 28 will exhibit on Shaughnessy Heights a model electrical home. The stated object is to show how electrical wiring should be done and how the home can be illuminated with the greatest efficiency and at minimum cost. A feature is the master switch which, pushed in one of the bedrooms, lights every outlet throughout the building and verandahs. This, it is stated, will be of special service in securing the hasty departure of possible prowlers whose yearly operations have started.

Members of the B. C. Hardware Club surprised their New Westminster friends this week when they announced that instead of the regular meeting, they would meet in banquet style in that city. W. C. Stearman of Vancouver, proved an ideal toastmaster. During the evening short addresses were delivered by Mr. Diplock, of the Steel Co. of Canada, Montreal, G. T. Elson, B. C. representative of Marshall Wells, Ltd., Ald. W. R. Owen of Owen and McCallum, of Vancouver, Chas. Snell of the Dominion Cartridge Co. and Harry C. Martin of Martin, Finlayson and Mather, Vancouver. Musical numbers of a high order were rendered by Royal City Artists while the Vancouver delegation took over Billy Menzies, a popular comedian of Vancouver, associated with the Crane Co.

Calgary, Alta.

Seventy-Five Per Cent. of Threshing in Western Provinces Now Completed

CALGARY, Alta., October 12.—A general review of the building activities of the 1922 season seems to warrant the claim that more buildings of the small and medium type have been erected this year than in any year since 1913. This probably is true but it may seem surprising to local people because of the quiet manner in which the work has been carried out. This does not mean that contractors have been busy, nor have the contractors in the mechanical trades been busy. It probably does mean that the season would have been a good one for all concerned in the trade if the work had been confined to the legitimate contractor, the legitimate plumbing and heating shop, paint shop, and tinsmithing shop. Unfortunately these trades have been up against a class of competition who seem satisfied to make wages on a job; have no overhead and probably do not know what it means; men who get a few jobs and are not heard of again; with the result that the regular trade has had to take on work at a price that shows much less than what might be considered a reasonable profit. This condition seems general throughout the building trade and the hardware merchant has been affected along with the other trades. The regular contractor has to offset his overhead by buying cheaper than the opposition who had no overhead and the hardware man had to recognize the position, and help out as best he could his regular customer. The net result is that on a very satisfactory aggregate of turnover, the profit throughout the trade has been less than what would be justified. A remedy for this condition is considered very necessary not only to the contracting trades and the hardware man but also to the supply and jobbing houses, and it is to be hoped that the winter season will not be allowed to pass without some concerted action on the part of all interested that will bring the necessary spirit of co-operation that will bring about the desired end.

Quite a distinct improvement in the

movement of seasonable lines has been noted this week. A couple of days frosty weather, accompanied by a little snow, which disappeared the same day, has started a general movement to prepare for winter and shopping is noticeably brisker. Stocks of fall goods are well assorted but light, and jobbers report quite a spurt in both travellers' and mail order business.

Threshing is fully 75 per cent. completed and reports throughout the province indicate a large acreage of fall plowing. Weather has been most favorable for this work and full advantage seems to have been taken.

New prices were issued this week on boilers and radiators. On boilers the f. o. b. prices at Calgary, Edmonton and Lethbridge show a small reducton on most of the sizes. Round hot water boilers are now 52 per cent. off list, and round steam boilers with Alberta Government trimmings, are net list. Square hot water boilers 15in, are less 3 per cent.; 19in. to 36in. are less 8 per cent. and 48in. are net list. Square steam boilers with Alberta Government trimmings, 15in. are less 3 per cent. and 19in. to 48in. are plus 4 per cent. on list. Radiators on the other hand show a slight advance of between three and four per cent.; new prices issued being as follows: Hot water radiators 38in., $57.00; 32in., $62.70; 30in., $65.55; 26in., $68.40; 22in., $74.10. Steam radiators 38in., $56.00; 32in., $61.60; 30in., $64.00; 26in., $67.20; 22in., $72.80. Wall radiators 7 and 9 feet $63.00 per 100 feet.

Boat and bridge spikes have taken on higher manufacturers' levels and prices in effect at Calgary, Edmonton and Lethbridge are as follows: ¼ x 4, $9.10; ¼ x 6, $8.60; 5/16, $8.10; 3/8, $7.85; ½, $7.60; ⅝, $7.60; ¾, $7.60 per 100 lbs.

Bench axes are reduced from 50 per cent. off to 52½ per cent. off with a plus in each case of 50 cents per dozen. Demand has been quite active from the railroad companies and from the elevator builders.

After about three weeks' steadiness, linseed oil again appears in local market changes; this time with a decline of three cents per gallon making current quotations at Calgary, Edmonton and Lethbridge $1.16 on raw and $1.19 on boiled. Distribution is lessening with the advancing season and stocks in the retailers' hands are considered low.

A decline of ten cents a gallon is noted in wood alcohol. Prices on this line have been steady over a period of some months. Demand continues very fair with stocks low. New prices issued are $1.80 in barrels, including barrel, and $1.90 in less than barrels with containers extra.

Certain lines of padlocks reflect factory advances of about ten per cent.; and Mrs. Potts' irons are higher. Polished are now quoted at $2.35 and N. P. at $2.45. Advice has just been received of a drop in price of Ingersoll watches which represents a decline of between 20 and 25 per cent. The new prices will be in effect for the coming week.

Hamilton, Ont.

Activity in Fall and Winter Hardware Lines Now Steadily Progressing

HAMILTON, Ont., October 12.—The numerous developments and price changes of an upward nature which occurred during recent weeks, serve to attract special attention to the primary elements underlying this movement. Following a more or less general deflation extended over a period of twelve to fifteen months, there has now developed a marked tendency to increase quotations on numerous hardware lines, this secondary period of inflation commencing in the basic steel markets and extending to practically all manufactured steel products. The effect of this rising level in commodity prices is described as merely an incident in improving times, but the probable duration of the cycle is of direct interest to every retail merchant. The maintenance of higher wage levels in the coal and steel industries, as well as in transportation work, places production costs of numerous lines on a relatively higher level than that previously anticipated by many manufacturers.

Activity in Fall and Winter goods is described as progressing steadily and with the approach of colder weather, a marked improvement in the movement of such seasonal lines is looked for. Wholesalers and manufacturers state that retailers are purchasing in larger quantities than has been the case for some time past, while many are exhibiting a tendency to contract for requirements ahead. This factor is attributed to represent increased confidence of the buyer in the rising market, coupled with the retailer's faith in the ability to satisfactorily dispose of such stocks.

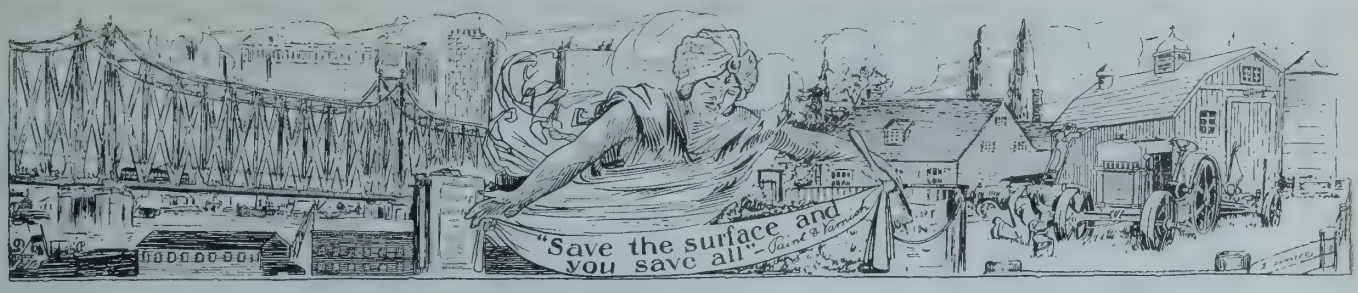
Price revisions on the current hardware markets are again of a varied nature, but, as has been the case during recent weeks, the number of advances is far in excess of the reductions. There has been a lull in the activity on the domestic bar iron markets, and, while trading in sheets is still reported brisk, the march toward higher quotations has halted, temporarily at least.

Some improvement is noticed in collections but the movement so far is more of a spotty nature than a general one. Quiet confidence, however, is expressed that the crop returns will go a long way towards putting general business on a better basis.

Merchants feel a cold spell is needed before the regular movement of seasonable lines hits the usual stride. Retailers are still using more advertising space than usual and show an inclination to force interest in general lines to tide over the between seasons quietness. Business in points outside the cities is improving.

There is still a good fall trade generally recorded for many lines of builders' hardware, including locks, butts, glass, nails, roofings, building papers, sash cord, sash weights, paints and varnishes.

Pittsburg, U. S. A.



Steel Production Recovering From Effects of Coal and Rail Strikes

PITTSBURG, October 12.—In the recent rail buying movement, produced by the rail mills announcing an advance in price from $40 to $43, effective October 1, and proposing to enter orders previously at the old price, considerably more than 1,000,000 tons was secured by the mills, while at the same time there was heavy buying of joints, spikes and tie plates. The total of all this business is estimated at about 1,500,000 tons. The object of the mills in making this offer was to secure winter and spring rollings, there being a stipulation that the rail should all be taken out by July 1, 1923.

Shipment Problems Serious

At the time the offer was made, about a month ago, it did not appear particularly probable that the steel mills would stand in need of orders in the winter, and some surprise was expressed at the offer on that account. It was clear that the price advance was justified by circumstances, as the $40 price seemed somewhat low a year ago, while now, on account of heavy wage advances, the production cost is higher and, in some quarters, it was considered strange that the mills should not advance the price first and then let the orders come when they would. Now, however, all the indications are that in the not distant future the mills will need orders. For about six months, and until a fortnight or so ago, the mills were straining every nerve to produce every ton of steel possible, fuel supply being the limiting factor. Then there was a sudden shift. Now, the chief point is to get cars in which to ship the product. In general, consumers want more steel than the mills are able to ship. When transportation improves, or when the advent of winter brings about a lower rate of consumption, orders will be in demand.

The car shortage is quite serious and the mills are complaining loudly.

Can a Man be a Christian and be in the Paint and Varnish Business?

Sermon by Russell H. Conwell in the Baptist Temple, Philadelphia

IN the 90th Psalm is my thought of this morning. It is a beautiful verse, a prayer to the Lord.

"Let the beauty of the Lord, our God, be upon us; and establish thou the work of our hands upon us; yea, the work of our hands, establish thou it."

Oh, Lord! Transfigure our every day work!

I received a letter that interested me very much, from a young man who had entered into the paint and varnish business, and who says that he is of a practical and spiritual turn of mind. He criticized some expressions I made a while ago and said, "You cannot be a Christian and remain in the paint business." When his assertion, from his experience was set forth so strongly without any conditions, it was as amusing as well as alarming. If Christianity is to be of any value at all, it is to be found in everyday experience. Christianity is one of the things to be found in the paint business, and my friend asserted that if anybody could find it in the paint business, he could find it in any other. I am at the basis of my thought at the beginning. I do not need to argue, but I do need to talk with you in the plainest everyday manner and if I can escape any look of an attempt at eloquence or sermonizing, I want to do so. I leave this thought with you which I believe will help you. It has been exceedingly helpful to me.

Can a man be a Christian and be in the paint and varnish business? From the beginning I take another view of it, which is one that appeals to our common sense. "Can a man succeed in the paint and varnish business without the spirit of Christ?"

Now Christianity enters into that business which I use only as one illustration of the general rule. If a man is opening a store for the selling of paints and varnishes, (or any other article) he must seek a location where he will be of the most use to the community, and reach the largest number of customers. He will seek it not only from a selfish motive, but will seek it to do good. If he is going into any business, it ought to be beneath any Christian's choice to take anything that does not throughout every day of his experience help other persons. "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me." A man's business, or a woman's business, should have for its first and foundation thought, the reaching of the largest number of people, and doing as much good as possible, consequently a man looking for a location for his plant or store, should find one that is readily accessible from the community and to the community. That would be a Christian thing to do.

Where Christianity Comes In

Then a man should enter into business with a view to purchasing paint and varnish. Now what has Christianity to do with that? Everything. In the first place every single keg of white lead furnishes labor to some poor men who are in need of money to support their families and educate their children, and the man should buy paint with that further view of hoping and believing that if he purchases that paint it will help to support people who would otherwise be out of work in that kind of business; that it will furnish labor to the men in the mines and in the factories who prepare the white lead in putting it up in packages, and those who transform it into such shapes as to make it usable. It is Christian duty to go into such business that he may furnish labor, honest labor to the working man who prepares these things for sale. As a Christian he should go into business with the determination to maintain strict honesty. He should be very careful not to purchase white lead, or any other preparation for paint that is not honestly prepared. He should only encourage those that do honest work, that prepare the paint carefully, and accurately and skilfully and bring out those color combinations which will stand the test of time. We must encourage honest labor, and consequently he must not purchase any goods of any firm, or support any labor, that is not honest, if he can avoid it. He should insist on honest men doing honest work, consequently he must examine carefully to see that he is not deceived and that he does not get inferior paint. "Be not overcome of evil, but overcome evil with good," and be very careful that you are not deceived in purchasing anything that is not worth what it was represented to be. That is Christian. With that spirit a man does not buy things that will not sell. In that spirit he preserves not only his own reputation but the reputation of those who supply him with the goods to sell.

Paint and varnish serves three different purpoes. In the first place it furnishes a decoration that may be beautiful or otherwise, as it is put on, or as the colors are prepared. In the next place it is preservative of the wood which it covers, or the other substance over which it is spread. Not only is it decorative or preservative, but it is a disinfectant, and a healthy thing to bring into the community. The man who goes into the business with a Christian view of it will think of all these things and be sure to secure lead, and oil and gum for varnish that will work out what it is intended to do. "Provide things honest in the sight of all men." Where can you find a better argument for a safe business than that a man should buy lead, and oil and gum and pigment with the Christian intention of doing good?

Transaction Should Do Good

A man entering the paint and varnish business must look on all sides to be sure that his transactions are doing good. Many of you have seen a beggar with a lead pencil who asks you to buy that lead pencil for charity, because he needs the money. You buy a pencil and credit yourself with having done a deed of charity, but there is no more charity in buying a pencil or those things which a beggar offers you than in buying an honest bill of goods and giving a fair price for them. There is charity. The largest possible charity is there. He who buy goods for the purpose of doing

WHAT PAINT MAN THINKS OF DR. CONWELL

Drawing attention to the sermon outlined fully in this article, Ernest T. Trigg, prominent in the paint and varnish industry, states as follows:— "In Philadelphia we have one of the finest characters in the world. Dr. Russel H. Conwell, the pastor of Grace Baptist Church and the president of Temple University, an institution created by himself, which affords to a present enrollment of over five thousand deserving young men and women an opportunity to secure at a very modest cost an education equal to that gained in any of our great Universities, is a man well along in the eighties who has devoted all of his life to making the world a better place to live in."

good to the seller is in a larger measure a Good Samaritan of the world than he who buys a beggar's lead pencil. The man who thus conducts his business keeps a spirit of Christianity. He must keep that purpose, that heart, that intention of doing the world good in every transaction in his store.

Then when he opens his store he must have employees. Here is another great test of Christianity, and when a man opens his store if he is a Christian man, goes to church regularly, prays a good deal, and hears the gospel continuously, some get the idea that they must hire Christian people who are poor, even though the employees do not know anything about the business at all. He is often under the impression that he is under obligations to employ only the poor in his store. He is short sighted who takes that view of Christianity. Such a man should have no hope of succeeding in that way. It is his duty both to his customers, and to those from whom he purchases goods, to get the very best salesmen he can put into his store, and if he gives away to the sentimental, and hires men who cannot do anything, he is all wrong in business generally, and usually a failure. He must be wise enough to secure the most talented employees, and also employ honest Christian men—Christian men in spirit and character, in his store. He must be careful as to employ skilled persons in his establishment. That is Christian. And if it is Christian it is good business.

Satisfied With Fair Price

When a man begins to sell his goods and finds out what he has to pay for paint of various kinds, then he figures out what it will cost to carry on that store, to pay honest and fair and living wages to his employees, and provides for overhead expenses. And then he adds a fair profit—not the profit of the profiteer, not taking advantage of customers' necessities and charging them more than the goods are worth. But ever truthful and honorable, seeing that he is entitled to honorably enlarge his business and supply employment for the people, and do more good with the paint. He must be satisfied with a fair price and then look every man in the eye, and in the sight of God with a clear conscience say, "I am making money on this. I don't want you to think that I am deceiving, I want you to understand that I am getting a fair profit." One of the greatest difficulties in Christian business, is that men are continually plotting, setting their prices in accordance with the extreme needs of the customers with whom they are dealing, without considering what is a fair price and profit to make in the business. I don't believe any man has ever gone into business in this land, with that principle of insisting openly on a fair profit, but what he succeeded in business and beyond what he had himself foreseen.

Then think of the great opportunities to do good that come to any honest business, especially the paint and varnish, as the customers come into the store. Every one of them furnishes a missionary opportunity. Everyone of them that comes in to buy paint, not only comes to buy what he needs but he comes to find a Christian influence. And if he comes into that store and says, "My house has never been painted, it looks bad; my children are ashamed of it; I want to have it painted, for the influence it will have on the children and on the community, and he finds that in that store the owner or the clerks take a kind interest in his affairs, see how he is situated; see what he most needs; see that he is furnished with that which will cover his house the cheapest, and at the same time safely and permanently—that merchant is not only making a profit in his business, but he is helping to build a Christian character, which is the first essential of Christianity. Business shows forth character as nothing else does. Christianity is character and character is in honesty. If that customer took home a can of paint which perhaps was mixed that he might apply it himself, and had received instructions from the owner, or the salesman as to its application, and concerning the various kinds of brushes, he has received more than paint. After he has finished the painting of that house and sees what an effect it has upon himself and his children and the community, he goes back to the paint store with a feeling of gratitude; he has met with a Christian man and he is dealing with a Christian firm. The next opportunity that comes he brings his friends to this store and other missionary opportunities follow that directly.

Understand the Value

If a man would sell paint and varnish —as paint and varnish are in my mind— he must understand the value of it; he must understand its power as a beautifier. Paint is simply a chemical combination which when applied to a surface, in proper combination, carries to the eye a keen satisfaction through the various shades and colors and as we appreciate them we grow in appreciation of all beautiful things and consequently recognize the wonders of God. If I had time I would like to talk for an hour on this subject, Paint and Varnish, and show how we increase in our appreciation of the beautiful through the means of it.

The wonder of Christian education is that so few have thought of the beautifying character of paint; paint that covers every natural thing in the world almost; paint that covers every church, and paint that produces again for lifelong treasures the faces of loved ones that have departed.

When I read the other day of the offer of $1,500,000 for Rembrandt's painting, "The Descent from the Cross," I felt that while it might perhaps be wiser to give that money to the poor, nevertheless it does give a hint of the great value of paint. In the sale of the painting "The Descent from the Cross," you have a good illustration of what a business man can do with paint if he will only study the subject as it should be studied.

The first time I saw "The Transfiguration of Christ," by Raphael, at the Vatican of St. Peters at Rome, tears streamed down my cheeks. I had read about it, lectured about it, and I expected to see something exceedingly fine, but when they opened that enclosure and swung out that wonderful picture into the light that had been prepared for it, it overcame us all. I happened to have charge of a company of people who were touring in Rome but who had never seen "The Transfiguration" by Raphael. As I turned around to look at that silent company I saw them all in tears, as they looked upon the form of Christ.

Oh! What paint can do! How it fills one with a sense of the sublime. Even the body of Christ Himself transfigured by the Spirit of God. Oh I should like to be transfigured by the Spirit of Christ. That men may see Christ in me as they see it in that picture before which we stood and wept. I have seen that picture many times since, but never without tears, and I have just wondered how could Raphael produce those combinations of paint that have brought out such an expression of Divinity, such an impression of sublimity and a beauty like that! No, the man in the paint and varnish business who does not look beyond the kegs and cases of things around his store does not have a transfigured life. But he will have the transfigured life who understands how paint will bring out for mankind one of the greatest gifts of God, a Love for Christ Jesus Himself. No man views the "Transfiguration of Christ" who is not changed in his life and character.

What Paint Can Do

I looked upon Da Vinci's "Last Supper" and as I looked at those wonderful figures of the Apostles, they grew more fascinating and interesting and I thought that any one who has not seen Da Vinci's "Last Supper" has a very faint appreciation of what paint can do for the world.

An old man came from Nevada two years ago into the mountains of Massachusetts where his old mother lived. He had not seen her for a long time, but she was still in the old home. It was an old bungalow cottage that had never been painted. It was very shabby in many places, when he came home. He looked it over and he decided he would do what he could to help his old mother and fix up the cottage for her.

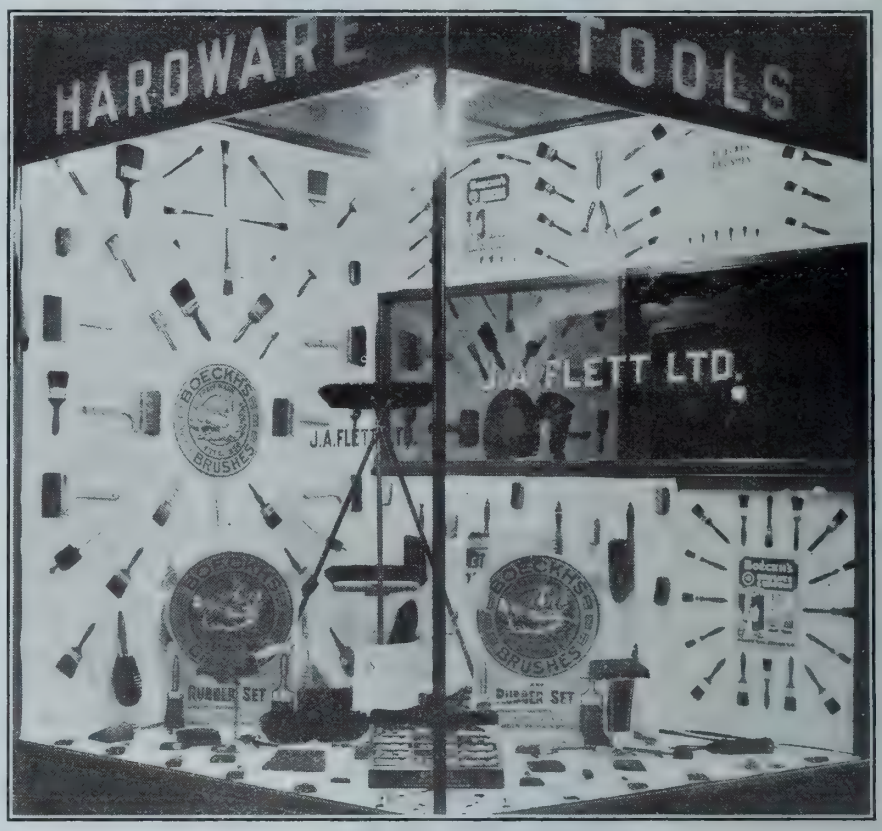
CAN A MAN BE A CHRISTIAN?

(Continued from page 56)

He said to her, "What can I do for you mother?" She said, "Paint the cottage for me." He said, "Why mother, that is not the best way to invest money. It ought to be improved and some changes made on the inside." "No," she said, "for your father's sake and for your own sake and for my sake, won't you paint the cottage and let me feel that it is going to have a charm for the community in the days that I remain?" And the old man painted his mother's cottage, fixed it all up, painted it with the best paint that he could secure from a Christian dealer, and then as he bade his mother goodbye outside of the house, she said to him, "Whenever I look at this newly painted cottage I will think of you and I hope you will come back to look at it yourself. I wanted it painted because I thought it would have such an influence on the village. It reflects so much of Christian character." The neighbors came to inquire about the newly painted house and she told the neighbors that she was sure it was real Christian paint, that her son put it on because he loved her, and because she loved him. Because he loved her, he had gotten the best paint that could be secured in that little village. All the neighborhood when they saw the beautiful painted cottage were ashamed of their own cottages and all around stretching out into the township they began to paint their cottages and things began to brighten up, and cheer up, and people were more prosperous because of the brightness of the new paint. They began to go to church more than they had been accustomed to do, and people who had never been to church started to go because of the influence of the surroundings. That painted cottage was like a Christian character in a community and it changed the lives of many people.

In every business (not only in the paint business), there is a Christian possibility of being transfigured. As I have thought through the night of the home at Nazareth and the carpenter shop with Jesus in it, there has come to me continuously that whatever your occupation you can transfigure it if you will. I saw a discouraged school teacher yesterday. She said to me, "I have seventy-three children to teach this year, which is more than I ever had before and I don't see that I can possibly teach so many as that. I don't believe I can stand it. I am determined to try and find something else to do. I have come to you for help. I want you to find something else for me to do." I had been thinking of the carpenter shop in Nazareth and I said, "You need to transfigure your occupation. You need to have it all transfigured. Go back there to help those children and you will find that you are more interested in them than you ever were before." When I saw her brightened and cheerful face this morning, she said to me, "I am going to try it on Monday morning. I am determined that I will try to be happy and make them as happy as I can." Well now that teacher will go to school and there will be an entire change in her work. She will find that she has a capacity for work that she has never had before, and her seventy-three scholars will be crowding around her and will be trying to learn all they can to please their teacher. That life, that business, that profession is full of enjoyment that is transfigured whatever the business may be. If you are back in the kitchen, if you are caring for the house, whatever you do, do all to the Glory of God.



The 73rd Psalm which I read to you by providential request has the same thought running all the way through it that we are to put Christ into our lives. That means that Great Divine Spirit, that Spirit that carries the Divine Character with it. Look to God all the time and retain with God's divine gift your reasonable common sense, and your life will be so different.

If I could only this morning persuade you all to see this thought and live it, as I am not perhaps able to do myself. But I am going to try it, I will be glad that I lived to see forty years in your service, if you will see Christ in your business, see Christ in your home, and live for him and for the principles and teachings which He has set forth. God grant that my message may not be a formal one, but be received as that of a real and sincere friend.

Benediction

Now may the Grace of Almighty God fill us with thought of the necessity of living the Christ life all the time everywhere, whatever we do in the fear of God and for the benefit of humanity. Grant us that inspiration and enable us to carry it into practical affairs of everyday life, so that we shall not only work for Thee on Sunday, but that we shall serve Thee effectively every day of the week. We ask that benediction in Christ's Name. Amen.

The Brush Department

Many are the arrangements which can be made of brushes in the display window. This one by J. S. Gibson of J. A. Flett Ltd., Vancouver, B.C., is very effective. Use is made of white factory cotton in the background on which brushes are grouped according to their use. On the floor of the window a number of brushes are arranged effectively representing the whole variety. The impression conveyed to the passer-by through such a display is that this store attached a good deal or importance to its brush stock and was able to meet all requirements in size or type.

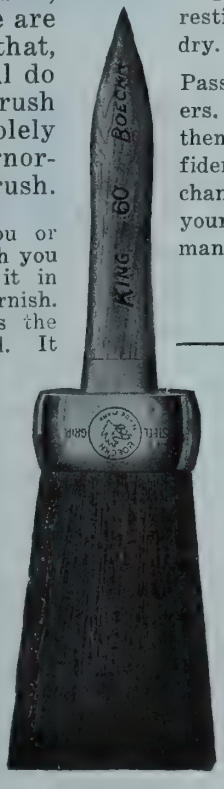
PAINT TRADE NOTES

The annual convention of the Sherwin Williams Co., will be held in Montreal October 17, 18 and 19.

The Canada Paint Co. will hold their annual convention in Montreal on October 18, 19 and 20.

Boeckh's Brush News

BOECKH TRADE MARK EST BD 1856 TORONTO



Helpful Sales Hints!

These Helpful Sales Hints are among the "little things that count" in selling Boeckh's Brushes. We pass them along to you feeling that, by telling them to **your** customers, you will eliminate much trouble for yourself, your customer, and us. These are just some of the little things that, if told to your customers, will do away with so many of the brush complaints that arise solely through the purchaser's ignorance of how to care for a brush.

We would suggest that when you or your assistants sell a Boeckh Brush you tell your customer not to soak it in water before using in paint or varnish. Tell him soaking in water causes the brush handle and setting to swell. It also injures the bristles — makes them flabby and "moppy." Tell him that when not in use, a brush may be safely suspended in coal oil for an indefinite period—but the oil should not be allowed to come up as far as the ferrule.

Moreover, impress upon your customer that the brush must be **suspended** so that it is not resting on the bristle. A good many painters, if intending to use brush again in same color, wrap the bristle end in brown paper before putting into oil. This is an excellent idea, as it holds the one color to the brush and makes it unnecessary to wash it before using again. And many of your Boeckh Brush customers will be glad to know that the easiest and best method of cleaning a paint brush is to wash thoroughly in coal oil or turpentine, then suspend it (with bristles down and not resting on anything) until thoroughly dry.

Pass these hints along to your customers. They will appreciate your telling them. It will win their instant confidence in you, in your store, your merchandise, and will do much to save you, your brush customer, and ourselves, many unpleasant explanations.

Weekly Paint Markets

Montreal

MONTREAL, Oct. 12.—Although no actual price changes are recorded on the local paint markets this week, the firm undertone of practically all lines attracts attention. Linseed oil prices are fairly firm owing to the present position of the flax seed market, and transportation difficulties from the head of the lakes. Space on the lake boats is almost at a premium, and the car shortage is also felt when shipment is made by rail. Turpentine continues on a strong basis both in the South and locally. Stocks are at a fairly low ebb, and while demand locally is only of a moderate nature the call for this product in the South is still quite active. Prevailing quotations on window glass are now described as firmer, and there is very little trace of unsettlement such as was evident earlier in the season. Shipments from Belgium are arriving in better volume, but stocks locally are by no means heavy, especially in some of the better selling cuts. Paint and varnish manufacturers state that fall business in general is progressing quite satisfactorily, the movement of ready mixed paint and white lead in oil now being fairly active. The undertone of the market in general is fairly firm owing to the continued strength of pig lead and other basic raw materials.

FLAX SEED TRANSPORTATION NOW A PROBLEM

Montreal.

Current quotations on linseed oil are unchanged this week with the flax seed market on a somewhat steadier basis. Minor fluctuations occur almost from day to day, but these are not sufficient to materially change the market situation. A factor now requiring the attention of local crushers is the question of seed transportation from the North West. Space on the lake boats is said to be almost at a premium because of the heavy grain shipments at this season, and on the rail route the shortage of cars is also being felt, one local crusher stating that in place of a dozen carloads which they hoped to have on the way this week they now learn that only three are available. This is only one instance showing the difficulties in transporting seed to eastern market centres. Unchanged quotations are as follows:

LINSEED OIL—

	Raw	Boiled
1 to 2 bbl. lots, per gal.	1 02	1 04
5 to 8 bbl. lots, per gal.	1 00	1 02

Less quantities, add ten cents per gallon.

STILL STRONG UNDERTONE IN TURPENTINE MARKET

Montreal.

A strong undertone remains in the turpentine market, and although prices are unchanged locally, these are again very firm. There has been an increase quoted of five cents in some quarters, but other firms are maintaining former levels, and $1.80 is the most general quotation at the present time. Stocks remain at a comparatively low level, and certain distributors report that their supply had become depleted during the week but fresh shipments had arrived within the past few days. Generally speaking the trade as a whole is in much the same position, but because of lighter requirements, no scarcity is felt. Although stocks in the South are by no means heavy, there is no apparent shortage, and lack of interest on the part of local buyers and slower deliveries are said to be responsible for the present low state of local stocks. In Southern primary centres the market is still very firm with demand continuing active. Following are local average quotations:

TURPENTINE—

1 barrel lots	1 80	1 85
2 to 4 barrel lots, per gal.	1 78	1 83
Broken lots	1 90	1 95

GOOD MOVEMENT NOTED IN WINDOW GLASS

Montreal.

Importers and distributors of window glass state that the market has now taken an active turn, the busy season now being in full swing. This improvement in sales has steadied the market considerably, and prevailing quotations are described as fairly firm. Adding also to this tendency is the comparatively low ebb of local stocks. Shipments from Belgium are speeding up to an extent, but certain of the better selling sizes are short, temporarily at least. However, manufacturers on the other side are continuing to increase their output and before the close of navigation importers anticipate a further increase in arrivals from this source. The Belgian market remains fairly steady, and unless the franc again shows a depreciation a firmer situation is looked for during the following active weeks.

WHITE LEAD IN OIL ON STRONG BASIS

Montreal.

Although a very strong undertone remains in the white lead in oil market the chances of higher prices to the trade this fall are considered remote by manufacturers, notwithstanding corroders have advanced quotations on sales to them. Pig lead on primary markets has displayed marked strength in recent weeks and producers found it necessary to increase prices to meet the higher production costs. However, the fall season for this product is now fairly well over, distributors taking this into consideration, and from present indications appear willing to absorb their extra cost in the meantime at least. Current business continues fairly brisk but the season is recognized as fast advancing.

ACTIVE MOVEMENT NOW RECORDED ON PUTTY

Montreal.

Trade in putty is now very active, indicating that the usual active fall season has commenced in earnest. Prices remain unchanged at following levels:

PUTTY—

Standard, per 100 lbs.	5-ton.	1-ton.	Less.
Bulk, per 800 lbs.	$3 25	$3 50	$3 75
Bulk drums, 100 lbs.	3 75	4 00	4 25
Bulk drums or tins, loose 25 lbs.	4 00	4 25	4 50
Do., loose 12½ lbs.	4 25	4 50	4 75
Tins, cased, 25 lbs.	4 75	5 00	5 25
Tins, cased, 12½ lbs.	5 00	5 25	5 50
Bladder barrels, 400 lbs.	5 00	5 25	5 50
Bladder cases, 100 lbs	5 25	5 50	5 75
5 lb. tins	8 00	8 25	8 50
1 lb. tins	10 00	10 25	10 50

Pure linseed oil putty, $1.25 per 100 lbs. advance over above prices.

Toronto

TORONTO, October 12.—The special features of the paint markets this week revolve around the undertone in shellac, turpentine and linseed oil fields, and the possible future trend of prices on these products. Turpentine remains on a firm basis, with no signs of easier levels in either southern primary centres or domestic markets. The fresh receipts are being absorbed by current requirements and it is stated that this condition allows very little opportunity for the increasing of stocks at production centres, such supplies usually being required during the winter months. The statistical position of turpentine is therefore considered strong.

Shellac continues to fluctuate in price and the current market is described as erratic and unstable. Linseed oil has registered very little change this week, flax seed being slightly improved and oil quotations steadier as a result. Window glass and putty are stronger, the busy season for these lines now being in full swing.

TORONTO PAINT MARKETS

(Continued from page 60)

TRANSPORTATION OF FLAX SEED RECEIVING ATTENTION

Toronto.

Flax seed is now reported on a somewhat steadier basis, and while linseed oil is moderately quiet, it is a shade firmer this week as a result. There has been no further change in prices, the current levels remaining fairly firm. Consumption is stated in certain quarters to be on the increase, and distributors report the outlook as brighter. The question of seed transportation is receiving the marked attention of crushers, it being reported that cars and shipping facilities generally are at a premium at this time of the year owing to the heavy grain shipments. Prevailing price levels on linseed oil follow:

LINSEED OIL—	Per Gallon Raw	Boiled
1 to 2 barrels	1 05	1 08
3 to 4 barrels	1 04	1 07
6 to 9 barrels	1 02	1 05

Less barrels, 15 cents per gallon.

ERRATIC CONDITIONS NOTED IN SHELLAC MARKETS

Toronto.

"Unstable" and "erratic" are the terms applied to describe current conditions in the shellac markets this week. while some signs of improvement were recently noted in primary centres, this movement has failed to be of permanent duration and has generally been succeeded by a period of fluctuations. While no announcement has been made regarding lower prices on shellac on the local market, it is noted that certain distributors are quoting slightly lower levels. Distributors still look for improvement in this direction during the ensuing months. Following are the average quotations now in effect:

SHELLAC—		
In barrels	4 50	4 10
One gallon jugs	4 95	4 45

SEASONAL ACTIVITY IN WINDOW GLASS MARKET

Toronto.

Trade in window glass is now described as registering a brisk fall movement, and while the current volume is generally up to seasonal expectations for this time of the year, the immediate demand is said to be even slightly below the volume recorded during the past two or three weeks. Future sales however are expected to be heavy and marked activity in window glass is generally looked for during the ensuing weeks owing to the large number of houses and other buildings now reaching the stage of completion. No further changes have been announced in window glass, and it is stated the local situation is now strengthened as a result of the improved call, combined with a slightly firmer tone noted in supply sources. Quotations on domestic window glass have remained unchanged, while the opinion has been expressed that with the advent of colder weather, the call for window glass should register a corresponding activity and render stocks of imported glass none too ample to care for these seasonal requirements.

GOOD FALL MOVEMENT NOTED IN BRUSHES

Toronto.

Brush manufacturers and distributors report a fairly even demand for both painters and household brushes during the present season. It was stated that the general movement of these products had been more extended than usual during the summer months—a period which is usually more or less quiet. Therefore, the fall trade was not expected to be quite so heavy as might otherwise have been expected. Prospects are described as good, the volume of orders comparing well with previous records at this season, while a steady consuming demand is noted. The tone of the bristle markets remains on a strong basis, with no further changes having been made since the last general revision at the beginning of September.

STRONGER TONE IN WHITE LEAD IN OIL

Toronto.

A very strong undertone is noted at the present time in white lead in oil, this development being principally attributed to the upward trend of pig lead. No advance in quotations on white lead in oil, however, is in sight, current trade being described as good for the season of the year, but the big movement is now drawing to a close. No change has been made in prevailing price levels.

HIGHER LEVELS ON OIL AND TURPENTINE

Just as Hardware and Metal goes to press, announcement is made that Toronto prices on both linseed oil and turpentine have been advanced. Oil is higher by five cents per gallon, bringing quotations on raw to $1.10. The upward revision in turpentine is ten cents per gallon, bringing the current level to $2.10.

ACTIVE MOVEMENT NOW RECORDED IN PUTTY

Toronto.

An active movement is now generally recorded in putty, the seasonal fall trade in this commodity now being in full swing, according to reports received this week from local distributors. Prices are unchanged at the following levels.

PUTTY— Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk bbls.	$3 70	$3 95	$4 20
100-lb. drums	4 20	4 45	4 70
25-lb. irons	4 45	4 70	4 95
Bladders in bbls.	5 45	5 70	5 95
Do., less quantities	5 70	5 95	6 20
1-lb. tins	10 45	10 70	10 95

Pure Linseed Oil Putty, $1.25 per 100 lbs advance over above prices for similar quantities.

FIRMNESS STILL EVIDENT IN TURPENTINE PRICES

Toronto.

Turpentine prices remain on a steady basis this week, there having been no change made in local quotations. The strong undertone noted during recent weeks is still in evidence, southern supply markets retaining an unusual degrees of firmness. Stocks locally are at comparatively low levels, but fresh shipments are reported on the way.

A review of southern production centres finds certain consumers of turpentine anticipating their future requirements in a moderate way. This is taken as an indication that the situation as regards supply and demand is being closely studied. Other distributors, however, are contenting themselves with the most limited buying that current needs will permit. Latest reports from Savannah indicate that prevailing requirements are sufficient to absorb the fresh receipts and thus prevent any increase in reserve stocks which are needed later on when the tail-end of the season brings a reduced supply of turpentine from the woods. In many quarters, therefore, there appears to be a firmly established conclusion that this product will be more or less hard to obtain throughout the winter months, although the moderate requirements during this season may offset to some extent these conditions.

TURPENTINE—		
1 barrel lots	1 90	2 00
2 to 4 barrel ots	1 89	1 99
5 gallon lots	2 05	2 15

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

FAVORED SAVE THE SURFACE CAMPAIGN COMMITTEE

The front cover of the September 30 issue of Hardware and Metal had been contracted for by Messrs. A. Ramsey & Son Co., Montreal, but in view of the fact that this was decided upon as a special Fall "Save the Surface" number, that firm very kindly consented to forego the arrangement and leave the position open for the use of the Save the Surface committee.

PAINT MAN HAS INTERESTING CAREER

Mr. Pearson has just turned forty years service with R. C. Jamieson & Co., Ltd., of Montreal, starting in the company's works in September 1882, and moving up in the service to his present position of Western Manager.

Ten years ago Mr. Pearson opened branches for his firm in Calgary, Alta., and Vancouver, B. C., moving with his family to the coast in 1912. The late Mr. R. C. Jamieson, prior to his death, allotted Mr. Pearson a block of the company's stock in recognition of long and faithful services.

Mr. Pearson has taken an active interest in public matters in the district in which he resides, Point Grey, (adjoining Vancouver), being councillor for several years and Reeve until his many friends insisted on him entering as a candidate for the Provincial Legislature in the elections of December 1920, when Mr. Pearson was elected by a handsome majority over four other candidates for the Constituency of Richmond, representing a population of over 30,000.

Sold only on a Quality Basis

Meakins Brushes are good brushes; they are built, essentially, for service.

Everything that goes into a Meakins brush is of a standard and quality that will endure and last and give one hundred per cent. service.

Never at any time, have we stressed prices, have we made an appeal for business on a price basis.

Our contention has always been that the hardware trade and the Canadian public are willing to pay a fair price for a satisfactory product; the experience of seventy years of making and selling brushes bears out this belief.

Yet our prices are no higher than obscure, little known brands.

Write for our 1923 *catalogue.*

The best recommendation for Simms Paint and Varnish brushes is the increasing sale they enjoy. Years ago they made their appearance in hardware and department stores. Painters tried them once and almost invariably came back and asked for the same brand.

TRADE SIMMS SET IN RUBBER MARK

PAINT AND VARNISH BRUSHES

have a record of performance that is hard to duplicate.

Are you profiting by the quality reputation of which the Simms trade-mark is a symbol?

A counter or window display of Simms brushes will be a good means of informing the public that you stock this well-known line.

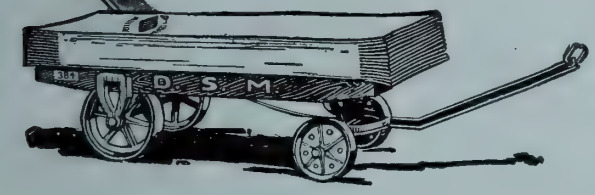
TINKER TOM'S TALKS.

No. 380



Then Came The Fire!

Buyers who think more of price than protection often fall for this **"fire retarding"** or **"fire resisting"** combination of paper, rags, tar and asphalt.

Barring their tendency to rot, tear, curl up, blow away and other like stunts, this paper or prepared roofing may be all right until some day when the fire rages—**then comes the real test.**

It takes 2,400 degrees of heat to affect a "Premier" Galvanized Sheet—that's four times as much as you could get in an open space. The farmers are needing sheet metal now—sell them something durable, economical and **absolutely fire-proof** and thus reduce Canada's enormous fire loss.

Feature the MONO-VAC

An Electric Vacuum Washer of Proven Efficiency at a Sales-making Price

A *Maxwell* Product

Made-in-Canada

Features that make the Mono-Vac exceptional:
—Single large vacuum cup, of aluminum;
—Adjustable to size of washing;
—Heavy cypress tub **holds** heat, instead of radiating it as with metal;
—Driving gears under tub promote stability; all fully protected;
—Adjustable fourth leg, for uneven floors and draining off;
—Swinging, reversible quick-release wringer.

Attractive Folders (in color), for distribution to your customers, gladly supplied on request.

Where the name "Wakyte" appears there is Perfection of Workmanship

We manufacture Buster Cars, Pony Cars, Shoofly Rockers, Wheelbarrows, etc., and have made it our business to see that the best possible service is given for the money expended.

The Wakyte Buster Car illustrated, is equipped with four pressed steel disc wheels and rubber tires. The body is artistically finished in Canary Yellow-Enamel, wheels in Vermillion Enamel. Shipped three to a crate.

When writing us ask about the "Comfort" Weather strip made in Quarter Cut Oak. Set consists of two pieces 7 ft. and two pieces 3 ft. long.

Where Quality and Price count the "Comfort" Weather Strip must appeal to all Buyers.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

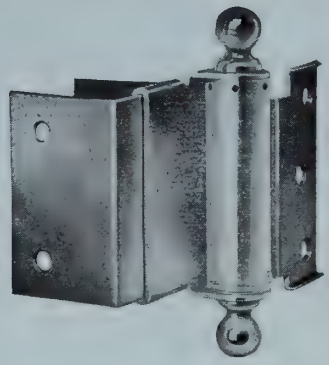
NOISELESS



No. 71 Fire Pot. List Price Each, $27.20. Ask for Discount.

No. 71 Fire Pot has Improved Double Blunt Needle Burner that burns gasoline or kerosene. It is smokeless, odorless and noiseless, making it very desirable for inside use. Over 300 degrees more heat is produced. The gas passes into the Burner Tubes, burning from both sides to the centre. Flame can be turned low if desired by long Needle. Short Needle cleans gas orifice. Burns perfectly outdoors in extreme cold and windy weather. Jobbers supply at factory prices. Catalogue upon request.

Clayton & Lambert Mfg. Co.
10615 Knodell Ave., Detroit, Mich.
U. S. A.

A Low-Priced Hinge
—for—
Light Lavatory Doors

Better and cheaper than a four-inch hinge and blank for lavatory doors weighing 30 pounds or less. Made of wrought metal—strong and durable. A good seller, No. 1,800.

Further information for the asking. All kinds of wire cash and parcel carriers and pneumatic tubes.

Gipe-Hazard Store Service Co., Limited
113 Sumach St., Toronto, Ont.
Also 318 Homer St., Vancouver, B.C.

Here is a Carrier affording the merchants better service in return for the money it cost than does any other of its type ever produced. It is also more compact and handsome.

Note that it has no cords, pulleys, elastic springs or other frail, cumbersome and unsightly toggery, and its means of propulsion are not only the most simple, but afford more power than any other made, and therefore the Carrier is more rapid and dependable.

There are many users of these machines throughout Canada, and you are invited to inspect and make inquiry about them from any one of these.

Black and Galvanized Stove Pipe Elbows and Canada Plates.

We have a large stock of the above on hand and can make delivery at once in all sizes, angles and grades.
250 SQUARES OF GREEN SLATE SURFACED 4 in 1 SHINGLES to clear at once special $5.50 per square.
Large stock of galvanized sheets, black sheets, zinc, copper, bolts, rivets, stove pipe wire, dampers, registers, roofing, local vent fittings, expansion tanks, etc.

Order Department, Main 784 and 785.

Why Hardware and Metal has Such a Large Western Canada Circulation

THERE are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Western Canada.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh—and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the only hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Federation Life Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

UNITED STATES OFFICES—New York, Room 1606, St. James Building, 1138 Broadway, (corner 26th Street; Boston, Room 734, Old South Building, Telephone Main 1024; Chicago, 405-6 Transportation Bldg., 608 South Dearborn St., Phone, Wabash 9430.

FOLDING FURNITURE

No Season is a Dead Season For

"GOLD MEDAL" FOLDING FURNITURE

TRADE MARK

There is no need for sales of Gold Medal Folding Furniture to stop with the end of the camping season. Every home has need for some item in this line. The No. 35 Gold Medal Folding Arm Chair is an especially attractive and profitable article for year-round sales. Social functions, card parties, etc., which overtax the regular furniture equipment of the average home create a demand for Gold Medal Arm Chairs and Folding Tables. And there is always a need for Gold Medal Folding Cots for emergency use—taking care of unexpected overnight guests, etc.

Keep the Gold Medal line before your trade. Show and demonstrate the comfort, convenience, and practical utility of the articles you carry. Keep the sales channels open during the winter months.

WATER SUPPLY

SYSTEM

Gives country residents all the advantages of a city water system without the excessive cost

The wide-awake dealer will make big profits out of this system among customers who now have difficulty with their water supply. It is so simple to operate and costs practically nothing for upkeep. The outfit consists of an air-tight steel tank which can be placed in the basement, and a "Myers" famous guaranteed pump (hand or power), suitable for pumping air or water, together with pipes and fittings. Any plumber or gas fitter can easily install it. Every outfit guaranteed to do the work for which it is designed. For small or large dwellings.

Write us for Water System Catalogue and prices.

Now is the time to interest your customers.

THE STEEL TROUGH & MACHINE CO., LTD.
TWEED, ONT., CANADA

Dollar Turpentine

is a fact and we can supply your full requirements promptly.

The specifications for quality imposed upon our Pure Turpentine make it an excellent thinner for paints, varnishes, colors, etc.

The price is $1.00 per imp. gal. F.o.b. La Tuque, Que., in steel drums of 46 imp. gals. Large stocks are on hand for immediate deliveries.

We invite correspondence from all turpentine dealers.

No worries over coal shortage with this combination Range.

We have developed this superior combination Heater and Range to be economical on fuel and at the same time to cook or bake to satisfy the most particular, exacting housewife—and it does just that.

By utilizing the Quebec Heater idea this range radiates in such a manner that it will heat a good-sized home and cut the coal bills in less than half.

This range completely solves the question troubling hundreds of people "How are we going to manage this winter with the coal shortage?"

Our nearest branch will quote you prices and give you all the particulars. Write to-day.

Triumphs in Canadian Saw-making

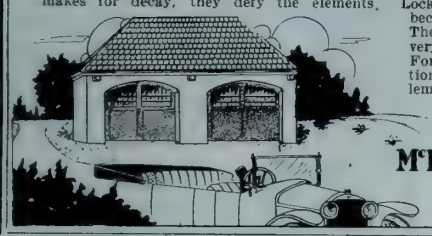
MAPLE LEAF SAWS are made by the largest all Canadian saw manufacturers. Their reputation, built up by years of conscientious effort, has spread to the four corners of the earth. In logging camps, in mills and in the home they are famous for their keener cutting edge and longer wear, due chiefly to the extra Refined Razor Steel used in their manufacture, and to the secret process of tempering.

If you want your men to work better, and produce more—equip them with MAPLE LEAF SAWS.

MAPLE LEAF SAWS

MADE BY

Shurly-Dietrich Co., Limited - Galt, Canada



Western Branch:—1642 Pandora St., Vancouver, B. C.

Agencies throughout the world.

"Crown" Metal Shingles

You Can Safely Recommend Them

For any and all kinds of building, for they have been scientifically constructed to adapt themselves to the most exacting roofing work. They are absolutely storm, water, fire and wind proof, making the strongest metal roof in existence. Free from solder, exposed nails or anything that makes for decay, they defy the elements. Locked on all four sides they become a continuous piece. They are easy to apply and are very attractive in design. For details and any information on any sheet metal problem, write

Sinking the Ship by Half Ounces!

The captain of a ship at sea doesn't waste one minute when he is told that his ship has sprung a leak. He sets about having that leak plugged. He knows even a small leak will sink his ship if he doesn't. There are hundreds of hardware dealers whose "business ship" is sinking every day under their feet through loss of profits over the weigh scale. Thousands of others are just chugging along with the business ship barely afloat—leaking profits every time goods are weighed, and the odd half ounce given away to an unappreciative customer.

Sinking the business ship by half ounces—in overweights with an old-fashioned scale.

Dayton Hardware Scale

Stops Profit Leaks!

Shows on a chart the exact weight to the fraction of an ounce — so you can get paid for all of it.

Shows the exact price all ready calculated, so no mistakes are made and no time is lost.

Ensures an absolutely square deal between store and customer.

The Dayton Hardware Scale can certainly save money for you. Send for illustrated folder.

The profit saver—famous Dayton Hardware Scale with counting scoop and extra capacity platform rack.

The Most Profitable Group of Dry Batteries You Can Sell—

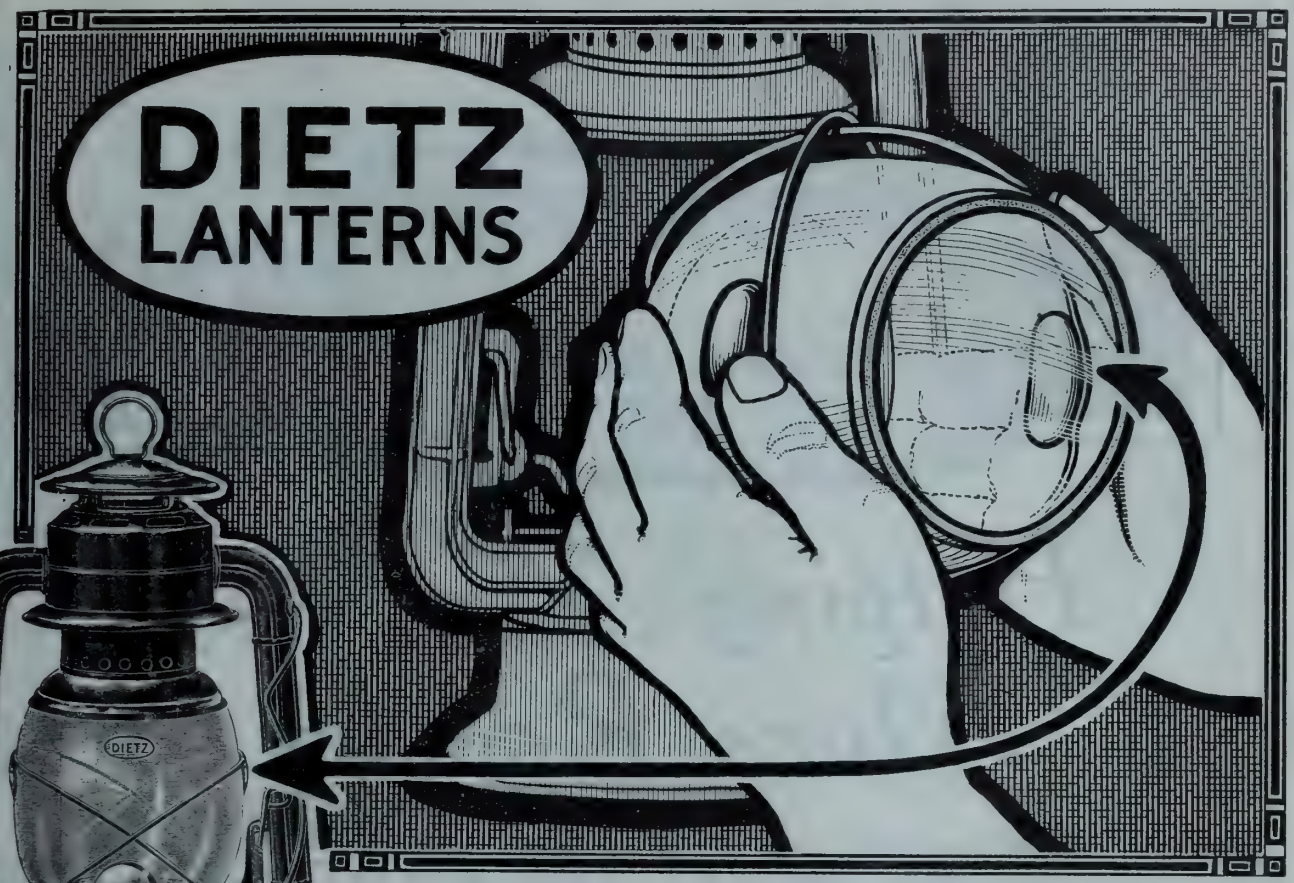
What Columbias Do—

—Ring Doorbells
—Buzz Buzzers
—Provide ignition for Fords when starting
—Fire Blasts
—Run Toys
—Make Telephones talk up
—furnish ignition for gas engines

Long life, high ignition power, low cost, all make Columbias the favorite Dry Cell in thousands of homes, on farms, and for industrial uses.

Your customers will appreciate the longer service which only Columbias give. This long life reduces the cost of ignition. The simplicity of Columbias enables any person to make the simple connections which bring the full power of Columbias into action.

Columbias are the only dry batteries consistently advertised on a nation-wide scale.



Order Columbias by name from your jobber.

DIETZ LOC-NOB GLOBES

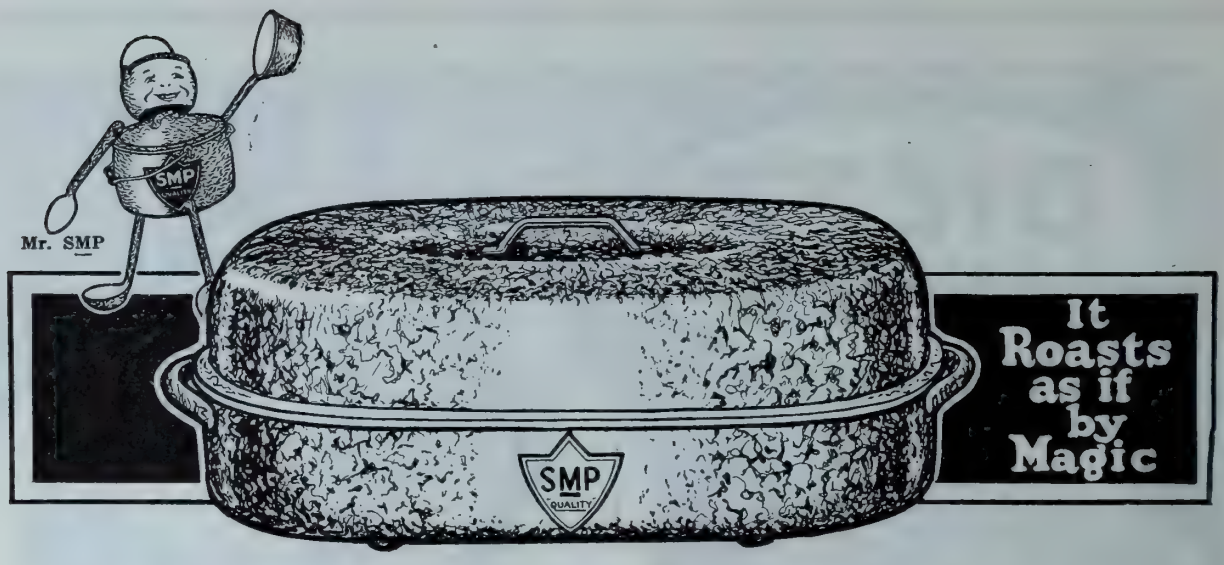
PATENTED

Dietz No. 2 "D-Lite"
COLD BLAST LANTERN

Sell your customers dependable Dietz Lanterns—Lanterns with a world-wide reputation for highest quality—lanterns with convenient, exclusive features of proven worth—

The Patented Loc-Nob, which prevents the globe from slipping out of the frame when it is tipped back to expose the burner, is one of the selling features found only in Dietz Cold Blast Lanterns.

Particularly noteworthy is the Dietz Combustion System, which insures dependability in all weathers and highest illuminating power possible in a kerosene lantern.



Each sale of a Dietz Lantern over your counter means a profitable transaction and good value for your customer.

Helping You Sell More Roasters

Thousands of **SMP** Pearl Ware and Crystal Ware Roasters will be sold this Fall and Winter in Canada. As a means of creating even a greater demand, we are running a series of large, strikingly handsome roaster and roasting season advertisements in the daily newspapers of Canada from coast to coast this Fall.

The benefits of roasting fowl, beef, fish and other expensive dishes in **SMP** Crystal and Pearl Roasters are gone into in language that is bound to create the desire of possession in the minds of Canada's housewives. Here is one sentence, for instance:

"No longer need tender roasts of beef be ruined through improper roasting. With one of these splendid SMP Roasters in your kitchen, you can now roast fowl or meat or bake fish to perfection! The Roaster will do all the work. It bastes—the fat drips down from above. The roast comes from the Roaster tender, delicious, juicy, full of wondrous flavor. The juices and the flavor cannot escape. They are cooked right in."

These advertisements are going to make women want a Crystal Ware or Pearl Ware Roaster. They are going to increase the already heavy demand for **SMP** Roasters. And don't forget that all this extensive, continued advertising is to help hardware merchants sell more **SMP** goods. Naturally, the merchants who co-operate most fully with the advertising reap the biggest rewards.

"So You Handle Gargoyle Mobiloil"

Mr. K., a hardware merchant in a prosperous Ontario town, recently had delivered a shipment of Gargoyle Mobiloil.

It happened that when the oil was delivered Mr. K.'s friend, a building contractor, was in the store.

The following conversation ensued: "Say, Jim, since when did you sell automobile oil?" "Why, I've sold Gargoyle Mobiloil for the last five years." "Well, it's a wonder you wouldn't tell folks about it. My trucks use about 6 barrels of Gargoyle Mobiloil a year. I don't see any reason why you shouldn't sell them to me."

This was an eye-opener to Mr. K. His experience showed him clearly what profits he had lost by selling oil in the old-fashioned way—from a barrel in a dark corner.

Mr. K. now keeps cans of Gargoyle Mobiloil in his window. The Gargoyle flange sign which he hung out has brought him many dollars of profits from passing automobile owners. He does a thriving business in automobile accessories.

Do you keep your Gargoyle Mobiloil out in plain sight, where you can cash in to the fullest on the profitable demand which Gargoyle Mobiloil enjoys?

Is the Chart of Recommendations in a conspicuous place in your store so that people know that you sell the correct oil for every make of passenger car, motor truck, motorcycle and tractor?

Can you afford to wait until an experience like Mr. K.'s shows you the road to bigger profits.

GARGOYLE

Mobiloil

Make the chart your guide

IMPERIAL OIL LIMITED

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargoyle Mobiloil.

Chart of Recommendations

(Abbreviated Edition)

THE correct grades of Gargoyle Mobiloil for engine lubrication of both passenger and commercial cars are specified in the Chart below.

How to Read the Chart:

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
BB means Gargoyle Mobiloil "BB"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

Where different grades are recommended for summer and winter use, the winter recommendation should be followed during the entire period when freezing temperatures may be experienced.

This Chart of Recommendations is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and represents our professional advice on correct automobile lubrication.

"GUTTA PERCHA" Automotive Equipment

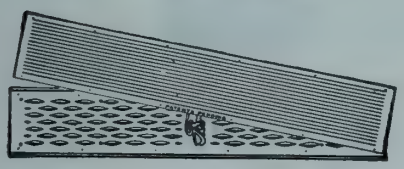
Windproof Mats (For Fords)

Windproof Mats (for Fords)

There are good all-the-year-round sales for these effective Mats. In winter, they stop the cold draft; in summer, they keep out the odors, dust and heat from below. Supplied in suitable models for Ford Coupes, Sedans and Touring Cars. Fit closely over brake and clutch lever openings.

Sealtite Patches

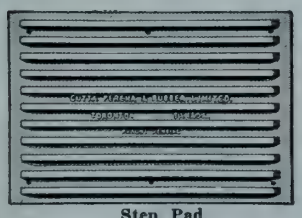
Sealtite Patches



A handy reliable way to avoid long road-stops for punctures. Sealtite Patches are quickly and easily applied with no other tools but the hands. The tube can be used at once. Just having them in the car eliminates the anxiety that spoils many a motor trip. Customers like them.

Rubber Headed Mallets.

Rubber Headed Mallets



These useful Rubber Headed Mallets are easily sold to motorists who quickly appreciate their general usefulness around the car. They are especially suitable for changing tires, or for use wherever protection for the finish is required.

Running Board Mat.

Running Board Mats

The long Running Board Mat, on the under side, is an exact counterpart of the Ford Running Board. It fits down snugly into place, making a dust- and mud-proof fit. The Step Pad is a simple, effective way of keeping mud and dirt out of the car, and affords a firm, non-slip footing. Both are furnished with necessary bolts and nuts, complete. Very easy to install.

Step Pad.

he *must* have dividers

Every machinist has his set of dividers. In laying out work—measuring dimensions between lines or points, transferring lengths taken direct from a graduated steel rule—scribing arcs and circles—he uses them daily.

With such a steady demand it's good policy to learn something about the Starrett Spring Divider No. 77.

They're different from the ordinary dividers. If you will examine the quick-adjusting automatic closing spring nut you can see at once why the 77 appeals to the critical machinist. The thread engages the screw at the slightest pressure when the leg comes in contact with the nut. When pressure is withdrawn, it releases itself immediately, sliding freely on the screw. Its use saves much valuable time in opening and closing. Also made with solid nut.

Fay Spring Dividers No. 77

Connor Electrics

Make Washing Easier

The Economy Electric, here shown, is designed to enable hardware merchants to meet the definite demand for moderately priced electric washing machines. The Economy Electric does this and more. Consider a few of its selling points: Tub of stave-leg design, mounted on four, full swivel casters; from cypress lumber of best quality (the wood most suitable for washing machine construction), stationary wringer, 11-in. rolls of best quality; safety release; reversible water board; and so designed as to save the housewife time and labor when in operation.

This is one of four "Connor Electrics." Write for prices and details of our full line.

LADD
Mixer Churn

Our Yearly Gift $200,000

AN ACTUAL FACT EASILY PROVEN. Figure it yourself. Before 1912 Egg-beaters sold chiefly for 10c. Your apparent 3c.-4c. profit an **ACTUAL LOSS,** considering time, wrapping, string and delivery. Highest price of any beaters, 25c. Then we offered the **LADD LINE** to sell for double that price and every professional in the business laughed in our faces with the senseless rejoinder: "You can't get more than 25c. for an Egg-beater." Well, some merchants putting their own prices on our goods against our suggested resale, mark them much higher. And **WHY?** Yes, **WHY?** It is the **QUALITY THEY FIND THEIR CUSTOMERS EAGER TO BUY. THAT QUALITY IS FOUND IN THE LADD LINE ALONE.**

Going to discerning buyers through every store of consequence in the country, it is easy to believe we have given dealers $200,000 **PROFIT** this year that they would never have had except for us and in most cases against their own judgment. **A YEARLY GIFT** so long as you handle the **LADD LINE. WE WON'T SELL** cheaps to produce **NO PROFIT.** It is just the same with many other things you sell you formerly thought must be cheap, tools, implements, utensils, etc. **SEARCH OUT AND STICK TO THE MAKERS OF QUALITY GOODS. YOU ARE IN BUSINESS TO-DAY CHIEFLY BECAUSE OF THEM.**

FAWCETT

The Peerless Rival

The Rival Furnaces embody these important details of construction: extra large feed door—oscillating grates connected in pairs—one-piece ash pit to prevent cracks from developing and so to leak gas, dust and smoke. These distinctive features are found only in the Rival Pipe and Pipeless Furnaces.

Our furnaces heat efficiently and with the minimum amount of fuel. They are made in five sizes.

A Complete Line

We also manufacture the Villa Rival, made specially for small buildings, and a line of Wood Furnaces designed expressly for wood fuel—they will take sticks of cordwood from 36″ to 56″ long. Also a full line of Heaters.

Write for full particulars and prices. You will find one of our branches located near you.

New Light on C.O.D. Postal System

Discussion of Service at Conference of Postal Officials in Ottawa Brings Out Interesting Suggestions—Retailers Can Send Goods by Mail to Persons Who Might be Considered Doubtful From Credit Point of View

That retailers and others would be in a position to send goods by mail under the C.O.D. postal service to persons with whom they had not previously carried on business and where they were reluctant to give credit, was one of the points outlined by postal officials to Hardware and Metal's Ottawa representative. That orders could be placed by telephone and filled by mail, was another suggestion, while the fact that jobbers might wish to make use of the service in sending goods in small quantities to merchants in rural districts, is another consideration. It was also pointed out that mail order houses have been getting money in advance for their goods and would lose this advantage if they utilized the C.O.D. system to any extent.

AT THE recent Dominion conference of postal officials in Ottawa, there was some discussion of the new C. O. D. postal service regulations. But this discussion was brief and failed to cover the ground that should have been covered in connection with so important an issue. Officials, after the conference was over, discussing the matter with Hardware and Metal, stated there was really no justification for any lengthy consideration of the question as the system had just been inaugurated.

However, the general impression of the delegates was that the C. O. D. Postal Service would prove of particular benefit to persons living in rural communities not served by express. It was, however, stated that mail order houses would not make very great use of the service as they were now getting money in advance for their goods and there would be no advantage in accepting deferred payment, as this would occasion the payment of a C. O. D. fee, and they would not be sure that goods when sent would be accepted.

It was maintained by some that manufacturers of small products, machinery parts, and also retailers, would be in a position to send goods by mail to persons with whom they had no previous business dealings and to whom they would not care to extend credit. The thought was expressed that in many instances, orders could be placed by telephone and filled by mail, the C. O. D. service working to the advantage of both the customer and the merchant taking advantage of it.

It was also thought that jobbers and wholesalers might make use of it in sending goods in small quantities to retailers in outlying points. The opinion was also expressed that the service could be extended to offices at which postal notes were sold. This suggestion is to be considered when the present service has passed the experimental stage.

No tangible suggestions were made other than to point to the few instances mentioned above, where the system might prove helpful to certain lines of trade.

The question of the adoption of a uniform registration system for the whole of Canada, came in for some consideration. In order to make the registration system uniform at all offices in the country and to simplify the system, without in any way decreasing its efficient workings, it was proposed to discontinue acknowledgement of receipt of registered mails and also to adopt the original number registration system now used in the International mails. The proposed simplification would likely save in the neighborhood of $50,000 per annum and would facilitate the tracing of registered articles.

The question of using stickers in place of a rubber stamp was also considered, but certain officials stated that they had found that stickers occasionally became detached from the article to which they related, and that the rubber stamp was much better for that purpose.

The hand to hand registration system was discussed and a committee appointed to work out a more efficient and uniform system to provide additional safeguards for registered mails. At offices where this hand to hand system had been tried out it was reported that not one single article had been lost.

Examples of Safety

Emphasizing the safety of the existing Canadian system, it was stated that within the period of a year, only one out of sixty-two thousand registered letters had been lost, while only one out of eighty thousand letters containing cash remittances had disappeared.

Important changes in regard to registered articles were approved. This came under the heading of the advisability of increasing the maximum indemnity for the loss of registered articles and the fixing of a scale of fees to cover varying amounts of indemnity. The votes taken favored:

1. Increase in the maximum indemnity for the loss of registered articles. The present maximum is $25. The new maximum suggested is $100.
2. Indemnity to include abstraction and damage.

In regard to the last named, indemnity is now paid only if the registered article is totally lost. Should the decision of the conference be adopted, indemnity will be paid if the contents are partly missing or damaged.

Suggestions for Service

"What demands are there on the part of the public for additional services which the post office might render?"

The above is one of the questions put to the gathering, but very few had any reply to make.

One delegate brought forward an important suggestion, and that was that stamped envelopes in different sizes be issued. It was pointed out that this system was practised in the United States and that it was considered to be very much to the advantage of big business houses. At present only one size stamped envelope is sold in Canada, but the United States have them in twenty or more different sizes. It was the general opinion of the delegates that if such a scheme were adopted in Canada it would be appreciated by the business interests.

More than usual interest was aroused over the consideration of postal arrangements between Canada and the United

States. Suggestions were offered for increasing the maximum weight on parcels from 4 lb. 6 oz. to 11 lb. and estimates of the effect of doing this varied greatly. Some were of the opinion that the incoming volume would be increased from five to six times. **One delegate was sure that the change would greatly benefit the mail order houses of the United States.**

It was stated that Canada was now receiving about two million pounds more in parcel mail from the United States than she was sending. Another delegate, however, took the view that the number of parcels coming from the United States would not increase very considerably, but that where two parcels weighing four pounds each are sent into Canada now, only one parcel weighing eight pounds would come in under the proposed regulations.

Which Way are Hardware Prices Headed?

Review Indicates That Higher Raw Material Costs Are Being Reflected in Price Adjustments on Many Manufactured Products

WHAT will be the trend of prices during the next few months? Will the majority of market developments continue to represent higher hardware costs, or has the present tendency towards increased price levels almost petered out? Does the present offer an opportunity for more liberal purchasing of goods than has been the case for some considerable time?

These and many similar questions are undoubtedly being asked by hundreds of retail hardware merchants throughout the country, who realize that the markets represent the thermometer of fundamental business relations and constitute the blood pressure in the process of buying and selling merchandise. Such queries are also the natural outcome of the numerous price increases which have recently developed; a factor of no mean interest to the careful student of business.

While the large proportion of recent market developments have been in the nature of upward revisions, so have the majority of such changes affected more closely such manufactured and semi-manufactured lines which are directly related to the basic elements. The raw materials of the iron and steel industry have been climbing in price through the combined influence of natural seasonal trade conditions and certain labor complications. This situation has been reflected in rising production costs of many manufactured products, and a careful review of market developments during this period may contain an indication of the sequence for such events.

Survey of Advances

One notable factor is that the effect of higher prices in the primary iron and steel centres has not been immediately apparent on finished hardware lines. One reason stated for this is that raw materials are frequently purchased some time ahead, while another is that in several instances certain manufacturers were protected to some extent against rising costs. While the increases on the raw materials markets have now generally abated, therefore, the problem naturally arises as to how long the upward trend will continue to be reflected on the general run of manufactured hardware goods, it being evident that while these two factors are co-related, the latter development is in succession to and not in conjunction with the primary cause.

A survey of the price advances recorded during the past few weeks reveals a most imposing list of such revisions. Included are the following products: buttweld and lapweld black and galvanized piping, boiler tubes, machine screws, wrought couplings and nipples, axes of all kinds, galvanized sheets, blue annealed and black sheets, soil pipe and fittings, plain wire, single loop bale ties, cast and malleable pipe fittings, rubber roofings, building papers, sheathing, belts, builders' hardware, galvanized pails, tubs, garbage and ash cans, tanks and sinks, range boilers, wood screws, stocks and dies, files and rasps, bar iron and bar steel, straightway valves, gate and globe valves, radiators and boilers, stove and sink bolts, mechanics' tools, padlocks, turpentine, stove pipe wire, brass and copper rods and tubing, heaters, fuel, eavestrough, conductor pipe, food choppers, mattocks, crow bars, grub hoes, claw and tamping bars, rock and clay picks, wrenches, tin ware and enameled ware products, cotton wrapping twines, antimony and spelter, as well as skate screws and a number of smaller lines.

In addition to the current revisions, there is a very strong tendency exhibited in certain other lines, with rumors of pending price advances. On the other hand, however, a number of downward revisions have also been recorded, but these changes are chiefly apparent on forward bookings only. Included in this category are such products as lawn mowers, gasoline, tires and tubes, sand paper and emery cloth, sporting goods, sprayers, grass hooks, pocket knives, rubber hose, stainless steel cutlery, clothes wringers, alarm clocks, and mirrors.

Reason for Higher Prices

This general movement towards higher price levels has been ascribed in many quarters to improved business conditions, the seasonal increased buying and consequent improved demand. Therefore, any recession in the volume of orders during the ensuing months should bring the test of current conditions. The seasonal dullness in the buying movement during the winter would tend to prove the stability of the existing higher levels on this group of hardware.

Buyers have also to consider the possible effects of seasonal movements upon the raw material markets. In view of these tendencies, moderate commitments on seasonal lines are generally being undertaken; the only element of hesistancy now evident is the fact that the cycle of improvement previously referred to may be of comparatively brief duration.

Certain manufacturers point out that a continuance of the advance in basic materials may necessitate even higher prices in the future, as such developments are reflected in production costs. As pointed out above, however, the primary steel markets have ceased to climb, at least temporarily, and the permanency and strength of the present situation and the possibilities of reaction, are vitally important characteristics.

The fact that several hardware manufacturers state that they are seriously contemplating advancing quotations on the majority of their lines would indicate that prices have seemingly reached a temporary level from which market developments will continue to be variable and complicated, including both recessions and advances, according to the trend of basic materials and the trend of production costs.

It is estimated that the tide of business has been rising for several months. There is no prospect at present that the revival will either terminate or suffer a serious reverse. Business recovery in general, however, has been retarded by various causes, such handicaps preventing the degree of progress that might have otherwise developed.

Three principal factors in the process of improved business relationship attract direct attention. The first is stated to be the working off of accumulations of high-priced goods left on the hands of producers and dealers when prices collapsed. The second constructive influence has been the stimulating influence of the 1922 building boom, and the third is the successful crop of the present season, which promises to increase the purchasing power of the agricultural element in the community and provides the element to discharge outstanding obligations with consequent beneficial effect upon trade in general.

Makes Every Department Pay Its Way

Changing Methods of Doing Business to Meet Changing Conditions—Quality Goods More Popular—Price Factor is Important —Merchandise Well Displayed is Half Sold—Modern Store Equipment Very Necessary—Featuring Tools and Electrics

"METHODS used in the carrying on of our business to-day are vastly different than they were some years ago, different from five years ago, and this season we find we still have to establish new schemes from those even employed last year in some of our departments. It seems the trend of custom changes almost from season to season, and more particularly in recent years. Apart from the buying end, where such care has now to be exercised, we find the selling over the counter a study in itself. It is not so many years ago that counter salesmanship was merely showing your customer the desired article, quoting the price and wait for a decision. When price, it might be said, sold the goods. Then came the time in years following, and I am speaking now of very recent years, when prices did not sell. People were demanding goods, and in many cases not even asking the price. The question was to be able to supply merchandise for sale. To-day another change has seemed to have passed over the buying public, and it is this stage that we merchants must deal with."

The above was a brief review of retailing conditions in the past years, outlined by H. St. Jacques, manager of S. Bourgeois & Company, hardware, St. Hyacinthe, Quebec. A store that has enjoyed a well established business in the community for a good many years, with developments in certain departments marked from time to time with the passing of years, until to-day each section of the store is a separate unit almost, and dependable on its showing in sales records for future existence. To be more specific, the electrical department was commenced a few years ago with the stocking of lamps only. At the present time the stock is complete enough for installation of either house or factory. If, on the other hand, these electrical supplies could not find a sale, they would have been discarded long before now. Mr. St. Jacques spoke of an isolated case where a new line was taken on, but for reasons pertaining to their locality it was found that the line could not pay its way and was at once sold elsewhere. Not in the store, at a sacrifice, because the goods could not be sold at any price in St. Hyacinthe.

New Modern Building Under Construction

With the advanced stage of merchandising now required, and the steady growth of trade, it is now realized that present premises are inadequate. "We are housed up here in too close quarters, and we cannot do justice to our goods," said Mr. St. Jacques. For this reason it was decided last year to move and extend, and a brand new building is now under construction. The location of their new stand is only a few doors away and will mean, when finished, everything in modern stores.

The front of the new store will be solid plate glass across the frontage of 60 feet with wide entrance in centre. The depth of the front store will be 90 feet, with the feature here of the extra high ceiling. The layout, as now planned, will be both modern and unique. Directly above the entrance will be the office, offering a full view of the store, and on this same level is a landing 10 feet wide, encircling the whole store. Two stairways, 7 feet wide, will be laid at the rear running from the centre of the store outward, so that when entering one can see at a glance the entrance to the raised portion. On this landing will be displayed lines that require more careful selection on the part of the buyer. There are many lines in a hardware store which the customer must take time to select, both because of more money involved and different styles usually shown. For instance, such lines as refrigerators, oil stoves, washing machines, churns, wringers, ham-

That the windows can be used very effectively for the sale of tools at this time of year is indicated by the arrangement depicted above. Modern fixtures, display boards and show cases have been used to good advantage in showing a wide range of various tools. The rest of the display is well arranged and represents a comprehensive stock capable of meeting the requirements of many local mechanics. While building has been fairly active throughout Canada this year and is continuing this Fall, such displays will continue to bring in business. Before the cold weather sets in there are many odd jobs of fixing up to be done around the house and outbuildings and such property owners are among the best buyers.

mocks, and other larger lines that usually are stocked on the floor. These can be displayed to advantage on this raised floor also because of their size, they being easily seen although some distance from the customers on the main floor.

Fixtures on the main floor will be placed some distance away from the wall on one side, this allowing passage behind for a hand truck to bring in stock. On one side the heavier goods will be shelved, including bolts, hinges, hangers, paint and varnish, etc., also the counter with the nail lines underneath. Showcases will be plentiful, adorning the centre of the floor, while aluminum ware, granite ware, tinware, will occupy the shelving on the other wall. "We have planned our new store for months," said Mr. St. Jacques, "but when completed I am sure that with our high ceiling and elevated landing as a feature, we will have one of the most modern stores in the province."

Good Display is Worth Extra Salesmen

"The old saying, 'goods well displayed are half sold' is only too true. Although we use every available means to keep our goods in the customers' eyes, we find we are still handicapped," he continued.

To a visitor to the store this is manifest, for even with a comparatively small store for the amount of stock carried, one is confronted with almost a mass of merchandise on entering the front door. Kept clean and neatly arranged as far as possible, but owing to lack of space the display does not show to advantage. In the centre of the floor, wares are stocked on tables. These form a half circle behind three silent salesmen, and above the tables are plate glass shelves for the finer wares, such as nickel plated tea pots, coffee pots, perculators, etc. Suspended also from the ceiling are wire trays which offer extra display space for lighter lines.

Fine Tool Display

If there is one section of the store that is more outstanding in appearance than the others, it is the tool department. Tools are a very profitable line with the store for many years and have grown appreciably. Two silent salesmen on the floor and two large glass fronted wall cases constitute the display. A sample of every tool stocked is in plain view.

"Mechanics are in a class by themselves, when it comes to serving them in a store. In most cases the man knows exactly what he wishes to buy before he enters the store. He knows the brand and style of tool he requires, and if he can see it before him, the sale is soon made."

Quality Counts

Continuing with the conversation dealing with present day business requirements, Mr. St. Jacques states that apart from prominent display, he thought quality was next in importance. People were to-day rather hesitant in their purchases at times, but it was not his opinion that cheaper quality at a lower price would remedy this. Take for example, cutlery, where prices in the past few years made it almost prohibitive for the working man to purchase even every day requirements. However, they did not buy the cheaper quality goods, rather they waited until they could afford it. Sales in this particular commodity had been curtailed because of high prices, but merchants would now commence to reap the benefit, with lower priced quality goods now procurable.

The same might apply to aluminumware. Housewives were now purchasing utensils of highest quality. Prices, in comparison with other wares, were high, but even the working man's wife realizes that it pays to buy quality. Sales of aluminumware in this store have increased in greater proportions than any other individual line, solely because of quality and display, in Mr. St. Jacques' opinion.

"In a town such as we have here, we find two classes of custom to cater to. With factories giving employment to a large number of our townspeople, there is the working man with only a fair salary, and the heads of the departments and executives of these same concerns, also the more well-to-do citizens who are among our customers. Both classes, however, demand the better grade of merchandise," continued Mr. St. Jacques.

Working From The Outside

"Merchandising to-day, too, often requires working from the outside, particularly does this apply to building materials. I, myself, keep a close observance on building constructions, and very often in the months of seasonable weather, I spend the mornings out among contractors and owners of buildings under construction," stated Mr. St. Jacques. "We find, as merchants in all sections must, that competition in these materials is keen, and I will admit that oftentimes we are kept hustling to secure an order. However, with a very complete stock to back us up, we are fortunately able to secure a good amount of this business.

"There is one obstacle we must overcome here, and I am sure other dealers have experienced the same difficulty. St. Hyacinthe is classed as a good manufacturing centre for its size, and consequently we have some very good manufacturing concerns in our town. It is surprising, however, the competition we must meet to even supply them with such common requirements as paint, or even tools. I am speaking now of firms whose manufacture is anything but hardware lines, or commodities that require any great amount of paint, and only a limited amount of tools. In either of these they will only use sufficient for the upkeep of their factory and machinery. Notwithstanding this, we find they purchase from other manufacturers or large jobbing houses, and very often we have no chance whatever, regardless of price. There seems to be a misunderstanding on the part of these manufacturers, and without a comparison of quotations, they are beforehand convinced that they can buy cheaper from outside sources than from their own retail hardware dealer. Such is not always the case, however, and very often we are able to compete with outside quotations. Purchases, also, can be made at home for actual requirements, and this should surely be worth something to them. The mechanic or workman whose duties are to use these articles or supplies is very apt to become careless when he knows there is a stock on hand at his disposal. We hardware merchants are willing to supply this trade with only a reasonable amount of profit, because it means a rapid turnover, and very often we are able to meet quotations from larger supply houses when quantity buying, and freight rates are considered."

Advancement in Paint Selling

Selling of paints and varnishes has now become almost an art, through the advancement of the industry, and the products now placed on the market for every purpose. Considerable knowledge in the manufacture of the many lines was now almost necessary for successful selling. There was a time when white lead in oil and linseed oil, with dries added, was advocated for painting both inside and out. Now, ready mixed paint had taken its place to a great extent, the use of the latter becoming more pronounced each year. It had been a hard task to educate some of the older users to take on the prepared mixtures, but gradually it is being done.

Now comes the "Save the Surface" argument, that is fast gaining popularity among dealers, and rightly so, because it is really bringing to the minds of the

May Be Some Good Pointers Here For You

Briefly summarized, the following are some of the strong points in this article:—

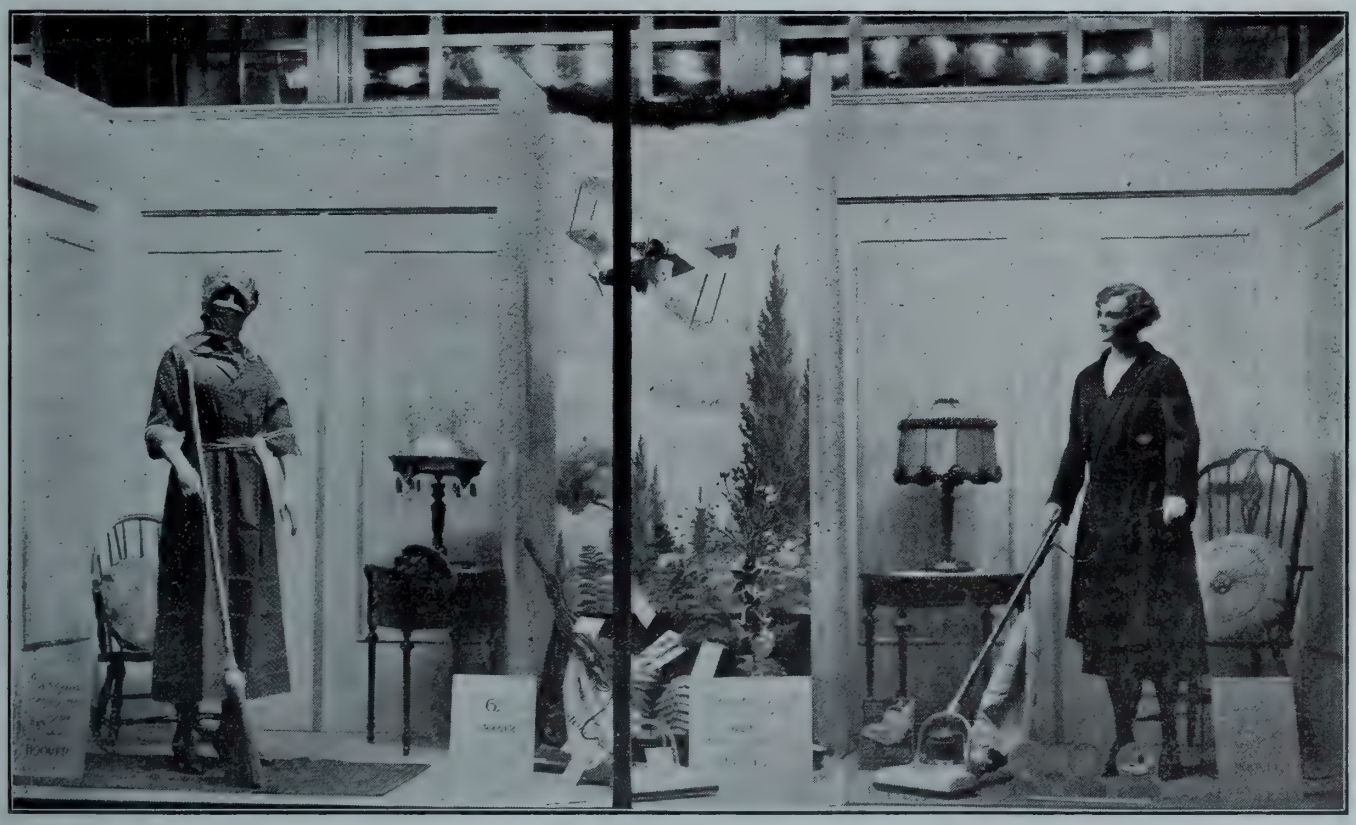
1. **Buying conditions are constantly changing and merchant must watch and prepare for these.**
2. **Make every department stand on own footing and pay a profit.**
3. **Don't carry a weak department. Study the field, put in good range of stock. Go after business aggressively. If it doesn't pay then throw it out altogether.**
4. **Good display features make salesmen's work easier and more effective.**
5. **Mechanics are a special class of buyers, particularly where tools are concerned.**
6. **Quality is important argument with price running close second.**
7. **Constant study needed to do effective selling.**
8. **Support the Save the Surface campaign in paint selling.**
9. **Quote prices in all store advertising.**

people the true sense of the value of paint as a preservative, apart from a product for decorative purposes. The present store will not allow taking hold of the scheme in a manner as they would like, but certainly the paint department in their new premises would fall in line with other dealers in promoting this sales-help.

Returns Empties at Invoice Price

Prices charged for containers by manufacturers and jobbing houses are often thought excessive. Complaints have been registered by merchants that packing cases are charged to them at a price that can in no way be realized. In many cases these are re-sold at a considerable sacrifice, but more often used for kindling wood or for early fall and late spring fuel. Seeing a large heap of these in a corner of the basement the question of how they were disposed of was asked. Mr. St. Jacques explained that in every case where a container charge is added to an invoice, this empty is kept track of, stored in a dry portion of the basement, and when a sufficient number for a truck load accumulated, they are trucked back to Montreal, and returned to former shippers at same quotation as previously paid. It must not be overlooked, however, that St. Hyacinthe is in the proximity of Montreal, and freight charges are eliminated by the use of the firm's truck.

Last, but certainly not least in importance, on Mr. St. Jacques' mind, is the question of advertising to the retail merchant. It may be the local paper that is preferred by some, solely the store windows by others, circulars, concert programmes, prize lists, etc., also being favored by many. All are considered good by this store, as many as the retailer can conveniently use. No matter where advertised, however, the price of the specified article is not overlooked. "People are anxious to know our merchandise, quality and otherwise, but they are also anxious to know the price."



WHAT TO FEATURE FOR HALLOWE'EN

Hallowe'en is on October 31. Hardwaremen can feature wax for preparing floors for house dances, galvanized tubs, and string for the apple diving contests, various small articles for prizes, electric bulbs for lantern effects. An effective window can be dressed with pumpkins cut in grotesque figures and lighted with candles, along with Chinese lanterns, and other material conveying the impression of a harvest scene.

RAZOR PRESENTATION SET WAS STERLING SILVER

In the report appearing in last week's issue of Hardware and Metal, with reference to the presentation of sets from the Auto Strop Safety Razor Co., to the guests attending the Canadian Wholesale Hardware Association annual dinner, it was reported that the guest of honor, Sir Henry Drayton, was presented with a gold-plated set. It is stated that this set was sterling silver.

Electric Devices for Fall Housecleaning

The housewife is now busily engaged on Fall housecleaning and a harvest awaits the hardwaremen who play up the various lines they carry which assist materially in lightening labor of cleaning. In addition to the polishes, paints, varnishes, etc., there are a number of electric devices which are used largely at this season of year. Prominent among these is the electric vacuum cleaner. Proof that very attractive displays can be arranged is seen in this window display showing the comparison between old and modern methods of cleaning the rugs. This display stimulated much attention in vacuum cleaners and resulted not only in some direct sales but a splendid list of enquirers to be worked up into ultimate buyers. Now is the time the housewife is most approachable with such ideas and when they will bring best results.

Our American Trade

DURING the month of August, Canada attained the noteworthy position of being the leading outside trader with the United States. Hitherto American trade with Britain has exceeded that with Canada. United States exports to Canada in this month were $56,000,000 and to Britain $55,000,000, and imports from Canada $32,000,000 and Britain $31,000,000. This country led Britain by a million dollars each way. Germany was third, with exports and imports of $37,000,000.

Furthering Interests of Good Health

GOOD HEALTH Week is to be held in Canada and the United States from October 23 to 30. This is the first occasion of this kind to be observed in Canada and it is hoped to make it a regular feature in years to come.

Plans are being made by a group of manufacturers interested in sanitary equipment, to make this week a memorable one. The idea will be developed through the co-operation of health department officials, plumbers, retailers and others coming in contact with the public. Obviously it provides merchants with a splendid opportunity to drive home the necessity of modern plumbing, heating and ventilating equipment in the interests of Good Health. There is a broad field here awaiting development.

Retail Salesman's Importance

WHAT ESSENTIALS are required to make a successful retail salesman? This question was recently asked by a delegate attending a trade convention and this was the reply: "No person can be a success as salesclerk unless they have the faculty of giving their customers complete satisfaction with every purchase made." Or in other words, selling the goods to themselves, before attempting to sell to their customers. To sell satisfaction in your dealings with the store's customers, the customer must be made to appreciate the value of the article you sell. Take, for example, a lady customer who enters the store to do some shopping. It may be only a minor article of small importance. Then again it may be some special for some memorable occasion in the family circle. In either case she has the money and you the merchandise. Her sense of self-interest rises to its highest point. While she may be a lady of friendly disposition, when she goes shopping, her instinct, sense of duty, and good sense all urge her to protect her purse—in fact, money is the one thing that lies closest to her self-centredness. From this she will not part, and then only on one condition—she must be made to feel the values offered her in exchange in the shape of some token or gift that will afford her a benefit or pleasure greater than the satisfaction she may have in keeping her money in her purse. When she considers the purchase of any article she instinctively weighs it against its cost; her self-interest scale begins to balance, first this way, then that way, weighing carefully the price against the goods until the sale is won or lost. No matter how good a farmer a man may be, nor how good a plot of land he may have, if he does not create conditions favorable to the growth of the seed sown his crop will invariably prove a failure. Similarly to the above is the hardware store salesman. Whenever there is a sale made the salesman does not really make the sale—the decision of the customer does that, but he can, and in every case should create conditions favorable to a decision for making a purchase. In this way he will not be imposing upon the customer, but on the contrary, be performing a genuine service.

The sales clerk can easily render this service when he studies his customers' wants and then shows the merchandise that will meet their requirements, also by calling attention to the goods in question and making it convenient for customers to examine the intended purchase.

More Frequent Reports on Improvement

REPORTS that business is showing marked improvement are becoming more frequent from all parts of the country. There is still, of course, an unevenness in industrial conditions, and certain industries which depend primarily upon large supplies of coal, iron and steel have, in a number of cases, been obliged to curtail operations. But this is obviously the result of an artificial curtailment of supply rather than of a decreased demand. In the case of the wholesale and retail trades the sobering experience of the last two years has modified to a large extent the general opinion as to what constitutes an autumn revival of business. Orders, though moderate in volume, have become steadier, collections have improved, and there appears to be a disposition on the part of customers to be satisfied with a much shorter term of credit.

Canada's Export Opportunity

DURING the next two months, business men will have an opportunity to discuss export affairs with two Canadian Trade Commissioners, Dr. Ross for China, and Major Gordon B. Johnson for Scotland and Ireland. In statements which they have made it is evident that important markets await development in a larger way than heretofore by Canadian manufacturers. The opportunity seems all the more real because of the curtailment that must result in trade with the United States because of the high tariff barrier which that country is raising in protection of home industry and in more intensive development of their home market. Canadian manufacturing processes follow those of our neighbors to the south very closely, and in appreciation of export opportunities in Canada the number of branch factories here is steadily increasing. Products should, therefore, be such as to meet the requirements of a trade that may be diverted in this direction.

EMPHASIS should be placed on the necessity of using only mailing lists that are up-to-date. Mailing lists should be gone over from time to time, once a year is not too often, to eliminate the dead names and to add the names of new prospects.

Such a scrutinizing would effect a considerable saving in money, time and labor, and render the success of a mailing campaign more certain. Dealers should watch carefully the returns from any such campaign and make changes accordingly.

Costs 27.8 Per Cent to Do Business

Operating Expenses in Department Stores in 1921 Were Higher in Percentage of Net Sales Than in 1920—Costs Are Arrived at From Reports Made From 392 Stores in Canada and the United States

THE COST of doing business, according to the reports received by the Bureau of Business Research, Harvard University, was higher in department stores in percentage of net sales in 1921 than in 1920. The chief items which were higher in ratio to sales in 1921 were salaries and wages, rentals, and advertising. Many of the smaller items were almost the same in percentage of sales in both years. The gross margin between the cost of the merchandise and the sales was slightly higher in 1921 than in the preceding year, but the difference was less than the increase in total expense. Consequently the average net profit was lower in 1921. It is to be noted, however, that the department stores showed an average net profit for 1921 despite the depression, whereas the retail shoe trade, the retail jewelry trade, and certain phases of wholesale business, for which the Bureau also has collected figures, each showed an average net loss for that year.

The department stores from which reports were received for both 1920 and 1921 showed an increase of 4.3 per cent. in net sales. This also was in contrast to the other three trades just referred to—the retail shoe trade having shown a decrease of 9 per cent. in net sales in 1921, the retail jewelry trade a decrease of 15 per cent., and the wholesale business records a decrease of 30 per cent. in net sales as compared with the preceding year.

392 Stores Make Reports

Reports on operating expenses in 1921 were received from three hundred and ninety-two department stores with an aggregate volume of sales of $724,820,000. The summaries in this regard, however, are based on the reports from three hundred and one firms with an aggregate volume of sales of $496,238,000.

The firms from which reports were received and tabulated were located in forty-two states, the District of Columbia, and Canada. One hundred and sixty-eight of these firms were located in cities with population less than 50,000; forty-nine firms in cities with population 50,000-99,000; fifty-nine firms in cities with population 100,000-699,000; twenty-four firms in cities with 700,000 population and over; and one firm was unidentified.

Operating expenses also are analyzed for five groups of firms classified according to their volume of sales. A supplementary summary also is given of operating expenses of the stores in five specially selected districts. An analysis has been made of the stock-turn figures and of the gross margin and net profit or loss figures of the firms from which reports were received.

The volume of business of the individual department stores from which reports were received for 1921 ranged from $16,000 to $29,000,000. Only seventeen firms, however, among those reporting, had sales less than $100,000, and the average volume of sales was over $1,000,000. The aggregate volume of sales for the one hundred and forty-nine firms that sent in fully comparable reports for both 1920 and 1921 was $305,173,000 in 1920 and $318,352,000 in 1921. The group figures for these firms are given herewith:—

	All Firms Reporting	Firms Reporting Both Years	
Net Sales	1921	1920	1921
Less than $250,000	81	22	25
$250,000-$499,000	66	32	34
$500,000-$999,000	47	31	24
$1,000,000-$2,499,000	61	36	39
$2,500,000 and over	46	28	27
Total number of firms	301	149	149

Net sales is the figure that is used to represent the volume of business of each firm. It also is the figure on which the percentages of expense and of gross margin and net profit or loss are reckoned. It serves as the common basis for comparison. On each report it was determined by deducting from gross sales, returns and allowances to customers, as well as cash discounts to employees and other purchasers and amounts collected from customers for excise and luxury taxes.

Operating Expenses

The cost of doing business is represented by total expense. This is the sum of all items of expense, including expenditures for such items as supplies and postage, insurance, advertising, wages, and also salary for the proprietor or partners, rent of the store building whether owned or leased, and interest both on capital borrowed and also on the net amount of capital invested in the business. It does not include inward freight, express, and cartage or alteration costs which are accounted for in the merchandise statement as part of the cost of the merchandise. It also does not include excise or luxury taxes, which are deducted from gross sales, or federal and state income taxes, provision for which is made in the net gain statement after the net gain for the year has been determined.

Operating expenses in department stores in 1921—301 firms—were as follows:—

Salaries and wages	15.4
Rentals	2.4
Advertising	2.4
Taxes (Except on Buildings, Income, and Profits)	0.6
Interest (On Capital—Borrowed and on Capital—Owned)	2.3
Supplies	0.8
Service Purchased (Heat, Light, Power, Delivery)	0.6
Unclassified	1.2
Traveling	0.5
Communication	0.2
Repairs	0.2
Insurance	0.4
Depreciation—Losses from Bad Debts	0.2
Other Depreciation	0.5
Professional Services	0.1
Total Expense	27.8

Total expense, which represents the cost of doing business, is the sum of the individual groups of expenses for which the common figures have just been explained.

The common figure for total expense in 1921 for the three hundred and one firms from which reports were received was 27.8 per cent. of net sales. Substantially more than one-half the firms reported total expense between 24 per cent. and 30 per cent. of net sales; the concentration around the common figure was well defined. Although the common figure in 1921 was 27.8 per cent. of net sales, the grouping of the expenses indicated that the tendency is toward a lower ratio of total expense, probably approaching a normal in the future around 26 per cent. of net sales.

The highest total expense reported was 45.9 per cent. of net sales. This firm, which had a small volume of sales, had the highest figure for salaries and wages and also the highest net loss that was reported by any store. Its rate of stock-turn was less than one-half the common figure.

BRITISH SENIOR TRADE COMMISSIONER TO RETIRE

G. T. Milne, British government senior Trade Commissioner in Canada and Newfoundland, announced this week that he expects to leave for England toward the end of next month and that he will retire from the Imperial Civil Service early next February. Mr. Milne took up his duties in Canada towards the end of the war but left for Cuba at the end of 1919. He returned to Montreal approximately one year ago.

Events in the Trade

BUSINESS CHANGES

The Johnson & Tait, hardware store, Toronto, has been succeeded by James Tait.

COMMENCING IN BUSINESS

H. J. Thompson and Harold F. Buchanan will conduct a new hardware store at Wingham, Ont. Both have had previous hardware experience. Mr. Buchanan was at one time associated with the Haileybury branch of the Northern Canada Supply Co., and was until recently connected with the Plummer Ferguson Hardware Co., of the Sault.

FIRE LOSS

F. M. Hempstreet, hardware, Winnipeg, Man., suffered loss through fire.

ROB OTTAWA STORE

The Capital Hardware Co., Ottawa, were visited by thieves, who gained entrance to the hardware store through a basement window. The burglars smashed open a cash register and took $17. A revolver and a pair of scissors were the only other goods taken.

PERSONAL

Lt. Col. Robt. Starke and Gordon C. Seybold of Starke-Seybold Limited, are attending the hardware convention in Atlantic City this week.

George Henderson, president Brandram-Henderson Limited, left on Friday of this week for England. Mr. Henderson expects to be away for about three weeks.

OBITUARY

S. D. Hewson, of the Hamilton office, Steel Co. of Canada, died on Wednesday of this week after several months sickness. He had been with the sales staff for over fifteen years.

Charles H. Potts, one of the founders of the old Halifax paint firm of Henderson and Potts, and a director of their successors, Brandram Henderson, Ltd., of Montreal and Halifax, died at the Victoria General Hospital, Halifax, N. S. Mr. Potts made his residence at Weymouth, N. S., for the past two years.

Cecil R. Lambert, president of the Cecil R. Lambert Co, manufacturers' agents, Detroit, was killed in an auto collision in Chicago. Mr. Lambert was crushed beneath the car, and his death was instantaneous. He was 35 years old, the son of the late Charles R. Lambert, former president of the Clayton & Lambert Mfg. Co., Detroit.

NEW STORE WANTS PRICE LISTS AND CATALOGS

The new Thompson and Buchanan hardware store at Wingham, Ont., are requesting wholesalers and manufacturing firms to send them catalogs and price lists.

OUT OF THE ASHES

The Norfolk and Rochester Hardware Co., Ltd., of Haileybury, Ont., who suffered a complete loss in the recent fire, announce that they are starting up again in temporary premises, and will probably rebuild next spring.

REQUIRE ALL CATALOGS

The George Taylor Hardware, Ltd., of Cobalt, Ontario, are in need of two copies of all hardware catalogues. In the recent fire, which was reported in last week's issue of Hardware and Metal, their catalog file was completely destroyed.

STEEL PRODUCTS TRADE

Winnipeg.—W. J. Wilson, sales manager of the Western Steel Products, Ltd., was the principal speaker at the annual meeting of the Salesmanagers' Association, in the Board of Trade building. Mr. Wilson's address was of a particularly informative nature, and his survey of the marked progress of the steel products industry during the past decade on the continent was received with great interest.

J. McD. WILSON
of the Chinic Ha dware Co., Quebec City, who was elected to the executive committee of the Canadian Wholesale Hardware Association for the season 1922-23, as announced in last week's issue of Hardware and Metal.

PURCHASING AGENTS HOLD THIRD ANNUAL CONVENTION

Over one hundred purchasing agents from cities all over Canada and some in the United States gathered at the Windsor Hotel, Montreal, at the third annual convention of the Purchasing Agents' Association of Canada.

MOVE TO LARGER OFFICE

The Toronto sales office of the Canada Foundries & Forgings Ltd., has now moved into larger quarters, with additional telephone facilities. The address, 185 Bay street, however, remains the same.

FISHER MOTOR COMPANY OPEN NEW FACTORY

The Fisher Motor Co., Ltd., Orillia, Ont., have opened a new factory. The building is three stories, of hollow tile construction, approximately 200 x 75 ft. The offices are located on the main floor. The products being made include die castings, sheet metal stampings, ice cream dispensers, fountain equipment, paper cup vending machines, the Ball arm radiator caps, and also a machine for dispensing paper towels.

"CHANGE OF OWNERSHIP" SALE

In connection with the recent re-organization of Ingram & Davey Ltd., St. Thomas, Ont., which is now the Davey Hardware Co., a "Change of Ownership" sale was staged with remarkable results. It is estimated that more than 5,000 persons visited the store on the opening day. Describing the patronage, Mr. Davey stated it greatly exceeded the largest Christmas crowd on record.

WESTERN ONTARIO NEWS

The Ideal Furnace Company, formerly of West Toronto, has moved its plant to Erin, Ont.

Col. W. M. Gartshore, of the McClary Manufacturing Company, London, Ont., plans to spend the winter in New Zealand and will leave shortly.

The new store of the Cowan Hardware Company at London, Ont., will be opened very shortly. The fixtures and equipment are now being installed.

The St. Marys Hardware Co., St. Marys, Ont., has been making a big drive this week in fall bulbs and has done much to stimulate interest in gardening and also in indoor bulb growing.

Sudden Death of James Hardy, Secretary Canadian Wholesale Hardware Association.

Stricken With Heart Failure While Attending National Hardware Convention at Atlantic City—Was Prominent in Canadian Hardware Circles for Over a Decade—Diversified Interests in Financial and Commercial Business

JAMES HARDY, known throughout the hardware trade as secretary-treasurer of the Canadian Wholesale Hardware Association, and prominent for a decade in manufacturing and wholesale circles, died suddenly on the boardwalk at Atlantic City on Tuesday afternoon of this week. Heart failure was the cause of his collapse. He was seated in a chair when stricken, and died before medical aid could reach him.

Mr. Hardy was attending the annual convention of the United States National Hardware Association, having made a practice of doing this for several years past. He was usually on the program at the opening sessions, making a brief address and bringing greetings from the Canadian trade.

The remains were brought back to Toronto and the funeral took place at Grace Church on Friday afternoon, October 20.

In addition to being secretary to the Canadian Wholesale Hardware Association for over twenty-five years, the late James Hardy was a member of the firm of Jenkins & Hardy, chartered accountants of Toronto, and also of James Hardy & Son, financial agents. His firm acted as secretary for a large number of trade associations and manufacturing concerns, and at one time discharged the duties of secretary-treasurer for about fifty different companies.

Mr. Hardy was of a very genial disposition and well liked among wholesale and manufacturing circles. Regrets at his sudden demise are expressed in practically all phases of Canadian hardware trade, and wherever his name and business career have been associated. He also held a large number of executive positions, among which was the presidency of the Hamilton Stove and Heater Co. Mr. Hardy was also a member of the board of directors of the Canada Creosoting Co.; a director of the Standard Bank, and president of the Muskoka Lake Golf and Country Club.

He was in his 68th year. He did a great deal of travelling and was generally prepared to catch a train on very short notice, having made a practice of keeping a grip packed for any such emergency. Mr. Hardy suffered a severe illness a couple of years ago, but after spending some months at his summer home in Muskoka, he was reported as feeling much better. His recovery was generally an accepted fact, and the news of his fatal collapse comes as a shock to many of his closer acquaintances.

The late Mr. Hardy was born at Nottingham, England, but came to Canada in 1883. He resided in Toronto for over

THE LATE JAMES HARDY

forty years, and is survived by the widow and one son, Arthur J. Hardy, a member of the firm. Mr. Hardy was still actively engaged in directing his various business enterprises, being a prominent figure in financial and commercial circles.

A local wholesale merchant described Mr. Hardy as "one of the old school whose passing will be sincerely regretted. His loss is a blow to the Wholesale Hardware Association, as he had guided the destinies of this organization almost from its conception."

S. J. Frame, of S. J. Frame & Co., Toronto, who was a former business associate with the late Mr. Hardy for over thirty years, sincerely regretted the passing of such a prominent figure in manufacturing and wholesale circles. "The passing away of Mr. Hardy will make a gap in this phase of industry, which will be distinctly felt," stated Mr. Frame, who is in a similar line of business, having for the past eight years acted as secretary for a large number of trade associations.

Peleg Howland, president of H. S. Howland & Son Co., Ltd., wholesale hardware, Toronto, made the following statement to Hardware and Metal:

"The news of Mr. Hardy's death came as a great shock to me. It was only about one week ago that he was in my office and he then stated that his health was fairly good. Mr. Hardy was a very likable man, and quickly made friends of those with whom he came into contact in his business relations. The firm of Jenkins & Hardy was the early secretary of the Canadian Wholesale Hardware Association, but the major portion of the work rested upon Mr. Hardy's shoulders. His judgment frequently had a stabilizing effect upon the affairs of the association."

Mr. Howland further remarked that he had known Mr. Hardy for something like thirty years. He also spoke of his grasp of detail and the wide knowledge of financial and commercial matters that was possessed by the late James Hardy.

"Present Forms of Taxation Are a Burden on the Retailer"

WINCHESTER, Ont. (Special).—"Encourage your local merchant. He is making your municipality whatever it is. Give him the preference whenever you want anything."

The foregoing is the advice given to a large gathering of the residents of the town of Winchester, Ont., a few days ago by Henry Watters, president of the Eastern Ontario and Ottawa District branch of the Retail Merchants' Association. The occasion was the presentation of a charter to the newly organized branch of that town, and in addition to the attendance of retail merchants from Ottawa and various points in the district, there were a goodly number of townspeople present. The Ottawa contingent, which was made up almost wholly of the hardwaremen and officials of the R. M. A., was dined at the Hotel Winchester, where they were met by representatives of the new organization. They later went to the town hall where the meeting was held. The speakers included Mr. Watters, Provincial Secretary W. C. Miller; District Secretary J. C. Campbell and Clarence A. J. Miller, representing the Retail Merchants' Underwriters' Agency. The Dominion Board, R. M. A., was represented by Assistant Secretary F. R. Perrott.

Support the Local Merchants

In his address, Mr Watters laid strong emphasis upon the importance of supporting the local merchant. "He is the man who is paying the taxes and contributing to the up-keep of the community," he said. "Whereas on the other hand, the mail order houses, hundreds of miles away, are not contributing a cent to the town's welfare."

The president then pointed out that the stronger the association was, the more it could accomplish. On the question of taxation, Mr. Watters said the present government seemed disposed to impose a burden on the retailer, which should not rest on him.

Too Many Hardware Stores in Toronto?

Retailers Suggest Wholesalers Are to Blame for Large Number of Newcomers Commencing Retail Hardware Business in Promising Localities—Discuss Standing of Painter, Whether Consumer or Otherwise—May Change Date of Regular Monthly Meeting

THAT there are too many retail hardware stores in Toronto and the surrounding district was the unanimous opinion expressed at the regular meeting of the Toronto Retail Hardware and Paint Club, held at the Central Y. M. C. A., on Monday of this week.

In introducing this question for discussion, President H. N. Joy, who presided, pointed out that this was a vital and serious problem. More retail stores were opening up all the time, several within short distances of one another. One merchant expressed the opinion that the situation has gone past the competitive stage and was almost tragic as regards its effects upon those investing their capital in this manner. Examples were freely quoted where, in local districts that could perhaps be classed as progressive and expanding, more new retail stores had recently commenced business than the most optimistic visions of the prospective size of these growing localities could be expected to sustain.

The general feeling of the meeting was that fresh ventures of this nature should be strongly discouraged, and the statement was freely made that if those commencing business in the instances under discussion, had been aware of the consequences and difficulties awaiting them, the majority would have hesitated before jeopardizing their capital.

Lay Blame on Jobbers

In discussing the matter from the viewpoint of what action could be taken by the Club to acquaint prospective merchants in respect to existing conditions, it was pointed out that several of such new stores had changed hands comparatively soon after opening. It was felt that many newcomers in the field vanish within a short period, either selling out or followed by another. One reason for this condition was advanced that jobbers are too keen to open up new accounts, without taking into consideration the class of trade, the size of the district, its future prospects and the number of retail hardwaremen already established therein. It was felt that it lay within the jobbers' province to remedy this situation.

It was also felt that some of the more recent cases were launching out under a false impression, while others have had little experience in the hardware industry.

Frank Jackson, a member of the executive committee, expressed the opinion that many of those recently established in the retail business were being nursed along by wholesalers and manufacturers in the hope that later on, perhaps in the near future, they would be in an improved position. Another merchant stated that wholesalers were very largely to blame, and such action on their part tending toward these conditions in the local trade, failed to take into account its effects upon the merchants who had been perhaps the pioneers in those districts now in the limelight. On the other hand, however, it was admitted that if the wholesaler refused to sell to a prospective merchant, it would not prevent the goods from being secured from some other house, and in connection with this phase of the subject a further theory was advanced that should all city jobbers fail to meet the requests of newcomers, they themselves would soon be faced with undue outside competition. This matter was finally left to the executive to deal with.

The Price to Consumers

Another important question before the gathering was whether manufacturers and jobbers of paints, lead and oil, should sell consumers and others at wholesale prices.

Here again an interesting discussion developed, the principal factor being whether the painter should be classed as a consumer or otherwise. Many merchants contended that the painter and decorator was merely a consumer in that he does not carry stock for sale, but only contracts for his requirements according to the current needs of the jobs in hand. In comparison it was pointed out that the retail hardware merchant buys purely for re-sale purposes and should be protected.

In the open discussion which followed, it was admitted that certain manufacturers protect their dealers, some around five per cent. and others up to ten per cent. That this was not a sufficient margin was readily endorsed. One retailer expressed the opinion that manufacturers and wholesalers were out to create and develop a larger volume of sales and merely took advantage of any opportunities which presented themselves. It was then pointedly stated that the retailer can supply all requirements in this field if given a legitimate opportunity to do so.

Classing the painter as a party entitled to preferential treatment, the statement was made that he bought the paint and then re-sold it to the actual consumer. In opposition to this, another merchant remarked that the painter was merely the representative or agent for the consumer in purchasing the paint, and when he paid for these products it was really done on the consumer's behalf only. The only thing which the painter sold was service and labor or time in the application of the goods. The matter was finally left open.

Report of Picnic Committee

While the attendance at the meeting was not large, the discussion at all times was keen and interest well sustained throughout. The meeting opened with the usual routine being speedily transacted. The report of the picnic committee was then introduced and adopted as read. This dealt with the first annual picnic conducted by the club last July, which resulted in a small balance being paid into the general exchequer. Certain recommendations were then made regarding future picnics, especially with respect to securing greater attendance of members and their families. This matter was also referred to the executive committee.

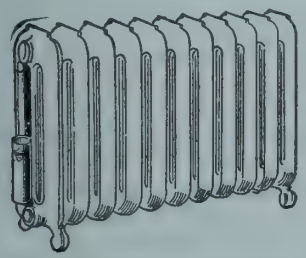
Much time was spent in discussing examples of price shading between competitive firms which were aired before the meeting. No definite line of action was taken respecting this matter.

Frank Jackson moved a motion to amend the by-law whereby the date of the regular meetings of the club could be changed from the 2nd Monday in each month to the second Tuesday. A resolution will be introduced and voted on at the next meeting whereby this alteration to the constitution will be open to receive the sanction of the members.

It was also decided to hold the next gathering on Tuesday, November 14, the change from the Monday evening being the result of the mediocre attendance. The location will be announced in Hardware and Metal, this decision being left with the committee. A number of interesting items are scheduled to come up for discussion at each gathering, and it is the intention to provide speakers on special topics of interest as the occasion requires. President Joy announced that there was no dearth of competent speakers, and was thereupon promptly commissioned to arrange for a speaker at the next meeting on the topic "Salesmanship." Other questions of vital interest to the retail trade will be taken up and discussed, together with recommendations decided upon.

The meeting also endorsed a special drive for membership in the organization, an inducement being offered that the usual fee cover an extended period for the balance of this season as well as the complete year to end of 1923.

New Hardware Goods



Offered to Canadian Hardwaremen

RADIATOR HUMIDIFIERS

The Sheet Metal Products Co., of Canada Ltd., Toronto, are placing on the market a new radiator humidifier.

This humidifier is designed so as to fit in between the upright sections of a hot water or steam radiator. The evaporating pan is 18 inches long by 9½ inches deep, and the supply can is three inches in diameter by 9½ inches high, this holding over two quarts of water.

The manufacturers point out that in experimenting with this humidifier, it was found that almost one quart of

S.M.P. Radiator Humidifier.

water per day was evaporated in a cold temperature. It is stated that in large radiators and under special conditions, two of these humidifiers can be used to each radiator, one at each end.

For the present the makers state that these products will be made in one size only and will be finished in either pearl gray or white. It is claimed that this humidifier will fit almost any standard radiator, except the very low ones.

GROUND-FORM GEAR CUTTERS

The Browne & Sharpe Mfg. Co., Providence, R. I., has introduced ground-form gear cutters which, as the name implies, are ground on the tooth form. It is claimed that this grinding corrects all hardening distortions, giving each tooth great accuracy of form and aligning all teeth with the hole in the cutter.

It is pointed out by the makers that as the work of cutting is evenly distributed among all the teeth, the resulting heat is not confined to any one portion of the cutter. This removes one of the commonest causes of cutter wear—localized heating. Another factor which is said to add to the life of ground-form cutters is that grinding of the form gives the teeth a positive clearance, eliminating "rubing" of the form back of the cutting edge. These cutters can be furnished from 1¾ pitch to 12 pitch inclusive.

STARRETT HAND VISE

The new Starrett hand vise, No. 200, placed on the market by the L. S. Starrett Co., Athol, Mass., is said to have a wide range of usefulness in the machine shop, garage and home. It is claimed to be particularly suitable for work around speed lathes, drill presses, etc.

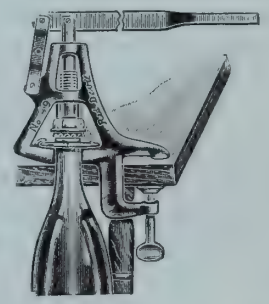
A feature of this vise is the adjustable handle which may be clamped at any point within a radius of 180 degrees. This opens up many uses for it. The stationary jaw has three V grooves for clamping cylindrical pieces such as wire. The rod and spring are intended to prevent the adjustable jaw from flopping around when opening or closing the clamp. The capacity of the vise is 1 inch. The depth from the end of the jaw to the first screw is 1⅛ inches.

AUTOMATIC BLOW TORCH

The Lenk Manufacturing Co., Boston, Mass., are placing on the market an automatic blow torch, which generates its own power. This is described by the makers as a convenient and practical tool for tinsmiths, farmers, autoists, and electricians. It operates on denatured oil. It is constructed in two cylinders, the size being 5½ x 2 x ⅞ inches. After filling both cylinders, the wick is ignited and it is said that within a few seconds a force is automatically generated, producing a long needle-point flame. This blow torch is non-leakable, and other features pointed out by the manufacturers are that no pumping, priming or blowing is required. This device is stated to be capable of producing a flame of more than 1,400 degrees Fahr.

STANLEY DISPLAY CARDS

The Stanley Works of New Britain, Conn., will bring out, during October, a series of six window cards—each card featuring a practical and appropriate use for Stanley tools when purchased in chests.



These cards are lithographed in eight colors, reproducing original oil paintings. Cards measure 13½ x 18½ inches and portray tools not only as a seasonable product but an all year round as well.

They have six distinct ideas, each a selling talk. The subjects are as follows:— Pals, His Hobby, Christmas Morning. Doping it out with Dad. Furnishing the Home. Gifts. A set of these cards can be obtained on request from the above manufacturers.

"RED DEVIL" BOTTLE CAPPER

Smith and Hemenway Co., Inc., Irvington, New Jersey., have placed on the market a bottle capper embodying several special features. According to the makers, it will cap all bottles with a standard neck, whether large or small. This product also seals all bottles air-tight.

The operation of the Red Devil bottle capper is as follows: The device is fastened to a table, the bottle is inserted, a crown cap is placed over the top of the bottle and then pressure is applied

"Red Devil" Bottle Capper

on the handle of the capper. The result is said to be an air-tight seal. It is further pointed out that the cap cannot fall out. It is said that there are no parts to get out of order or break. This device is finished in dull nickel.

SPEED INDICATOR

A new Speed Indicator, No. 748, is being placed upon the market by the Brown & Sharpe Mfg. Co., Providence, R. I. This device determines the revolutions of shaftings, overhead works, motors, etc., in either direction and measures both high and low speeds.

In design this indicator has few parts. The readings are taken from one side. It is set at zero for repeated use.

The indicator registers up to 5,000 revolutions by every 5 revolutions, although speeds much faster than 5,000 r. p. m. can be readily determined. Two arrows on the face of the dial indicate the figures to use for the different directions of rotation. The figures showing through the small round windows on the dial read every 5 revolutions direct. The small inside dial reads every 100 revolutions. This dial is turned to 0 for repeated use by the knurled knob on the back of the indicator.

The fibre handle is an insulation against electricity. The working parts are enclosed in a dull-nickeled case.

HARDWARE prices continue very firm, the majority of current changes being of an upward nature. Another budget of price advances supplies the premier development in this week's market reports. Higher levels are now in effect on the following items: Turpentine, cotton wrapping twines, agricultural wrenches, wagon hardware including malleable plough clevises, track spikes, corn house brooms, small nuts, miscellaneous wire nails, zinc sheets and radiator valves. Owing to the strength in primary metals, it is expected that an advance in solders will be put into effect in the near future. The list of downward revisions is again smaller this week, pig iron supplying one of the premier changes in this direction, while the second decline on gasoline within a week attracts special attention. New price levels also appear on certain makes of brass compression bibbs, while western centres record increases on toe caulks. Prices on carpenters' tool baskets have been reduced approximately ten per cent.

MODERATE activity is generally recorded in the iron and steel trade, while sheet supplies are now in heavier volume. The recent improvement continues in the boiler tube market, a steadier tone being evident with more extensive construction and repair work at this season. Range boilers are also reported fairly active. Hardware business is fair to good this week, the arrival of colder weather having stimulated the sale of many seasonal lines. Wholesalers record that a bustle of activity is noted in supplying rush orders for stoves, accessories, heaters and companion goods. The rise in turpentine prices is a special feature, the current advances having established a new high mark for this season.

Montreal, Que.

MONTREAL, October 19.—Lower prices on auto tires and tubes attract attention in the current hardware markets. Through a revision in discounts and a change on list prices, a reduction of varying extent is shown. A further drop of one cent in gasoline prices is announced, this making the second decline in one week. A new price list is issued on wagon hardware showing higher prices on malleable clevises and a few other sundry lines. Market tendencies are also of interest, an advance in solders being probable at an early date, while other ingot metals cause a firmer tone in lead and zinc products. There is also a weaker trend to galvanized sheets, and slightly lower prices on all gauges is predicted in the near future. An unsettled feeling is again noted in corrugated, with a rumor that prices are being shaded to secure business. The wrought pipe market is still very firm with mills reporting active business and still behind in their orders.

Business in hardware circles continues in seasonal proportions, and while certain lines are a little quieter, there is a good movement in goods seasonable at this time of year. Range boilers are fairly active sellers at the present time, and boiler tubes are moving in better volume.

REDUCED PRICES ON AUTO TIRES AND TUBES

Montreal.

As announced in last week's issue, lower prices on automobile casings and tubes were expected at an early date. Manufacturers now announce a reduction of from five to ten per cent., some of the better selling sizes and grades showing a bigger decline because of competition. Certain list prices are lower, and the discount on casings has been changed from 20 per cent. to 25 per cent. off, while the discount on tubes has been revised from 25 per cent. to 30 per cent. off list prices. A special discount of five per cent. is again offered for cash. Following is new list with discounts.

AUTOMOBILE TIRES—

Size	Casings Cord	Fabric	Tubes Regular	Extra Heavy
30 x 3		11 00	1 75	1 85
30 x 3½		17 50	14 50	2 00	2 20
32 x 3½		27 50	19 50	2 50	2 75
31 x 4		31.75	21 60	3 15	3 45
32 x 4		35 00	25 50	3 40	3 75
33 x 4		36 00	26 80	3 50	3 85
34 x 4		37 00	27 40	3 70	4 05
32 x 4½		45 25	34 70		4 70
33 x 4½		46 25	35 90		4 80
34 x 4½		47 50	37 00		4 90
35 x 4½		48 75	39 00		5 15
36 x 4½		49 75	40 00		5 30
33 x 5		56 26	44 00		5 50
34 x 5		58 00			5 70
35 x 5		59 25	47 00		5 85
37 x 5		62 25	50 00		6 20

Discount; casings 25 per cent. ,tubes 30 per cent. 5 per cent. cash, 10th month following.

IMPROVEMENT NOTED IN BOILER TUBE MARKET

Montreal.

Local distributors of boiler tubes state that a better movement is still in evidence, the call for these products showing an appreciable improvement in recent weeks over previous months. The undertone of the market is described as steady with a slight tendency towards firmness. For the balance of this month and well into next a fairly good demand is anticipated owing to more extensive construction and repair work usual at this season. Following are average quotations on the various sizes:

BOILER TUBES—

	Seamless	Lapweld
1 inch	19 00	....
1¼ inch	21 00	....
1½ inch	20 00	....
1¾ inch	23 50	23 00
2 inch	20 00	19 00
2¼ inch	23 00	21 50
2½ inch	26 00	22 50
3 inch	32 00	28 50
3½ inch	37 00	33 00
4 inch	47 00	42 00

Prices per 100 ft. f.o.b. Montreal.

NEW HIGHER PRICES ON MALLEABLE CLEVISES

Montreal.

New price lists have been issued by manufacturers of wagon hardware, and higher prices are recorded on malleable clevises and a few other sundry lines.

MAY BE SLIGHT REDUCTION IN GALVANIZED SHEETS

Montreal.

Underlying conditions in the sheet markets are little changed from one week ago, and from a distributing point of view former price levels are still quoted. As outlined last week slightly lower quotations in the near future were anticipated because of accumulation of stocks following heavier shipments from England and sources to the south. This tendency is still evident and one local distributor stated that although mill prices are steady, a reduction of twenty-five cents per 100 lbs. on all gauges of galvanized sheets may be made within the next week or so.

It is pointed out, however, that while keen competition and heavier stocks may figure prominently in the market from now on, there is the close of navigation and the resultant higher transportation costs to be anticipated. Orders now placed will be forwarded from the coast by rail and this should strengthen the situation to a degree, especially in view of little or no signs of a recession at production centres.

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 85
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 25	7 75
26 gauge	7 00	7 50
24 gauge	6 40	6 90
22 gauge	6 05	6 55
18—20 gauge	5 35	5 85
Other Brands—		
10¾ oz.	7 00	7 50
28 U. S. gauge	6 60	7 10
26 U. S. gauge	6 30	6 80
24 gauge	6 15	6 65
22 gauge	6 15	6 65
18—20 gauge	6 00	6 50
16 gauge	5 85	6 35

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 25

Galvanized, 52s	7 25
Galvanized, 60s	7 75

CANADIAN OIL GATES NOT YET ADVANCED

Montreal.

In last week's issue of Hardware and Metal reference was made to an advance in quotations on the Perfection and Stebbins oil and molasses gates. This applies only to the American makes, Canadian manufacturers not yet announcing any change.

ANOTHER DROP IN GASOLINE PRICES

Montreal.

A further reduction of one cent per gallon is made in quotations on gasoline, this making the second decline in one week. Local prices are now 32 cents for the motor grade and 35 cents for higher grade. Coal oil still remains unchanged.

CEMENT QUOTATIONS SHOW NO CHANGE

Montreal.

Current quotations on cement are unchanged notwithstanding slightly lower levels have been reached in other domestic centres. A slight weakening in the local market however would not be surprising as a slower movement of this product is now in evidence and transportation costs are on a slightly lower basis. Unchanged quotations are as follows:

CEMENT—	
Car load lots, per bag, f.o.b. steam cars	0 92
Per bag, delivered	1 00
Less car lots, per bag, f.o.b. yard	1 00
Per bag, delivered	1 10

Less 5 per cent.
Rebate of 20 cents for empty bags.

UNSETTLED MARKET AGAIN EVIDENT IN CORRUGATED

Montreal.

Following a period when corrugated sheet prices were on a fairly steady basis, there are again signs of an unsettled feeling, with prices being shaded in some quarters. Conditions in the market for these products have varied considerably during past months, and while the fact that supplies of flat sheets being none too ample recently steadied the market tone, there was formerly the unsteadiness which is now again showing. Business continues in fair proportions although not as brisk as a few weeks ago, and this is also said to be assisting towards the unsettled feeling. List prices and average discount are the following:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

WROUGHT PIPE MILLS ARE STILL VERY BUSY

Montreal.

In discussing the continued firm tendency in the undertone of wrought iron and steel piping, producers emphatically state that present prices, list No. 56, are still on a very firm basis. Apart from prevailing higher costs of raw materials there is the question of deliveries to be considered, domestic mills still being very busy and two weeks behind in their orders, and this has its strengthening effect on the market. American producers are in much the same position, although deliveries there are even farther behind with demand continuing exceptionally good. No further advance has been made in steel piping prices on the United States markets although this has been expected for a few weeks past.

FURTHER IMPROVEMENT IN RANGE BOILER SALES

Montreal.

The sales movement of range boilers is now reported to be quite satisfactory, an improvement being noted in more recent weeks. Apart from the amount of new construction work demanding supplies, the season is now well on hand when old boilers need replacement, or new installations are made in older dwellings, before the cold weather sets in. No further change in quotations has been made since the revision of a few weeks ago, and following are list prices and prevailing discounts:

RANGE BOILERS—

Size	List Price
5 gallon	$13 60
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 45 per cent. Extra heavy, 35 per cent.

HIGHER SOLDER PRICES EXPECTED IN NEAR FUTURE

Montreal.

The firm tendency of tin on primary metal markets continues and is of such proportions that advanced quotations on solders are considered altogether likely on the local market in the near future. The stronger tone in this metal commenced to show itself about two weeks ago and has since been on a steady upward climb. Lead and spelter are also continuing in their improved market position, the former recording a further advance within the past few days, while the trend of spelter has been of a steady firming nature for some time past. The undertone of finished products therefore is firm, but the tendency is expected to reflect on solder prices before any direct effect is felt on other lines. Present prices are as follows:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs. sq. ft., lb.	0 10½
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¼
Do., 4 to 8 lbs. sq. ft., lb.	0 9½

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 25
Do., strictly, lb.	0 22
Do., commercial, lb.	0 21
Do., wiping, lb.	0 21
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

SEASONAL TRADE CONTINUES IN PIPE FITTINGS

Montreal.

A fair seasonal trade continues in pipe fittings, with the undertone of the market remaining firm. Although there was a feeling among the local trade a few weeks ago that higher prices were likely there is still said to be no definite indication that such a change is probable, although chances of any recession are very remote.

PIPE FITTINGS—

Cast iron fittings	27%
Plugs, cast iron	27%
Do., solid	27%
Do., countersink	27%
Bushings, small	30%
Bushings, cast	30%
Unions, ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged unions	27%
Dart Unions, blk., ¼ to 2 in.	331-3%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, black and galvd. ⅛ to 4 in., close and short	55%
Do., 4½ in. and larger	45%
Do., long, ; in. to 4 in.	60%
Do., 4½ inch and larger	50%
Do., running thread	35%
Couplings, 4 in. and under	25%
Do., 4½ in. and larger	5%

MALLEABLE FITTINGS—

Price list effective June 1st, 1922. Discount 70 per cent.

STEADY MARKET FOR BAR PRODUCTS LOOKED FOR

Montreal.

Following opinions expressed last week that from more recent indications further increases in quotations on bar products were unlikely, for the present at least, producers state that the tendency is now towards a steady market tone for future. Although pig iron prices are a little lower than formerly other production costs fully warrant present selling figures. The situation, therefore, with regard to future price levels would seem to rest with distributors, and while prevailing quotations are lower than those quoted on other domestic markets, there seems little likelihood of a change in an upward direction. Unchanged current levels are the following:

IRON AND STEEL—

Common bar iron, 100 lbs.		3 15
Refined iron		4 65
Irish finish machinery steel		3 20
Mild steel		3 15
Single reeled machinery steel		5 25
Band steel	3 50	3 65
Spring steel	4 75	8 50
Sleighshoe steel		3 15
Tire steel		3 35
Harrow tooth steel		3 30
Toe caulk steel		4 05
Mining tool steel, per lb.		0 20½
Black Diamond tool and cast steel, per lb.		0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

Iron and steel 3-16 in. and thinner, 50c. per 100 lbs. extra.

STRONG TREND REMAINS IN MOST METALS

Montreal.

There is a firming tendency in practically all ingot metals, some markets showing a considerable amount of strength. Copper, which has been displaying a strong undertone in recent weeks, is now rather dull with little interest apparent.

TIN.—This metal has been advancing steadily for the past ten days and has reached a new high level for the year both in London and New York. It would appear that some pressure has been brought to bear and from present indications higher figures may yet be expected. Buying locally has been somewhat less on the advance, and the market is quoted at 38 cents.

COPPER.—Copper is dull and easier both in London and New York. Export demand is reported poor, and with production on the increase in the United States and offerings from South America available, supplies are heavier. It is possible to buy for first quarter delivery at about to-day's prices which does not indicate much strength. Electro is quoted at 17¾ cts., casting at 17½ cts.

LEAD.—This market is still strong in the U. S. A. and London remains firm. Demand is not quite as good as it has been, but there is no weakness evident and higher prices would not be surprising when navigation closes. Present quotation is 7¼ cents.

SPELTER.—The American market recovered sharply from the re-action earlier in the month and is again quite firm, while London continues to register a new high price each day. It is still below the American equivalent and should advance further. Local market is stronger with consumption very good, and is quoted at 9 to 9¼ cents.

ANTIMONY.—The situation in antimony appears to be slightly easier in the U. S. A. owing to freer offerings from China. The Canadian market will now have to absorb shipments in bond from China because of the new high duty in the United States. Local market is steady at 7¾ cts. for English and 7¼ cts. for Chinese.

ALUMINUM.—Aluminum has been stronger in the U. S. A., but there is no change locally and price remains at 22 cents.

Toronto, Ont.

TORONTO, October 19.—Another large number of price advances features the weekly market reports. Among those products with higher levels are, agricultural wrenches, malleable plough clevises, track spikes, small nuts, cotton wrapping twines, miscellaneous wire nails, zinc sheets and radiator valves. It is also expected that an advance will be put into effect on solders in the near future. Compression bibbs are at revised quotations, while lower prices are recorded on pig iron and gasoline, the latter change being the second reduction on this product within a few days. Wire nail quotations are still considered on a nominal basis. The new prices on papers and sheathings are not yet generally in effect, but it is admitted that the revisions will become operative very shortly. A return of unsettlement is noted in corrugated sheets, owing to easier prices on flat sheets, a larger volume of supplies and the approach of the quiet season. Moderate activity is noted in the local steel trade.

HIGHER PRICE LEVELS ON PLOUGH CLEVISES

Toronto.

Malleable plough clevises have been advanced in price this week, the extent of this development being around one cent per pound.

WIRE NAIL QUOTATION ON NOMINAL BASIS

Toronto.

Although the current local base price of $3.65 on wire nails is still reported as nominal in certain quarters, the opinion is again expressed that some settlement of this situation, which has been outlined in recent issues of Hardware and Metal, will be made in the near future. Jobbers state that manufacturers are advising of a contemplated increase in quotations, a factor which has been noted from time to time and given little credence in local circles during recent weeks. In one quarter, however, it was pointed out that the strength of primary markets, basic materials and production costs all supply a note of firmness.

AGRICULTURAL WRENCHES AT INCREASED PRICES

Toronto.

New discounts are recorded this week on agricultural wrenches which place quotations on a higher level. The revised price is 47½ and 2½ per cent. off list, compared with the former discount of 50 and 2½ per cent.

COTTON WRAPPING TWINE PRICES AGAIN RISE

Toronto.

Cotton wrapping twines in balls and cones have been advanced two cents per pound. The revised quotations follow:

TWINE (COTTON)—

5 lb. sack, 3-ply	0 56
Do., 4 ply, lb.	0 59
Cones, 3 ply, lb.	0 52
Do., 4 ply, lb.	0 55

NEW DISCOUNT BRINGS ADVANCE ON NUTS

Toronto.

An advance of approximately fifteen per cent. has been recorded in prices on small nuts. The new discount on these products is 32½ per cent., compared with the previous quotations of list less 37½ per cent.

QUOTATIONS ON TRACK SPIKES ALSO HIGHER

Toronto.

Track spikes have also attained higher price levels, the revised quotation being $4.25 per cwt., compared with the former level of $3.75.

NEW ROOFING PRICES NOT YET GENERAL

Toronto.

Although the new higher prices on rubber roofings, building papers, sheathings and felts are not yet generally in effect, it is admitted that the revised levels will be made effective within a few days.

MISCELLANEOUS WIRE NAILS ADVANCED IN PRICE

Toronto.

An advance of almost ten per cent. is recorded this week in quotations on miscellaneous wire nails. The revised discount is 70 per cent. off list, as compared with the former quotation of 72½ per cent. The usual extras remain unchanged.

FURTHER CUT OF ONE CENT PER GALLON IN GASOLINE

Toronto.

Gasoline prices have recorded the second decline within a week, another reduction of one cent per gallon being announced. The previous recession recorded in last week's issue of Hardware and Metal became effective on October 11, while the latest revision was announced on October 17. This brings the current price level to 32 cents per gallon. As pointed out in recent market reports, this product has assumed a decidedly easier tone in primary markets, and the current change is in line with similar price cuts by refiners in southern centres.

Coal oil quotations on the other hand, continue strong, with a slightly more active demand recorded for this product during recent weeks.

EASIER PRICES ON PIG IRON MARKETS

Toronto.

A decidedly easier trend is noted in the pig iron market. Several weeks ago the outlook in this direction was for continued higher prices, but upon the resumption of coal supplies, it is stated that too many furnaces blew in, and declines have already been recorded in certain American production centres. Reduced quotations are also noted locally, the prevailing level being $36.30. This change of front is evident in domestic as well as other markets, the booking for the first quarter being described as noticeably less active. Now that the change in price is recorded, however, more interest in this direction is generally looked for.

SOIL PIPE REFLECTS RAW MATERIAL TREND

Toronto.

The soil pipe market continues to reflect the upward climb of certain raw material prices, and while these basic elements have halted their march toward higher price levels, the movement is still being reflected in quotations on the finished products. Owing to the advanced fall activity in building circles, the call for soil pipe and fittings is described as keeping up in remarkably good volume for this season of the year. There has been no further change in local quotations on these lines, the revised discounts of a few weeks ago still being in effect as follows:

SOIL PIPE—

2 inch	Less 33 1-3 per cent.
3 inch	Less 33 1-3 per cent.
4-inch	Less 33 1-3 per cent.
5 and 6 inch	Less 33 1-3 per cent.
8 inch	net

FITTINGS—

2 to 6 inch fittings	Less 45 per cent.
8 inch fittings	net

COMPRESSION BIBBS AT NEW PRICE LEVELS

Toronto.

Certain numbers of compression bibbs now appear with revised discount levels, while radiator valves have been advanced in price. The new discount on radiator valves is 54 per cent., compared with the previous level of 58 per cent. Stop and waste cocks, No. 3,480, are now quoted at 45 and 30 per cent. off list, while No. 3483 are less 65 per cent.

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in	50%

Webber gate valves	33%

BASIN COCKS:—

No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

ZINC SHEETS HIGHER: SOLDERS MAY FOLLOW

Toronto.

Prices on zinc sheets have been advanced another one cent per pound, this change bringing the average local quotation to within 11 and 12 cents per lb. It is also stated that solder prices are very strong and the viewpoint is expressed that an advance of half a cent per pound will most likely be put into effect during the next few days. This tendency is a reflection of the strength of primary metals, tin now climbing up again, while spelter and zinc continue to record a firm tone. Following are current levels:

LEAD AND ZINC GOODS—

Lead pipe list per lb.	0 13
Lead Waste, pipe, list, per lb.	0 14
Do., over 8 in., list per lb.	0 15
Lead pipe is subjected to a discount of	10%
Lead traps and bends	15%
Lead sheets 4 to 6 lbs. sq. ft. in rolls, lb	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 30
Do., strictly, lb.	**0 22½**
Do., wiping, lb.	0 21
Do., guaranteed, lb.	0 24
Do., commercial, lb.	0 21
Zinc sheets, per lb. 0 11	0 12

RETURN OF UNSETTLEMENT IN CORRUGATED SHEETS

Toronto.

Due to the larger stocks of flat galvanized sheets, and the lower prices recently annnouced on these goods, this condition has been reflected in the corrugated market, an easier trend having developed during recent weeks.

The active season is now drawing to a close, and it is stated that price shading on smaller sizes has again become apparent in certain quarters. The opinion was expressed by one local distributor that this unsettlement is not generally looked upon as serious. No change in quotations has been announced, the nominal list still being quoted, it being pointed out that corrugated sheets did not advance in proportion when the strength in flat sheets was most apparent.

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 26 U. S. gauge	8 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

FAIR ACTIVITY NOTED IN RANGE BOILERS

Toronto.

A fair degree of activity is generally reported in range boilers, although the seasonal movement is also described as keeping up well for this time of the year. The strong undertone in this market, caused by the rising cost of raw materials, has recorded a lull, which in some quarters is considered as temporary while in others it is attributed to the advancing fall season. The flat galvanized sheets have ceased to climb in price, and no further advances in quotations on range boilers and other galvanized products are therefore in sight, at present. Following is the unchanged list and discounts:

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	88 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 45 per cent; Extra heavy, 35 per cent.

WROUGHT PIPE STILL ON FIRM FOUNDATION

Toronto.

Wrought piping continues on a strong price basis, with an active movement in the smaller sizes. There has been no change in price, list No. 56 still governing the local market. Primary conditions, however, are described as firm, with the natural reflection of higher production costs in the tone of the finished goods. Owing to the more or less restricted condition of large construction, the call for heavy sizes of

pipe has been moderate and with the completion of work of this nature and the passing of the summer months, trade in larger sizes is again reaching the quiet stage. The shortage that was apparent in small quick-moving sizes is now being rapidly overcome, while the delivery conditions are described as well in hand.

WROUGHT PIPE

Price List No. 56. August 23, 1922.

SHEET SUPPLIES NOW IN HEAVIER VOLUME

Toronto.

The general situation as regards supplies of galvanized and black sheets is now described as easier, this being one of the principal factors in the recent downward price movement recorded in last week's issue of Hardware and Metal. Two elements contributed towards this development, namely: a falling off in the current demand due to the lateness of the season, and receipt of larger supplies from the British markets. It is stated that present levels are fairly steady and taking all things into consideration, the undertone is moderately firm. Primary sheet markets are also affected, however, by the coming on of the quiet season in the production end of the automobile industry.

BLUE ANNEALED SHEETS—

10 gauge, base	4 25
12 gauge	4 30
14 gauge	4 35
16 gauge	4 40

BLACK SHEETS—

18-20 gauge	5 05
22-24 gauge	5 10
26 gauge	5 15
28 gauge	5 25

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED SHEETS—

	Premier and	Apollo
10¾ oz.	6 65	7 15
U. S. 28 base	6 25	6 75
U. S. 26 base	5 95	6 45
22 and 24	5 80	6 30
18 and 20	5 65	6 15
16	5 50	6 00
12 and 14	5 35	5 85

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown in 20c. per 100 pounds.

London, Ont.

LONDON, October 19.—Hardware business here this week is good. The cooler weather has stimulated the sale of many lines and the stores are kept busy supplying rush orders for stoves, stove accessories, electric heaters and kindred lines.

Prices continue very firm, most changes being in an upward direction. Linseed oil, turpentine and miscellaneous wire nails are quoted higher.

LINSEED OIL PRICE FIVE CENTS HIGHER

London, Ont.

The price on linseed oil has advanced five cents per gallon, thus bringing the average quotation to $1.10 for raw. A fair seasonal sale is generally recorded. The revised price levels follow:

LINSEED OIL—

	Raw	Boiled
1 to 2 barrels	110	1 13
	Imperial Gallon	
3 to 5 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less barrels, add 15c gallon.

FURTHER INCREASE IN TURPENTINE QUOTATIONS

London, Ont.

A new price, ten cents per gallon higher, is now in effect on turpentine. This further advance brings the revised average quotation to $2.10 per gallon. A good sale is recorded. The tone of the primary markets is described as decidedly firm.

TURPENTINE—

1 bbl. lots, $2.10 imperial gallon. 2 to 4 barrel lots, $2.09 imperial gallon. 5 gallon lots, $2.25 per imperial gallon.

ANOTHER TEN CENT RISE IN TURPENTINE

Turpentine prices have been advanced this week another ten cents per gallon, this change bringing the local quotation to $2.20.

NEW HIGHER PRICES ON CORN HOUSE BROOMS

London, Ont.

Corn house brooms have been advanced in price this week to the extent of $1.00 per dozen. The revised quotations follow:

CORN BROOMS—

Special, $6.00 doz.; No. 7, Bamboo Handle, $10.00 doz.; Carpet, $9.00 doz.; No. 8, Hardwood Handle, $11.00 doz.; No. 7, Hardwood Handle, $10.00 doz.; Parlor, $8.50 doz.; 4 String Hardwood Handle, $7.25 doz.; XX Hardwood Handle, $6.50 doz.

DEMAND FOR GAME TRAPS NOW EVIDENT

London, Ont.

Dealers generally report game traps to be moving in satisfactory volume, the current demand being satisfied at the following price levels:

GAME TRAPS—

Victor, No. 0, $1.95 doz.; No. 1, $2.25; No. 1½ $3.45; No. 2 $4.75; No. 3, $8 00; No. 4, $9.75. No. 2, $4.75; No. 3, $8.00; No. 4, $9.75.

Oneida Jump, No. 0, $2 55 doz.; No. 1, $2.90 No. 1½, $4.15; No. 2, $6.40.

Hawley and Norton, $3.65 doz.; No. 1, $4.30; No. 1½, $6.55; No. 2, $9.10; No. 3, $12.15; No 4, 14.35.

Newhouse, No. 1, $6.40; No. 1½, $9.60; No. 2, $14.40; No. 3, $19.20; No. 4, $22.40.

EASIER PRICES ON CARPENTER TOOL BASKETS

London, Ont.

The prices on carpenter tool baskets are around ten per cent. lower, this reduction bringing the following quotations into effect:

Round and lined.

No. 4 .....$13.00 per dozen
No. 5 ..... 14.00 per dozen

IMPROVEMENT IN SALE OF ASH SIFTERS

London, Ont.

The sale of ash sifters which has been rather slow this fall, is now reported as showing a marked improvement during the past few days. Prevailing prices are as follows:

ASH SIFTERS—

Common Wood Sides, $2.65 doz.; Banner No. 2, $2.65 each.; Banner No. 3, $1.95 each.

STOVE BOARDS NOW IN SEASONAL MOVEMENT

London, Ont.

Stove boards are also numbered along seasonal lines enjoying a brisk movement at present. Following are current quotations on the American Persian design of stove boards:

STOVE BOARDS—

24 x 24—$13.75 doz.; 26 x 25, $16.25 doz.; 26 x 26, $16.25 doz.; 28 x 28, $18 90 doz.; 30 x 30, $21.90 each.; 33 x 33, $26.00 doz.

SHOVELS AND SCOOPS AMONG POPULAR LINES

London, Ont.

Fairly brisk activity is now noted in shovels and scoops, and also in fall lines of harvest tools. The current discount on shovels and scoops is 53 per cent., and on harvest tools list less 60 per cent.

SEASONAL CALL NOTED FOR ALARM CLOCKS

London, Ont.

A good seasonal sale is reported for alarm clocks. Prices on these products are unchanged at the following levels:

ALARM CLOCKS—

Good morning	Each	1 37
America	"	1 37
Lookout	"	1 88
Sleepmeter	"	2 06
Jack-o-Lantern	"	2 75
Big Ben Plain Dial	"	3 12
Big Ben, Luminous Dial	"	4 09
Baby Ben, Plain Dial	"	3 12
Baby Ben, Luminous Dial	"	4 09

REVISED DISCOUNTS ON MISCELLANEOUS NAILS

London, Ont.

New discounts are now in effect on miscellaneous wire nails, representing an advance in price of approximately nine per cent. The revised discount is 70 per cent off list, with the usual extras.

Winnipeg, Man.

WINNIPEG, October 19.—Business is reported satisfactory by both wholesale and retail trade. There is a good volume of business passing but orders are confined to immediate requirements. Bookings on all lines of Christmas specialty goods are reported to be showing an improvement. Due to the heavy yield of grain in the West, scoop and grain shovels are in good demand. The trend of practically all markets remains upward.

FAIR ACTIVITY NOTED IN RANGE BOILERS

Winnipeg.

The demand for range boilers is described as fairly active for this season of the year as building activities are keeping up well. The primary markets have been showing a stronger tendency and no doubt this is reflected on local conditions.

STEADY TONE IN COTTON WASTE MARKET

Winnipeg.

The tone of the cotton waste market continues fairly firm. The trade, however, are of the opinion that present prices will show no change for some time at least.

REVISED LOWER PRICES ON LAWN MOWERS

Winnipeg.

There has been a revision in quotations on lawn mowers for the coming season. Such lines as Woodyatt, Empress and Daisy are quoted as follows:

WOODYATT—
12 in., $9.00; 14 in., $9.75; 16 in., $10.25; 18 in., $11.00; 20 in., $11.50.

EMPRESS—
14 in., $11.50; 16 in., $12.25; 18 in., $13.00; 20 in., $13.50.

DAISY—
12 in., $6.75; 14 in., $7.00; 16 in., $7.25.

REVISION IN PRICE ON CAST IRON FITTINGS

Winnipeg.

There has been an advance of 5 per cent. on all lines of cast iron fittings such as elbows, tees, crosses, return bands, caps and lockmits. The discount is less 20 per cent. of list price. Bushings are quoted at less 25 per cent. and plugs at less 20 per cent.

GRAIN AND SCOOP SHOVELS IN POPULAR DEMAND

Winnipeg.

Due to the heavy yield of grain in the West the demand for scoop and grain shovels has been satisfactory.

SLIGHT ADVANCE ON AIR TIGHT HEATERS

Winnipeg.

There has been a slight advance on air tight and Quebec heaters. Following are new prices:

AIR TIGHT HEATERS—
No. 018, $2.05; No. 18, $2.30; No. 21, $2.56; No. 24, $3.37; No. 28, $5.37.

Quebec Heaters without grate—
No. 15.....$15.25

Quebec Heaters with grates—
No. 30, $11.25; No. 40, $13.80; No. 52, $16.35; No. 60, $20.95; No. 2300, $11.25; No. 2400, $13.80; No. 2500, $16.35; No. 2600, $20.95.

ENAMEL WARE PRICES ON UPWARD TREND

Winnipeg.

Practically all lines of enamel ware such as preserving kettles, tea and coffee pots, sauce pans and all kindred lines have shown an advance of 7½ per cent.

HEAVY DEMAND NOTED FOR COW TIES

Winnipeg.

Wholesalers report a good demand for cow ties. Quotations however are unchanged.

HEAVY BOOKINGS FOR CHRISTMAS SPECIALTIES

Winnipeg.

Wholesalers report heavy bookings of all lines of Christmas specialty goods such as cut glass, cutlery, carvers, thermos bottles, etc.

WROUGHT IRON NIPPLES SHOW AN ADVANCE

Winnipeg.

There has been an advance of 5 per cent. on wrought iron nipples both close and short. Nipples up to four inch are quoted at less 50 per cent. off list price and four and a half inch and larger less 40 per cent.

NO CHANGE IN PRICES ON LINSEED OIL

Winnipeg.

Quotations on linseed oil show no change this week. The demand for this line is seasonable. Raw is quoted at $1.10 with boiled at $1.13 per gallon.

STRENGTH REMAINS IN TURPENTINE MARKETS

Winnipeg.

The undertone of the turpentine market continues on a firm basis. Quotations at $2.15 remain unchanged.

ACTIVE MOVEMENT NOW RECORDED FOR GLASS

Winnipeg.

A quite satisfactory trade is recorded for glass and the movement is keeping up to expectations and a continued activity is looked for, for some time. Prices remain unchanged.

Hamilton, Ont.

Cooler Weather Brings Improvement In Buying Seasonal Hardware Lines

HAMILTON, October 19.—Hardware business this week is generally reported very fair, and during the last few days considerable improvement is recorded in both wholesale and retail departments, this being attributed to the advent of cooler weather. Fall lines are reported moving nicely, with timely consumer interest being registered in stoves, stove accessories, such as pipe, electric and oil heaters, and companion lines.

Underlying factors in the steel market generally have been interesting during the past two months. Up until two weeks ago there was a decidedly firm tone evident, said to be responsible to higher fuel and increased labor costs, but the fact that basic pig iron on American markets is now easier, causes a little different aspect to the market. Although this might be termed a sudden turn, advices from southern centres state that the former important coal question is no longer such a serious one, the ability to secure cars for transportation now being the factor for consideration in this respect.

Quite a distinct improvement in the movement of seasonable lines has been noted this week. A couple of days of cooler weather has started a general movement to prepare for winter and shopping is noticeably brisker.

Business in all lines of stoves, heaters and furnaces is said to be very active at this time on the basis of orders for immediate shipment. Little or no booking is being done, although this has been the case for some time past. It is noted that the sale of stoves and heaters especially designed for the use of wood have been particularly active. Electric ranges have also been selling very rapidly of late. Stove business this fall is reported by manufacturers generally to be much ahead of last year, though it is noted at the same time that 1921 was an exceptionally poor year in this line. Prices throughout the whole list of heaters, ranges, furnaces, etc., are described as stable at present levels, at least until the end of the year. Retailers have been looking for some downward revision in quotations on these products, but it is pointed out that recent increases in foundry iron, Canada plates, black sheets, galvanized sheets, and fuel used in the foundries have precluded any such movement. These have tended to offset any expected declines for the present.

A general review of the building activities of the 1922 season seems to warrant the claim that more buildings of the small and medium type have been erected this year than in any year since

1913. This probably is true but it may seem surprising to some people.

With the autumn season now at hand, merchants begin to feel a fresh stimulus to business and prepare for an active fall and winter trade. The vacation period is over and the hot weather has practically passed. There is a general feeling that this is the proper occasion to put forth greater effort to secure a bigger turnover. During the summer period there is often a disposition on the part of the public to withhold from extensive buying. But with the approach of colder weather, the pressure of numerous seasonal requirements compel attention to household needs. Furnace time is fast approaching and heaters, stoves, stove accessories, ash sifters and similar goods again become prominent. Many fall lines provide popular opportunities for stimulating the volume of trade and commencing the fall and winter period with marked activity.

St. John, N. B.

Lively Discussion at New Brunswick Retail Merchants' Annual Convention

ST. JOHN, N. B., October 19.—The New Brunswick Branch of the Retail Merchants' Association of Canada, held their eighth annual convention in St. John, N. B., on October 10 and 11, and elected new officers for the coming year. The convention was opened by W. G. DeWolfe, of St. Stephen, the provincial president, who delivered an address of welcome to the delegates from all parts of New Brunswick. Mayor McLellan of St. John, in a short address extended the greetings of the city, and referred to the retail merchant as the backbone of any community, and a necessity to the citizens, and the man who should guide municipal affairs, paying as he does the bulk of the taxes. W. F. Burditt, president of the St. John Board of Trade, and R. E. Armstrong, secretary of the board of trade, welcomed the delegates on behalf of that body. E. M. Trowern of Ottawa, secretary of the Dominion Board, delivered a short address, and pointed out that there was a decided improvement in business throughout Canada. He expressed the opinion that we were "around the corner" and well on the way to a stable condition in business and general trade. People recognized that the turn had been made and were not slow to take advantage of it. Most stores had been able to reduce their stocks, and were beginning to buy again.

One of the delegates present stated that in his opinion the maritimes never got the showing and consideration they should receive under confederation, and in reply to this Mr. Trowern said that when a duck laid an egg, nobody knew a thing about it, but if a little bantam laid an egg, it told the world. Mr. Trowern believed that the maritimes were far too conservative, and did not advertise nearly enough. They had geographical advantages, shipping facilities and large manufacturing industries, but they were a long way behind the westerners so far as advertising went, and if they wanted the rest of Canada to sit up and take notice of them, they must make a bigger noise, and tell the world what they had to offer. He said, "You have less population and larger bank clearings per capita than the rest of Canada, so it is evident that the money is there, and that things are on a solid foundation."

At the evening session the delegates were addressed by the Hon. W. E. Foster, premier of New Brunswick.

On the second day of the convention a banquet was held, and addresses given by Hon. Fred Magee, of Port Elgin, Hon. J. M. B. Baxter, St. John, Senator Daniel, A. E. Everett, the new president, Mayor McLellan and Mr. Trowern. The report of the secretary for the provincial board showed a good balance on the right side, and that the membership totalled just under seven hundred merchants.

The newly elected provincial president, A. Ernest Everett, is one of St. Johns' largest and most successful merchants, and his election is looked upon with a good deal of satisfaction by the members. The retiring president, W. G. DeWolfe, filled the office for two terms, being re-elected to office last year. He is a member of the firm of the DeWolfe Hardware Co., Ltd., St. Stephen N. B., and retires with a good record of active work on behalf of the association.

In discussing the axe situation with G. Wilford Campbell, of Campbell & Campbell, sales agents for the Welland Vale and associate companies, and W. T. R. Irving, representative of Canada Foundries and Forgings, Ltd., Hardware and Metal was advised that developments had arisen as had been expected in the axe situation. Many dealers had delayed in placing orders for their requirements in axes for the coming season until only just recently, with the result that it was now a case of getting deliveries, and that axe factories were working to full capacity, and yet were not able to meet the demand. To quote Mr. Campbell, "Everybody is buying axes, with the result that deliveries are behind. Many large lumbering concerns in the Maritimes are commencing operations on a large scale, resulting in some very heavy orders being placed for axes." Mr. Irving stated that he had noticed a decided improvement in business just recently, and that some of the large houses were buying pretty freely of the lines manufactured by this company. When asked if German competition had interfered to any extent with goods of Canadian manufacture, he stated that so far as the Maritimes were concerned he had not felt this competition very much, and did not believe that just at the present time there was any great amount of German manufactured goods in this part of the country. Mr. Irving had just returned from a trip to Prince Edward Island, and stated that business was picking up rather slowly there on account of the potato situation. The crop had only been fair, and Prince Edward Islanders stated that the price was so low that they could not be sold profitably. But in spite of this, labor conditions were pretty good, with practically no unemployment.

The St. John Board of Trade reports that the port of St. John is likely to have a very busy season this winter. Grain shipments are expected to be very large, and the C. P. R. advise that they have an ample supply of cars available to handle the large volume of freight.

A good deal of painting is still going on, and the number of newly painted houses in St. John is far in excess of any former years. One painter has stated that he has work that will carry him right up to the time when the weather will stop outside work.

A good business is being done in fall sporting goods, and it is expected that the sale of skates, hockey sticks and hockey equipment will be good, owing to the fact that many clubs are being formed throughout the Maritimes, and also the sport has been revived to a large extent in St. John by the building of a large arena, capable of accommodating four thousand spectators. Some of the latest hardware prices are as follows:

Axes.—Ship 5½-7, 38.00; Timber 8-10, 40.00; Force 10 up, 44.00; Sleeper up to 7, 38.00; Bench XXX No. 1, 17.50; No. 2, 20.00; 3, 22.50; 4, 24 50; 5, 27.00; Hunter 10.00; Boys, 10.50; Campbells XXX, Blenkhorns Chief, Manns, Single Bit, 16.00; Double Bit, 21 50; Elgin Pattern, Single Bit, 2.00 advance; Double Bit, 3.00 advance; Steel Poll Axes, 4.50, advance; Hammer Poll Axes, 23.00.

Hinges.—No. 904 Light Tee, 3, .94; 4, 1.00; 5, 1.20; 6, 1.40; 8, 1.67; 10, 2.27; 12, 4.20; No. 900 Light Strap, 3, .94; 4, 1.14; 5, 1.27; 6, 1.60; 8, 2.34; 10, 3.27; 12, 5.60; Corrugated Loose, No. 935 Strap, 4, 1.45; 5, 2.00; 6, 2.75; 8, 4.25; 10, 6.50; 12, 9.85; No. 937 Tee, 4, 2.30; 5, 2.45; 6, 3.25; 8, 8.50; 10,7.80; 12, 10.90;

Butts.—241A and 24102, 2 x 2, .33; 2½ x 2½, .35; 3 x 3, .36; 3½ x 3½, .45; 4 x 4, 55; 4½ x 4½, 79; 5, 1 35. Hinges Hasps 3, 1.67; 4, 1.90; 6, 2.15; 8, 3.35.

Narrow Wrought Butts.—1, .31; 1¼, .36; 1½, .47; 1¾, .60; 2, .67; 2½, .74; 3, 1.00 3½, 1.60; 4, 2.33.

Calgary, Alta.

Weather in Alberta Stimulates Fall Plowing But Retards Seasonal Sales

CALGARY, October 19.—Everybody is delighted with the splendid summer weather Alberta has been enjoying throughout the fall, excepting the retail merchant. The slight break of last week brought some business, but the weather settled back into Indian summer again after a day or two and left nothing to sustain the expected move to cover up for winter. The spurt of last week among the jobbers is not apparent this week which means that seasonable goods are not moving out of retailers' stocks in noticeable quantity and probably will not until necessity, in the form of lower temperatures, forces fall needs into seasonable activity. From the standpoint of the man on the land, the actual producer of most of our prosperity, the absence of a weather break has freed him from expensive delays in threshing, and enabled him to get much more acreage under fall plowing than is usually the case. Future prospects for the farmer are judged to quite an extent by the amount of fall plowing done and this year should be a record. When work of this nature has to be discontinued, the retail merchant will have a more satisfied customer to deal with, and one who feels he can afford to spend a little more money than he thought necessary a month or two ago.

The most active sections of the province are the coal fields of the Crow's Nest Pass and the Drumheller section. The output has reached very large figures and coal is being shipped as far east as Northern Ontario. The miners' earning capacity under existing schedule is a large one and there seems to be every assurance of the peak output being needed to fill the demand. Operators claim that only those mines working under the most favorable conditions are able to show a profit at present prices and feel that they took a good deal the worst of the late negotiations. This of course may be questioned, but in the meantime the big pay roll is playing an important part in the general trade of the province.

Chicken shooting opened the first of the week and should bring in its usual quota of sporting requirements to the hardware man. Jobbers report sorting orders for ammunition lighter than anticipated but expect stocks will have a good run during the next two weeks. Chicken are plentiful, the northern ducks are coming down, and a few good bags of geese are reported.

Automobile accessory displays show a distinct departure from the summer tourist lines to lines of winter equipment. Jobbers report that merchants are putting their winter stock in shape to handle this business when it comes, but that general lines are slow.

Price changes for the week with few exceptions have been few and unimportant; mostly of the nature of adjustments on small lines of shelf goods, and affording no indications of a general character. The outstanding advance is one of 15 cents on bar iron and mild or soft steel, which was unexpected; buyers seeming to feel that peak price had been registered with the change in early September. New prices quoted at Calgary, Edmonton and Lethbridge are as follows:

Bar iron and mild or soft steel:

	Base
Rounds and squares 3/16, ¼, 5/16	6.40
Rounds and squares ⅜ to 2 in., and flats up to and including 1 x 4	5.35
Rounds and squares over 2 in., up to and including 2¾ in., and flats over 1 x 4 up to 6 in. wide.....	5.80
Rounds and squares over 2¾ in. up to 6 in.	6.10
Band iron or steel	5.85
Sleight shoe steel	6.60

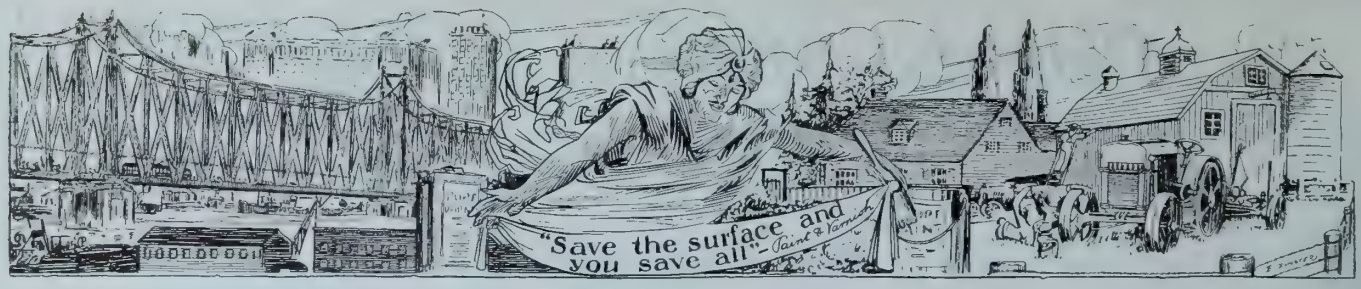
An advance on Juanita and Sweet's Toe Caulks of 35 cents per 100 lbs. is also noted; the Calgary, Edmonton and Lethbridge quotations now standing at 12.85 for medium and blunt and 13.35 for sharp.

Wrought well casing prices reflect the general stiffening of the heavy goods market with an advance of about five per cent. The hardware jobbers report this line being slower than is usual at this time of the year, while the machinery supply house who does business direct with the driller reports a fairly active demand for quick out of stock shipments. New prices issued at Calgary, Edmonton and Lethbridge are as follows. inserted joint 4¼—61.00; 5—78.75; 5⅝—97.25; 6¼—109.00 per 100 feet. Screw and socket 4¼—60.00; 5—77.75; 5⅝—96.00; 6¼—107.00 per 100 feet.

Turpentine with an advance of 10 cents a gallon struck the high peak of the year and it is felt that prices will have to go higher unless the Minneapolis market shows some tendency to ease off. Current quotations Calgary, Edmonton and Lethbridge are 2.25 in barrels and 2.35 in less than barrels.

A number of minor changes in the automobile accessory lines are noticed. Cork gaskets show quite a substantial reduction. The following revision on badger jacks represents a slight decline: No. 1—3.15; No. 3—4.00; No. 4—4.00; No. 5—7.32; No. .... —5.45; No. 6—4.18; No. 55—14.50; No. 300—1.60; No. 200—1.40; No. 600—1.47. The Mayhew lines of tools are also reduced; Critcheley type reamers sell at list less 5 per cent.; while other mechanics' tools are list less 10 per cent.

Pittsburg, U. S. A.



Period of Price Readjustment Now Evident Throughout Steel Industry

PITTSBURG, October 19.—Prices in the iron and steel industry have entered into a period of readjustment. A week ago, coke began declining sharply and pig iron is now in the act of declining, although it has gone down but little as yet. There has been practically no decline in steel prices, merely a softening in the undertone.

Occasion for readjustment is furnished by the ending of the coal strike, making production of coal, coke, pig iron and steel easier, and probably also by the existence of stocks of steel of considerable size in the hands of buyers, who anticipated more of a shortage in deliveries by the coal strike and the subsequent transportation disability than has actually occurred.

There is no definite evidence that readjustment is influenced by any unfavorable change in the general volume of industrial activity. No decrease in general industrial activity can be observed, nor is there any definitely in prospect, except such as would naturally occur between now and the end of the year from purely seasonal influences. It may be, however, that some observers in the past few months have been over-rating the industrial activity then in progress. There has been a tenseness that should be ascribed not to the amount of work being done being extra large, but to its being difficult to do work on account of strikes and the indisposition of some workmen to work efficiently.

Small Curtailment.—Steel ingot production has now gotten back approximately to the rate of last June, the high rate of the year, and is probably slightly above that rate, which was 36,600,000 gross tons of ingots a year. The American Iron and Steel Institute reports the September production of ingots by the 30 companies that make monthly returns at 2,373,779 tons. From this it can be computed, after allowing for the producers not reporting, that the average rate of production during September by the whole industry was about 33,000,000 tons a year, against an average rate during August of 30,000,000 tons.

Pushing Paint Sundries in Fall Months

Protecting Construction Work Against Winter Weather Means Fall Sales of White Lead in Oil and Ready Mixed Paint—Montreal Merchant Also Cashes in on Sundry Paint and Varnishes for Inside Decoration During Autumn Months—New Store Makes Special Provision for Paint and Wall Paper Departments

ENTERING a hardware store at this time of year and finding the salesman actively engaged in and around the paint department leads one to believe that the store is cashing-in on Fall paint trade. Activity, meaning the unloading of fresh supplies at the rear door and customers in front of the counter in the paint department, was apparent to Hardware and Metal on a recent visit to Allard & Kingsley, Mount Royal Ave., Montreal. When asked whether this was a usual or an unusual occurrence at this season of the year, A. Kingsley, a partner of the firm, stated that they had always enjoyed a fair paint and varnish business after the summer season, but it had grown considerably in more recent years and they were hoping for a good trade during the next six weeks or two months. Last spring their sales in both paint and wall-paper had been the biggest on record and by the Fall turnover showing larger returns, this year would exceed last, or any previous year.

A factor which would greatly help them this season, and one to which they were paying special attention, was the amount of new building requiring paint before the cold winter weather set in. In their locality, as in most others throughout the city, the building program this year was exceptionally big, dwelling houses being erected on nearly every street. Many of these had already been finished and were now occupied, but there were a good many still under construction and were now at the stage where painting was being done. This would be carried out well into later fall months and when pressed for time builders would at least make certain that a priming coat was applied to protect against the severe weather following.

Calls for Sales of White Lead in Oil

This class of trade called for supplies of white lead in oil, and for a primary coat Mr. Kingsley felt he could recommend this, with a liberal mixture of linseed oil. They were selling a fair amount of ready-mixed white paint with instructions to thin well with oil, but the former products seemed preferable for this work. The chief reason for this, in Mr. Kingsley's opinion was that much of the building was contract work, and many of the older painters were very apt in mixing white lead in oil, and were convinced that it could not be beaten for a body builder.

Business was also obtained quite often through a sub-contract on priming and glazing sash. At the present time one man, and sometimes two, in the store were almost continually engaged in this work. Apart from supplying material and work, benefit was very often derived through receiving orders for other supplies required by the contracting firm.

T. PEARSON

Western manager, R. C. Jamieson & Co., Ltd., of Montreal, who, as announced in last week's issue of Hardware and Metal, has just completed over forty years' service with this company.

Sundry Lines and Wall-Paper

The sale of inside paints, varnishes, sundries and wall-paper has also reached favorable proportions at this season. "We consider the active seasons for these lines to be the usual period of nearly three months in the spring, and approximately six weeks in the fall of the year. While the male customer is interested in the outside of his home when it comes to painting, we have found the housewife is even more anxious to have the rooms of her home present a clean and attractive appearance. This question is brought home to her when the weather becomes cooler and she realizes that the family will soon be spending their evenings at home," said Mr. Kingsley.

Store Lay-out Attracts Attention

In February last the firm entered their new store on the present location, and the opportunity then presented itself to give more prominence to both the paint department and the wall-paper section. That nothing in their plans was overlooked can be easily seen by the present lay-out. Commencing near the front of the store is the paint shelving, following which is the stock of window glass, with the glass table in a handy position immediately in front. This section extends to the rear partition separating the front store from the warehouse. On an elevated floor at this point is the wall paper department, entrance to which is gained by a wide stair case in front of the glass table. On the opposite wall and facing the paint section is shelving on which a general line of paint sundries is carried, while directly to the rear of this is a separate room where oils, turpentine, varnishes

Are You Making Money In Your Paint Department

The Paint on a Pedestal

Check up your Paint sales TO-DAY. Compare them with your total investment and "cost of doing business" to ascertain how much profit your Paint Department yields you.

Maybe you will get a surprise.

If the margin of net profit is out of all proportion to your yearly investment you should discuss the cause with us—purely from a business standpoint.

We have a real message for you. One that has been responsible in very recent weeks for radically changing the Paint Department of many of our Agents from a losing proposition to a source of large profits.

Lowe Brothers PAINTS AND VARNISHES
MADE IN CANADA
SAVE THE SURFACE AND YOU SAVE ALL.

The paint department in the new store of Allard & Kingsley, Montreal, showing attractive layout with paint shelving toward the front of the store, window glass next with glass table in handy position immediately in front extending right through to the partition between store and warehouse. In this position the paint department receives much attention and the salesmen take advantage of every opportunity to talk the use of paint and varnish for protection at this season.

PUSHING SUNDRIES IN FALL

(Continued from page 46)

and bulk goods are stocked. This section of a hardware store is perhaps the hardest to keep clean, and it was for this reason that a separate room is set aside for the purpose.

The imposing appearance of the wallpaper department is really the feature of the store. A customer may see at first glance when entering that nothing has been left undone for convenience. Chairs are placed around an attractive-looking rug in the middle of the floor, and from these a full view of samples and stock is afforded. The samples are displayed on hinged panels in front of the stock bins, each panel papered on both sides with price and bin-number in plain figures. Although a wide range of patterns is carried in stock they are easily sampled in this way without hiding the stock in rear, or inconveniencing the salesman in getting the goods after the sale is made. Patterns too are sorted in a way which lends an artistic appearance, besides helping both customer and salesman in making a selection. "This department has steadily grown year after year, and we have necessarily had to increase our selections to meet demand. However, our entire stock now does not take up as much room as it did when we were displaying only half as many samples," stated Mr. Kingsley.

Winnipeg Hardwaremen Form New "Save the Surface" Association

AT A meeting recently held in Winnipeg about fifty hardware dealers and salesmen formed a Winnipeg Save the Surface Association.

The point in connection with this association is that it will combine the retail paint dealers and salesmen along with manufacturers and their salesmen. The association have realized that paint manufacturers in Canada look upon the merchant as the last link in the chain in selling paints.

The association was formed as hardwaremen and salesmen realize that in selling customers paints and varnishes a better knowledge of same by themselves would be to their interest.

The following executives were appointed from two paint manufacturers, two retail hardware dealers and two hardware salesmen.

John Drewe of the Winnipeg Paint & Glass Company, was elected chairman.

N. E. Horton of the Glidden Company, and D. McIver of the G. F. Stephens Company, represent paint manufacturers.

Retail hardware merchants are represented by W. A. Templeton and C. C. Falconer.

Retail paint salesmen are represented by J. W. Black and J. Coplett.

John Drewe gave a short talk on paint troubles. It is the intention of the newly formed association to have addresses that will be of an educative nature and meetings will be held once or twice every three weeks.

A suggestion was made that every salesman who met with any difficulties in regard to selling paints should write same down and at the next meeting it will be discussed thoroughly by all the members.

Several leading paint and brush experts will address the Winnipeg Save the Surface Association during the coming months.

ENTERTAINS TORONTO PAINT MEN AT GOLF

F. J. Penberthy, vice-president and managing-director Lowe Bros. Ltd., entertained the members of the Toronto Paint, Oil and Varnish Club at the Lakeview Golf Club last Wednesday afternoon. Out-of-town guests on this occasion were, R. Scarfe, of Brantford, and W. Chatfield of New York City.

Lac Shades

Do we Walk on the Floor or The Finish?

Why the finish of course, if it is a finish that is made to "rough it."

If as a finish it does not contain the necessary hard-wearing, long life qualities, it is only a matter of a short time before the **floor** gets the "roughing" and clearly shows it.

FLOGLAZE LAC SHADES have been designed to give maximum wearing service while at the same time producing a lustre not obtainable with other floor finishes.

What is true of a floor finish is doubly true when applied to furniture, stairs, cabinets, etc., because the uses of FLOGLAZE LAC SHADES are universal in scope.

Let us show you what the "just a little better quality" means to your paint department.

Our dealers' booklet "A Guide to Larger Profits" describes FLOGLAZE LAC SHADES fully.

Weekly Paint Markets

Montreal

MONTREAL, October 19.—The feature of the paint markets this week is the further increase in turpentine prices of ten cents per gallon, thus bringing present price levels well up to the two-dollar mark. This product in primary circles continues in a strong position, and some local distributors are of the opinion that still higher prices will be quoted before any recession is noted. Stocks in the south are only sufficient to take care of present requirements, and demand will in all probability continue good during the following months.

Linseed oil quotations are again unchanged and there is still a firm tendency in the seed market. There is a feeling however among certain crushers that when shipments from the northwest increase to normal, seed values will be due for a drop as prevailing levels are considered high in view of the new crop now being marketed. The shellac market is again unsettled, although local quotations remain unchanged, notwithstanding lower prices on other domestic markets. This market in primary circles was reported as somewhat improved during the past few weeks, but is again unsettled owing to recent heavy arrivals to this side.

TRANSPORTATION STILL BIG FACTOR IN LINSEED OIL

Montreal.

Linseed oil quotations are again unchanged with a fairly firm undertone in the market. Flax-seed prices continue to hover around the new higher levels with little indication at the present time of any break to lower values. In some quarters however, present price levels on seed are considered high in view of the new crop which is now being marketed. Although statistics show that seed available for the coming months will not be in as great a volume as in other past years, it is felt that transportation difficulties are playing no small part in the market situation to-day and are a great factor in maintaining present values. When shipments again become normal a recession in the market is looked for by some. Unchanged oil prices are the following:

LINSEED OIL—

	Raw	Boiled
1 to 2 bbl. lots, per gal.	1 02	1 04
5 to 8 bbl. lots, per gal.	1 00	1 02

Less quantities, add ten cents per gallon.

ANOTHER TEN CENT ADVANCE IN TURPENTINE PRICES

Montreal.

The turpentine market is still on its upward climb, a further increase of ten cents per gallon being recorded this week. There is a variation of five cents per gallon among local distributors, but it is noted that the advance is generally quoted. Southern markets continued to move upwards during the week with buying active, although purchasers are still conservative in their orders. The position of this product in primary centres is strong, and with demand continuing good and fresh receipts only ample to meet immediate requirements, a firm outlook for the following weeks is given. Local importers anticipate no recession from present levels and still higher prices would not be surprising to some well informed. Revised quotations are as follows:

TURPENTINE—

1 barrel lots	1 90	1 95
2 to 4 barrel lots, per gal.	1 88	1 93
Broken lots	2 00	2 05

LOWER SHELLAC PRICES AT AN EARLY DATE

Montreal.

While the shellac market has been described in the past few weeks as somewhat improved, there is an unsettled feeling again evident on the local market, with the situation in primary circles also unsteady. Reports indicate that heavy arrivals have reached this side and this has caused the easier tendency. Locally, quotations for the present remain unchanged, but although certain firms anticipate little if any change in prices, other firms announce that new lower levels will in all probability be reached within the next few days. The probable extent of any such decline could not be ascertained at time of going to press, but an appreciable reduction would not be surprising. From present indications the local market will assume an unsettled state, and a wide range in quotations seems likely in the immediate future.

SHELLAC—	White	Orange
In barrels	510	4 60
5 gallon jugs	5 25	4 75
1 gallon jugs	5 40	4 90

SOMEWHAT LESS ACTIVITY IN PAINT AND VARNISH

Montreal.

Paint and varnish manufacturers still report a fair movement of their lines, although current trade is not as active as it was in previous weeks. The season is now advancing, and from a manufacturer's point of view little further activity is looked for until next season's business is anticipated a little later in the year. The market tone for all products remain on a very steady basis, the recent stronger tendency in pig lead prices assisting in this direction. The undertone of white lead in oil is also firm and opinions are again expressed that in all probability prices will remain steady for the balance of the season.

Toronto

TORONTO, October 19.—The feature of this week's paint markets is the establishment of a new high price for the season on turpentine. Following the advance of ten cents per gallon, briefly recorded in last week's issue of Hardware and Metal, another increase of a similar amount is announced, which brings the price in many quarters to $2.20 per gallon. Other distributors are still quoting price several cents below this level, but the opinion is expressed that under the existing tone of southern supply centres, domestic quotations will retain this strength for some time. Locally, buying has been done only in small lots as immediate requirements warrant for some time past, and this policy is evidently still being continued. In spite of this factor, however, the product remains scarce, both in domestic and primary markets. Stocks in the south are described as only sufficient to care for present needs, the heavier call from Europe, due to the shortage of French turpentine, being a premier factor in the current situation.

Linseed oil locally attained slightly higher levels the latter part of last week, but a mixed viewpoint prevails as to the probable future trend. In some quarters, the expression is noted that the supply of flax seed is not of any extensive volume and therefore prices on oil should remain steady to firm. On the other hand, it is pointed out that the transportation of seed is the element providing the existing strength, and when flax seed becomes available in larger quantities, quotations may lose some of their present firmness.

"GOING UP" DESCRIBES TURPENTINE PRICE TREND

Toronto.

Owing to the small amount of stocks on hand, turpentine in practically all

TORONTO PAINT MARKETS

(Continued from page 50)

centres continues with a very strong undertone. Prices on both primary and domestic markets rule firm, with quotations at production centres still climbing. The local level was advanced another ten cents per gallon this week, following the rise at the end of last week, as recorded briefly in Hardware and Metal. This development brings the highest local quotation to $2.20 per gallon in one barrel lots, a new high mark for the season. Recent reports appearing in these columns described the prospect for future prices as containing strong possibilities of further advances owing to the general scarcity of the product, and therefore the current movement in this direction was not surprising from this viewpoint. While the current requirements are not considered large, yet distributors claim that existing conditions provide no opportunty to lay in stocks, which will be needed during the ensuing winter period when the flow at production areas will have ceased. The statistical position of the market in general is therefore regarded as very strong. The southern markets are again higher, current sales being in excess of fresh receipts. There is also reported a fairly active demand, a good amount of export business also being put through.

TURPENTINE—		
1 barrel lots	2 00	2 20
2 to 4 barrel lots	1 99	2 19
5 gallon lots	2 15	2 35

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

LINSEED PRICE ALSO TRIES CLIMBING UP

Toronto.

The linseed oil market is still doing the "elevator act," prices going up and down with more or less regularity. The general result of these devolpments, however, places current quotations on a slightly higher level, the average tendency during the last week or two having been in an upward direction. As briefly reported in last week's issue of Hardware and Metal, an advance of five cents per gallon was put into effect locally, this revision bringing average quotations on raw to $1.10 per gallon, and on boiled to $1.13, in one or two barrel lots.

Varnish makers, linoleum and paint manufacturers are described as interested in the market, with activity in this direction, combined with the steadier trend of flax seed prices, being responsible for the improved position of oil. The transportation of flax seed is still assuming more than usual importance, owing to the fact that available shipping and transportation facilities are required at this season for the heavy grain shipments.

LINSEED OIL—	Per Gallon Raw	Boiled
1 to 2 barrels	1 10	1 13
3 to 4 barrels	1 09	1 12
6 to 9 barrels	1 07	1 10

Less barrels, 15 cents per gallon.

STILL FURTHER RISE PENDING ON TURPENTINE

Toronto

Just as Hardware and Metal goes to press, still another advance is reported pending in turpentine prices. The new high mark attained earlier this week of $2.20 per gallon, will, it is stated, be increased five cents per gallon, bringing the season's record quotations to $2.25 per gallon in barrel lots. It is even suggested that this additional advance may be ten cents, according to the rising trend of southern supply markets.

STRONGER TONE NOTED IN RESIN MARKETS

Toronto.

That resin prices are now generally considered on a strengthening market was the opinion expressed in distributing circles this week. The prices in one instance have been advanced fifty cents per cask of 280 lbs., which development reflects the firm tendency at present evident in primary markets. Current average prices on resin follow:

RESIN—	
G., medium grade	4 50
Water White	5 50

SPREAD EVIDENT IN CURRENT SHELLAC PRICES

Toronto.

The shellac market is still more or less erratic, although hopes of future improvement in this direction are contained in some quarters. The local prices record a wide range for this particular product, a spread of as much as fifty cents per gallon being noted in certain instances. The quotations given below are described as representative of the average level, although other distributors are evidently maintaining higher quotations, in the expectation that primary markets will regain strength and evidently hope that such an improvement be recorded on domestic centres during the ensuing weeks. Existing quotations are looked upon as comparatively low in most cases.

SHELLAC—	White	Orange
In barrels	4 60	4 10
One gallon jugs	5 95	4 45

SATISFYING MOVEMENT IN PAINTS AND VARNISHES

Toronto.

A genuine fall movement in paint products generally is still evident. Brisk activity is recorded all along the line, ready-mixed house paint, flat wall colors, varnishes and enamels, all being noticeably popular at this season. The general undertone to the market continues very firm, the recent higher levels on lead contributing to the current strength of raw materials. Existing prices remain in effect on paint lines, with orders for spring delivery being accepted on the basis of present quotations with April 1, 1923, dating.

Sherwin-Williams Co. Annual Sales Convention

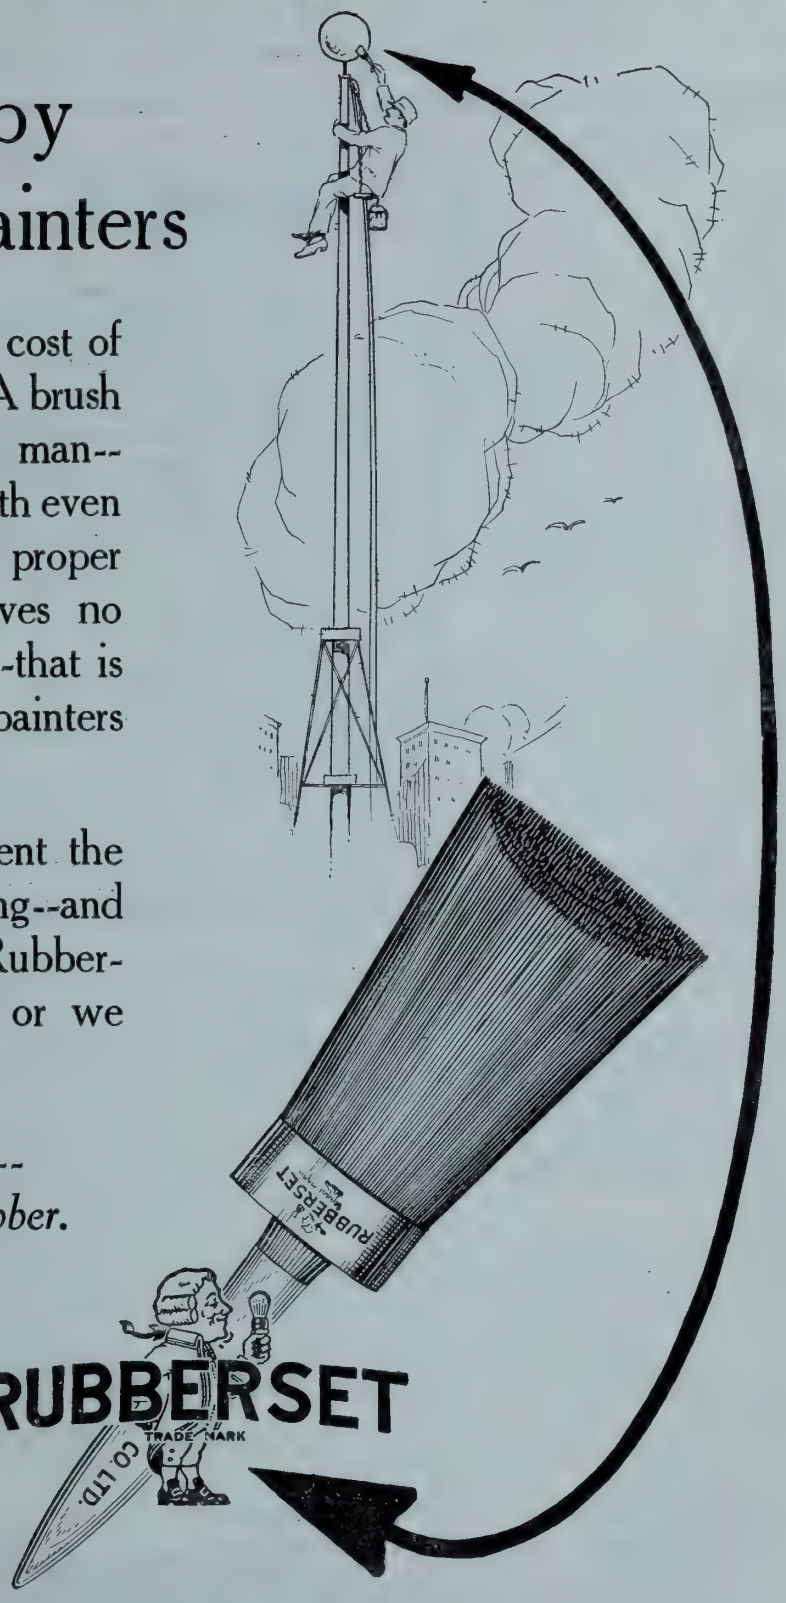
MONTREAL.—The annual sales convention of the Sherwin-Williams Co., was held in this city on Tuesday, Wednesday and Thursday of this week. The gathering was attended by district sales managers and representatives from Fort William to the Atlantic coast, including Newfoundland, as well as executives and the staff of the head office here. Sessions were held in the convention hall of the company, which was suitably decorated.

W. S. Fallis, vice-president and managing director of the organization, opened the convention, extending a hearty welcome. He also referred to the satisfactory results of the year's operations as being indicative of increased prosperity of business in general, and promising of greater activity to come. Mr. Fallis presented the special awards and money prizes to sales representatives, G. W. H. Wylie of Montreal winning first prize, and Henry Hill of Nova Scotia the second prize.

Wednesday and Thursday were devoted to regular sessions. The convention was brought to a close on Thursday evening, Oct. 19, when the gathering were guests of the company at a theatre party in the Princess theatre, followed by a supper at the Windsor hotel. This latter event was made the occasion of the presentation of gold watches to two members of the staff who this year completed their twenty-fifth year of service with the company. The recipients were J. H. Gordon, secretary-treasurer, and Jas. Senior, one of the factory foremen. In addition, the Montreal office staff presented Mr. Gordon with a sapphire and diamond stick pin in commemoration of the event.

Martin-Senour Hold Annual Convention

The Ontario sales force of the Martin-Senour Co. gathered in the Toronto offices of the company for their annual convention on Friday of last week, and were welcomed by general manager, J. H. Conover, and other executives who journeyed from Montreal for the occasion. Sessions were held both morning and afternoon, and during these records of the past year were reviewed, which showed that encouraging progress had been made during 1922. Reports from each salesman were presented, and with regard to prospects for the coming year there was an unanimous opinion that 1923 could be looked to with confidence.



An interesting feature of the program was the banquet held in the King Edward Hotel in the evening, presided over by the general manager. Prizes were awarded the various winners and Mr. Conover congratulated the recipients on the showing they had made, the sales total reaching figures only possible through greater efforts on their part.

Specified by Experienced Painters

A LARGE part of the cost of "painting" is labor. A brush that co-operates with a man--that spreads paint in smooth even swathes--that has just the proper life and action to it--leaves no hairs or streaks behind it--that is the brush that careful painters like--and **buy.**

Rubberset brushes represent the highest art of brushmaking--and are fully guaranteed--"Rubberset Brushes make good or we will."

O.P.W.

To the unthinking, a paint is valued at its cost per gallon. To those who can see a little further a paint is valued not by the gallon but by the cost per square yard or the finished job. Those who go further look into the durability of the paint, and realize that the paint that puts off for the longest time the necessity of repainting is best and cheapest.

For satisfaction inside and out, a paint composed of the proper ingredients to insure greatest durability, a paint not for today, but for tomorrow, sell your customers O. P. W.

Get The Early Season Sales

THE man who makes the first window displays and shows skates prominently in his store, gets the "jump" on competitors.

He is making sales before the other stores realize the skating season is so close at hand. And at the end of the season he will have a more thorough clean-up of his stock.

Right now is none too soon to start things moving. The national advertising campaign for C. C. M. Automobile Skates starts early in November and will be creating business for live dealers right from the start.

C·C·M· Automobile Skates

Canada Cycle & Motor Co., Limited
WESTON, ONT.

Desolvo

A Time and Money-Saver

If you do plumbing in addition to your hardware business, it will pay you to keep Desolvo on hand. It will shorten your time on jobs and will make profitable sales to customers.

Desolvo just has to be mixed with cold water; it generates heat that quickly removes any stoppage from pipes. It saves tearing up floors, lawns, etc.

Order from your jobber

The Chamberlain Desolvo Co., Ltd.
35 Richmond St. E., Toronto

ONCE IS ENOUGH!

It may be a long time before the fire fiend again visits the scene of the recent disaster in Northern Ontario—but how about other sections similarly situated?

Some Roofing Material, such as wood shingles, or prepared roofing, will burn readily—other material may be in the "doubtful class" but it's an absolute certainty that

GALVANIZED IRON IS SAFE

Let every dealer resolve to sell more 100% fireproof covering and thus conserve life and property. The profit is just as good and the volume of business is constantly growing.

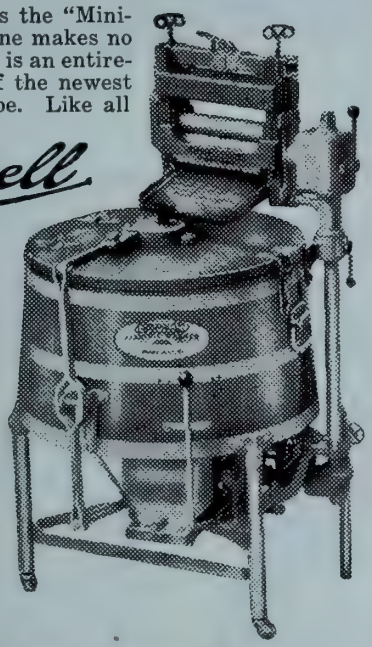
Self Lubricating Aero Clothes-line Pulleys

The deep V-shape friction groove accommodates various diameters of clothes lines. The space between the groove and guard allows knots to pass.

The weather-proofing treatment repels moisture—hence no freezing. Being of treated wood it lubricates itself—is noiseless and smooth working—there is never any rust. Made in two sizes, 2¾″ and 6″.

The price encourages sales.

THE AERO MFG. CO. Limited - Lennoxville, Que.



Western Agents: H. L. PERRY CO., LTD., Winnipeg

IT PAYS A DEALER to be sure of his goods

The dealer who stocks the "Minimax" Washing Machine makes no error in judgment. It is an entirely reliable machine of the newest wing design, dolly type. Like all

Maxwell

Products, it embodies the most approved modern features—quiet action, compactness, a swinging, reversible, quick-release wringer, and adjustable "4th" leg for uneven floors and draining. The sheerest and the weightiest fabrics are washed by the "Minimax" with equal success.

TWO BEST SELLERS

PATENTED IN CANADA

Better Selling Value Than Ever

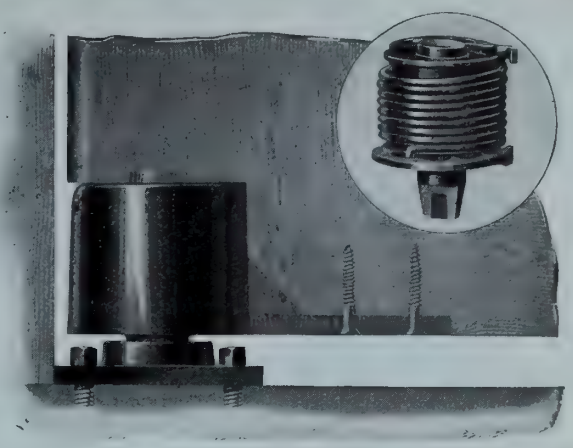
We have equipped our Steel Baths with **Pressed Steel Removable Legs** and 3 inch **Roll Rim** around the top, for which we have secured a Canadian Patent. This **Roll Rim** adds greatly to the selling value of

TWEED ENAMELLED STEEL BATHS

They now look like the expensive cast enamel baths but are the **same price** as before.
Our new patent Roll Rim Enamelled Steel Baths are now ready for shipment.—Order samples.

TWEED SANITARY CHEMICAL CLOSET

Stamped out of Black Sheet Steel and is very strong, durable, attractive, and guaranteed to be absolutely sanitary, and to satisfy every user or money refunded.



Up-to-date facilities and special machinery enable us to produce these superior grade closets at a very low price.

We will help you to get started by sending you circulars, talking points and cut for local advertising.

Large stock on hand, can ship promptly. Get after Fall business.

Write for catalogue.

STEEL TROUGH & MACHINE CO., LTD., TWEED

A Hinge for Heavy Doors

Cure factory doors of hinge trouble. This No. 1,700 Matchless Floor Spring Hinge is just the thing for doors 2¼ in. and more thick. May be set at closed or 90 degree positions. Write for catalog prices and terms.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

LAIDLAW'S WIRE BOYS

Always Satisfied

Says W.N. to B.T.: "Did you ever notice the satisfied smile when a hardware man sees Laidlaw nails coming from his jobber? He knows the keg is tight, Nails right and full weight."

Bale Tie: "Well, you have nothing on me or other Laidlaw Products."

Everything in Wire and Wire Nails

THE

Laidlaw Bale Tie Co., Ltd.

Head Office and Works
HAMILTON, ONTARIO

Say "Laidlaw Products" to your jobber

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worth-while buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.
